GALILEO SPECIAL EVENT ---> Detailed information on the European Space Agency's Amateur Radio 2013 Galileo Special Event, running through 2013 to "celebrate the achievements of the Galileo satellite navigation project", can be found at https://sites.google.com/site/hamradiogalileo/home. The first activity period started on 14 March and will end on 7 April. [TNX I0WTD]

WARD AWARD ---> The WARD (World Amateur Radio Day) Award commemorates the World Amateur Radio Day celebrated by IARU on 18 April each year. The award is sponsored by MK QTC (the Polish Amateur Radio Journal) and PZK (the Polish Amateur Radio Union), and it is issued to licenced amateurs and SWLs for contacts made/heard between 00.00 and 23.59 UTC on 18 April. Details can be found at http://qtc.suchacz.eu/articles.php?article_id=5 [TNX SP2FAP]

+ SILENT KEY + Ingolf Schuster, DL4JS died on 28 March "due to a terrible accident" during the T2YY DXpedition to Tuvalu. An RTTY specialist, over the years he participated in several operations - 5K0Z, XU7AJS, 5T5DC, 6V7M, TO8YY, 9H9OB, XV4YY and HU2DX to name a few. The other two team members (Rich, DK8YY and Det, DL3ALI) will still be QRV as T2YY to honour Ingolf's memory until 4 April, but understandably their activity will only be sporadic. [TNX DL7ZZ]

20966. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-03-30 13:01:01 UTC
From: Paul Dunphy
Topic: 19749 Message: 20966

```
:Issued: 2013 Mar 30 1239 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30330
SIDC SOLAR BULLETIN 30 Mar 2013, 1219UT
SIDC FORECAST (valid from 1230UT, 30 Mar 2013 until 01 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 30 Mar 2013 10CM FLUX: 109 / AP: 018
PREDICTIONS FOR 31 Mar 2013 10CM FLUX: 115 / AP: 007
PREDICTIONS FOR 01 Apr 2013 10CM FLUX: 120 / AP: 012
COMMENT: Solar activity is expected to reach eruptive levels with risks
of C-class flares from NOAA ARs 1708 and 1710. A returning region,
(previously AR 1698) is just beginning its transit on the disk, and
might contribute as well to the slight increase in solar activity.
Geomagnetic activity is expected to be mostly quiet for the next 48
hours, with periods of unsettled conditions. Minor storms conditions
were observed on March 29 and from 00 to 06 UT on March 30. Strong
excursions (down to -10 nT) of the Bz component of the interplanetary
magnetic field were observed on March 29th, by the ACE spacecraft.

TODAY'S ESTIMATED ISN : 052, BASED ON 08 STATIONS.

PREDICTIONS FOR 02 Apr 2013 10CM FLUX: 123 / AP: 007
COMMENT: Solar activity is expected to reach eruptive levels with risks
of C class flares from NOAA AR 1708, 1710 and 1711. The past 24 hours
were quiet; the only noticeable event being a weak type II radio burst,
around 1320UT, linked to a small eruptive event (B4.8) in NOAA AR 1708,
with no obvious CME. Geomagnetic activity is expected to be quiet for
the next 48 hours.

TODAY'S ESTIMATED ISN : 061, BASED ON 13 STATIONS.

Google sez:

Note from DL1VDL [25 Mar 2013]

TO5BG is F6ASS, Pascal Dupire,
He will be again QRV in WPX SSB 2013.

I don't think they have a rhyme no reason to the numbering. I have worked: TO5A FM, TO5DX FJ, TO5FJ FJ, TO5G FY, TO5J FM, TO5RV TK,
TO5RZ FJ, TO5X FM. I don't work everyone that comes down the pike and these are mainly contest but as you can see they are all over
the place with them.

Mornin' Pete,

Seems as if the German operator has done this before. Little info given prior to the operation. However, the information (from a bunch of sources) indicates it was Guadeloupe.

In the end, it doesn't really matter 'cause I've got both FG & FM on 15 anyway. Someone also sent me a picture of what turns out to be a really nice TO5BG card that clearly states "Guadeloupe" so if I get a confirmation QSL it will be nice in my collection.

As unhappy as I am with the FCC for what they've done, my frustration with the French bureaucracy for the worldwide confusion they have caused is quadrupled. Only "good" thing about these moronic T-prefixes is that there are relatively few of them by comparison to W2s in FL and N6s in GA, MA & ME, KL7s in TX, etc., etc.

Although I haven't uploaded my QSO to LoTW yet, Don, I am unable to find any information for VK9CZ QSOs. I worked 'em at 1544 today on 15M (new band/country). Their log page is "under development" and although Club Log says they've been added, there's nothing yet there either.

Any suggestion on how I can find out if my QSO is OK? I'm sure it is but I've become one of the "I want it now" crowd! ☺

20985. W3LPL spots GONE!

Yahoo group: DX-IS (2013)
Date: 2013-04-02 18:06:57 UTC
From: VE1AL
Topic: 20985 Message: 20985

I am pleased to finally announce that, with the hands-on help of VE1BVD, my problem with W3LPL has been taken care of. VE7CC Cluster is now downloaded, the filters have been set to exclude both W3LPL and other MD spots (just in case) and I have been monitoring VE7CC through my DXbase cluster connection for more than an hour without a single W3LPL spot.

I am very, very happy and want to thank all of you who helped me get to this point of euphoria!!! :-)

Al,

The only way I found out mine was OK was to load my log into LoTW last night.

My QSO's were late yesterday afternoon and early last night, so they must have loaded them in the evening US time.

Suggest you load your log into LoTW and learn about your QSO. Sort of complicated, but sure beats Box 88, Moscow!!

I'll do what Iain suggested, Don, 'cause I can wait a day or two. I'm rock solid with the QSO, I just wanted to pull a few chains about instant gratification.

I actually thought a courier would arrive at my door with a hand-delivered QSL about an hour after the contact. ☺

An unusual QSO a little while ago with IS0GQX.

Our last QSO was on 30M at 2240Z on April 2, 2012. Today's contact was close to the same QRG then and was logged at 2238Z.

We've made a date to meet again next year, same time, place and date! :-)

You think you have problems! He's only 800 feet away from me, and I can hear

him moaning in my shack with phones on!

You can get noise cancelling headphones that eliminate that sort of
thing. I have a pair I use for flying. It reduces jet roar, babies
crying, etc. immensely.

Google "noise cancelling headphones" . . . it may be your solution. :-)

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30403
SIDC SOLAR BULLETIN 03 Apr 2013, 1227UT
SIDC FORECAST (valid from 1230UT, 03 Apr 2013 until 05 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 03 Apr 2013 10CM FLUX: 122 / AP: 003
PREDICTIONS FOR 04 Apr 2013 10CM FLUX: 122 / AP: 019
PREDICTIONS FOR 05 Apr 2013 10CM FLUX: 123 / AP: 015
COMMENT: Solar activity has been eruptive during the past 24 hours,
with two C flares produced by NOAA AR 11708, the brightest one being a
C2.7 flare peaking around 09:43 UT on April 3. More C flares are
expected within the next 48 hours, with a slight chance for an M flare,
especially from NOAA AR 11708 in which flux and sunspots are currently
emerging. Geomagnetic activity was at quiet levels (K Dourbes between 0
and 3; NOAA Kp between 0 and 2) during the past 24 hours. Quiet (K
Dourbes < 4) to active (K Dourbes = 4) conditions are predicted for
April 3 to 5 due to an expected gradual rise in solar wind speed as a
result of a coronal hole high-speed stream passing by.

TODAY'S ESTIMATED ISN : 068, BASED ON 13 STATIONS.

SOLAR INDICES FOR 2 Apr 2013
WOLF NUMBER CATANIA : ///
10CM SOLAR FLUX : 122

That's just great, Iain. I'm good, knowing my 15M QSO is OK. To be honest, I had QRM from some guy calling on the frequency and honestly only caught "AL" out of the contact.

Heard them for a moment or two on 10 today but I had to leave and have not heard them since. See them spotted on 17 SSB but nary a peep here.

Date: 2013-04-04 03:43:26 UTC
From: Buzz Jehle
Topic: 20993 Message: 21005

My 1978 QSL from FB8ZM says Ile Saint Paul et Amsterdam, but does anyone remember which island the operation was from? Most FT/Z cards say Amsterdam Island, but some say both. None say St Paul only that I could find. Just wondering if St Paul has been activated?

Thanks, Buzz N5UR

21006. RE: [DX-IS] FT5/Z

PREDICTIONS FOR 04 Apr 2013 10CM FLUX: 130 / AP: 009
PREDICTIONS FOR 05 Apr 2013 10CM FLUX: 130 / AP: 022
PREDICTIONS FOR 06 Apr 2013 10CM FLUX: 130 / AP: 011
COMMENT: Solar activity has been eruptive during the past 24 hours,
with two C flares produced by NOAA AR 11711 and NOAA AR 11713. The
brightest one was a C1.7 flare peaking around 18:45 UT on April 3, and
was released by NOAA AR 11711. More C flares are expected within the
next 48 hours, with a slight chance for an M flare, especially from NOAA
AR 11713. A large filament, centered near N30W60 erupted around 6h UT on
April 4. Further analysis is required to determine whether an
Earth-directed CME was associated with this event. Geomagnetic activity
was at quiet levels (NOAA Kp between 1 and 2) during the past 24 hours.
Quiet (K Dourbes < 4) to active (K Dourbes = 4) conditions are predicted
for April 4 to 6 due to an expected gradual rise in solar wind speed as
a result of a coronal hole high-speed stream passing by. A sector
boundary crossing from negative to positive is anticipated for April 5.

That's the problem Al! The coordinates on the QSL are not on land! They are in open sea to the north of the two islands. Could be just poor records from the olden days. The WX station is on Amsterdam, so I suspect he was there. Does not appear to be any settlement on St Paul anymore. Just checking out my QSLs to see what bands I need the new operation on, 160 12 and 6 so gonna be tough for both of us at the antipodes.

Even Crozet has multiple Islands, but most QSLs were designed for DXCC only with no thought to the actual island. Such is the case for many QSLs from the 80s and older, makes IOTA and local island awards a real problem.

Good Luck, going to work on my 80 xmit antenna today, wouldn't load after the 60 mph winds and storm of past two days.

You saved me from looking up the coordinates myself, Buzz. Agreed, back in the "olden days" we were far more concerned with DXCC countries and not actual locations. A search through all my FB8 cards indicates the same thing.

Nonetheless, I will be in there for the FT/Z operation, also looking for band fills.

Still way too cold for me to attempt any antenna work. I've become a wimp and refuse to work at 32°F. ☺

Antennas never work right unless they are put up when it is under 32F. Some freezing rain and snow during installation makes them perform even better.

My 1978 QSL from FB8ZM says Ile Saint Paul et Amsterdam, but does anyone remember which island the operation was from? Most FT/Z cards say Amsterdam Island, but some say both. None say St Paul only that I could find. Just wondering if St Paul has been activated?

Thanks, Buzz N5UR

My FB8ZO card has Martin de Vivies on it. That's the settlement
on Amsterdam Island. So does my FB8ZM card.

☐

Antennas never work right unless they are put up when it is under 32F. Some freezing rain and snow during installation makes them perform even better.

You saved me from looking up the coordinates myself, Buzz. Agreed, back in the "olden days" we were far more concerned with DXCC countries and not actual locations. A search through all my FB8 cards indicates the same thing.

Nonetheless, I will be in there for the FT/Z operation, also looking for band fills.

Still way too cold for me to attempt any antenna work. I've become a wimp and refuse to work at 32°F. ☺

That's the problem Al! The coordinates on the QSL are not on land! They are in open sea to the north of the two islands. Could be just poor records from the olden days. The WX station is on Amsterdam, so I suspect he was there. Does not appear to be any settlement on St Paul anymore. Just checking out my QSLs to see what bands I need the new operation on, 160 12 and 6 so gonna be tough for both of us at the antipodes.

Even Crozet has multiple Islands, but most QSLs were designed for DXCC only with no thought to the actual island. Such is the case for many QSLs from the 80s and older, makes IOTA and local island awards a real problem.

Good Luck, going to work on my 80 xmit antenna today, wouldn't load after the 60 mph winds and storm of past two days.

When I put my MA5B up in Iowa, I was on the roof the day before throwing down ice melter so it would be clear enough the next day to mount the antenna. Didn't let the XYL see that one, she thinks I am crazy enough already. The MA5B did work good, though.

ARLD014 DX news

ZCZC AE14
QST de W1AW
DX Bulletin 14 ARLD014
>From ARRL Headquarters
Newington CT April 4, 2013
To all radio amateurs

SB DX ARL ARLD014
ARLD014 DX news

This week's bulletin was made possible with information provided by N7QT, NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TANZANIA, 5H. Maurizio, IK2GZU will be QRV as 5H3MB from April 7 to May 8 while working at a local hospital and orphanage. He will be active in his spare time on the HF bands. QSL to home call.

SAMOA, 5W. A large group of operators are QRV as 5W0M until April 18. Activity is on 80 to 6 meters using CW, SSB and RTTY, with EME on 2 meters at limited times. QSL EME QSOs via DL9MS and all others via DL4SVA.

CHILE, CE. Special event station XR86PL is QRV until April 30 in commemoration of the 86th anniversary of the Chilean police, Carabineros de Chile. Activity is on all bands using SSB, RTTY and PSK. QSL via CE3ETE.

EASTER ISLAND, CE0Y. Pipe, CE3SX is QRV as XR0YX until April 11. Activity is on 6 meters only from grid DG52. QSL direct to home call.

PORTUGAL, CT. Special event station CS250CLE is QRV until the end of 2013 to celebrate the jubilee of the construction 250 years ago of the Torre dos Clerigos bell tower in Porto. QSL via CS5RPT.

FEDERAL REPUBLIC OF GERMANY, DA. Special event station DP50IPAHB is QRV until the end of 2013 in commemoration of the close association between IPA and amateur radio in Bremen during the last 50 years. QSL via bureau.

ST. LUCIA, J6. Rob, N7QT is QRV as J6/N7QT and Frans, J69DS is also QRV from Babonneau until April 16. Activity is on 80 to 10 meters

using CW, SSB and either RTTY or PSK. They will also be singing /P from various locations on the island. QSL J6/N7QT to home call and J69DS direct.

SEYCHELLES, S7. Nobby, G0VJG is QRV as S79VJG from the Chalets Anse Forbans, Mahe Island, IOTA AF-024, until April 16. Activity is on the HF bands using SSB. QSL direct via G4DFI.

SUDAN, ST. Mario, CT1FTR is QRV as ST2FT from Khartoum until June. Activity is on the HF bands. QSL to home call.

GREECE, SV. Special event station SV2013ATGM is QRV until April 21 during the 8th International Alexander The Great Marathon. QSL direct via SZ2TSL.

BELIZE, V3. Ismael, XE1AY and Enrique, XE2AA will be QRV as V31MV and V32EE, respectively, along with Hernan, V31HU from Twin Cays from April 6 to 12. Activity will be on all HF bands including 6 meters. QSL all calls via IT9EJW.

MICRONESIA, V6. Haru, JA1XGI is QRV as V63XG from Pohnpei Island, IOTA OC-010, until April 11. Activity is on 160 to 6 meters using CW, SSB, RTTY and JT65. QSL to home call.

VIET NAM, XV. Irek, SP3SUX will be QRV as XV4Y from Can Tho during the SP DX contest. QSL via operator's instructions.

ROMANIA, YO. Special event station YP20ARER is QRV until the end of 2013 in commemoration of 20 years of the Association of Romanian Amateur Environmentalists. QSL via YO6CUF.

THIS WEEKEND ON THE RADIO. The LZ Open 40-Meter CW Sprint Contest, PODXS 070 Club PSK 31 Flavors Contest, QRP ARCI Spring CW QSO Party, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, SP DX Contest, EA RTTY Contest, Missouri QSO Party, Texas State Parks on the Air and the RSGB RoPoCo SSB event are all on tap for this weekend. The NAQCC Straight Key/Bug CW Sprint, CWops Mini-CWT Test and RSGB 80-Meter Club SSB Championship are all scheduled for April 10. Please see April QST, page 84, and the ARRL and WA7BNM Contest websites for details.

VK9CZ was building quite nicely on 24896 around 1230Z when my phone rang.
I answered it, watching the S-meter while on the phone and when I hung up,
there he was -- GONE!

Blasted phone!!! :-)

Simple solution:
?
Don't answer the phone.
?
Remember:? The telephone is there for your convenience.? So if it's inconvenient, don't answer it.
?
If?the matter really is?important, someone will either leave a message or call back.?
?

I had a similar story with BS7H. I worked the group that didn't count (Scaffold Reef). I missed the next group because I on business in Dubai.

Around 15 years ago, BS7H was on 20 mtrs with a healthy signal and while the Alpha was warming (I was calling barefoot anyway) I got a call from Dubai. The same person I was visiting during the second trip.

15 minutes later when I was done there was no signal.

I learned later that day they had to QRT because of a political issue between the Chinese and Philippines.

Well, it became the only thing I needed for a decade. I was convinced Saeed would call me every time I tried to work them, but luckily he didn't (I would have answered the phone!!!).

There is always a next time.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30405
SIDC SOLAR BULLETIN 05 Apr 2013, 1215UT
SIDC FORECAST (valid from 1230UT, 05 Apr 2013 until 07 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 05 Apr 2013 10CM FLUX: 132 / AP: 003
PREDICTIONS FOR 06 Apr 2013 10CM FLUX: 133 / AP: 007
PREDICTIONS FOR 07 Apr 2013 10CM FLUX: 133 / AP: 007
COMMENT: Solar activity has been eruptive during the past 24 hours,
with a C2.1 flare produced by returning NOAA AR 11695 on the East limb,
which peaked around 06:50 UT on April 5. More C flares are expected
within the next 48 hours, with a slight chance for an M flare,
especially from NOAA AR 11695 and 11713. A filament centered close to
25S45W erupted around 22:12 UT on April 4. The corresponding CME was
observed in LASCO C2 and COR2 A imagery, but is not expected to arrive
at Earth. Geomagnetic activity was at quiet levels (NOAA Kp between 0
and 1) during the past 24 hours. Quiet (K Dourbes < 4) conditions are
predicted for April 4 to 6 with a slight chance for active periods.

TODAY'S ESTIMATED ISN : 078, BASED ON 05 STATIONS.

Sent: Friday, April 05, 2013 10:07 AM
To: DX-IS@yahoogroups.com
Subject: Re: [DX-IS] Woe is me

Simple solution:

Don't answer the phone.

Remember: The telephone is there for your convenience. So if it's inconvenient, don't answer it.

If the matter really is important, someone will either leave a message or call back.

From: jjreisert@...
Topic: 3232 Message: 21025

SB PROP @ ARL $ARLP014
ARLP014 Propagation de K7RA

ZCZC AP14
QST de W1AW
Propagation Forecast Bulletin 14 ARLP014
>From Tad Cook, K7RA
Seattle, WA April 5, 2013
To all radio amateurs

SB PROP ARL ARLP014
ARLP014 Propagation de K7RA

Solar activity increased over the past week, with average daily sunspot numbers up 32 points to 81.6, and average daily solar flux increasing more than 16 points to 113.4. The geomagnetic field was active on March 29, due to solar wind.

The predicted solar flux is 130 on April 5-7, 125, 115 and 110 on April 8-10, 105 on April 11-12, 120 on April 13-14, 115 on April 15, 110 on April 16-17, 105 on April 18-19, 100 on April 20-21, 105 on April 22 and 110 on April 23-24.

The predicted planetary A index is 5 on April 5, 8 on April 6, 5 on April 7-9, 8 on April 10-12, 5 on April 13-22, then 12, 8, 18 and 15 on April 23-26, 5 on April 27-29, and 8 on April 30 through May 4.

OK1HH predicts the geomagnetic field will be mostly quiet April 5, quiet to active April 6, quiet to unsettled April 7, mostly quiet April 8-9, quiet April 10, quiet to unsettled April 11-12, quiet to active April 13-14, mostly quiet April 15, active to disturbed April 16-17, mostly quiet April 18-19, quiet April 20-22, active to disturbed April 23, quiet to unsettled April 24, quiet to active April 25, quiet to unsettled April 26, and mostly quiet April 27.

Our three month moving average of sunspot numbers for January through March was 80.7. To review recent numbers, the three-month moving average of sunspot numbers centered on January, 2012 through February, 2013 were 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9, 81.2, 82.3, 74.4, 82.8, 73.6, and 80.7.

NBC ran an interesting report this week about modeling of the Sun's interior on a supercomputer. Read it at,
http://science.nbcnews.com/_news/2013/04/04/17603918-suns-magnetic-heartbeat-is-discovered
.

Jon Jones, N0JK reports: "I was in Hawaii during the weekend the CME impact March 17 mentioned by Bill, W3XO occurred. There was no significant VHF enhancement from the CME and geomagnetic propagation that day. If anything, conditions seemed worse on 6 meters. The day before the KH9 Wake Island beacon, H4 and 3D2 were in for hours.

"A day after the geomagnetic field started to settle down, propagation picked up. On March 22 the KH9/WA2YUN/b was in again for about 5 hours, and I worked stations in Australia and FK8CP on TEP around 0545 UTC. I was heard by BV2DQ in Taiwan. The KH9 beacon was back almost every evening until we left for home on March 23."

Jim Smith, K3RTU sent in another report from the field, working DX from his backpack-based radio. He writes, "Last emailed you on 2/25/2013 after working EA8BVP in the Canary Islands, with both of us running QRP. I had been operating from Ridley Creek State Park in FM29 (southeast PA). Since then I have made a number of good contacts from the same location, but yesterday April 3 I hit the jackpot on 17 meters. From 2045 UTC until 2124 UTC I worked the following stations using CW: R7AY and SV2JAO, then worked the following stations using SSB: S57DX, W7FE and IK4GRO. Both R7AY and SV2JAO gave me 559 reports and got a 5x6 from S57DX, 5x4 from IK4GRO, but W7FE could barely hear me. I was using my FT-817 and Buddistick again. To say the least, 17 meters was red hot but not the weather in FM29. Had to finally pack everything up into my backpack and head back to the car, which was a mile away, because of the mid 40s temperature and wind chill that made it feel like 30. It's hard to send CW when your fingers are stiff from the cold!"

Jim mentioned working W7FE, who is in Henderson, Nevada. Check out the W7FE page at http://www.qrz.com/db/W7FE to see what's inside the little building behind his house.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for March 28 through April 3 were 49, 73, 70, 83, 84, 103, and 109, with a mean of 81.6. 10.7 cm flux was 98.7, 105.1, 108.4, 113.3, 119.1, 122.1, and 127, with a mean of 113.4. Estimated

planetary A indices were 9, 23, 17, 4, 6, 4, and 3, with a mean of 9.4. Estimated mid-latitude A indices were 10, 19, 12, 3, 6, 4, and 3, with a mean of 8.1.

Is VK9CZ a brand new one for you or a bandfill - that was my curiosity.
I've skipped many a bandfill - but NEVER a NEW country <g>
BTW I heard them for the 1st time today on 17 - tough copy with the
echoing note added to the lids and weak sig strength.
Just 20 points on the solar number and they magically appear.
Good luck to us all Al

From: VE1AL
Topic: 21018 Message: 21027

No, I've had VK9C confirmed several times (one such QSO was with VK6DU when he visited Cocos-Keeling) but the newest operation is new for me on 15M SSB/CW. My earlier QSOs are on 20 SSB/CW and 30M. I also heard them on 12 today (of course) and later on 17M but today's numbers don't look like I'll make a QSO from here today. Lots of time left!

And yes, had it been a new country (could only have been P5), the phone would never have been answered!!!

Doesn't look like P5 is going to happen in the near future. Sure hope I can hang in until it does -- or it is blown off the face of the earth and deleted. Whichever comes first. ☺

21028. 425 DX News - #1144

Yahoo group: DX-IS (2013)
Date: 2013-04-05 17:21:09 UTC
From: r_brothers
Topic: 21028 Message: 21028

06 April 2013 A.R.I. DX Bulletin
No 1144
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2 - Wes, ZL3TE will be active as 3D2SE from Fiji on 12-16 April. He will operate mainly CW with some digital modes, and will take part in the Japan International DX Contest (from 7 UTC on 13 April to 13 UTC on the 14th). QSL via home call and LoTW. [TNX W1AW]
CE - Special event call XR86PL will be in use on all bands and modes until 30 April to commemorate the 86th anniversary of Carabineros de Chile, the uniformed Chilean national police force and gendarmerie. QSL via CE3ETE. [TNX XQ7UP]
CT - CR5IARU is the special callsign for the Rede dos Emissores Portugueses, Portugal's national IARU society, to celebrate World Amateur Radio Day. Look for activity on all bands from 13 to 19 April. QSL via CT1REP (bureau or direct) and logsearch on Club Log.
DL - Helmut, DL5BUT will be active as DL5BUT/p from Ruegen Island (EU-057) on 6-17 April. He will operate CW, SSB and digital modes on 160, 80, 40 and 20 metres. QSL via home call, direct or bureau. [TNX DX Newsletter]
DL - DB5BZ, DJ4RU, DK7LV, DL1BGC, DL2VFR, DL4BBH and DL7UXG will operate SSB and CW on all bands as DM50IOTA from Neuwerk Island (EU-127) on 12-14 April. QSL via bureau or direct to DL2VFR. [TNX rsgbiota.org]
DU - Dindo, DV1UD has received the DX8DX license for his operations from the islands of Bongao (OC-174), Tawi Tawi (OC-174) and Taganak (OC-225) [425DXN 1142]. The license is valid from 2 April through 31 May. Now he expects to be active from Bongao and Tawi Tawi for about one week around the third week of April, and then to move to Taganak. He plans to operate CW (preferred mode) and SSB on 80-10 metres with 100 watts to a vertical. QSL via M0OXO. Bookmark www.m0oxo.com/dx8dx.html for updates.
F - Gil, F4FET (http://f4fet.webs.com) will be active as F4FET/p from IOTA group EU-094 for 1-2 days between 11 and 18 April, hopefully on 13 and 14 April (but actual dates will depend on local conditions). He plans to operate from Ile aux Moutons and Ile de Guiriden, with activity focussed on 10, 15, 17 and 20m.
F - Members of the Charente DX Group (namely F5LOW, F5MNK, F6ANA, F6HKA, ON4ZD) will be active as TM0SI from Ile de Sein (EU-068) from 27 April to 4 May. They will operate SSB, CW and digital

modes on 80-10 metres. All of the QSOs will be confirmed automatically via the bureau. The QSL route for direct cards is via F5LOW. Logsearch on Club Log. [TNX F5MNK]
FT5Z - An international team of 14 experienced DXpedition operators (led by K0IR and including 9V1YC, EY8MM, FM5CD, HK1R, K4UEE, K9CT, LA6VM, N4GRN, N6HC, VE3EJ, VE7CT, W6IZT and WB9Z) will be active from Amsterdam Island (AF-002) next year. The team has been granted an 18 day access to the island to occur between the dates of 15 January and 20 February 20 2014.
The team will sail from Fremantle, Australia aboard the Braveheart, and the voyage will last about 8 days. Landing must be timed according to sea conditions; this may necessitate waiting off shore until the conditions are suitable. The 18-day window includes setup and take down, but it will start when the operators step onto the island. The group plans to have eight stations on the air on 160-10 metres SSB, CW and RTTY from two different operating sites.
"This is a costly venture", as the expenses total just over USD 400,000. The International DX Association (INDEXA) and the Northern California DX Foundation (NCDXF) have already made generous contributions to this DXpedition; however the group "needs your financial support to successfully complete this major project and is asking all DX'ers to contribute what they can to make this happen". A website is under construction at www.amsterdamdx.org [TNX K0IR]
GD - Look for Angela MD/DL4DXF, Volker MD/DM5DM and Ralph MD/DL9MWG to be active from the Isle of Man (EU-116) between 6 and 13 April. They will operate CW and SSB on 160-6 metres. [TNX DX Newsletter]
HB0 - HB0/PA2HGJ, HB0/PA2HW, HB0/PA2RDK, HB0/PA3CNO, HB0/PA3DFR, HB0/PA3HK, HB0/PE0MGB and HB0/PE1FLO to be active from Liechtenstein on 13-20 April. They plan to operate CW, SSB and PSK31 on 160-10 metres. QSL via PE1FLO, direct or bureau. [TNX OPDX Bulletin]
I - Alfio IT9EJW, Salvatore IT9ELT, Sergio IW9FSG and Andrea IW9HQP plan to be active as homecall/p from Scoglio di Sant'Alessio Siculo (EU-025, IIA S-049) on 7 April (14, 21 or 18 April if weather/sea conditions are bad). The Italian Islands Award (IIA) is being revamped, please contact the Award Manager, Saverio Amore IK2RLS, for further information (ik2rls[@]ari.it).
IS0 - Luciano I3CLZ, Mauro IK3VUU, Bruno IW3HXR and Tony IZ2ESV will be active as IM0MA from Maddalena Island (EU-041) on 21-24 April. They will operate CW, SSB and digital modes on as many bands as possible. QSL via IK2DUW. [TNX IZ2ESV]
PA - Henk, PA0HFT and Gert, PA5TS will be active as PA0HFT from Terschelling Island (EU-038) on 8-14 April. QSL via PA0HFT, bureau preferred. [TNX rsgbiota.org]
SV9 - Dimis, SV9COL and others will operate as J49C until 30 June to celebrate the 100th anniversary of Crete's final annexation to the Kingdom of Greece. QSL via SV9COL (direct) and LoTW; logsearch on Club Log. [TNX SV9COL]
VK9L - Oliver, W6NV and Seppo, OH1VR will be active as VK9LT (10-14 April) and VK9/OH1VR (11-16 April) from Lord Howe Island (OC-004).

QSL via home calls. [TNX OPDX Bulletin]

CARIBBEAN TOUR ---> Rick, AI5P will be active holiday style as J75PX from Dominica (NA-101) on 6-20 April and as TO5PX from Martinique (NA-107) on 20 April-4 May. QSLs via AI5P. [TNX The Daily DX]

It is nice to see that there those that digitize their logs. Doesn't count anything for me just interesting.

Not trying to out-do you, Tim...but in recent weeks I have received LoTW confirmations for the late 60s and early 70s. It is very interesting how many are entering old logs. Perhaps I should enter old logs for the guys I manage for -- VE3AII/SU, VE6CBJ/SU, ZK2DD, ZK2DJ, ZK2YL, CY9DXX, CY0DXX. But on second thought, that's more work than I want to do. ☺

No, I wanted to hear what others have had as far as old LOTW confirmations.

Hey, I could help you with entering the logs just send me a copy and I can type some in.

☐

Not trying to out-do you, Tim...but in recent weeks I have received LoTW confirmations for the late 60s and early 70s. It is very interesting how many are entering old logs. Perhaps I should enter old logs for the guys I manage for -- VE3AII/SU, VE6CBJ/SU, ZK2DD, ZK2DJ, ZK2YL, CY9DXX, CY0DXX. But on second thought, that's more work than I want to do. ☺

I think I read someplace on the ARRL's web site that the oldest LoTW QSL was from 1956.

The oldest one I have is from 1986. Probably because the oldest logs I have in the computer are from 1986.....

21035. RE: [DX-IS] old LOTW confirmations

Yahoo group: DX-IS (2013)
Date: 2013-04-05 21:57:50 UTC
From: VE1AL
Topic: 21030 Message: 21035

As a matter of interest, Tim, I went back and looked at the last 1000 LoTW confirmations. Of those, there are dozens from 1990-1995 and three that I managed to find that are prior to 1985:

SM6JLU '84
PA0BWL '73
WA5SOG '70

I do recall one from 1969 and several others from the 70s but I can't easily find them.

Nonetheless, I am astounded that guys are digitizing their logs going so far back. If anyone wants a card for one of the stations I have logs for, an SAE + Canadian postage of $1.10 will get one to the US.

73

Al, VE1AL

BTW, VK9CZ was on 17 for a while and I might have made a QSO (more QRM on his QRG). Perhaps I'll be in tomorrow's upload. Perhaps I'll be back at the drawing board.

How do the "radialless" verticals, like the R5, R7000, MA5V, Gap ones, compare in performance to the standard 1/4 wave verticals that are roof mounted with radials? Does one tend to outperform the other? I am looking how each performs for DXing and longer haul communications.

SIDC SOLAR BULLETIN 06 Apr 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 06 Apr 2013 until 08 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 06 Apr 2013 10CM FLUX: 137 / AP: 005
PREDICTIONS FOR 07 Apr 2013 10CM FLUX: 138 / AP: 010
PREDICTIONS FOR 08 Apr 2013 10CM FLUX: 141 / AP: 007
COMMENT: Solar activity has been active during the past 24 hours, with
an M2.2 flare and two C flares. The M flare peaked at 17:48 UT on April
5, and was produced by new NOAA AR 11719 on the East limb. More C flares
are expected within the next 48 hours, with a good chance for an M
flare, especially from NOAA AR 11719 and 11718. Solar wind speed as
measured by ACE has been steadily increasing from about 260 km/s in the
second part of April 5 till about 360 km/s around 12h UT on April 6.
This could be due to the arrival of an expected coronal hole high speed
stream. A further increase of the solar wind speed is possible on April
6. Geomagnetic activity was at quiet levels (NOAA Kp between 1 and 2)
during the past 24 hours. Quiet (K Dourbes < 4) conditions are predicted
for April 6 to 8 with a slight chance for active periods due to the
possible arrival of a coronal hole high speed stream.

21040. DX use of SKIMMER

Yahoo group: DX-IS (2013)
Date: 2013-04-07 13:13:56 UTC
From: Brian Alsop
Topic: 21040 Message: 21040

Guys,

In the past few weeks, I've had what appears to have been SKIMMER detected QSO's in a pileup.

I'd call in the pileup. Shut up and listen. About 5 QSO's later DX station would call me. I hadn't transmitted or QSY'd any in the interim.

This adds a new dimension to pileup breaking. If you move to follow the crowd + some offset, you likely wouldn't be where SKIMMER detected you. The result would likely be no QSO.

So add one more thought process of psyching out where the DX will be listening. Is he likely to be using as SKIMMER?

Topic: 21040 Message: 21041

Thanks Brian for confirming a suspicion I had. I started to question what was going on when they'd be already giving the 5nn to another station as soon as I stood by. Now I have a pretty short call, W2NK, and had the keyer set at 26 wpm, only gave my call once, so how would they be already be in the midst of giving a report to a station with a long call like WB9XYZ. So they had to hear the WB9XYZ, give WB9XYZ's call and then the report-no something wasn't right:)
Kathy
PS No disrespect intended to WB9XYZ if there is someone with call, it was strictly picked out as an example of a long call and may or may not actually be issued to someone.

xYZ call so

21044. Re: [DX-IS] DX use of SKIMMER

Yahoo group: DX-IS (2013)
Date: 2013-04-07 14:14:32 UTC
From: GARY HUBER
Topic: 21040 Message: 21044

In the past, maybe around the Fall of 2000, there was a DXpedition with operators who would listen to the CW pile, then run a string of three to five calls; AB9M 5NN, N9PE 5NN, N1SF 5NN, W1AW 5NN, QRZ UP 5. My friend Paul, N9PE (SK right after 9/11) thought the DXpedition operators were working from a list. They were, either a mental list or a hastily written list. There are great CW operators who can copy and work thru pile-ups this way, the problem is those in the pile, are they listening for a string of callsigns and QRZ UP or just calling mindlessly. CWSkimmers have changed the dynamics of the pile-up, but one still has to log the contact when you hear your call come back and worry less about if the DXpedition copied your report.

In the past few weeks, I've had what appears to have been SKIMMER
detected QSO's in a pileup.

I'd call in the pileup. Shut up and listen. About 5 QSO's later DX
station would call me. I hadn't transmitted or QSY'd any in the interim.

This adds a new dimension to pileup breaking. If you move to follow the
crowd + some offset, you likely wouldn't be where SKIMMER detected you.
The result would likely be no QSO.

So add one more thought process of psyching out where the DX will be
listening. Is he likely to be using as SKIMMER?

It's conceivable some DXpeditions are using a skimmer, but I highly doubt it. Most of the CW guys are the top echelon OPs and can do what Gary describes above. Anyone who remembers W9WNV (Don Miller) can attest to that. He'd listen to a pileup for 20-30 seconds, rattle off several calls with 5NN, break and do it again for hours at a time.

Think about it . . . you hear SSB pileup where the DX Operator says "VE1DX your 59, now K3KO 59" . . . if one can do it in on language (English), why can't one proficient in another language (Morse) do the same? I heard one of the K5D (Desecheo - 2009) do it on 40m at 35-50 WPM, and he was even calling half the guys he worked by name. Something like this:

K5D UP
(roar)
VE1DX 5NN TU PAUL (BK> K3KO 5NN HI BRIAN <BK> VE1AL 5NN TNX AL <BK> K5D UP
(roar)

I am pretty sure I know who the OP was an I can guarantee he wasn't using a skimmer.

I agree with Paul on this. What use of Skimmer and SDRs on a DXpedition would do is to allow even moderately skilled operators to run 200+ per hour. With advance publicity, plus exhorting the masses to "5-10 up", even I could do that. It would take one or two DXpeditions doing this for the masses to get the idea, but it would sure enhance productivity.

Or out of the pileup the OP had copied multiple calls and was working from a self generated "list", no Skimmer involved. I've had long delayed responses like that long before skimmers were around. You can also hear that technique used on SSB.

The crowd if paying attention should not be moving as most should detect that he is running a receive frequency and if so would stay there where the last station worked was.

The Elecraft P3 is some operating aid/crutch for figuring out a pileup.

21050. RE: [DX-IS] DX use of SKIMMER

Yahoo group: DX-IS (2013)
Date: 2013-04-07 18:26:00 UTC
From: Ron Notarius W3WN
Topic: 21040 Message: 21050

Sorry Brian, I disagree.

I don't think what you're seeing is necessarily use of Skimmer(s) or RBN stations by the DX.

I do think what you are most likely seeing is a good to excellent DX op.

Now: By no means do I mean to imply that I'm anything but a middlin' DX'er & contester. That said, though, there have been many times when I've had a pileup call me, and I could clearly distinguish 2 or 3 or even 5 calls.

For example:

Me: CQ Pa QSO Party W3WN QRZ?

Pileup: (almost all at once) W3WH N3SBF K3VX W4ZE

Me: W3WH, Hi Bill, 123 Allegheny

W3WH: QSL; 154 Washington

Me: Thanks Bill. N3SBF 124 Allegheny

N3SBF: QSL; 101 Clarion

Me: Thanks Carol, say hi to Richie. K3VX, Hi Larry, 125 Allegheny

K3VX: Thanks Ron, 98 Mercer

Me: QSL. W4ZE, 126 Allegheny

W4ZE: QSL, 154 South Florida

Me: Thanks Ted. QRZ Contest, Pa QSO Party W3WN

Pileup.

Might be a little tougher on voice than on CW - for me, but not for others.

Now, this is not to say that a given DX station isn't using technological assistance of some kind or another. Could be Skimmer. Could be code readers. Could be any of a dozen other things. But apples to oranges, I'd say it's just a good op who can pull multiple calls out of the pileup. Nothing more.

Bob,

IIRC, wasn't KH6IJ noted for working a relatively fast op while a relatively slow op was still sending his call?

He was one of the all time greats!

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Before heading to the International DX Convention in Visalia, CA, look for Wes, ZL3TE/W3SE, to be active as 3D2SE from Suva on the Island of Viti Levu (OC-016, WLOTA 0055) between April 12-16th. Activity will be casual, mainly CW, and some Digital modes possibe. He also states

that he will be operating in the Japan International DX CW Contest (April 13-14th). Logs will be uploaded to LoTW at a later date.

A3, TONGA. Vadum, UT6UD, will be active as A35UD from Tongatapu Island (OC-049) between May 1-7th. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via UT6UD.

A3, TONGA. Masato "Masa", JA0RQV, a member of a DX group in region zero of JA known as JA0-DX-GANG, will be active as A35JP from Tongatapu Island (OC-049) between May 5-22nd. Activity will be limited as Masa is there working for the Tongan government. He mentions that he will try his best to be on every night (local time) after his work. Operations will be on 80-10 meters using CW and SSB. He will use 100 watts into a ATU and GP. QSL via his home callsign, by the Bureau or direct to: Masato Tamura, 891-4 Tomitake Nagano-city 381-0006 Japan (w/SASE and 1 IRC). He will upload later to LoTW. If you have any requests or a scheduled QSO, let him know by E-mail at: ja0rqv@...

CARIBBEAN TOUR. By the time you read this, Rick, AI5P, should be active as J75PX from the Sea Cliff Cottages, Dominica, on the NE side of the island (as reported by "The Daily DX") between April 6-20th. Activity will be holiday style. Rick will leave Dominica and fly to Martinique where he will be active as TO5PX between April 20th and May 4th. QSL both operation via AI5P.

E5, SOUTH COOK ISLANDS (Reminder). Mauri, AG1LE, is now active as E51DXX on a holiday/DXpedition from Rarotonga (OC-013) until April 13th. Activity will be on the HF bands. QSL via his home callsign.

FT5Z, AMSTERDAM ISLANDS (Press Release). Ralph Fedor, K0IR, sent out the following on April 3rd, to the 'The DX Community' [edited]: "I am pleased to announce a major DXpedition scheduled to occur during January and February of 2014.
An international team of 14 experienced DXpedition operators, led by K0IR, will depart from Fremantle, Australia, in early January of 2014.
Their destination will be Amsterdam Island (FT5Z).
Amsterdam Island is under the administration of Terres Australes et Antarctiques Francaises (TAAF). There are strict rules and environmental regulations in place on Amsterdam Island and access is limited. Representatives of this DXpedition team met with TAAF officials on Reunion Island in November and in Paris in early March. The team's plan and credentials were reviewed at those meetings, and resulted in TAAF's final, written authorization to land on Amsterdam Island and conduct this DXpedition.
The team has been granted an 18 day access to the island to occur between the dates of January 15th and February 20th of 2014.
The team will sail from Fremantle, Australia aboard the MV Braveheart.
The voyage to Amsterdam Island will take them through the 'roaring 40s' of the Indian Ocean and last about 8 days, depending on the wind and weather. TAAF has reviewed the Braveheart's specifications, environmental precautions, and emergency response plan and has designated anchorage conditions for the vessel. Landing at Amsterdam must be timed according

to sea conditions as there is no natural harbor to shield the landing area from the open sea. This may necessitate waiting off shore until the sea conditions are suitable. But, our 18 day window does not start until we step onto the island.
Once ashore, the team will move to two station positions assigned by TAAF. The two locations are about 2 kilometers apart. Each location will allow a full complement of antennas. The separation will allow simultaneous CW/RTTY and SSB transmission on the open bands. The group plans on eight stations; four at each location. Elecraft K3's, a full complement of antennas, and 500 watt and 1.5 KW amplifiers will be the backbone of the station configurations.
The operators are well known in the DXing and contesting world and include: 9V1YC, EY8MM, FM5CD, HK1R, K4UEE, K9CT, LA6VM, N4GRN, N6HC, VE3EJ, VE7CT, W6IZT, WB9Z, and yours truly K0IR.
Our website is in the final stages of preparation. When it is complete, you may access it at: http://www.amsterdamdx.org
The website will be password protected until it is ready.
As with past DXpeditions to 'Top Ten' countries, this is a costly venture. The expenses total just over $400,000 (U.S.). Each operator must contribute a minimum of $10,000 of his own money, pay his own way to Fremantle, Australia, be away from home and family for six weeks, spend 16 to 18 days at sea, and be prepared for the financial and physical risks inherent in a major DXpedition of this magnitude.
The group needs your financial support to successfully complete this major project and is asking all DX'ers to contribute what they can to make this happen. We know that clubs and major sponsors will help us; INDEXA has already made an extremely generous contribution to the project and the NCDXF has honored with a very large grant. But we also need the help of individual DX'ers, not only from North America, but also from Europe, Asia, Africa, South America, and Oceania. Let's make this happen!
Then, let's enjoy the chase of a new country, a new band country, or working a rare one! 73 ☐ Ralph Fedor ☐ K0IR"
ADDED NOTES:
* Since the press release, it was announced by Stan, SQ8X, that the callsign of the 2014 Amsterdam Island DXpedition will be FT5ZM.
Also, both Facebook and Twitter pages at now available at:
https://www.facebook.com/FT5ZM
https://twitter.com/FT5ZM
* NCDXF PRESS RELEASE (Major Grant to Amsterdam Island DXpedition):
"FOR IMMEDIATE PUBLICATION - April 4, 2013 -- The Northern California DX Foundation is pleased to announce a grant of $50,000 to the FT/Z Amsterdam Island DXpedition planned for Jan-Feb 2014. Amsterdam is #4 on the DX Magazine's Most Wanted List for 2013.
This is the second largest grant in NCDXF's history. Without major financial support from NCDXF, DXpeditions like this to challenging or rare locations would not be possible.
<www.amsterdamdx.org/> will soon post the DXpedition details.
For the past 41 years the NCDXF has funded major DXpeditions to many Most Wanted Entities. The credit for these large grants goes to the

NCDXF contributors, individuals and clubs, who make DX like this
possible. Have you contributed yet?

IDXC 64TH (VISALIA CONVENTION) NEWS.....
* (Last Call IOTA Dinner). Ray, N6VR, reports that he has less than two weeks before he has to turn in his IOTA Dinner meal count. If you would like to attend the IOTA Dinner, he needs your check for 32 USDs as soon as possible. Please check the Int'l DX Convention Web page, Friday evening dinner, IOTA dinner, for details at: http://www.dxconvention.com Their featured guest is, Don, G3XTT. He is the Manager of the RSGB IOTA Contest. Don is also member of the RSGB IOTA board and will talk about the latest with the RSGB program and will make a presentation on his RECENT OJ0 operation. Other presenters are Fred, PY2XB, presenting on his SA-041 operation. They also have Rick, K6VVA, with C6AVA. Rick is full of surprises, he will have more! It will be an exciting and enjoyable Dinner! Ray needs your check by April 10th.

* The Intrepid-DX Group will be making a big announcement at the IDXC 2013 in Visalia on April 20th.

* The Intrepid-DX Group will honor a famous DXpeditioner with our "Intrepid Spirit Award" at IDXC 2013 on April 20th.

IOTA (Philippines) TOUR (Update to OPDX.1105). Dindo, DV1UD, has announced the dates to activate three of the 'most wanted' Islands in the DU area. Dindo will visit Bongao Island (OC-174) and Tawi-Tawi Island (OC-174) between April 9-11th. Activity from Taganak Island (OC-225) will be between April 13-15th. His callsign will be DX8DX, and activity will be on CW and SSB. Suggested frequencies are:
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 3755, 7055, 14280, 18128, 21260, 24950, 28460 and 28560 kHz

QSL via M0OXO OQRS. For more details, visit his Blog page at: http://www.m0oxo.com/dx8dx.html

IOTA NEWS.....
EU-008. (Update) Members of the Camb-Hams will once again activate the Isle of Mull (IOSA NH15, SCOTIA CN10, WLOTA 2485), Inner Hebrides, as GS3PYE/p between May 10-16th. The Camb-Hams have been activating the Scottish Isles each year since 2008. Look for thirteen operators to be active on all bands and many modes

from 160-2 meters as well as 472 kHz. The HF bands will be covered by five simultaneous stations, while 6m, 4m and 2m stations will have a great take-off towards the UK and Europe from the island's south-east coast in IO76 square. They will have an antenna elevation system for 2m EME activity and will also be on many of the VHF/UHF satellite passes. WSPR beacons will be operating on most of the inactive bands to help find the best propagation. Contest operations will take place in 70 MHz CW on May 12th and 432 MHz UKAC on May 14th. The group will be active on the major social networks before, during and after the trip. You can check on progress or interact with the operators via their blog at <dx.camb-hams.com> or through Twitter <twitter.com/g3pye>, Facebook <facebook.com/CambHams> and YouTube <youtube.com/CambHams>. Previous trips have generated some great audio and video recordings of the GS3PYE/P signal from around the world. Check their previous blogs and their YouTube channel and see if you can post a better recording. Please E-mail <skeds-2013@camb-hams.com> to arrange skeds on the more challenging bands and modes. VHF and EME skeds will also be made via ON4KST and N0UK's EME Chat. All links are available via <dx.camb-hams.com>.

EU-041. Operators Tony/IZ2ESV, Bruno/IW3HXR, Mauro/IK3VUU and Luciano/ I3CLZ will be active as IM0MA from La Maddalena Archipelago (IIA OT-008, MIA MIS-013, WLOTA 1632, WWFF IFF-004) between April 21-24th. This activity is intended as a spring-break expedition, aimed firstly to relax and have fun on the air. Operations will be during their spare time on 80-10 meters using CW, SSB and the Digital modes. QSL Manager is Antonello, IK2DUW.

EU-049. Five members Sands Contest Group from Morecambe, England, will be visiting the Island Samos (GIOTA SAS-006, MIA MG-099, WLOTA 4163), for a holiday and DXpedition between May 16-30th. The group will be using the callsign SZ8S (kindly loaned to them by the Aegean Radio Association), and operating from the Radio House at Zervou Point above Samos town. They mention that the actual days for operation are uncertain, but hope to start on Saturday May 18th. Operators mentioned are Barrie/G1JYB, Ian/ G0VGS, Stephany/G1LAT, Hughie/G4UME and Bob/G1OCK. QSL "ONLY" direct via G1LAT the QSL Manager in the UK (w/SASE and outside the UK w/SAE + 1 IRC or 2 USDs). QSLs by the Bureau or eQSL are via M0SCG. PLEASE DO NOT SEND ANY QSLS TO THE LISTED ADDRESS FOR SZ8S (FOR THIS DXPERDITION), AS YOU WILL NOT GET A REPLY. AS THIS IS THE AEGEAN RADIO ASSOCIATION□S SPECIAL CALLSIGN.

EU-057. Helmut, DL5BUT, will be active as homecall/p from Ruegen Island (DID O-007, WLOTA 1712) between now and April 17th. Activity will be holiday style on 160/80/40/20 meters using CW, SSB, and the Digital modes. Depending on the weather and conditions, look for a possible two day WWFF (World-Wide Flora

Fauna) operation from the National Park Jasmund (DLFF-007).
QSL via his home callsign, by the Bureau or direct.

EU-057. Operators Friedrich/DL4BBH, Matthias/DK7LV, Klaus/DL7UXG,
Henning/DB5BZ, Peter/DJ4RU and Ric/DL2VFR will be active as
DM50IOTA from Hiddensee Island (DID O-005, WLOTA 2371) between
September 28th and October 4th. Activity will be on all HF
bands using CW and SSB. This activation will also count for
the Vorpommern Lagoon Area National Park WWFF (World-Wide
Flora Fauna) reference DLFF-014. Also the lighthouse Dornbusch
(DLTD_GLHA #17, ARLHS FED-026, WLOTA 2371). QSL via DL2VFR,
by the Bureau or direct. For more details and updates, visit
the Web site at: http://www.iota-expedition.com
ADDED NOTE: This is the fourth German Island group activated by
DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate
all German IOTAs during that time. If you have worked DM50IOTA
from all German IOTA by the end of 2013 you can apply for a
special award.

EU-110. Nikola, AC6DD, will be active as 9A/AC6DD from Oprtalj-Portole,
Sveti Nikola, Croatia, in the Istra IOTA Group, during the
RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/
24HRS/High-Power entry. QSL via AC6DD.

EU-121. Andy, G7SQW, will be active as EJ/G7SQW from Arranmore Island
[aka Aran] (WLOTA 1189) between May 27-29th. Activity will
be on 40-6 meters. A radio, possibly with a yagi, will be
dedicated for 6 meters and will activate two WW Loc. grids
IO54 and IO55. This will be Andy's first IOTA activation.
QSL via his home callsign, direct or by the Bureau.

EU-121. Gerard, EI5KF, will once again be active as EI5KF/P from
Lohehort Battery, Bere Island [aka Bear] (WLOTA 2983), during
the RSGB IOTA Contest (July 27-28th), possibly as a Single-Op/
12HRS/CW-Mode/Low-Power entry. QSL via EI5KF.

EU-127. Operators Friedrich/DL4BBH, Klaus/DL7UXG, Matthias/DK7LV,
Henning/DB5BZ, Peter/DJ4RU, Helmut/DL1BGC and Ric/DL2VFR will
use the special callsign DM50IOTA from Neuwerk Island (DID
N-012) and lighthouse (DLTD_GLHS #38, ARLHS FED-165, TWLHD
WLH DL-01, WLOTA 2311 and Admiralty B 1344) between April
12-14th. Activity will be on all HF bands using CW and SSB.
This activation will also count for the National Park and
Nature Reserve Hamburg Wadden Sea (WWFF reference DLFF-005).
QSL via DL2VFR, by the Bureau or direct. For more details and
updates, visit the Web site at: http://www.iota-expedition.com
ADDED NOTE: This is the third German Island group activated by
DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate
all German IOTAs during that time. If you have worked DM50IOTA
from all German IOTA by the end of 2013 you can apply for a
special award.

NA-180. (Update) Operators Hernan/V31HU, Ismael/XE1AY (V31MV) and
Enrique/XE2AA (V32EE) will be active from Twin Cayes in the
South Water IOTA Group, Stann Creek district, Belize, between
now and April 12th. Activity will be on all bands including
6 meters. QSL all callsigns via IT9EJW. Visit their Website
at: http://www.it9ejw.it/v31

T48K QSL ROUTE. For stations who worked T48K during the 2013 CQWW WPX SSB Contest, DK1WI is not the QSL Manager for this callsign any longer. Erhard will manage all T48K's operations from 1999 until last year's CQWW VHF Contest and will stop his services. The QSL Manager for the last CQWW WPX is Hugo, F5FYO. Please, send your cards, including SASE to: PO BOX 50033, La Reole, Cedex, 33191, France , or via REF Bureau.

QSL RECEIVED VIA LoTW: 3Z8T, 4Z4DX, 9M2/R6AF/P, BD2OB/7, C6ANM, CX3AL, DL3GD, EA3IN, EF5Y, FS/UA4CC, GW100C, HA8JV, II9P, J34G, J38A, JA8CMC, KH0/R0FA, LN8W, LZ9W, OK1AWZ, OZ1BTE, PJ2T, PJ7AA, PY2KJ, RU4LM, SN2M, SV1OZ, T2GM, TM6M, TN0INT, TK1INT, TK2INT, V31LJ, V44KAI, V47JA, V84SMD, VK9CZ, VP2EC, VP2V/KE2VB, VP9/WA1Z, VP9I, YB8Y, YE0M, YU1FJK and ZL3NB

QSLS RECEIVED VIA MAIL: 7O6T, E51E, EU3DN, H40FN, KH2/G3ZEM, RI1FJ, RV3EFH/0, S21XV, TZ6BB, V25A, V63ZM, XT2TT and ZB3R

QSLS RECEIVED VIA THE BUREAU: F5CQ, G3TXF, RK3DXW, VK5PAS and YB0NDT

S7, SEYCHELLES (Reminder). Nobby, G0VJG, is now active S79VJG from the Seychelles (AF-024) until April 16th. Activity will be on the 40-10 meters using SSB only and HF verticals on the beach (QRO). QSL via G4DFI.

SU, EGYPT. "After almost 9 Moons the License has been received", states Andy "Sparky", RW3AH. He is now active as SU9AF near Cairo, and his license is good for 160/40/20/17/15/12/10 meters (80/75/30m not allowed for use in Egypt). His equipment is an Icom IC-718, delta-loop for 20/10m and a vertical for 30/17/15/12m. He currently does not have a 160m antenna. Suggested frequencies (his favorites) are:
CW - 7002, 14002, 18070, 21002, 24895 and 28002 kHz
SSB - 7155, 14155, 14195, 18155, 21295, 24940 and 28495 kHz
6m/VHF/UHF/Satellite: Not permit for Amateur radio activity from Egypt.

The length of his stay is not known, but his license is good until the end of the 2013. QSL via UA3DX. He does have a survey for "modes and bands needs" on the following Web page at: http://www.CQDX.ru/su9af

S21XV VIDEO AVAILABLE ON YOUTUBE (9:08 mins.). This is the March 1-7th, 2013, S21XV Dhaka, Bangladesh, DXpedition by Vadym, UT6UD. See the video at: http://www.youtube.com/watch?v=7srW0eW1SmU

TS8, TUNISIA (Update). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, are planning a second IOTA DXpedition to Djerba Island (AF-083, WW. Loc. JM53KT, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), as TS8TI between April 29th and May 6th (see OPDX.1100, OPDX.1101 & OPDX.1102). Activity will be on all HF bands, including the 30/17/12/6 meter bands using CW, SSB, RTTY and PSK31/63/125 modes. Operators mentioned are Ashraf/KF5EYY, 3V8SA (ARCS of Tunisian Scout), 3V8ST (ARC of Tunis), 3V8ESG (Department of Communications and Networking National Engeneering School of Gabès), 3V8SF (Scout Radio Club of Sfax), Fred/IK7JWX (Team Leader), Antonello/IK2DUW (QSL Manager), Ampelio/IS0AGY, Rosy/IW2NLC (YL), Stefano/IK6JRI,

Vincenzo/IZ8LFI, Heathem/YI1UNH. QSL via IK2DUW, direct or by the Bureau. Logs will be available on LoTW, <http://www.ik2duw.it> or <http://www.mdxc.org/TS8TI/log-on-line>. The team is still in need of sponsors and individual contributions. Contact: ik7jwx2003@...
For more info updates and pictures, watch the following Web pages:
http://www.qrz.com/db/TS8TI/
http://www.arilimbiate.it/
https://www.facebook.com/alfredo.denisi

V6, MICRONESIA (Reminder). Haru, JA1XGI, is once again active as V63XG from Pohnpei Island (OC-010) until April 11th. Activity will be on 160-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. Also JT65. Suggested frequencies are (no 80m) listed in OPDX.1094. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW. Look for updates and details on Haru new Web page or Blog page at: http://island.geocities.jp/v63xg/index.htm
http://ja1xgidxvacation.blogspot.com

VK9C, COCOS KEELING ISLANDS (Update). Operators Chris/GM3WOJ (ZK2V) and Keith/GM4YXI (ZK2X) are now active as VK9CZ from Cocos Keeling Island (OC-003) until April 13th. Activity will be on SSB and CW, with some RTTY. QSL via N3SL. For more details and updates, see their Web page at: http://www.vk9cz.com
Log is being uploaded to LoTW and is also available on ClubLog at:
http://www.clublog.org/charts/?c=vk9cz

VP9, BERMUDA. Eric, K9GY/T6MO, announced that he will be active possibly as VP9/K9GY or K9GY/VP9 in the Worked All Europe CW Contest in mid-August. He informs OPDX that he plans to be there between August 8-15th. Activity will probably be mainly CW on 40-10 meters. He also mentions, "Might be late in the season for 6m propagation, but it would be great to work Europe :-)". Activity will be from Ed's, VP9GE, Hamilton apartments QTH <see the Web page at: http://vp9ge.com >. QSL via K9GY.

XR86, CHILE (Special Event). Look for special event station XR86PL to be active until April 30th. Activity is to commemorate the 86th Anniversary of Carabineros de Chile (Chilean Police). Operations will be on all bands using SSB, RTTY and PSK. QSL via the home callsign (see QRZ.com) or CE3ETE.

YJ0, VANUATU. Bill, K2PO, will be active as YJ0PO from Efate Island (OC-035), one of Vanuatu's 82 islands, during the CQWW WPX CW Contest (May 25-26th). He states that his activity will start a few days before and end a few days after. Operations will be on 80-10 meters. QSL via his home callsign. Logs will be uploaded to LoTW promptly after his return to the USA in early June.

YN, NICARAGUA. Eric, K9GY/T6MO, will be departing Afghanistan in about three weeks (shut down the T6MO station on April 28th). He informs OPDX, "Hope to be at Dayton if I can process through Ft Benning quick enough, hah!" In late May, Eric will once again be active as YN2GY from Octavio's, YN2N, QTH in Grenada. He states that he will be there May 22nd (probably more like May 23rd with the late flight) until early May 28th. While there

he will also be in the 2013 CQ WPX CW Contest (May 25-26th) as a Single-Op/All-Band/Low-Power entry. Outside of the contest, look for CW activity on 30/17/12 meters. Also look for him on 6 meters (he's hoping for some good 6m propagation). QSL via LoTW or to his home callsign, direct or by the Bureau.

From: Don Greenbaum
Topic: 21040 Message: 21053

NCDXF PRESS RELEASE (Major Grant to Amsterdam Island DXpedition):

"FOR IMMEDIATE PUBLICATION - April 4, 2013 --
The Northern California DX Foundation is pleased to announce a grant of
$50,000 to the FT/Z
Amsterdam Island DXpedition planned for Jan-Feb 2014. Amsterdam is #4 on
the DX Magazine's Most Wanted List for 2013.

This is the second largest grant in NCDXF's history. Without major
financial support from NCDXF, DXpeditions like this to challenging
or rare locations would not be possible.
<www.amsterdamdx.org/> will soon post the DXpedition details.

For the past 41 years the NCDXF has funded major DXpeditions to many
Most Wanted Entities. The credit for these large grants goes to the
NCDXF contributors, individuals and clubs, who make DX like this
posible. Have you contributed yet?

... 73, Glenn Johnson, W0GJ
NCDXF Vice President

That'll cover my costs, Don. What are the others going to do?

Seriously however, I am impressed and delighted that NCDXF has made this fantastic donation to the upcoming DXpedition.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30408
SIDC SOLAR BULLETIN 08 Apr 2013, 1134UT
SIDC FORECAST (valid from 1230UT, 08 Apr 2013 until 10 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 08 Apr 2013 10CM FLUX: 141 / AP: 004
PREDICTIONS FOR 09 Apr 2013 10CM FLUX: 144 / AP: 005
PREDICTIONS FOR 10 Apr 2013 10CM FLUX: 145 / AP: 003
COMMENT: Three out of nine active regions reported by NOAA today have
beta-gamma configuration of the photospheric magnetic field (NOAA ARs
1713, 1718, and 1719). So, despite no C-class flares today, we expect
flaring activity on the C-level, with an M-class flare possible but not
very likely. An eruption in the NOAA AR 1714 (Catania sunspot group 34)
was detected around 02:00 UT on April 8, accompanied by a local soft
X-ray flux peak at 01:44 UT at C1.1 level (no flare was reported).
Coronal dimmings and a post-eruption arcade observed by SDO/AIA indicate
the eruption of a CME. However, SOHO/LASCO did not detect any CME in
association with this event, and STEREO coronagraphs have a data gap.
Due to presumed weakness of the event (below the detectability threshold
of LASCO), any geomagnetic consequences are unlikely. The Earth is
currently inside a slow (around 350 km/s) solar wind flow with weak to
average (3-4 nT) interplanetary magnetic field magnitude. We expect
quiet geomagnetic conditions.

TODAY'S ESTIMATED ISN : 090, BASED ON 09 STATIONS.

21060. RE: [DX-IS] W3LPL spots GONE!

Yahoo group: DX-IS (2013)
Date: 2013-04-09 05:20:21 UTC
From: Lance Martin
Topic: 20985 Message: 21060

Hi Paul/Al,

Well on the other side of things, W3LPL has been helping me out, spotting these rare ones early so that I can pounce and get in before the pile.
I haven't been able to get into the KP2 log yet for the current time but it's not from a lack of trying.

Have you noticed we've had some good south pole openings of recent times but I have proved on a couple of occasions now that just because I can hear a rare (and I mean rare for me) Caribbean station loud over the south pole, it doesn't mean he is automatically going to hear me... :(

Beaming south, (and sometime north :))
73, Lance - VK6DU

You can get noise cancelling headphones that eliminate that sort of thing. I have a pair I use for flying. It reduces jet roar, babies crying, etc. immensely.

Google "noise cancelling headphones" . . . it may be your solution. :-)

From: Lance Martin
Topic: 21040 Message: 21061

I must be getting old. I thought the skimmers (i.e. reverse beacon network) only picked up stations calling CQ.
What am I missing here?

I agree with Paul on this. What use of Skimmer and SDRs on a DXpedition would do is to allow even moderately skilled operators to run 200+ per hour. With advance publicity, plus exhorting the masses to "5-10 up", even I could do that. It would take one or two DXpeditions doing this for the masses to get the idea, but it would sure enhance productivity.

It's conceivable some DXpeditions are using a skimmer, but I highly doubt it. Most of the CW guys are the top echelon OPs and can do what Gary describes above. Anyone who remembers W9WNV (Don Miller) can attest to that. He'd listen to a pileup for 20-30 seconds, rattle off several calls with 5NN, break and do it again for hours at a time.

Think about it . . . you hear SSB pileup where the DX Operator says "VE1DX your 59, now K3KO 59" . . . if one can do it in on language (English), why can't one proficient in another language (Morse) do the same? I heard one of the K5D (Desecheo - 2009) do it on 40m at 35-50 WPM, and he was even calling half the guys he worked by name. Something like this:

K5D UP
(roar)
VE1DX 5NN TU PAUL (BK> K3KO 5NN HI BRIAN <BK> VE1AL 5NN TNX AL <BK> K5D UP
(roar)

I am pretty sure I know who the OP was an I can guarantee he wasn't using a skimmer.

Lance,
You have to check a box to tell SKIMMER to only spot calls sending CQ.

Otherwise it decodes all call it can. You wouldn't want to use this all calls option is a contest!

Thus in a pileup you can see the calls of the guys chasing the DX and at what freq.

From: Pete Smith N4ZR
Topic: 21040 Message: 21063

CW Skimmer (the single-band-at-a-time software) allows you to choose, and it shows all signals on the waterfall. In fact, it was originally designed to be a tool for DXers to crack pileups by showing you which caller had gotten through while you read the DX's CW. With Omni-Rig as part of the package, it permits you to QSY your radio to the successful caller's frequency. The first Skimmer did not even have a Telnet server.

What I was suggesting is the mirror image of this - rare DX using Skimmer to collect calls of 10, 20, or 30 callers at once and then run down the list. It is exactly the same process as those really good operators, but conducted on a scale and over a frequency range that even the very best could not hope to equal.

There are good screen shots and other info on http://dxatlas.com.

21064. RE: [DX-IS] W3LPL spots GONE!

Yahoo group: DX-IS (2013)
Date: 2013-04-09 13:58:25 UTC
From: VE1AL
Topic: 20985 Message: 21064

Well, Lance, I am absolutely delighted to have finally discovered how to eliminate the W3LPL spots. Like so many of us in North America whose antenna systems don't hold a proverbial candle to his, seeing all those juicy spots and not being able to hear 98% of them was always very frustrating.

Paul, of course, does not agree. But then again, I heard him work a DU2 just a few minutes ago on 15M and I didn't have a chance. I also worked VR2XLN after making a pain-in-the-butt of myself but I did get through. I also got an anonymous e-mail telling me I am a terrible operator. Yeah, right! I wasn't doing anything that everyone else wasn't doing. I hate it, buty to survive you've got to do what you have to do.

There are many who agree with me about W3LPL from this side of the world but if you find the spots helpful, have at 'er. If it works, use it!!!

I've managed VK9CZ on 15 & 17 but my "QSO" on 12M yesterday did not show up in the log so I'll be back at that today. There's a spot for them on 10M SSB right now but I have a huge noise (birdie?) on that QRG. But as long as they're there I will try to get them into the log on a few more bands.

Good luck with that KP2, of course, and 73,

Al, VE1AL

COMMENT: Nine sunspot groups were reported by Catania today. Only one
of them (Catania number 43, NOAA AR 1719) has beta-gamma configuration
of the photospheric field. This sunspot group, as well as Catania
sunspot groups 32, 34, and 40 (NOAA ARs 1713, 1714, and 1718
respectively) that produced flaring activity at a low C-level during the
past 24 hours, have the potential to produce C-class flares. An M-class
flare is possible, although not very likely. The filament eruption
observed by SDO/AIA around 13:46 UT on April 8 was most probably
confined as it was not associated with a CME observed by SOHO or STEREO.
The Earth is currently inside a slow (around 350 km/s) solar wind flow
with average (5-6 nT) interplanetary magnetic field magnitude. We expect
quiet geomagnetic conditions.

It frustrates me to see W3LPL's own Skimmer spots conflated with the W3LPL-3 spots, which are gathered and processed from Skimmers all over North America. I find the latter of little use, while the former quite often tell me where juicy DX has settled in before I can hear them, but not too much before (I'm about 60 KM from him).

21067. RE: [DX-IS] DX use of SKIMMER

Yahoo group: DX-IS (2013)
Date: 2013-04-09 19:59:28 UTC
From: KQ8M
Topic: 21040 Message: 21067

The only drawback I can see on DXpeditions using skimmer and gathering a list of calls is, I for one, listen in the pileup for where they have worked the previous call and learn the pattern. So if they then have me like third on t he list, I am no longer on the same frequency. Bang I lose the Q unless they have the smarts to check the skimmer and see if they can see me answering.

73,

Tim Herrick, KQ8M

Charter Member North Coast Contesters

kq8m@...

AR-Cluster V6 kq8m.no-ip.org

User Ports: 23, 7373 with local skimmer, 7374 without local skimmer

Server Ports: V6 3607, V4 Active 3605, V4 Passive 3606

Sent: Tuesday, April 09, 2013 5:44 AM
To: DX-IS@yahoogroups.com
Subject: Re: [DX-IS] DX use of SKIMMER

Lance,
You have to check a box to tell SKIMMER to only spot calls sending CQ.

Otherwise it decodes all call it can. You wouldn't want to use this all
calls option is a contest!

Thus in a pileup you can see the calls of the guys chasing the DX and at
what freq.

Date: 2013-04-10 01:41:04 UTC
From: Pete Smith N4ZR
Topic: 21040 Message: 21068

Tim, this is why I suggest that a Dxpedition planning to do such a thing should publicize it in advance, so people would know to alter their normal patterns.

73, Pete N4ZR
Check out the Reverse Beacon Network at
http://reversebeacon.net,
blog at reversebeacon.blogspot.com.
For spots, please go to your favorite
ARC V6 or VE7CC DX cluster node.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30410
SIDC SOLAR BULLETIN 10 Apr 2013, 1150UT
SIDC FORECAST (valid from 1230UT, 10 Apr 2013 until 12 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 Apr 2013 10CM FLUX: 149 / AP: 005
PREDICTIONS FOR 11 Apr 2013 10CM FLUX: 151 / AP: 003
PREDICTIONS FOR 12 Apr 2013 10CM FLUX: 150 / AP: 004
COMMENT: Catania sunspot group 40 (NOAA AR 1718) is the only group that
produced C-class flares during the past 24 hours, all of them being
below the C2 level. This sunspot group, as well as Catania sunspot group
43 (NOAA AR 1719), maintain beta-gamma configuration of the photospheric
magnetic field. Together with two rapidly emerging sunspot groups in the
south-east quadrant (Catania number 44 and another group that is still
not numbered), these active regions are expected to provide flaring
activity on the C-level. An M-class flare is possible but not very
likely. The Earth is currently inside a slow (around 350 km/s) solar
wind flow with average (around 5 nT) interplanetary magnetic field
magnitude. We expect quiet geomagnetic conditions.

Topic: 21070 Message: 21070

For those reading this, do so from the bottom up. This is a good example of what DXing has become. Here's a cop, a philosopher, a pundit and a jerk, all rolled up in one.

Al, VE1AL

I'm too much of a gentleman to tell you what I'm thinking. Oh, I had a very nice e-mail from VR2XLN thanking me for the QSO. Put that in your corncob and smoke it.

From: Lyuff [mailto:lyuff01@...]
Sent: Wednesday, April 10, 2013 5:33 PM
To: VE1AL
Subject: Re: VR2XLN

Don't worry, this letter will be posted along with the video, to show your justification for being a lousy operator.

It doesn't matter if you are running a KW, 100 watts, or 1 watt, your operating is piss poor and the only reason you got through is because he was fed up with your constant calling. You are a poor excuse for an operator and soon everyone else will know that too.

On Tue, Apr 9, 2013 at 9:20 AM, VE1AL <VE1AL@...> wrote:

I see. You hide behind anonymity and chastize me for what every other asshole was doing. I am on the east coast of Canada, run 100W and I have a chance against all those QRO stations on the east coast?

My calling through those idiots who started calling before a QSO was finished finally got me a QSO, my 1st on any other band but 20M, ever. I praise Clive for his patience with all the dolts out there, apparently including me. If you had stayed around you would have heard that he took specific pain to get me into his log.

So take your self-righteous butt and fade into the ether.

Please watch for a video to be posted soon on YouTube that showcases how so-called Honor Roll DX'ers do not follow the DX Code of Conduct.

Your example of constant calling when the DX was requesting a specific callsign (not your's) was textbook. Your peers and the rest of the DXing community will be aware of just how you operate. Congratulations!

Thanks!

Don't worry, this letter will be posted along with the video, to
show your justification for being a lousy operator.

It doesn't matter if you are running a KW, 100 watts, or 1 watt, your
operating is piss poor and the only reason you got through is because he was fed
up with your constant calling. You are a poor excuse for an operator and
soon everyone else will know that too.

Date: 2013-04-11 05:55:53 UTC
From: Lance Martin
Topic: 21040 Message: 21078

Hi Tim,

Well this was the next issue I was going to raise and you beat me to it.
Yes, we would need notice.
I am happy to just sit on one freq. and keep calling but only if I know I am not wasting my time…. ☺
Could DX come this this?
Interesting days and I think this would be a can of worms opening up if we go down that path.….

I can just hear someone complaining about them not being able to work a DXpedition on CW and then someone replying….”didn’t you know they were a skimmer DXpedtion” o’boy….

73, Lance – VK6DU

Sent: Wednesday, 10 April 2013 3:59 AM
To: DX-IS@yahoogroups.com
Subject: RE: [DX-IS] DX use of SKIMMER

The only drawback I can see on DXpeditions using skimmer and gathering a list of calls is, I for one, listen in the pileup for where they have worked the previous call and learn the pattern. So if they then have me like third on t he list, I am no longer on the same frequency. Bang I lose the Q unless they have the smarts to check the skimmer and see if they can see me answering.

Lance,
You have to check a box to tell SKIMMER to only spot calls sending CQ.

Otherwise it decodes all call it can. You wouldn't want to use this all
calls option is a contest!

Thus in a pileup you can see the calls of the guys chasing the DX and at
what freq.

21079. RE: [DX-IS] W3LPL spots GONE!

Yahoo group: DX-IS (2013)
Date: 2013-04-11 06:01:56 UTC
From: Lance Martin
Topic: 20985 Message: 21079

Hi Al,

Sounds like you are going through the same frustrations that I have with the Caribbean.... Though remarkably a Polish PJ4 was a 10 over S9 this morning on 20m SSB LP, mate was that a surprise!
I guess those SFI numbers do really mean something. 10m opened up to NA the other day and was able to work some of you guys over there on SSB.

VK9 and 5W have been thumping in here as you would expect so I guess there are some perks in being in VK6 :)

I know it's still not the total peak of the cycle but I am losing confidence in 6m ever opening to EU this time around.
I guess we have a couple more equinoxes to go...

Keep at 'em Al,

73, Lance - VK6DU

Sent: Tuesday, 9 April 2013 9:58 PM
To: DX-IS@yahoogroups.com
Subject: RE: [DX-IS] W3LPL spots GONE!

Well, Lance, I am absolutely delighted to have finally discovered how to eliminate the W3LPL spots. Like so many of us in North America whose antenna systems don't hold a proverbial candle to his, seeing all those juicy spots and not being able to hear 98% of them was always very frustrating.

Paul, of course, does not agree. But then again, I heard him work a DU2 just a few minutes ago on 15M and I didn't have a chance. I also worked VR2XLN after making a pain-in-the-butt of myself but I did get through. I also got an anonymous e-mail telling me I am a terrible operator. Yeah, right! I wasn't doing anything that everyone else wasn't doing. I hate it, buty to survive you've got to do what you have to do.

There are many who agree with me about W3LPL from this side of the world but if you find the spots helpful, have at 'er. If it works, use it!!!

I've managed VK9CZ on 15 & 17 but my "QSO" on 12M yesterday did not show up in the log so I'll be back at that today. There's a spot for them on 10M SSB right now but I have a huge noise (birdie?) on that QRG. But as long as they're there I will try to get them into the log on a few more bands.

Good luck with that KP2, of course, and 73,

Al, VE1AL

Subject: RE: [DX-IS] W3LPL spots GONE!
Hi Paul/Al,

Well on the other side of things, W3LPL has been helping me out, spotting these rare ones early so that I can pounce and get in before the pile.
I haven't been able to get into the KP2 log yet for the current time but it's not from a lack of trying.

Have you noticed we've had some good south pole openings of recent times but I have proved on a couple of occasions now that just because I can hear a rare (and I mean rare for me) Caribbean station loud over the south pole, it doesn't mean he is automatically going to hear me... :(

Beaming south, (and sometime north :))

You can get noise cancelling headphones that eliminate that sort of thing. I have a pair I use for flying. It reduces jet roar, babies crying, etc. immensely.

Google "noise cancelling headphones" . . . it may be your solution. :-)

From: GARY HUBER
Topic: 21040 Message: 21080

As one who uses both CWSkimmer and a FLEX-1500 in panadapter mode to to watch a 10 kHz slice of a pile-up for the 5NN patterns, I can tell you it does not matter if you QSY after sending your call. If you send VK6DU VK6DU and move the P5DX sends KQ8M 5NN, K3KO 5NN, AB9M 5NN, VK6DU 5NN, QRZ 5 UP. You are already in the log, but if yo send P5DX TU 5NN VK6DU, the P5DX skimmer will display " VK6DU 5NN" . There are several things that do show alongside callsigns including QRL, QSL, CQ, 5NN, 599 so it would be possible for a DXpedition operator to work a pile-up with-out hearing the pile-up. Or with the right configuration the DX operator could work you simplex on YOUR frequency.

CWSkimmer is just another tool. It can be used, misused or abused. If you are QRP, low power, antenna restricted or antenna limited it can help you make smarter decisions about where to be in the pile-up.

My configuration of CWSkimmer is shown with drawings and screen shots at http://www.dxlabsuite.com/dxlabwiki/DDUtilPowerSDRN1MMSkimmerCommander .

Subject: RE: [DX-IS] DX use of SKIMMER

Hi Tim,

Well this was the next issue I was going to raise and you beat me to it.

Yes, we would need notice.

I am happy to just sit on one freq. and keep calling but only if I know I am not wasting my time…. J

Could DX come this this?

Interesting days and I think this would be a can of worms opening up if we go down that path..…

I can just hear someone complaining about them not being able to work a DXpedition on CW and then someone replying…."didn't you know they were a skimmer DXpedtion" o'boy….

73, Lance – VK6DU

From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf Of KQ8M
Sent: Wednesday, 10 April 2013 3:59 AM
To: DX-IS@yahoogroups.com
Subject: RE: [DX-IS] DX use of SKIMMER

The only drawback I can see on DXpeditions using skimmer and gathering a list of calls is, I for one, listen in the pileup for where they have worked the previous call and learn the pattern. So if they then have me like third on t he list, I am no longer on the same frequency. Bang I lose the Q unless they have the smarts to check the skimmer and see if they can see me answering.

Subject: Re: [DX-IS] DX use of SKIMMER

Lance,
You have to check a box to tell SKIMMER to only spot calls sending CQ.

Otherwise it decodes all call it can. You wouldn't want to use this all
calls option is a contest!

Thus in a pileup you can see the calls of the guys chasing the DX and at
what freq.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30411
SIDC SOLAR BULLETIN 11 Apr 2013, 1227UT
SIDC FORECAST (valid from 1230UT, 11 Apr 2013 until 13 Apr 2013)
SOLAR FLARES : Active (M-class flares expected, probability >= 50%)
GEOMAGNETISM : Severe geomagnetic storm expected (A>=100 or K>=7)
SOLAR PROTONS : Proton event in progress (>10 MeV)
PREDICTIONS FOR 11 Apr 2013 10CM FLUX: 150 / AP: 009
PREDICTIONS FOR 12 Apr 2013 10CM FLUX: 147 / AP: 009
PREDICTIONS FOR 13 Apr 2013 10CM FLUX: 145 / AP: 080
COMMENT: Seven sunspot groups are reported by Catania today. Catania
sunspot groups 40 and 43 (NOAA ARs 1718 and 1719 respectively) maintain
beta-gamma configuration of the photospheric magnetic field. C-class and
M-class flares are likely to erupt from at least one of these active
regions, with a small chance for an X-class flare (especially from
Catania sunspot group 43, NOAA AR 1719). An M6.5 flare peaking at 07:16
UT was detected today in the Catania sunspot group 43 (NOAA AR 1719),
accompanied by a metric type II burst observed by Humain starting from
around 07:02 UT. SDO/AIA data demonstrate that this flare was also
accompanied by coronal dimmings, an EIT wave, and a post-eruption
arcade, indicating the eruption of a CME. A full halo CME was first
detected in the SOHO/LASCO C2 field of view at 07:24 UT. The CME
plane-of-the-sky linear speed was around 930 km/s (the second-order fit
showed deceleration from around 1160 km/s to 800 km/s as the CME
progressed through the C2 and C3 fields of view). The corresponding
interplanetary disturbance is expected to arrive at the Earth in the
morning of April 13. Due to the position of the CME source region
(Catania sunspot group 43, NOAA AR 1719) close to the solar disk center
(around N09E12), the arrival of the magnetic cloud is possible, even if
the CME presented a strong asymmetry of the material distribution
towards the east. If present, the magnetic cloud will most probably have
left-handed chirality, with WSE or NWS magnetic field orientations. The
occurrence of a strong geomagnetic storm (K index around 7) will be
probable. The proton flux at energies above 10 MeV crossed the SEP event
threshold around 10:00 UT and is still rising at the time of writing.
The Earth is currently inside a slow (around 420 km/s) solar wind flow
with slightly elevated (5-6 nT) interplanetary magnetic field magnitude.
We expect quiet geomagnetic conditions in the coming hours.

TODAY'S ESTIMATED ISN : 079, BASED ON 08 STATIONS.

To: VE1AL
Subject: Re: VR2XLN

Don't worry, this letter will be posted along with the video, to
show your justification for being a lousy operator.

It doesn't matter if you are running a KW, 100 watts, or 1 watt, your
operating is piss poor and the only reason you got through is because he was fed
up with your constant calling. You are a poor excuse for an operator and
soon everyone else will know that too.

This is quite a shock. I've known Al since I was licensed, and he was a true, blue DXer. While he may never have worked a P5, he did achieve #1 DXCC HR before P5 was added to the list. I don't think I ever met a more ethical and honest DXer. His DX achievements are too long to list . . . from DXpedition participation, to QSL manager for many, etc. He will be sorely missed by all.

SB DX ARL ARLD015
ARLD015 DX news

This week's bulletin was made possible with information provided by K7LA, NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

FIJI, 3D2. Wes, ZL3TE is QRV as 3D2SE from Viti Levu Island, IOTA OC-016, until April 16. Activity is on the HF bands using mainly CW and some digital modes. This includes an entry in the Japan International DX contest. QSL to home call.

GHANA, 9G. Eltje, PA3CEE and Rene, PE1L are QRV as 9G5EME until April 24. This is an EME operation. QSL via PA3CEE.

WEST MALAYSIA, 9M2. Members of the Segamat DXers are QRV as 9M4CMN from Tioman Island, IOTA AS-046, until April 14. Activity is on the HF bands using SSB. QSL via operators' instructions.

MOZAMBIQUE, C9. Reinhard, DL6DQW is now QRV as C98RF from the Inhambane island group, IOTA AS-072. Activity of late has been on 12 meters from 1600 to 1700z. QSL to home call.

PORTUGAL, CT. Special event station CR5IARU will be QRV from April 13 to 19 in celebration of World Day of Amateur Radio on April 18. QSL via CT1REP.

PHILIPPINES, DU. Dindo, DV1UD will be QRV as DX8DX from the Turtle Islands, IOTA OC-225, from April 13 to 15. Activity will be in his spare time on 80 to 10 meters using CW and some SSB. QSL via M0OXO.

LIECHTENSTEIN, HB0. Look for operators PA2HGJ, PA2HW, PA2RDK, PA3CNO, PA3DFR, PA3HK and PE1FLO to be QRV as HB0/home calls from April 13 to 20. Activity will be on 160 to 10 meters using CW, SSB and PSK31. This includes some SOTA locations to be activated as well. QSL via PE1FLO.

ITALY, I. Members of the Radio Club Vercelli are QRV as II1MGY in commemoration of the sinking of the RMS Titanic. QSL via bureau.

NETHERLANDS, PA. Special event stations PA13KING and PB13ROYAL are QRV until April 30 during the transition of the monarchy from Queen Beatrix to Prince Willem-Alexander. QSL via PA9JO and PB5X, respectively.

EGYPT, SU. Andy, RW3AH is now QRV as SU9AF near Cairo. He is active on 160, 40, 20, 17, 15, 12 and 10 meters using CW and SSB. The length of his stay is unknown. QSL via UA3DX.

GREECE, SV. Special event station J49C is QRV until June 30 in celebration of the centennial of Crete and Greece's union. QSL via SV9COL. In addition, special event station SV2013ATGM is QRV until April 21 in celebration of the 8th International Alexander The Great Marathon. QSL via SZ2TSL.

COSTA RICA, TI. Special event call TE1856 is QRV in commemoration of the marching feat on the part of the Costa Rican army, known as La Ruta de los Heroes. Activity is on 80 to 10 meters using CW, SSB and PSK. QSL via operators' instructions.

MICRONESIA, V6. Sho, JA7HMZ and Kei, JA7GYP will be QRV as V63DX and V63T, respectively, from Pohnpei Island, IOTA OC-010, from April 15 to 20. Activity will be on 40 to 6 meters using CW, SSB and RTTY. QSL direct to home calls.

LORD HOWE ISLAND, VK9L. Oliver, W6NV and Seppo, OH1VR are QRV as VK9LT and VK9/OH1VR, respectively, until April 16. Activity is on the HF bands. This may include entries in the Japan International DX CW and Yuri Gagarin DX contests. QSL direct to home calls.

TOKELAU ISLANDS, ZK3. Hans, DL6JGN and Guenter, DL2AWG will be QRV as ZK3N from Nukunonu-Atoll, IOTA OC-048, from April 15 to 30. Activity will be on 80 to 6 meters using CW, SSB and various digital modes. QSL via DL2AWG.

THIS WEEKEND ON THE RADIO. The Japan International DX CW Contest, SKCC Weekend CW Sprintathon, NCCC RTTY Sprint, NCCC Sprint CW Ladder, Montana QSO Party, New Mexico QSO Party, EU Spring CW Sprint, Georgia QSO Party, Yuri Gagarin International DX CW Contest, International Vintage HF Contest and the Hungarian Straight Key CW Contest will keep contesters busy this weekend. The NAQCC-EU Monthly CW Sprint is scheduled for April 15. The 222 MHz Spring Sprint is scheduled for April 16. Please see April QST, page 84, and the ARRL and WA7BNM Contest websites for details.

From: GARY HUBER
Topic: 21082 Message: 21093

RIP Al. We didn’t always agree, but we had some great exchanges including my working P5/4L4FN twice in the same afternoon: once as N1SF (I’m still trustee of the club license) and with my own call AB9M. That one was a two-fer.

Please pass along my condolences as well. Al – VE1AL will be missed by many.

Best regards,

CSM(r) Gary L Huber – AB9M

I guess the subject line says it all...

I had a phone call about an hour ago (1900z) from Al's daughter, saying that she had come home from work and found that he'd passed away, apparently from a heart attack.

No further details at this time, but as they become available, I will post them here.

73, Al. Sorry about the P5

This is quite a shock. I've known Al since I was licensed, and he
was a true, blue DXer. While he may never have worked a P5, he did
achieve #1 DXCC HR before P5 was added to the list. I don't think I
ever met a more ethical and honest DXer. His DX achievements are too
long to list . . . from DXpedition participation, to QSL manager for
many, etc. He will be sorely missed by all.

Very sorry to hear that, Lance. Mike was my first VK on top band.
We worked occasionally on 80 as well, and on both bands it was his
antenna system(s) that did all the work.

That is 2 icons in such a short time. While they were
geographically at antipodal points on the globe, they were eerily
similar in their dedication to Ham radio and DXing. The hobby has lost
two gentlemen.

73, Paul VE1DX

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30412
SIDC SOLAR BULLETIN 12 Apr 2013, 1235UT
SIDC FORECAST (valid from 1230UT, 12 Apr 2013 until 14 Apr 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >= 50%)
GEOMAGNETISM : Severe geomagnetic storm expected (A>=100 or K>=7)
SOLAR PROTONS : Proton event in progress (>10 MeV)
PREDICTIONS FOR 12 Apr 2013 10CM FLUX: 140 / AP: 009
PREDICTIONS FOR 13 Apr 2013 10CM FLUX: 143 / AP: 076
PREDICTIONS FOR 14 Apr 2013 10CM FLUX: 146 / AP: 022
COMMENT: Catania sunspot groups 40 and 45 (NOAA ARs 1718 and 1721) have
beta-gamma configuration of the photospheric magnetic field and might
produce flaring activity up to M-level. Catania sunspot group 43 (NOAA
AR 1719) is growing and has developed beta-gamma-delta configuration of
its photospheric magnetic field. Due to this rapid increase in the
number of spots and magnetic complexity, we expect further significant
flaring activity (probably up to X-level) from this active region, with
a possibility of another Earth-directed CME and an SEP event. The
current SEP event associated with the full halo CME of April 11 is still
ongoing, although the proton flux is decreasing. We expect a slight and
temporary increase of the proton flux at the arrival of the
interplanetary shock associated with the halo CME of April 11. The Earth
is currently inside a solar wind flow with an intermediate speed (around
450 km/s) and average (around 5 nT) interplanetary magnetic field
magnitude. We therefore expect quiet geomagnetic conditions until the
arrival (most probably tomorrow morning) of the interplanetary
disturbance (probably a shock and a magnetic cloud) associated with the
full halo CME of April 11. The occurrence of a strong geomagnetic storm
(K index around 7) will be probable.

TODAY'S ESTIMATED ISN : 075, BASED ON 09 STATIONS.

SOLAR INDICES FOR 11 Apr 2013
WOLF NUMBER CATANIA : 120
10CM SOLAR FLUX : 137
AK CHAMBON LA FORET : 008
AK WINGST : 005
ESTIMATED AP : 004
ESTIMATED ISN : 086, BASED ON 17 STATIONS.

13 April 2013 A.R.I. DX Bulletin
No 1145
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5H - Bodo, DF8DX will be active from Tanzania on 20-28 April. His tentative itinerary is as follows:
20 April 5H1DX/3 Dar Es Salaam
21 April 5H1DX/3 Bongoyo Island (AF-075), from 9 to 19 UTC
22-26 April 5H1DX Pemba Island (AF-063)
26-28 April 5H1DX Zanzibar (AF-032)
He will operate mainly CW on the IOTA frequencies, with 100 watts and vertical antennas. QSL via DF8DX and LoTW.
5Z & 6O- Roger, LA4GHA is now active from Kenya (5Z4/LA4GHA) and Somalia (6O0LA) while on a work assignment for the United Nations Office on Drugs and Crime. He is QRV on 160-6 metres CW, SSB and digital modes until December 2014. QSL via LA4GHA. [TNX LA4GHA]
6W - Luc, F5RAV will be active again as 6V7T from Senegal from 26 April to 5 May. He will operate SSB and PSK and will participate in the Helvetia Contest (27-28 April). QSL via home call, direct only. [TNX F8REF]
9A - Look for Pista 9A/HA5AUC, Ed 9A/HA5BWW and Karl 9A/HA7PC to be active from Rab Island (EU-136) on 21-27 April. They will operate mainly CW on the HF bands and 6 metres. QSL via home calls, direct or bureau. [TNX HA0HW]
A3 - Masa, JA0RQV will be active as A35JP from Tongatapu (OC-049), Tonga on 5-22 May. He will be QRV on 80-10 metres CW and SSB in his spare time, typically during his evening-night hours, with 100 watss and a GP. QSL via home call, direct or bureau, and LoTW. [TNX JA0RQV]
CT9 - Costantino, IW2NXD and Antonio, IK2ZJR will be active holiday style as CT9/IW2NXD and CT9/IK2ZJR from Madeira (AF-014) on 12-20 May. They will operate SSB, CW and PSK31. QSL via home calls, bureau preferred. [TNX IK2XDE]
DU - Dindo, DV1UD was active as DX8DX from Bongao, Tawi Tawi group (OC-174) on 9-11 April. The operation from the Turtle Islands (OC-225) is now scheduled for 12/13-15 April. QSL via M0OXO (OQRS for direct and bureau cards at www.m0oxo.com)
F - TM114M will be active during the International Marconi Day's weekend to celebrate the 144th anniversary of the first wireless transmissions across the Channel (27 March 1899). QSL via F5JYD,

direct or bureau. [TNX F5JYD]
FT5Z - FT5ZM is the callsign issued to the Amsterdam Island DXpedition planned for January-February 2014 [425DXN 1144]. The website is now up and running at www.amsterdamdx.org
GJ - Peter ON8ZZ, Frederik ON8ZL and Frank ON5NQ will be active as MJ/OT9Z from Jersey (EU-013) on 2-9 August. They will operate SSB, CW and digital modes on the HF bands and 6 metres. QSL via ON8ZL, direct or bureau, and LoTW. Further information can be found at www.dxpeditionchannelislands.weebly.com [TNX ON8ZL
JA - Toku, JA6TNY will be active as JA6TNY/0 from Awa Island (AS-117) from around 7 UTC on 20 April until around 3 UTC on the 21st. He will operate CW and SSB on 160-10 metres, with planned main activity on 20m. [TNX JN6RZM]
KH0 - Yutaka, JQ2GYU and his wife Miho, JJ2VLY will be active as NH0J from Tinian (OC-086) between 27 April and 1 May. They plan to operate CW, SSB amd RTTY on 80-10 metres. QSL via JJ2VLY, direct or bureau. [TNX NG3K]
PA - Wim, PA0WRS will be active as PA0WRS/p from Ameland Island (EU-038) on 19-26 April. QSL via home call, direct and bureau. [TNX rsgbiota.org]
PA - Bob, PA5V will be active as PA6IMD on 19-22 April for the International Marconi Day, and as PA75FOC on 4-31 May to celebrate the 75th anniversary of FOC (www.g4foc.org) [425DXN 1143]. [TNX F8REF]
SU - Sparky, RW3AH is now active as SU9AF from Egypt. His license in valid until 31 December, and is allowed to operate on 160, 40, 20, 17, 15, 12 and 10 metres (80, 30 and 6 metres are not permitted). He runs 100 watts into a delta loop for 20 and 10m, and a vertical for the other bands (no antenna yet for 160m). QSL via UA3DX. Further information and logserach at http://www.cqdx.ru/su9af/
SV - Francois, ON4LO will be active as SV3/ON4LO/p from the Peloponnese from 15 April to 30 May. He plans to operate SSB on 40-6 metres, with activity from various lighthouses. QSL via home call. [TNX ON4LO]
SV - Five members of the Sands Contest Group (namely Ian G0VGS, Barrie G1JYB, Stephany G1LAT, Bob G1OCK and Hughie G4UME) will operate as SZ8S from the Aegean Radio Association's Radio House at Zervou Point on Samos Island (EU-049) between 16 and 30 May. QSL for this operation via G1LAT (direct) or M0SCG (bureau), plus eQSL. [TNX SV8CYV]
UA - RA9LR, UA9LAC, UA9LEW, UA9LP, UA9LT, UB9LAG and UB9LBS will be active as RT9L/8 from Nature Park "Bazhovskiye mesta" on 17-21 April. They will operate CW, SSB and digital modes on 80-10 metres. QSL via UA9LP (email requests for bureau cards can be sent to ua9lp[@]mail.ru). [TNX UA9LP]
UA - A large number of callsigns with R27, RA27, RT27 and RU27 special prefixes will be active between 18 April and 17 July to celebrate the XXVII Summer Universiade (the World University Games organized by the International University Sports Federation) to be held in Kazan, Russia on 6-17 July.

V6 - Look for JA7HMZ (V63DX) and JA7GYP (V63T) to be active from Pohnpei (OC-010), Micronesia on 15-20 April. QSL via home calls. They plan to operate CW, SSB and RTTY on 40-6 metres. [TNX NG3K]
W - Once again Joe, K5KUA will be active as K5KUA/5 from Galveston Island (NA-143) on 26-28 April. He usually operates CW only on 40-10 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org]
XE - Celebrating World Amateur Radio Day and IARU's 88th anniversary (18 April), the DXXE Group (www.dxxe.org) will be active on 160-6 metres and satellites as 4A8DMR on 18-21 April. QSL via N7RO and LoTW.
XW - A multi-national multi-operator DXpedition to Vientiane, Laos, is being planned for 6-16 September. Team members 9M6DXX, 9V1YC, EA2TA, EA3NT, EA5KA, F4BKV, G3XTT and MM0NDX plan to operate five stations from 160m to 6m on CW, SSB and RTTY. A website is being produced and will be available soon. The callsign and further details will be announced later. [TNX 9M6DXX]
YB - Adhi, YB3MM and Teti, YB2TET expect be active holiday style as YB3MM/2 and YB2TET/p from Karimunjawa (OC-186) on 13-16 April. They plan to be QRV on 15 metres SSB between 10 and 23 UTC. QSL via IZ8CCW.
YN - Eric, K9GY will shut down his T6MO station on 28 April and then leave Afghanistan. On 22-28 May he will operate as YN2GY from Nicaragua, including a SOAB Low Power entry in the CQ WW WPX CW Contest. Outside the contest he will concentrate on 30, 17, 12 and hopefully 6 metres CW. QSL via home call, direct or bureau, and LoTW. [TNX OPDX Bulletin]
ZS8 - On 10 April Carson, ZR6CWI (ZS8C) and David, ZS1BCE (ZS8Z) [425DXN 1140] left Cape Town for Marion Island (AF-021). They expect to be QRV around mid-May, after the current overwintering team heads back home. They will be QRV in their spare time, with activity on SSB and digital modes using "the commercial broadband HF antenna at the base". QSL for both via ZS1HF. More information can be found on their respective qrz.com sites. Pierre, ZS1HF also reports that "Carson's girlfriend, Nadia, and the team's diesel mechanic, Marius" will take their Radio Amateur's Examination (RAE) while on the island, so "there will eventually be four active hams on Marion Island during the next year".

CQ MM DX CONTEST ---> The third edition of the CQ Manchester Mineira DX Contest, sponsored by the the Juiz de Fora CW Group (www.cwjf.com.br), will be held on 20-21 April. It is a continuation of the Manchester Mineira All America CW Contest, initially limited to Brazil (1993-1996), then expanded to South America (1997-2006), to the Americas (2007-2010) and finally to

the world (2011). It will run from 12 UTC on Saturday through 23.59 on Sunday, on 80, 40, 20, 15 and 10 metres CW. Complete details can be found at www.cqmmdx.com [TNX PY4WAS]

NEW IOTA CHECKPOINT ---> With effect from 1 May 2013 Tony Ritchie, G4VMX will be stepping down as checkpoint for Scotland, Wales, Northern Ireland, Channel Islands, Isle of Man and all British SWLs. He will be replaced by Bob Barden, MD0CCE who has agreed to take over responsibility for this checkpoint area. Bob's address is correct on QRZ.com. There will be no other change to UK checkpoints. [TNX G3KMA]

QSL T48K ---> Raul, CO8ZZ reports that DK1WI is no longer the QSL manager for T48K (he still manages all T48K operations from 1999 until last year's CQ WW VHF Contest). The QSL route for contacts made during the CQ WW WPX SSB Contest 2013 is via F5FYO, direct (Hugo O. Gomez, P.O. Box 50033, 33191 La Reole CEDEX, France) or bureau.

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).

+ SILENT KEYS + Hermann Sachse (5Z4RT), passed away on 4 April. "He had been in Kenya for decades", says Ted Alleyne, 5Z4NU, Chairman of the Amateur Radio Society of Kenya, "was a Life Member of ARSK and ran our Sunday morning nets for many years as well as being involved in a medical net based in Germany".
- Nusret Abadzic E73N (ex T93N, YU4BN) passed away on 6 April after a long illness at 82 years of age. For many years he was the IARU liaison officer for ARABiH, Bosnia-Hercegovina's national amateur radio society.
- Alan R. Leith (VE1AL) passed away unexpectedly on 11 April, apparently from a heart attack, at 66 years of age. Over the years Al edited several DX publications, and in 1988-89 he participated in the CY9DXX and CY0DXX DXpeditions to St. Paul and Sable islands. In paying their tribute to "a true gentleman in every sense of the word", the CY9M team says that last year's expedition to St. Paul "would not have happened without Al's help and knowledge".
- Mike Bazley, VK6HD passed away on 12 April. one of Australia's most successful DXers, he was the first station from Oceania to obtain DXCC on 160 metres.

QSLs received direct or through managers: 3D2MF, 3D2PT (OC-121), 4L8A, 4S7NE, 4W0VB, 5N0NH, 5N7YZC, 5X8C, 5Z4/DL1QW, 6Y3M, 7O6T, 8Q7TB, 9U4U, 9X0NH, A63HI (AS-021), BV1EL, CE6WUW, CT9/DL5AXX, CW5X, D2QR, DU9AQQ (OC-235), E51E, E51WL, ED5K (EU-093), ED5RKB (EU-093), EU3DN, EX/UA4WHX, EY8/UA4WHX, EY8MM, FH8PL, FO4BM, GI0BQX, GN4KPT, H40FN, HA30S, HC2/UA4WHX, HD2A, HG1S, HS0ZCW, HS0ZCY, II2POPE, J52HF, JG8NQJ/JD1, JT1CO, JY5MM, KH2/G3ZEM, KL7DX, L22D (SA-022), LX1HD, MI0MVP, OF9X, OH0RJ, OJ0X, OO7P, PJ2T, RA0R, RI0K (AS-061), RI0K/p (AS-092), RI1FJ, RV3EFH/0, S21XV,

21108. Re: VE1AL - SK

Yahoo group: DX-IS (2013)
Date: 2013-04-12 16:58:18 UTC
From: mm0ndx
Topic: 21082 Message: 21108

CY9M 2012 would not have happened without Al's enthusiasm and help. All the team are shocked and saddened at Al's passing.

On behalf of the CY9M team, it was a pleasure to meet Al and spend some time with him.

http://www.cy9m.com/al-leith-ve1al-silent-key/

One final 73, Al.

Col MM0NDX and all the CY9M crew.

>From Tad Cook, K7RA
Seattle, WA April 12, 2013
To all radio amateurs

SB PROP ARL ARLP015
ARLP015 Propagation de K7RA

With sunspot numbers and solar flux up, geomagnetic indices down, and it being Spring time, what could be better for HF propagation? That was the case this week, until Thursday when a magnitude 6.8 X-ray flare and CME erupted, and it seems to be aimed toward Earth. Expect it to arrive on Saturday, April 13.

Average daily sunspot numbers rose this week by nearly 57 points from last week, to 138.1. Average daily solar flux was up more than 25 points to 138.8. The average daily planetary A index dropped by more than half from 9.4 to 4.1.

With solar indices rising, the daily sunspot number reached 162 on April 8 and 163 on April 10, the highest level since January 11 when it was 166.

The latest solar flux prediction from USAF and NOAA sees flux values of 138, 135, and 130 on April 12-14, 125 on April 15-16, 120 on April 17, 115 on April 18-19, 95 on April 20-23, then 100, 105, 110, 115 and 120 on April 24-28, 120 on April 29 through May 1, then rising to a peak of 138 on May 5.

The predicted planetary A index is 5 on April 12, 26 on April 13, 45 on April 14, 8 on April 15, 5 on April 16-22, then 12, 8, 18 and 15 on April 23-26, 5 on April 27 to May 4, and 8 on May 5.

A predicted A index of 45 is a big number. At 2358 UTC on April 11 I received a geomagnetic disturbance warning from the Australian government's Ionospheric Prediction Service: "A full halo earthward directed CME was observed on 11 April with estimated arrival late on 13 April. Geomagnetic activity is expected to rise up to Major storm levels due to the effect of this CME late on 13 April and through most parts of the day 14 April." They predict quiet to major storm on April 13, then major storm down to unsettled conditions on April 14.

The Czech Propagation Interest Group sent a geomagnetic forecast from Petr Kolman, OK1MGW. This appears to be a little early to include the effects of the flare. He predicts active to disturbed conditions April 12, quiet to active April 13, mostly quiet April 14-15, quiet to active April 16-17, quiet to unsettled April 18, quiet to active April 19, quiet to unsettled April 20-22, quiet to active April 23-24, active to disturbed April 25-26, quiet to unsettled April 27-28, and mostly quiet April 29-30.

Jon Jones, N0JK followed up on his comments in last week's Propagation Forecast Bulletin ARLP014 about propagation in the Pacific. He writes, "The distance between Hawaii and Wake Island is around 3,925 km. Or close to the limit of a standard F2 hop, which is about 4,000 km. Thus an optimum F2 path for the lowest possible MUF. Possibly the F2 is off the northern high MUF ridge. Hawaii and Wake Island are both about 20 degrees geomagnetic north. The 6-meter path between Hawaii and Wake Island appears to be reliable and consistent. KH7Y heard the KH9/WA2YUN/b this morning (April 5) from 0500 to after 0720 UTC. The beacon runs 50 watts to a loop antenna."

Bruce Smith, AC4G of Taft, Tennessee (grid EM65pb), several miles north of the Alabama state line, reports: "I was so excited to QSO VK9CZ on 80m CW that I had to write in. Our QSO took place on 3 April around 2345Z when VK9CZ and my location in southern Tennessee were in sunlight at the edge of the terminator. This had to be one of my best QSOs ever due to the level of difficulty, the distance, and no darkness at either location (so my terminator map showed). The VK9CZ signal was S5-S7 on my transmit antenna (vertical). The signal was so strong that my separate receive antenna was not required. Since that date, I have not been able to copy their 80m signal. I guess it was one on my luckiest days to be able to make this QSO."

Sounds like fun! At that day and time, I would expect good propagation on 15 and 17 meters! VK9CZ is the Cocos-Keeling DXpedition, and the path was exactly 10,843 miles, or 17,450 km. Time given of 2345 UTC was 4 minutes after sunrise at the South Pacific end, and 21 minutes prior to sunset on the Tennessee end.

W3HKK sent this account of his participation in a club effort for the CQ World Wide WPX SSB Contest of two weeks ago: "WW8OH and the Cooken ARC Contest Animals had been planning for months to give the WPX contest a shot. The week didn't look promising. SSNs dropping. An indices in the 20s. And warm WX with its high QRN on Fri night in particular were stacked against us.

"DX wasn't that good. 10 was spotty. 15 better but not great. 20-40 were loaded with sigs but nowhere to go.

"WW8OH (400w to a 35 ft high hex beam and a 70 ft high, 600 ft horizontal loop) has been on a quest to score 1000 Qs and 1M points in some contest! ANY contest! So far this year we'd get 600 Qs on Day One, but struggle on Day Two, always falling short, with QSO

totals usually in the mid 800s. We were thinking the WPX could do it for us, thanks to domestic and DX contacts being allowed.

"Friday was a steady slog, all night. Heavy QRN hurt scores on 40-80-160m. Saturday was more of the same, but QRN was easing. Around 9 pm Sat night we moved to 40m and began to work them, 1 at a time, then 2, then 3, then a small pile, then stations 10 deep! We were logging them as fast as we could. AC8GX was at the mic. AC8GI was at the laptop. And I was listening for calls and shouting them out. Poor AC8GI. He was getting one call in his left ear, and another call in his right ear, and had to choose which one to go with. Our rates were building (N3FJP software) into the 40s, 50s, 60s, 80s, 100, 120, 140, and peaking out at 149 Qs per hour per the 20 min adjusted number. We were having a BALL! This went on for FIVE hours, till around 2 am Sunday morning. Loud ones, Weak ones. In between ones. Mostly Stateside sigs. Bless the West coast. They were ALL on the air in droves.

"By the time we broke for sleep Sunday at around 3 am, we had already set club records with 1100 Qs and 1M points. What an amazing run on 40m. Nearly half of our total Qs had come on 40m!

"Sunday at 11am we resumed, focusing on 10-15-20m, but without any runs. By 6 pm we were up to 1300 Qs but our (new) dream of hitting 1500 was dying. At 7pm we decided to see if 40M had another run left in it. 7.240 was quiet, and it began again. A few, then more, then another pile up! We spent the last 55 minutes in ham heaven, with rates over 100/hour, until at 7:55 we heard a carrier, followed by music. A broadcast station ended it for us, and we finished with 1449 Qs and over 1.5M points. COOKEN Club records, from our QTH in Fairfield County, Ohio.

"80M gave us a nice couple of hours on Sat night, as well, despite high QRN. But in order of QSOs, it was 40 by a mile, then 20, 15, 10, 80 and finally 160m.

"It feels GOOD to hear the pile up calling YOU! Guys telling us we owned the frequency, were 40 over. DX worked included a smattering of good ones: Antarctica, VK, ZL, JA, DU, YB, CN2R, a fair number from the NE coast of Brazil, some really OLD guys in G, EI, GM, F, and SM5. Guys I remember working back in the 60s! Still going at it, getting a thrill out of contesting. There is hope for all of us!

"So even when propagation is far from optimum on 10-15-20, don't sell 40 or 80m short. On this weekend, 40 meters was in amazing shape for domestic contacts, and gave us a thrill."

Very sorry to hear that, Lance. Mike was my first VK on top band.
We worked occasionally on 80 as well, and on both bands it was his
antenna system(s) that did all the work.

That is 2 icons in such a short time. While they were
geographically at antipodal points on the globe, they were eerily
similar in their dedication to Ham radio and DXing. The hobby has lost
two gentlemen.

Such bad news to the whole ham community, especially dx chasers. I passed many an email on and off the board with him and he sure had much wisdom to share. As I read through the thread, I find that we also lost Mike VK6HD, whose qsl is on my wall.
My condolences to both families, what a loss to us all.

I guess the subject line says it all...

I had a phone call about an hour ago (1900z) from Al's daughter, saying that she

had come home from work and found that he'd passed away, apparently from a heart

attack.

No further details at this time, but as they become available, I will post them here.

73, Al. Sorry about the P5

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30413
SIDC SOLAR BULLETIN 13 Apr 2013, 1248UT
SIDC FORECAST (valid from 1230UT, 13 Apr 2013 until 15 Apr 2013)
SOLAR FLARES : Active (M-class flares expected, probability >= 50%)
GEOMAGNETISM : Severe geomagnetic storm expected (A>=100 or K>=7)
SOLAR PROTONS : Warning condition
PREDICTIONS FOR 13 Apr 2013 10CM FLUX: 140 / AP: 039
PREDICTIONS FOR 14 Apr 2013 10CM FLUX: 142 / AP: 045
PREDICTIONS FOR 15 Apr 2013 10CM FLUX: 143 / AP: 008
COMMENT: Catania sunspot groups 40 and 43 (NOAA ARs 1718 and 1719
respectively) show the signs of decay, although these two active regions
(as well as Catania sunspot group 45, NOAA AR 1721) have beta-gamma
configuration of the photospheric magnetic field. M3.3 flare was
detected on April 12 peaking at 20:38 UT in the Catania sunspot group 40
(NOAA AR 1718). It was not associated with a CME. The delta sunspot in
the Catania sunspot group 43 (NOAA AR 1719) does not exist anymore, so
an X-flare (and an SEP event) is not very likely (although an
Earth-directed CME remains possible). We expect further flaring activity
on the M-level, with a non-negligible chance for an isolated X-class
flare. The proton flux at energies above 10 MeV is currently below the
SEP event threshold, although it still exceeds significantly the
background level. In such a situation, a relatively small increase of
the proton flux at the expected shock arrival may lead to crossing the
SEP event threshold again. The Earth is currently inside a slow (around
400 km/s) solar wind flow with average (around 4 nT) interplanetary
magnetic field magnitude. We expect quiet geomagnetic conditions until
the arrival (expected later today) of the interplanetary disturbance
produced by the halo CME of April 11. The occurrence of a strong
geomagnetic storm (K index around 7) will be probable.

From: NA8M
Topic: 21082 Message: 21115

All:

Our radio club in Western Michigan does a special "Last Call" Ceremony for members of our club who are deceased. We generally do this ceremony on two-meters. The details of the ceremony are as follows:

Silent Key Ceremony

I am assuming you are asking for a written copy of the "Last Call" procedure. As far as I know there has never been a written procedure. The whole thing was the idea of K8MHZ who ran some of the initial nets. It is simply an opportunity for everyone to make a "last call". We have done it a couple of ways. If my memory serves me, the earliest ceremonies were held following the Wednesday night net. A special net was called immediately following the Wednesday night net by a net control station who volunteered for the duty. I do not have a script for that net. Those checking in were assumed to want to participate. The net control would go through the roster, giving everyone a chance to make a "last call". For example, I have a couple of references to the last call ceremony for K8ROH. The call would go something like this:
"K8ROH, K8ROH this is N8YJT"
Listen
"K8ROH, K8ROH this is N8YJT"
Listen
"Nothing heard, N8YJT back to net control"
Most of the time there would only be one call instead of two. But some stations would want to do it twice.The other, more recent method has been to include to the above within the 2 meter net. Assuming everyone would want to participate. This may be in error, but it has not been a problem so far.

This is an opportunity to remember the SK. Oftentimes someone will record the ceremony and offer a copy of same to the family.

If you would like to do such a "Last Call" Ceremony in memory of Al, VE1AL we might want to arrange something on HF.

Bill, NA8M

This is the first time that I've posted to this group (I've been lurking here for some months), but feel motivated to, what with the double dose of sad news. I worked Mike last November; I'm looking at his card now. He's easily my farthest DX contact, some 11,600 miles as the (very weary) crow flies, and it'll be harder to get much farther than that and stay on the planet. I was thrilled when he came back to me, faint but clear on 17m one night into my indoor Buddipole.

I always appreciated Al's comments in this group, whether or not I agreed with him. He was always insightful, spoke his mind, and had the experience of a lifetime of DXing to contribute. I looked back at my log and see that I did work him once, last Canada Day.

May they both rest in peace.

SIDC SOLAR BULLETIN 14 Apr 2013, 1245UT
SIDC FORECAST (valid from 1230UT, 14 Apr 2013 until 16 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Minor geomagnetic storm expected (A>=30 or K=5)
SOLAR PROTONS : Warning condition
PREDICTIONS FOR 14 Apr 2013 10CM FLUX: 123 / AP: 023
PREDICTIONS FOR 15 Apr 2013 10CM FLUX: 121 / AP: 017
PREDICTIONS FOR 16 Apr 2013 10CM FLUX: 119 / AP: 004
COMMENT: NOAA ARs 1718 and 1719 (Catania numbers 40 and 43) are
decaying, although maintaining their beta-gamma configuration of the
photospheric magnetic field. NOAA AR 1721 (Catania number 45) decayed
also and is now classified as beta active region. No flare above the C2
level occurred during the past 24 hours. We expect flaring activity on
the C-level, also from the rapidly emerging NOAA AR 1723 (no Catania
number yet). An isolated M-class flare is not excluded. Due to two
beta-gamma active regions in the western hemisphere, we maintain the
warning condition for protons, although their flux at energies above 10
MeV continues to decrease. The Earth is currently inside the post-shock
solar wind flow with speed around 500 km/s and interplanetary magnetic
field (IMF) magnitude around 12 nT. The north-south IMF component Bz has
been almost exclusively positive after the shock arrival, so the
geomagnetic conditions remained at the quiet to unsettled level. The
ICME driving the shock has not arrived yet. If it arrives, a geomagnetic
disturbance only up to the minor storm level (K = 5) can be expected due
to low ICME speed.

and on SSB with some CW. He will use an IC-706 into a mag mount vertical and/or dipole. QSL via his home callsign direct.

5T1, MAURITANIA (Special Event). Look for Jean, 5T0JL (ON8RA), to be active as 5T1FOC during the month of May. Activity is to celebrate the 75th anniversary of FOC (First Class CW Operators' Club). The special license was issued by the l'Autorité de Régulation, National Council of Regulation in Mauritania (ARE) on March 10th. For more details on the FOC, visit: http://www.g4foc.org
There will be other special FOC callsigns on during the month of May, as well as a special award available. See the Web page above for more details.

8Q, MALDIVES. Jim, G3VDB, will be once again active as 8Q7EJ, but this time from Komandoo Island (AS-013) between May 13-26th. Activity will be holiday style mainly on 20 meters using CW and SSB. QSL via his home callsign. The 2009/2010/2011/2012 8Q7EJ logs are available on the Clublog Web page at: http://www.clublog.org/logsearch/8Q7EJ

9H, MALTA. Operators Olaf/DL4HG and Holger/DL5XAT will once again be active as 9H3OG and 9H3TX, respectively, from Gozo Island (EU-023) between November 17-25th. Activity will be on the 30/17/12 meters using CW and RTTY. Operations will also include the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry using the callsign 9H3TX. QSL 9H3OG via DL4HG, by the Bureau or direct. QSL 9H3TX via DL5XAT, by the Bureau, direct or LoTW.

A3, TONGA (Update to OPDX.1107). As mentioned last week, Masato "Masa", JA0RQV, a member of a DX group in region zero of JA known as JA0-DX-GANG, will be active as A35JP from Tongatapu Island (OC-049) between May 5-22nd. Activity will be limited as Masa is there working for the Tongan government, so look for him possibly every night (local time) after his work. Operations will be on 80-10 meters using CW and SSB. QSL via his home callsign, by the Bureau or direct. For more info, see OPDX.1107 or visit Masa new Web page at: http://www.sato3.com/a35jp/index.html

AFRICAN TOUR. Roger, LA4GHA, is now in Africa on work assignment for the United Nations Office on Drugs and Crime (UNODC) in East Africa, until December 2014. He has been active as 5Z4/LA4GHA from Nairobi, Kenya, and is expected to be active as 6O0LA sometimes from Garowe, Somalia. Activity will be on 160-10 meters using CW, SSB and the Digital modes, as time permits. QSL via LA4GHA, by the Bureau or direct.

CQMM DX CONTEST/2013 (Reminder)! Ed, PY4WAS, CWJF President, wants to invite everyone to participate in the CQMM DX Contest which is held April 20-21st. For more details, see: http://www.cwjf.com.br

CT9, MADEIRA ISLANDS. Operators Costantino/IW2NXD and Antonio/IK2ZJR will be active as CT9/homecall from Madeira Island (AF-014) between May 12-20th. Activity will be "holiday style". If time permits, they will operate CW, SSB and PSK31. QSL via the Bureau to their home callsign.

EE8, CANARY ISLANDS. Luis, EA8AY, will be active as EE8X from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-band entry. QSL via W2GR. Visit his Web site at: http://www.ea8ay.com/ef8x2/index.html

EG3, SPAIN (Special Event). Members of local section of URE (Union Radioaficionados Españoles) in Tarragona, together with the Radio Club del Tarragones, will activate the special event callsign EG3FTV between May 13-26th. Activity will take during the "Festival Tarraco Viva" (see <http://www.tarracoviva.com>). QSL Manager is EA3BDE. QSL via Bureau.

FT5Z, AMSTERDAM ISLANDS. The Amsterdam Island DXpedition Web site is now active and available on-line at: http://www.amsterdamdx.org

IDXC 64TH (VISALIA CONVENTION) NEWS (IOTA Dinner News Flash). Rick, K6VVA, reports: "For any folks making late reservations for the Visalia DX Convention, there may still be a few a few seats left for 'walk-ins' at the IOTA Dinner on Friday evening, April 19th. Tnx to Phil Parton (National Sales Manager) and Kenwood Communications, I am thrilled to announce that the Grand Prize for the IOTA Dinner Raffle will now be a new Kenwood TS-480HX (200 Watt) TXRX. This is the perfect IOTA Expeditioner rig, and I now carry two of these on all my IOTA Expeditions. Having the extra 3dB signal gain from a 200 Watt radio can sometimes make the difference between a QSO being made or not when it is not possible to take along an amplifier."

IOTA NEWS.....
AS-073. Members of the Malaysian Special Expedition Team will be active as 9M2SE from Perhentian Besar Island between May 1-3rd, to promote Malaysia's beautiful island and also IOTA activities. Operators mentioned are Piju/9M2PJU, Khairul/9M2KRZ, Rizal/ 9M2RDX and their special guest from Poland, Jacek/SP5APW. Jacek will continue to operate until May 7th, as 9M2/SP5APW. Their operating equipment will be two 100 watts transceivers, a vertical antenna and a tribander yagi. Activity will be on 40-10 meters using CW, SSB and the Digital modes. For QSL information, please read info carefully on QRZ.com. ADDED NOTES: The Perhentian Islands (Pulau Perhentian in Malay) lie approximately 10 nautical miles (19 km) off the northeastern coast of West Malaysia in the state of Terengganu, approx- imately 40 miles (64 km) south of the Thai border. The name "Perhentian" means "stopping point" in Malay, referring to the islands' traditional role as a waypoint for traders between Bangkok and Malaysia. The islands were sparsely inhabited by fishermen for centuries, although tourism now accounts for most economic activity. The Perhentian Islands appear on many maps of the nineteenth and twentieth century as 'The Station Islands'. This arises from the British colonial period, as an English translation of "stopping point".

EU-068. Members of the Charente DX Group (CDXG) will be active as TM0SI from Ile de Sein between April 27th and May 4th. They

will operate on CW, SSB and the Digital modes on 80-10 meters.
Operators mentioned are Eric/F5LOW, Laurent/F5MNK, Alain/F6ANA,
Bertrand/F6HKA and Leon/ON4ZD/OS0S. All QSOs will be confirmed
automatically via the Bureau. QSL route for direct cards are
via F5LOW. A log search will be available on ClubLog.

EU-088. Operators Harry/PA1H and Nico/PA7PA will be active as OZ/homecall
from Laeso Island (DIA NK-003, WLOTA 2820) between now and April
26th. Activity will be on 80-10 meters, if possible also on 160m,
using SSB and the Digital modes. QSL via his home callsign,
direct or by the Bureau.

EU-127. German operators have once again activated the special callsign
DM50IOTA from Neuwerk this past week between April 12-14th.
This opertaion also counts for the World-Wide Flora and Fauna
(WWFF) as DLFF-005 and for lighthouse chasers as ARLHS FED-165.
QSL via DL2VFR, by the Bureau or direct. For more details and
updates, visit the Web site at: http://www.iota-expedition.com
ADDED NOTE: This is the fourth German Island group activated by
DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate
all German IOTAs during that time. If you have worked DM50IOTA
from all German IOTA by the end of 2013, you can apply for a
special award.

EU-136. Three Hungarian operators will once again activate Rab Island
(CI-096), Croatia, starting on April 21st, signing 9A/homecall.
Operators mentioned are Pista/HA5AUC, Karl/HA7PC and Ed/HA5BWW.
They will stay there for a week and operate on the HF bands
and 6 meters using mainly CW. Their rigs are an IC-746 and
IC-756PRO with vertical antennas and a FD-4. QSL via the HA
Bureau or direct.

OC-186. Only a few more days to work YB3MM/2 (Adhi) and YB2TET/P (Teti)
from Karimunjawa Island. They are expected to go QRT on April
16th. Activity is between 1700-0600 local time on 15 meters
SSB using low power and a ground-plane. QSL via IZ8CCW.

J8, ST. VINCENT. Brian, GW4DVB, will be active as J8/G4DVB from Palm
Island (NA-025) between now and April 20th. Activity will be on 80-6
meters using a Elecraft KX-3 and HLA300 amp into a HW-40HP dipole. QSL
via GW4DVB. For more details, see the Web site at: http://www.g4dvb.co.uk

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will once again be active as KP2MM during the CQWW WPX CW Contest (May 25-26th) and the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW. For more details, see: http://www.n2tta.info

KP4, PUERTO RICO. Members of the Puerto Rico Field Day Group will be on the air April 18th to celebrate "World Amateur Radio Day 2013" from the Municipal Emergency Management Agency of the city of Cataño, to make echo of this year's theme: "Amateur Radio: entering its Second Century of Disaster Communications". They will use the callsign KP4FD on the HF bands. Confirmations will be via LoTW and there will be an electronic certificate per request. More info on QRZ.com.

MJ, JERSEY. Kazunori, M0CFW/JK3GAD, will be active as MJ5Z during the CQ WPX CW Contest (May 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or via M0CFW. Look for activity before and after the contest using the callsign MJ0CFW.

MJ, JERSEY. A Belgium team will be active as MJ/OT9Z from the "Jersey Amateur Radio Society" (JARS) Headquarter on Jersey (EU-013) between August 2-9th., 2013. Activity will be on all HF bands and 6 meters using CW, SSB, PSK and RTTY. They plan to have two stations on during the day (Not at night but late in the evening). Operators mentioned are Frederik/ ON8ZL (Team Leader, CW/SSB/6m), Peter/ON8ZZ (PSK/RTTY) and Frank/ON5NQ (SSB). QSL Manager is ON8ZL. For more details, see: http://dxpeditionchannelislands.weebly.com

NH0, MARIANA ISLANDS. Operators Yutaka/JQ2GYU/WS2Y and his wife Miho/ JJ2VLY/WS2M will be active as NH0J from Tinian Island (OC-086), Northern Mariana Islands, the special commemorative Tinian station of the "J-Tinian Radio Space Club, between April 27th and May 1st. Activity will be on 80-10 meters including the 30/17/12 meter bands, using CW, SSB and RTTY. QSL via JJ2VLY, direct (SAE + 2 USDs) or by the Bureau. Please don't send your QSL request to Tinian Island. For more details and updates, see: http://jq2gyu.blogspot.jp

VP2V/KE2VB QSL/LoTW STATUS. Rex, NR6M, reported on April 7th: "QSL cards for VP2V/KE2VB arrived yesterday. All QSL request I have received will be in Monday's, April 8th, outgoing mail. Also logs have been uploaded to LoTW. I am looking for more DX stations to manage."

QSL RECEIVED VIA LoTW: CT8/PA4N, CU2CE, DL3GD, EH7H, HZ1SK, JA1LZR, T2T, T46RRC, T48RRC, V31WA, VE3VHB, VK9CZ and Z21BB

QSLS RECEIVED VIA MAIL: 3D2MF, 4L8A, 5B8AD, A5A, A63HI, CT9/DL5AXX, CW5X, E51E, E51WL, EX/UA4WHX, EY8/UA4WHX, HA30S, HC2/UA4WHX, HG1S, JX5O, L22D, LX1HD, T6LG, TT8TT, UK/UAWHX, VP2V/KE2VB, VP8ROT, YB26SEAG and ZL9HR

QSLS RECEIVED VIA THE BUREAU: 3D2OP, 3D2OU, 3D2RO, 4L1FP, 5Z4HW, 9L0W, 9U4U, B3C, CP8/DF7NX, CT3/DF8AA, EA8/DF8AA, EA8/DK5AN, EP3SMH, HI3EPR, HU2DX, I2VRN, J6/DL7AFS, J79ZG, JW/DF8AN, JW/LZ2HM, JY8VJ, LX0SAR, TC3A, TJ3AY, VU3SIG, YB8Y, Z38Z, ZV2HQ and ZV13HQ

R40, EUROPEAN RUSSIA (WAO and RAO Ops). A group of Russian operators will activate the special callsign R40AST during a complex WAO, RAO and TV DXpedition in the Astronomical Observatory of the North Caucasus. Activity will take place between April 18-22nd, in celebration of the 40th anniversary of the "International Day of Astronomy" (April 19th), one of the oldest scientific disciplines of the Earth, in the framework of the world diploma program Astronomical Observatories (WAO) and National diploma program Astronomical Observatories of Russia (RAO) from the following Astronomical Observatories of the North Caucasus:
April 19th - Remote astronomical Observatory of the Scientific Centre (Ka-Dar); RAO-041.
April 19th - BTA (Big Telescope Alt-Azimuthal); RAO-007.
April 20th - Caucasian mountain Observatory astronomical Institute, Moscow University; RAO-042.
April 20th - Radio astronomy Observatory, (Zelenchukskaya); RAO-027.
April 20th - RATAN-600 - Special astrophysical Observatory; RAO-011.
April 21st - North-Caucasus astronomical station KFU; RAO-028
April 21st - Station optical observations of the satellites of the Earth (Arkhyz); RAO-044.
April 22nd - The Kislovodsk mountain astronomical station; RAO-022.

Operations will be on various HF bands using CW and SSB. Watch around the WFF frequencies. Operators mentioned are Oleg/UA6GG, R7TU, Andy/RN7G, Yuri/RA6EE, Andrei/RK7A, Oleg/R3FA, Valery/RW3GW and TV-operator. Awards are available with 5 QSOs with different RAO expeditions making it possible to automatically fulfill the terms of the WAO EU 3 class (5 QSO, more details: at <http://www.wff44.org/program/wsp/wao/rules>) and RAO class 3 (5 QSO, more details <http://www.greenrussia.travel/RAO>). You may receive an e-Diploma for WAO and RAO. The expedition will be filmed for a documentary (Green Russia) showing the participation by radio amateurs. A special QSL can be obtained via UA6GG (direct, by the Bureau or Green LogSearch).

SILENT KEYS.....
VE1AL - Alan Leith, became a Silent Key (SK) on the afternoon of April 11th, of an apparent heart attack. His daughter found him when she came home from work in his shack. Al achieved the ARRL DXCC #1 Honor Roll before North Korea (P5) was added to the DXCC list, but was waiting for a chance to work that elusive P5. He had 334/353 confirmed on the ARRL DXCC Mixed standings. Col, MM0NDX, states, "CY9M 2012 would not have happened without Al's enthusiasm and help. All the team is shocked and saddened at Al's passing. On behalf of the CY9M team, it was a pleasure to meet Al and spend some time with him."
See: http://www.cy9m.com/al-leith-ve1al-silent-key

VK6HD - Mike Bazley became a Silent Key (SK) on April 12th, after a long fight with cancer. He was noted for being many station's first 160 and 80 meter contact. Mike was the top Australian operator on the current DXCC Honor Roll.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned.

TM114, FRANCE (IMD Op). Look for the Marconi special event station TM114M to be on the air during the weekend of April 20th. The station is celebrating the 114th anniversary of the first wireless radio link between Wimereux, France, and South Foreland, England, on March 27th, 1899. QSL via F5JYD, by the Bureau or direct.

TO4, MARTINIQUE (IPA Op!). Operators Paul/FM5AM, Jean-Baptiste/FM5GI, Valere/FM5CW, Claude/FM5CY and Henri/F6FLO (all members of the International Police Association [IPA]) will use the special callsign TO4IPA from St. Pierre between April 18th and May 2nd. Activity will be on CW, SSB, RTTY and PSK. QSL via HA3JB. QSOs are valid for IPA Award.

UP44, KAZAKHSTAN (WFF/UNFF expedition). Members of the "Traveling Radio Amateurs Group" plan to travel to the area of Tian-Shan Astronomical Observatory between April 20-21st. During the group's expedition, they plan to take part in the "International Astronomy Day" celebration and activate the following reference numbers as UP44WFF:
☐WAO/UNAO-01 - Tien-Shan Observatory (2700 m)
☐WMA/UNM-037 - Tien-Shan Observatory (2700 m)

☐WFF/UNFF-005 Ile-Alatau national Park
☐KDA: Q - 13 (Talgar region)
☐WW Loc.: MN83LB.
Operators mentioned are Arthur/UN6QC, Sergey/UN6GAO and Victor/UN7GIT.
Activity will be on 40-10 meters including the WARC bands using SSB and
the Digital modes. Suggested SSB frequencies are: 7144, 14144, 14244,
18144, 21244, 24944 and 28544 kHz (+/- QRM). Digital frequencies will
be on the "Band Plan 1 Region". QSL via info and details on special
awards is available on QRZ.com.

VE3, CANADA (CISA Op/OQP). Team VE3ZF will be active from Twilight Island
(CISA ON-018), Manitoulin Island district, on April 20th and 21st, in the
Ontario QSO Party. The team will consist of Pat/VE3HZQ, Ron/VE3NDI and
Igor/VE3ZF. QSL via the Bureau or direct. Rules for the Ontario QSO Party
contest are posted at: http://cco.ve3xd.com/oqp/rules.htm

VP2E, ANGUILLA. Operators Rich/KE1B and YL Anna/W6NN will be active as
VP2EAQ and VP2EAR, respectively, from Anguilla between May 9-16th.
Activity will be "holiday-style" using a single station with 100w and
a Buddipole antenna system directly adjacent to the sea. Operations
will be on all bands 40-10 meters (including 30/17/12m), and all modes
(CW/SSB/RTTY). They expect to have Internet access, and plan to upload
logs to ClubLog daily. You can check your QSO status and request a QSL
card via the Online QSL Request System (OQRS). Direct QSLs are via their
home callsign (see QRZ.com for details).

VQ9/VQ93/VQ975, CHAGOS (Special Event). Jim, ND9M, is once again active
as VQ9JC from Diego Garcia until sometime in July. He is expected to use
the special callsign VQ975FOC during the month of May to celebrate the
75th anniversary of the FOC (First Class CW Operators' Club). Also, look
for Jim to be active as VQ93JC between June 22nd and July 7th. He usually
activates a unique/special prefix each year (last year it was VQ92JC).
As mentioned several months ago, Jim is operating Field Day style from
a recreational park using a FT-857 at 100 watts to a dipole at a height
of 10 meters because the VQ9 club station has been shut down. Jim reports
that he has to set up the station each time and then break it down each
day which further limits his operating time typically to 1230-1615z on
most days. Sometimes he is on Fridays starting as early as 0830Z. QSL
via ND9M.

WARD CERTIFICATE (Free!). For those who participate during the "World
Amateur Radio Day" on April 18th, 2013, and make a minimum of 200 QSOs,
can obtain a certificate. It is issued free of charge if requested in
electronic format (pdf). To get this certificate, you must send by May
18th, 2013, a log in ADIF format with 200 QSOs to: fenyo3jw (at) yahoo.com
More info is available at: http://wff-yo.blogspot.com

XW, LAOS. Steve, 9M6DXX, informs OPDX that a multi-national, multi-operator,
DXpedition to Vientiane, Laos, is being planned for September 6-16th, 2013.
Team members are Steve/9M6DXX, James/9V1YC, George/EA2TA, Christian/EA3NT,
Raul/EA5KA, Vincent/F4BKV, Don/G3XTT and Col/MM0NDX. They plan to operate

five stations from 160-6 meters using CW, SSB and RTTY. A Web site is currently under construction and will be available soon. The callsign and more details will be announced later.

ZK3, TOKELAU (Reminder). Operators Hans/DL6JGN and Guenter/DL2AWG will be active as ZK3N from Nukunonu Atoll (OC-048) between April 15-30th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. They will be using a TS590 with a Tokyo Hy-Power solid state amp; K3 with a 500 watt solid state amp; AV640 and Tripod Leg for 40-10 and GP for 80m. QSL via DL2AWG. Subject to a reliable Internet connection, they will upload their log to ClubLog on a daily basis. Otherwise, the complete log will be uploaded upon their return. There is a ZK3N Web page available at: http://www.tokelau2013.de

ZS8, MARION ISLAND (More Ops Possible). Operators Carson/ZR6CWI (ZS8C) and David/ZS1BCE (ZS8Z) reportedly have departed Cape Town on April 10th, to head to Marion Island. It was announced this week that there may be two more operators onboard the ship to Marion. Nadia (Carson's girlfriend) and Marius (the team's diesel mechanic) are writing to the "Independent Communications Authority of South Africa" (ICASA) for a RAE (Radio Amateur Examination) to obtain a licence. Pierre, ZS1HF/ZS8M, has arranged with the South African Radio League (SARL) to invigilate ['proctor'] the exam. This means there will eventually be four active hams on Marion Island during the next year. Carson and David are expected to be active around mid-May once the ship departs with the old team back to Cape Town. As mentioned in previous bulletins, activity will be on 40-10 meters (NO 160/80m) using mainly SSB and the Digital modes. QSL Manager is ZS1HF.

21121. W5UWB SK

Yahoo group: DX-IS (2013)
Date: 2013-04-15 01:16:09 UTC
From: John G.
Topic: 21121 Message: 21121

More sad news in terms of silent keys. I learned today from another reflector that John, W5UWB, has become a SK. Some of you probably worked him on 6 meters, or higher bands via the ultimate long path (moonbounce). He was a great VHF pioneer and will be missed.

73 John AF5CC

Amen. He worked more 6 meter DX from South Texas than I could dream of here in East Texas. He knew when 6 meters was open long before most of the rest of us. Very sad.

73 John.
You will be missed.

Mike, W5UC

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30415
SIDC SOLAR BULLETIN 15 Apr 2013, 1229UT
SIDC FORECAST (valid from 1230UT, 15 Apr 2013 until 17 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 15 Apr 2013 10CM FLUX: 114 / AP: 007
PREDICTIONS FOR 16 Apr 2013 10CM FLUX: 111 / AP: 006
PREDICTIONS FOR 17 Apr 2013 10CM FLUX: 108 / AP: 004
COMMENT: Catania sunspot groups 40 and 43 (NOAA ARs 1718 and 1719,
respectively) continue to decay although they still have beta-gamma
configuration of the photospheric magnetic field. No C-class flares were
detected during the past 24 hours. We expect flaring activity on the low
C-level, with an M-class flare being unlikely. The Earth is currently
inside the magnetic cloud associated with the halo CME observed on the
Sun on April 11. The magnetic cloud belongs to the ENW type
(left-handed), and therefore does not contain southward interplanetary
magnetic field (IMF). Since the arrival of the shock driven by this
magnetic cloud late on April 13, the IMF Bz component was steadily
positive and the solar wind speed did not exceed 560 km/s, so no
geomagnetic storm occurred (K index stayed below 4). Currently the solar
wind speed is around 390 km/s and the IMF magnitude is around 9-10 nT.
Unless the IMF turns strongly southward, which is unlikely, we expect
quiet geomagnetic conditions.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30416
SIDC SOLAR BULLETIN 16 Apr 2013, 1223UT
SIDC FORECAST (valid from 1230UT, 16 Apr 2013 until 18 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 16 Apr 2013 10CM FLUX: 111 / AP: 003
PREDICTIONS FOR 17 Apr 2013 10CM FLUX: 110 / AP: 005
PREDICTIONS FOR 18 Apr 2013 10CM FLUX: 109 / AP: 006
COMMENT: Four weak C-class flares were detected during the past 24
hours. Three of the observed flares originated from the Catania sunspot
group 46 (NOAA AR 1723) which is growing fast and has beta-gamma
configuration of the photosperic magnetic field. The C-class flares are
probable, in particular from the Catania sunspot group 46. The M-class
flares are possible but not very probable. The Earth is currently inside
a slow solar wind with a speed of about 360 km/s. Small low-latitude
coronal hole in the northern hemisphere will pass the central meridian
later today, however not much impact is expected from this coronal hole.
The interplanetary magnetic field magnitude is about 5 nT, with its Bz
component most of the time steadily positive. The geomagnetic conditions
are quiet and expected to remain so.

PREDICTIONS FOR 19 Apr 2013 10CM FLUX: 106 / AP: 009
COMMENT: Six sunspot groups were reported by Catania today. The flaring
activity was at the low C-class level, and the strongest flare reported
was the long duration C3.5 flare peaking at 21:32 UT on April 16. The
flare originated from the Catania sunspot group 43 (NOAA AR 1719)
situated at that moment close to the west solar limb. The flare was
associated with the coronal dimming. The presence of the coronal dimming
gives indication that the flare had an associated CME. However, this
cannot be confirmed due to the data gap in SOHO/LASCO and STEREO
observations. The flaring activity at the C-class level is probable and
the M-class flares are still possible but unlikely. The Earth is inside
a slow solar wind with a speed of about 350 km/s. The interplanetary
magnetic field magnitude is about 4 nT. The Bz component of the
interplanetary magnetic field is fluctuating with the occasional
intervals of its negative values (up to -5 nT). The geomagnetic
conditions are quiet and expected to remain so.

21126. Solar Cycle 24 - the peak? - delayed email

Yahoo group: DX-IS (2013)
Date: 2013-04-18 07:00:11 UTC
From: Lance Martin
Topic: 21126 Message: 21126

Hi Guys,

In respect to too great ops. namely VK6HD and VE1AL, the following email was not sent a few days ago.
I was actually typing this message when I suddenly noticed Al's passing and it went straight into the draft box.

(the text in red I have just filled in now)

Well Guys, we may be at the peak.

This could be the peak today (I hope not) but have a look at the numbers and the charts here http://www.solarham.net/

I was hoping for solar flux to hit 200+ this time but it only made around 150.
I really need 200+ to get a signal into EU on 6m, 150 just doesn't cut the mustard.

Anyone got some better news about the sun out there?

Poles shut this morning, hopefully things will settle down shortly as we come off this temporary peak.

Bring on CE0Z

73, Lance - VK6DU

I have been in touch with LU5OM Manuel in Argentina about an 80m QSO. Manuel needs z29 on 80 and had been in touch with Mike VK6HD through Mike's wife while Mike was in hospital in last week. Mike conveyed his message via Pam up until his final day...
In memory of Mike, I have vowed to Manuel to complete the QSO on Mike's behalf, I know that Mike would have wanted this, let's hope we can do it on CW this winter.

I will keep you all informed of our progress.

This does not mean I will have the same signal as Mike or the passion he had on the low bands, he was a master...

73, Lance - VK6DU

PREDICTIONS FOR 20 Apr 2013 10CM FLUX: 100 / AP: 011
COMMENT: Majority of the flaring activity during past 24 hours was of
the low C-class level and originated from the Catania sunspot group 43
(NOAA AR 1719) which just turned behind the west solar limb. The
strongest flare reported was C1.6 flare peaking at 08:19 UT today. The
long duration C3.5 flare peaking at 21:32 UT on April 16 was associated
with narrow CME which will not arrive at the Earth. The solar wind speed
decreased to rather low value of about 280 km/s. The interplanetary
magnetic field magnitude is stable and amounts about 3 nT . The fast
flow from the small low-latitude coronal hole in the northern hemisphere
which passed the central meridian on April 16 might arrive at the Earth
late on April 19 or early on April 20. Although the arrival of the fast
stream is possible it is not very probable, and we do not expect
disturbed geomagnetic conditions due to its arrival. We expect quiet
geomagnetic conditions in the next 48 hours.

DX Bulletin 16 ARLD016
>From ARRL Headquarters
Newington CT April 18, 2013
To all radio amateurs

SB DX ARL ARLD016
ARLD016 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TANZANIA, 5H. Bodo, DF8DX, will be QRV as 5H1DX and 5H1DX/3 from IOTAs AF-075, AF-063 and AF-032 from April 20 to 28. Activity will be on 160 to 10 meters near the IOTA frequencies using mostly CW, with EME on 70 and 23 cm using JT65 and CW. QSL to home call.

MALDIVES, 8Q. Pai, VU2PAI and Krish, W4VKU will be QRV as 8Q7KP from Bodu Finolhu Island, IOTA AS-013, from April 23 to 30 with two stations. QSL via operators' instructions.

CROATIA, 9A. Operators HA5AUC, HA7PC and HA5BWW will be QRV as 9A/homecalls from Rab Island, IOTA EU-136, from April 21 to 28. Activity will be on the HF bands including 6 meters using mainly CW. QSL direct to home calls.

FRANCE, F. Marconi special event station TM114M will be QRV on April 20 and 21 in celebration of the 114th anniversary of the first wireless radio link between Wimereux, France and South Foreland, England on March 27, 1899. QSL via F5JYD.

MARTINIQUE, FM. A group of operators are QRV as TO4IPA until May 2. Activity is on the HF bands using CW, SSB, RTTY and PSK. QSL via HA3JB.

HUNGARY, HA. Special event station HG50NOHAB is QRV until March 31 2014 in celebration of the modernization of the Hungarian Railway 50 years ago. Activity is on the HF bands using CW, SSB and digital modes. QSL via bureau.

SOMALIA, T5. Roger, LA4GHA is QRV as 6O0LA from Puntland while working as a member of the UNODC-mission. He is active in his spare time on 160 to 6 meters using CW, SSB and various digital modes. QSL to home call.

EUROPEAN RUSSIA, UA. Special event station R40AST is QRV until April 22 from multiple Astronomical Observatories in the North Caucasus of Russia during the International Day of Astronomy. QSL via UA6GG.

KAZAKHSTAN, UN. A group of operators will be QRV as UP44WFF from the Talgar region on April 20 and 21 during the International Day of Astronomy. Activity will be on 40 through 10 meters using SSB and various digital modes. QSL via operators' instructions.

CHAGOS ISLAND, VQ9. Jim, ND9M is QRV as VQ9JC from Diego Garcia until sometime in July. He may also be active using the special callsign VQ975FOC during the month of May to celebrate the 75th anniversary of the First Class CW Operators Club. He is active Field Day style from 1230 to 1615z most days. QSL to home call.

PRINCE EDWARD AND MARION ISLANDS, ZS8. Look for Carson, ZR6CWI and David, ZS1BCE to soon be QRV as ZS8C and ZS8Z, respectively, from Marion Island. They may be joined by other operators as well. Activity will eventually be on 40 to 10 meters using mainly SSB with some digital modes. QSL via ZS1HF.

THIS WEEKEND ON THE RADIO. The ARRL SSB Rookie Roundup, NCCC RTTY Sprint, Holyland DX Contest, TARA Skirmish Digital Prefix Contest, ES Open HF Championship, Worked All Provinces of China DX Contest, Nebraska QSO Party, CQ Manchester Mineira DX CW Contest, EU SSB Spring Sprint, Michigan QSO Party, EA-QRP CW Contest, North Dakota QSO Party, Ontario QSO Party, South Dakota QSO Party, Feld Hell Sprint and the YU DX CW Contest will certainly keep contesters busy this upcoming weekend.

The Run for the Bacon QRP CW Contest is scheduled for April 22. The SKCC CW Sprint, CWops Mini-CWT Test and 432 MHz Spring Sprint are scheduled for April 24. Please see April QST, page 84, and the ARRL and WA7BNM Contest websites for details.

SIDC URSIGRAM 30419
SIDC SOLAR BULLETIN 19 Apr 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 19 Apr 2013 until 21 Apr 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 19 Apr 2013 10CM FLUX: 103 / AP: 005
PREDICTIONS FOR 20 Apr 2013 10CM FLUX: 100 / AP: 010
PREDICTIONS FOR 21 Apr 2013 10CM FLUX: 098 / AP: 006
COMMENT: Seven sunspot groups were reported by Catania today and none
of them was particularly active, with only two C-class flares reported
in last 24 hours. The strongest flare reported was long duration C5.6
flare peaking at 18:23 UT on April 18, and originating from the Catania
sunspot group 43 (NOAA AR 1719) situated at that moment just behind the
west solar limb. The partial halo CME, associated with this flare, was
first seen in the SOHO/LASCO C2 field of view at 18:36 UT, had angular
width of about 180 degrees and projected speed of about 400 km/s (as
reported by CACTUS software). The CME was associated with the coronal
dimming, EIT wave and a type II radio burst. The solar wind speed has
continuously low value of about 280 km/s. The interplanetary magnetic
field magnitude is stable and amounts about 4 nT . The fast flow from
the small low-latitude coronal hole in the northern hemisphere might
arrive at the Earth late today or early tomorrow. The arrival of the
fast stream is not very probable and should not result in disturbed
geomagnetic conditions. Due to the position of the CME associated active
region we do not expect the partial halo CME from April 18 to arrive at
the Earth. We expect quiet geomagnetic conditions in the next 48 hours.

21130. NY Times: "Serbia and Kosovo Reach Milestone Deal"

Yahoo group: DX-IS (2013)
Date: 2013-04-19 17:42:17 UTC
From: wn3vaw
Topic: 21130 Message: 21130

Just posted online by the New York Times:

"Serbia and Kosovo reached an agreement on Friday aimed at overcoming ethnic enmities in the former Serbian province, a milestone that could enhance stability in the region and help clear the path for their eventual membership in the European Union."

http://www.nytimes.com/2013/04/20/world/europe/serbia-and-kosovo-reach-milestone-deal.html?pagewanted=all

In the article, it is reported that part of the deal includes Serbia not opposing membership by Kosovo in (unspecified) international organizations... which may mean an official ITU-assigned prefix, which in turn means eligibility (at last!) for DXCC status.

73, ron w3wn

21131. Re: [DX-IS] NY Times: "Serbia and Kosovo Reach Milestone Deal"

What is required to get an ITU prefix block assigned? The other way to get DXCC entity status is to be admitted to the UN, but I think there is at least one country on the security council that would oppose Kosovo membership in the UN.

QST de W1AW
Propagation Forecast Bulletin 16 ARLP016
>From Tad Cook, K7RA
Seattle, WA April 19, 2013
To all radio amateurs

SB PROP ARL ARLP016
ARLP016 Propagation de K7RA

Solar activity weakened over the current reporting period (April 11-17), and geomagnetic conditions were stable as well. The predicted geomagnetic storm did not happen last weekend, with both the planetary and mid-latitude A index only rising to 10 on Sunday April 14 in response to a glancing blow from a CME.

Average daily sunspot numbers declined nearly 25 points to 113.3, and average daily solar flux was down over 17 points to 121.7.

Predicted flux values for the near term are 95 on April 19, 90 on April 20-23, 95 on April 24-25, 100 on April 26, 110 on April 27-28, 115 on April 29-30, 120 on May 1-2, 125 on May 3-6, 120 on May 7-8, and 115 on May 9-12.

Predicted planetary A index is 5 on April 19-22, 12 on April 23-25, 15 on April 26, 5 on April 27 to May 4, 8 on May 5, 5 on May 6-11, and 8 on May 12.

F.K. Janda, OK1HH of the Czech Propagation Interest Group predicts the geomagnetic field will be quiet to unsettled April 19, quiet April 20, mostly quiet April 21, quiet to unsettled April 22, quiet to active April 23, active to disturbed April 24, quiet to active April 25, active to disturbed April 26, quiet to unsettled April 27-28, mostly quiet April 29-30, quiet May 1-4, mostly quiet May 5, quiet May 6-7, mostly quiet May 8, quiet May 9, mostly quiet May 10, quiet to unsettled May 11-12, and mostly quiet May 13.

Carl Luetzelschwab, K9LA maintains a great website devoted to propagation information, but it moved recently to a new domain. Check http://k9la.us/.

Paul Drahn, KD7HB of Crooked River Ranch in Central Oregon wrote: "I must take exception to your comment about 'great news for HF propagation.' It's very difficult for local evening nets on 75

meters. I am active on the Oregon Emergency Net on 3980 from 6pm to 7pm. Just prior to our net, the Tennessee phone net operates on the same frequency. Afterward, several Tennessee hams use the frequency as a local rag chew net. At times, like the last two evenings, they are stronger in Oregon than many of the local check-in stations. Last night there were at least three conversations going on from Tennessee, all on 3980. They could not hear each other, and could not hear the OEN.

"We expect this interference in the Winter, but only is a problem at other times when the propagation allows it. Fortunately the folks in Tennessee go to bed early!"

As we move later in the Spring and toward Summer, the signals should be weaker around net time. It might help if the folks in Tennessee used NVIS type antennas for local coverage, as they don't have a low angle of radiation. There are several pages that describe the NVIS, or Near Vertical Incident Skywave antenna, such as http://www.hamuniverse.com/nvisbeam.html or http://www.w0ipl.net/ECom/NVIS/nvis.htm or https://www.txarmymars.org/downloads/NVIS-Antenna-Theory-and-Design.pdf.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for April 11 through 17 were 121, 128, 148, 111, 99, 97, and 89, with a mean of 113.3. 10.7 cm flux was 137.1, 137.9, 125.1, 116.8, 113.3, 113.3, and 108.1, with a mean of 121.7. Estimated planetary A indices were 5, 5, 6, 10, 5, 3, and 3, with a mean of 5.3. Estimated mid-latitude A indices were 4, 4, 6, 10, 6, 2, and 2, with a mean of 4.9.

From: r_brothers
Topic: 21133 Message: 21133

20 April 2013 A.R.I. DX Bulletin
No 1146
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5B - Dave 5B/G4IAR/p, his wife Judith 5B/G4IAQ/p and Steve 5B/G0SGB/p will be active from Cyprus (AS-004) on 22-28 April. Operations will be mostly centered on lighthouses and on 20 metres. QSL via home calls, direct only. [TNX rsgbiota.org]
8Q - Pai, VU2PAI and Krish, W4VKU (VU2VKU) will be as 8Q7KP from the Maldives (AS-013) on 23-30 April. They will operate SSB, CW and RTTY on 80-10 metres with two stations. They plan to setup an OQRS on Club Log, and also to upload their log to LoTW, eQSL and qrz.com.
9H - Look for Floris PA1FW (9H3E), Jasper PB2JJ (9H3JN), Rinus PA2HEM (9H3MS), Marion PD3MV (9H3MV), Wim PG9W (9H3ON), Andre PA3HGP (9H3S) and Sjirk PE1OFJ (9H3YM) to be active from Malta (EU-023) between 18 May and 5 June. They will be QRV on 80-6 metres, and will use their personal calls as well as 9H25 (QSL via PI4KGL), a very special callsign chosen to celebrate the group's 25th trip to Malta.
9M2 - Piju 9M2PJU, Khairul 9M2KRZ, Rizal 9M2RDX and Jacek SP5APW will be active as 9M2SE from Perhentian Besar Island (AS-073) on 1-3 May (Jacek will continue to be QRV as 9M2/SP5APW until the 7th, see 425DXN 1143]. They will have two transceivers (100 watts), a vertical antenna and a tribander yagi, and will operate CW, SSB and digital modes on 40-10 metres. QSL for this IOTA operation via SP5APW. [TNX 9M2PJU]
DU - Victor, R6AF will be active as DU1/R6AF from Busuanga Island (OC-090) from 27 April to 3 May. [TNX DX World]
FM - International Police Association's members F6FLO, FM5AM, FM5CW, FM5CY and FM5GI will operate SSB, CW, RTTY and PSK as TO4IPA from St. Pierre, Martinique (NA-107) between 18 April and 2 May. QSL via HA3JB. [TNX HA3JB]
GM - A group of operators from the Kilmarnock and Loudoun ARC will be active as MM0KLR from the Isle of Canna (EU-008) on 22-26 April. QSL via MM0KLR (bureau) or MM0GHM (direct). [TNX rsgbiota.org]
GW - Six operators from the Gordano Amateur Radio Group (namely Peter 2E0GKA, Lyns G0AZE, Michael G1UPP, Malcolm G4KPM, Martin M0HCT and Jim M0JWB) will participate in the International Marconi Day as GB5IMD from Flat Holm Island (EU-124). They expect to be QRV with

two stations on 80-10 metres from around 17 UTC on 19 April until around 9 UTC on the 21st. Request your card by sending QSO details to lynsowen[@]blueyonder.co.uk
I - ARMI Taranto (IQ7UJ) will be active as II7WARD on 18-21 April to celebrate the World Amateur Radio Day. QSL via IZ7AUH (OQRS on Club Log). [TNX IZ7AUH]
I - Special memorial station IY4MKD (Marconi Kite Day) will be active on 25-28 April during the 34th "Vulandra" International Kite Festival in Ferrara. The antenna will be lifted by a Baden-Powell Levitor kite, like Marconi did to receive the first transatlantic wireless transmissions back in 1901. QSL via IQ4FE, direct or bureau. [TNX IK4VFB]
JD1_oga- Look for JD1YBT and JD1BLC to be QRV from Chichijima (AS-031), Ogasawara from 28 April to 5 May. Plans are to be active on 160-6 metres CW, SSB, RTTY (plus FM on 10m). QSL both calls via JP1IOF and LoTW.
PJ2 - Once again Anja, DH2AK and Torsten, DL1THM will be active holiday style as PJ2/DH2AK and PJ2/DL1THM from Curacao (SA-099) from 23 April to 7 May. They plan to operate SSB on 15-20 metres. QSL via home calls, direct or bureau. [TNX DX Newsletter]
SV - Laci, HA0HW Laci will be active as SW8WW from Thassos Island (EU-174) from 23 May to 5 June, including an entry in the CQ WW WPX CW Contest. Before and after the contest he will operate CW, SSB and RTTY on the HF bands and 6 metres. QSL via HA0HW, direct or bureau. [TNX HA0HW]
SV5 - A group of nine operators (namely John SV1GE, Theodoros SV1GRM, Cliff SV1JG, Manos SV1ME, Spiros SV1RC, George SV1RP, Vangelis SV2BFN, Takis SV2FWV and Mike SV8GKE) will be active as SX5KL from Kalolimnos (EU-001) on 10-20 May. They will operate CW, SSB and RTTY on 160-6 metres. QSL via SV2FWV, direct or bureau (OQRS on Club Log), and LoTW. Further information at sx5kl.no-ip.org [TNX SV8CYV]
SV9 - Look for Alessandro SV9/IK4ALM (SSB and CW) and Carlo SV9/IZ4WJA (digital modes) to be active on 40-10 metres from Crete (EU-015) on 13-20 May. QSL via home calls, direct or bureau. [TNX IK4ALM]
TA - Once again the TC Special Wireless Activity Team (www.tcswat.org) will be active as TC57A on 19-25 April in remembrance of the role played by the 57th Infantry Regiment ("Alay") of the Turkish Fifth Army during the Dardanelles Campaign in 1915. QSL via TA1HZ. [TNX TA1HZ]
V2 - Paul, KB4GYT will be active holiday style as V25PM from Antigua (NA-100) from 27 April to 4 May. He will operate mainly CW, with some SSB and PSK31. QSL via home call (direct).
VE - Team VE3ZF (namely Pat VE3HZQ, Ron VE3NDI and Igor VE3ZF) will be active from Twilight Island (not IOTA, CISA ON-018) on 20-21 April during the Ontario QSO Party (http://cco.ve3xd.com/oqp/rules.htm). QSL via home call, direct or bureau. [TNX VE3ZF]
VE - Heinz, VA7AQ and Mike, VE7ACN will operate CW and SSB from Gambier Island (NA-091) on 25-29 April. QSL via home calls [TNX islandchaser.com]

VU7 - Krish, W4VKU (VU2VKU) reports he has been granted permission by the Indian Ministry of Communications to operate as VU7KV from Kavaratti, Lakshadweep Islands (AS-011) between 23 April and 5 May. However, "plans are already firm to activate 8Q7KP from 23 to 30 April" and "getting to the VU7 island has become a challenge". If he gets to Kavaratti, plans are to operate SSB and some RTTY on 80-10 metres. See www.qrz.com/db/VU7KV.
YN - Luca, IK2PFL will be active as YN/IK2PFL from Nicaragua on 2-6 May. He will operate CW on the HF bands and 6 metres, and will participate in the ARI International DX Contest (from 12 UTC on 4 May through 1159 UTC on the 5th).

425 DX NEWS MAGAZINE ---> The March 2013 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

AMATEUR RADIO IN GREECE ---> Published in 1990, "The Dawn of Amateur Radio in the U.K. and Greece" by Norman F. Joly (G3FNJ) is still the standard reference of this period. Vienna-based Documentary Archive has just published the chapters relating to the history of Amateur radio in Greece, with the author's kind permission from his personal copy which contains some corrections and amendments to the printed version, and with additional material from the Archive's files: see www.dokufunk.org/joly and www.dokufunk.org(joly-d) for a German version. [TNX OE1WHC]

IOTA HONOUR ROLL ---> The 2013 Honour Roll and Annual Listings have been uploaded to both the IOTA Manager's (www.g3kma.dsl.pipex.com) and the IOTA Programme's (www.rsgbiota.org) websites.

WRTC2014 NEWS ---> WRTC2014, Inc., host of the 2014 World Radiosport Team Championship (WRTC) competition, has opened the application process for qualified individuals that would like to serve as Referees. The Referee application period closes on 1 December 2013. Complete information, including downloadable application forms, can be found at http://www.wrtc2014.org/qualifying/referee-selection/

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30420
SIDC SOLAR BULLETIN 20 Apr 2013, 1219UT
SIDC FORECAST (valid from 1230UT, 20 Apr 2013 until 22 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Apr 2013 10CM FLUX: 100 / AP: 005
PREDICTIONS FOR 21 Apr 2013 10CM FLUX: 103 / AP: 006
PREDICTIONS FOR 22 Apr 2013 10CM FLUX: 105 / AP: 004
COMMENT: The flaring activity during past 24 hours was of the low
C-class level and all the C-class flares originated from the newly
emerged and fast developing Catania sunspot group 51 (NOAA AR 1726). The
flaring activity at the C-class level is probable in particular from the
newly emerged Catania sunspot groups 51 and 52 (NOAA AR 1726 and NOAA AR
1727) and Catania sunspot group 46 (NOAA AR 1723). M-class flares are
possible but unlikely. The solar wind speed slightly increased and now
amounts about 340 km/s. The interplanetary magnetic field magnitude is
about 6 nT. The Bz component of the interplanetary magnetic field is
fluctuating with the intervals of its negative value (up to - 4 nT). The
geomagnetic conditions are quiet and expected to remain so.

TODAY'S ESTIMATED ISN : 063, BASED ON 15 STATIONS.

21136. Antenna issue-really puzzling me

Yahoo group: DX-IS (2013)
Date: 2013-04-20 21:25:15 UTC
From: af5cc
Topic: 21136 Message: 21136

This is DX related in that it involves my antenna, which allows me to work DX, and you can reply to me off the list if you like also to keep the reflector from getting too far off topic. I am hoping I can rely on the collective wisdom of list members who know far more than I do about antennas and electronics.

Here is my antenna system-105 feet or so of copper wire, attached to Radio Shack 300 ohm twinlead, about 20 feet or so of that. The twinlead runs to a 4:1 voltage balun, which transitions to RG-11 75ohm coax, which then runs to the shack. I then use a MFJ949D manual antenna tuner.

About a year ago I noticed the receive level in my Icom 706 was starting to dropping down, first on 12m, and later on on some other bands, and coming back after you click the mic or key putting the rig into transmit. That first suggested to me that it might be a relay problem, specifically on the low pass filter board since it wasn't happening on all bands. I did go through and try to test things in the antenna system after a friend say he had had a similar problem once with a connector going bad in the feedline. I tested the coax jumpers, low pass filter, tuner, and they all looked ok.

One test I also made was to switch over to the 6m yagi and see keying the rig would bring the receive back, since it is on a different feedline from the dipole I am running. It did, which is one reason I concluded it must be a rig problem. I now see that there probably was a little energy making it to the dipoles feedline anyways, since both antennas were on an antenna switch in the tuner, and I know that isolation isn't perfect. I sold the rig as a fixer upper and got a good deal on a replacement. Well it has the same problem! Same symptoms, same bands (different brand and model of rig) everything! Talk about frustrating!

Tried hooking the 6m antenna straight up to the rig and didn't witness the receive level dropping at all. That tells me it must be something in the antenna system. Given this system, where is the problem likely to be-and more importantly, why would it occur on some bands and not others. It happened mainly on 12m and 15m, and was starting to happen more on 17m and 30m. I never saw it occur on 10m or 20m, and only very rarely on 40m.

Anyone have an idea as to what might be going on?

73 John AF5CC

Topic: 21136 Message: 21137

John, what is the configuration of your 105 feet of wire - a Windom or OCF dipole? My best bet would be either your balun or something in the antenna tuner, followed by a connector problem somewhere. I would try removing thebalun and the tuner from the circuit, one at a time - don't worry seriously about matching for this purpose.

The best repository of good info and smart people about antennas and towers and feedlines and everything in between is towertalk@... - a great reflector, one of the oldest out there.

73, Pete N4ZR

John, disconnect the HF antenna and hook the 6 meter antenna to the HF port. You don't need to transmit, just listen. If the signals still vary significantly then you likely have a problem with in the radio. If the signals are all about the same, then you probably have an antenna problem, or maybe a tuner problem. You can also use this same technique with a random length of wire poked into the HF connector.

Good Luck.

That's what I was going to suggest. I will add that (a) the
problem will be at the highest and hardest to get at place to fix, and
(b) when you have the time to do it, it will rain! <G>

How do I know this? Just went through it with a 40M dipole. It's
the law of erratic antennas!

Hi Pete,

It is a regular dipole. About 52 feet on each side of the twinlead.

Hi Mike,

Already tried that. It seems ok with the 6m yagi attached to it. Why would this problem show up on some bands and not the other? I would think it would be the same on all bands, but it isn't

I experienced a similar problem some years ago with my Butternut vertical.

Traced the problem to a deteriorated solder joint in a connector. I guess the RF was enough to break down the oxides or whatever. Over time, the problem got worse.

When I inspected the connector I saw that it the soldering could have been, well let us just say it could have been better...

Solder exposed to the elements does tend to deteriorate.

Probably want to check the feedline to antenna connections.

I have been thinking that as well, and have a new feedline ready to
install. Why would the problem occur on some bands and not others,
though? That is what is really puzzling to me.

It happens because RF is not logical. It does whatever it wants. Plus impedance changes with frequency so it can happen at one
frequency and not another.

I have been thinking that as well, and have a new feedline ready to install. Why would the problem occur on some bands and not
others, though? That is what is really puzzling to me.

I experienced a similar problem some years ago with my Butternut vertical.

Traced the problem to a deteriorated solder joint in a connector. I guess the RF was enough to break down the oxides or whatever.
Over time, the problem got worse.

When I inspected the connector I saw that it the soldering could have been, well let us just say it could have been better...

Solder exposed to the elements does tend to deteriorate.

Probably want to check the feedline to antenna connections.

On 4/20/2013 5:25 PM, af5cc wrote:

This is DX related in that it involves my antenna, which allows me to work DX, and you can reply to me off the list if you like also
to keep the reflector from getting too far off topic. I am hoping I can rely on the collective wisdom of list members who know far
more than I do about antennas and electronics.

Here is my antenna system-105 feet or so of copper wire, attached to Radio Shack 300 ohm twinlead, about 20 feet or so of that. The
twinlead runs to a 4:1 voltage balun, which transitions to RG-11 75ohm coax, which then runs to the shack. I then use a MFJ949D
manual antenna tuner.

About a year ago I noticed the receive level in my Icom 706 was starting to dropping down, first on 12m, and later on on some other
bands, and coming back after you click the mic or key putting the rig into transmit. That first suggested to me that it might be a
relay problem, specifically on the low pass filter board since it wasn't happening on all bands. I did go through and try to test
things in the antenna system after a friend say he had had a similar problem once with a connector going bad in the feedline. I
tested the coax jumpers, low pass filter, tuner, and they all looked ok.

One test I also made was to switch over to the 6m yagi and see keying the rig would bring the receive back, since it is on a
different feedline from the dipole I am running. It did, which is one reason I concluded it must be a rig problem. I now see that
there probably was a little energy making it to the dipoles feedline anyways, since both antennas were on an antenna switch in the
tuner, and I know that isolation isn't perfect. I sold the rig as a fixer upper and got a

good deal on a replacement. Well it has
the same problem! Same symptoms, same bands (different brand and model of rig) everything! Talk about frustrating!

Tried hooking the 6m antenna straight up to the rig and didn't witness the receive level dropping at all. That tells me it must be
something in the antenna system. Given this system, where is the problem likely to be-and more importantly, why would it occur on
some bands and not others. It happened mainly on 12m and 15m, and was starting to happen more on 17m and 30m. I never saw it occur
on 10m or 20m, and only very rarely on 40m.

Anyone have an idea as to what might be going on?

John, do you have access to a MFJ-259 or a MFJ-259B antenna meter? It
would be interesting to see what that antenna looks like with that piece
of test equipment.

No, don't have an antenna analyzer. Won one a couple of years ago at the Oklahoma City hamfest but immediately sold it to someone there.

SIDC SOLAR BULLETIN 21 Apr 2013, 1248UT
SIDC FORECAST (valid from 1230UT, 21 Apr 2013 until 23 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 Apr 2013 10CM FLUX: 107 / AP: 003
PREDICTIONS FOR 22 Apr 2013 10CM FLUX: 108 / AP: 006
PREDICTIONS FOR 23 Apr 2013 10CM FLUX: 106 / AP: 007
COMMENT: Seven sunspot groups were reported by Catania today. During
past 24 hours fifteen low C-class flares were reported and they all
originated from the Catania sunspot group 51 (NOAA AR 1726). This fast
growing sunspot group has at the moment beta-gama configuration of its
photosperic magnetic field and we expect that it will produce more
C-class flares and also possibly M-class flares. The interplanetary
magnetic field magnitude is about 7 nT. The Earth is currently under the
influence of a slow solar wind with the speed of about 270 km/s. The
low-latitude coronal hole in the southern hemisphere has reached the
central meridian and we expect arrival of the fast solar wind late on
April 24. We expect quiet to possibly active geomagnetic conditions in
the next 48 hours.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B, CYPRUS. Tony, RT9T, will once again be active as 5B4ALB from Cyprus between May 15-28th. Bands and modes of activity were not provided. QSL via RT9T direct only.

5B & ZC4, CYPRUS AND THE UK SOV. BASES AREAS ON CYPRUS. Steve, G0SGB, will be active as 5B/G0SGB/p from Cyprus (AS-004, MIA MCI-002, WLOTA 0051) and as ZC4BS from the UK Sov. Bases AREAS on Cyprus (AS-004, MIA MCI-002, WLOTA 0892) between April 22-28th. Activity will be on all HF bands using mainly SSB and CW. QSL both callsigns via G0SGB, direct only with SAE. NO eQSL!

5U, NIGER. Pierre, HB9AMO, will be active as 5U9AMO from Niger between April 20th and May 30th. Activity will be holiday style on 80-10 meters CW using a TS-50 and a low hanging long wire. QSL via M0URX. Log will be uploaded to LoTW and ClubLog. For more details, updates and a log search, visit Pierre's Web page at: http://www.hb9amo.net

6V7, SENEGAL. Luc, F5RAV, will once again be active as 6V7T from Le Calao Resort, La Somome, between April 26th and May 5th. He will be operating from Jean-Francois, 6W7RV, QTH. Activity will probably be the same as last time -- on SSB and PSK31, and on 160-10 meters (including 17 and 12m with a dipole only). He will also participate in the Helvetia Contest (April 27-28th). QSL via only direct to his home callsign. See details on QRZ.com. Also, visit his BLOG page at: http://f5rav.free.fr

A7, QATAR. You only have a few more days to work Tomas, VK2CCC (LY1F), as A71A from the QARS club station in Qatar until April 25th. Activity is most evenings, but limited to a couple of hours in the evenings as it has to be in presence and under the supervision of a QARS member. QSL via A71A (see QRZ.com).

C9, MOZAMBIQUE. "DX-World.net" is reporting (edited): "During last night's (Friday) Top Band dinner at Visalia, it was announced that a large DX-pedition to C9 Mozambique ☐ with emphasis on the low bands ☐ will take place mid-October. More info in due course."

D4, CAPE VERDE. Harald, DF2WO, will once again be active as D44TWO from Leeward Islands [aka Sotavento] (AF-005) between June 3-20th. Activity will be holiday style on the HF bands. He usually has a Kenwood TS-50 and is running 80 watts using CW and SSB on all bands, except on 160/80 meters. QSL via M0OXO.

DXCC (At Dayton Hamvention 2013). Bill Moore, NC1L, reports [edited], "The 2013 Dayton Hamvention is rapidly approaching and once again ARRL Awards staff will be on hand to check applications not only for DXCC, but all ARRL awards: DXCC, WAS, VUCC, WAC and Extra Class Certificate. While we will be there all weekend we suggest that you not wait until Sunday to have your application checked."
A detailed PDF file is available to help guide you through the card checking process so that everything proceeds smoothly at:
http://www.arrl.org/files/file/DXCC/2103_Dayton.pdf
If, after reviewing the PDF file and you have questions, send an E-mail to Bill Moore, NC1L, at: bmoore@arrl.org

FT5Z, AMSTERDAM ISLAND (Tentative Schedule for FT5ZM). Stan, SQ8X, posted the following on the FT5XM Web page <http://www.amsterdamdx.org> on April 19th [edited]: "The MV Braveheart will arrive in the port of Fremantle,

Australia, on January 12, 2014, and be available for the team to board. Fuel and supplies will be taken aboard and port documentation procedures completed. The vessel will sail for Amsterdam Island on January 15, 2014. The sailing time to Amsterdam Island will be 9 days with an estimated arrival date of January 24th.
Landing operations will commence as soon as the sea conditions and weather allow. Once the team is ashore, they will have 18 days to set up, conduct the DXpedition, and tear down for departure.
The return sail to Fremantle is also estimated at 9 days. The team anticipates being back in Fremantle by February 23, 2014."

GB7, ENGLAND (Special Event). Bill Cross, G0ELZ, Chairman of the Marine Museum Society, Wallasey, UK, and David Oakden G3UFO, have announced that special event callsigns GB70BOA and GB70WA will be on the air between May 20-27th. The event will be hosted by the Marine Radio Museum Society (Wallasey) [resident callsign GB4FPR], at Fort Perch Rock New Brigfhton. Members of the Wirral and District Amateur Radio Club (WADARC), the Chester & District Amateur Radio Society (CADARS) and the Tall Trees Contest Group [G5D] (based in Cheshire) will activate GB70BOA from Fort Perch Rock at the Mersey entrance and GB70WA from the Leasowe Lighthouse. The activity is to commemorate the 70th anniversary of the Battle of the Atlantic. Approximately 2,800 merchant ships were lost during this battle and 30,000 merchant seamen lost their lives. Similarly, 30,000 Allied Naval and Air Force personnel and 30,000 Kriegsmarine sailors also lost their lives. These numbers vary according to whose history of WW2 you read, and the above numbers are a rough average. Operations will take place on all band 80-10 meters, as well as VHF/UHF operations on 144 and 432 MHz on all modes. This event is especially important to Liverpool and other Merseyside hams because the battle was commanded from the Western Approaches command and is now a premiere WW II museum in Liverpool. Operators are hoping to make over 2800 contacts during this period. A special QSL card is being produced in commemoration. More details can be found on QRZ.com as well as: http://www.clanlinereunion.co.uk/BA70-page10.html
GB70BOA and GB70WA are part of the official recognition of this event.

HI7, DOMINICAN REPUBLIC. Ronny, ON4ARV, will once again be active as HI7/OT4R from Punta-Cana, Dominican Republic (NA-096, WLOTA 2974, WW Loc. FK58TN), between May 10th and June 1st. Activity will be on 20/15/10 meters on SSB and PSK, between 2000-2200z every day. Suggested frequencies are: 14266, 21226 and 28450 kHz. QSL only via LoTW and eQSL. More info is available on his Web site at: http://www.OT4R.net

INTREPID-SPIRIT AWARD (Press Release). "IDXC 2013, Visalia, California - April 20th, 2013 - Tonight, the Intrepid-DX Group is very proud to present our 'Intrepid Spirit Award' to a notable DXer and DXpeditioner that we have come to respect and admire greatly, Mr. Silvano Borsa-I2YSB. This award is to recognize Silvano□s outstanding efforts to activate Somalia on three different activations, as well as Chad and most recently Burkina Faso.
We acknowledge Silvano□s pursuit of Dxpedition excellence and his quest to activate the rare and often dangerous entities. It is for these reasons

that we honor him tonight with our Intrepid Spirit Award.
This 'Intrepid-Spirit Award' is made in memory of our fallen friend
and member, James McLaughlin, T6AF who was killed in Kabul, Afghanistan
just two years ago this month.
Thank you,
Paul S. Ewing
President, The Intrepid-DX Group"

IOTA NEWS.............
EU-038. Wim, PA0WRS, will be active as homecall/p from Ameland Island (WLOTA 1059) between now and April 26th. Activity will be on all modes and the HF bands, propagation permitting. QSL via his home callsign, direct or by the Bureau.

EU-174. Laci, HA0HW, will once again be active from Thassos Island (GIOTA NAS-037, MIA MG-124, WLOTA LH-4186, QRA KN20HS), but this time as SW8WW (ex-J48HW) between May 23rd and June 5th. He will operate mainly CW, with some SSB and RTTY, on the HF bands (usually on 40/30/20/17 meters) and on 6 meters. He will enter the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band entry. His rigs are usually a FT-840 with a MOS-FET amplifier (300-400 watts) and an IC-706 (for 6m only). Antennas are a monoband Gps and dipoles on fishing poles. QSL via his home callsign, direct or by the HA Bureau.

NA-067. Eric, W4OTN, will be active as homecall/p from Hatteras Island (USI NC005S, WLOTA 3913, Dare County, NC) between August 4-10th. Activity will be holiday style on the higher HF bands (20-10m). QSL via his home callsign, by the Bureau or direct.

NA-091. Operators Heinz/VA7AQ and Mike/VE7ACN will be active as homecall/p from Gambier Island (CISA BC031) between April 25-29th. Activity will be on all HF bands using CW and SSB. QSL via their home callsigns, direct or by the Bureau.

SA-027. Fabio, PP5BZ, will be active as PQ5M from Sao Francisco do Sul Island during the RSGB IOTA Contest (July 27-28th) as Single-Op/All-Band entry. QSL via PP5BZ.

SA-060. Operators Renato/PY8WW, Ewerton/PY8AA, Fernando/PU8WZT, Ronaldo/PS8RV, Pedro/PR8ZX and Gabriel/PU8RGV will be active as PX8Z from Cotijuba Island (DIB PA-14, WLOTA 2855) between July 26-28th. Activity coincides with the RSGB IOTA Contest weekend. QSL via PY8WW.

JD1, OGASAWARA. Just a reminder that Harry, JG7PSJ, will once again be active as JD1BMH from Chichijima Island (AS-031) between April 22nd and May 4th. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via the Bureau to JD1BMH or direct to JG7PSJ. Visit his Web page for more details at: http://jd1bmh.zxq.net

OJ0, MARKET REEF. Operators Jean-Pierre/ON5JT, Michel/ON6QO, Koen/ON4CCP, Philippe/ON4LEM and Peter/ON8VP will be active as OJ0V from Market Reef (EU-053) between July 1-6th. Activity will be on the HF bands using CW and SSB. On request of a lot of hams worldwide, they will also be active on the Digital modes (RTTY or PSK). QSL via ON4CCP.

P5, NORTH KOREA PRESS RELEASE (Announcing the P5 Project - IDXC 2013 Convention in Visalia, April 20th, 2013), received from Paul, N6PSE:
"P5, North Korea is the most wanted DXCC entity world-wide.
Today, the Intrepid-DX Group, in partnership with the World-Wide DX Group, is announcing our sustained and ongoing effort to activate North Korea.
For the past four years, we have been working with professionals in the business and tourism industries who are actively doing business in North Korea. We are leveraging their ideas and contacts towards our goal of a major Dxpedition over a four week period from within the DPRK. We are using the same techniques that were successful in opening up Kurdistan (Northern Iraq) South Sudan and Yemen to Dxpedition activity.
We have prepared a comprehensive, multi-faceted proposal, and we have delivered it to the DPRK officials via our Chinese emissary. Several members of our leadership and advisory team have made multiple visits to the DPRK and are advising us accordingly. We are making further plans to visit the DPRK in the coming months to further bolster our business contacts and to research and assess various venues.
We expect this ongoing project to require a sustained effort. We are committed to work as hard and as long as it takes to activate this rare and much needed entity. We will continue negotiating and flying into and out of the DPRK as needed during this process to lay the groundwork and to build the trust to ensure that a favorable outcome can be created. We want the DX community to be aware and to understand that a sustained effort is being made to activate this rare and important entity.

Thank you,
N6PSE AH6HY YT1AD K3LP -- The Intrepid-DX Group"

ADDED NOTE: The Intrepid-DX Group has set up a Web page which is still
under construction at: http://www.intrepid-dx.com/p5/index.php

PJ2, CURACAO. Wim, ON6DX, will be active as PJ2/ON6DX from Curacao (SA-099,
WLOTA 0942) between June 28th and July 7th. Activity will be holiday style
on 40-6 meters using CW, SSB and RTTY. Wim will play special attention on:
- 50 MHz CW/SSB/RTTY (keep in touch with ON4KST chat)
- JA & Asia: 28/24/21 Mhz RTTY/SSB/CW
For a list of suggested frequencies, see the Web page below. QSL via his
home callsign, by the Bureau or direct. Log will be uploaded to LoTW and
eQSL. For more info, see his Web site at:
http://dxpedition.be/PJ2-ON6DX.html

PRESS RELEASE (Amateur Radio in Greece). Wolf Harranth, OE1WHC, from the
Amateur Radio Section of ORF (Austrian Broadcasting Corporation) and the
Documentary Archives Radio Communications/QSL Collection, has informed
OPDX that "The dawn of Amateur Radio in the U.K. and Greece" by Norman
F. Joly (G3FNJ) was published, in 1990, and still is the standard reference
of this period. The Vienna-based Documentary Archive has just published
the chapters relating to the history of Amateur radio in Greece, with the
author's kind permission from his personal copy which contains some
corrections and amendments to the printed version, and with additional
material from the Archive□s files. To read it, visit:
http://www.dokufunk.org/joly
(A German version is available via www.dokufunk.org(joly-d)

(e) eQSL only (d) direct only (B) Bureau only (L) LoTW only

H44KW QSL STATUS. Phil, G3SWH, reports on April 15th: "Today, I have mailed replies to all of the direct OQRS QSL requests received. I will now start working on the direct snail mail requests and expect these to be in the mail within the next two weeks or so."

LoTW NEWS. The ARRL LoTW Web site is reporting that an ARRL LoTW Study Committee has been formed. It states, "In January 2013, the ARRL Board of Directors chartered a committee to review and make recommendations about Logbook of the World. This committee held its first meeting on April 12th and formed three sub-groups to study and report on:
1) current Logbook costs and resources
2) technical review of Logbook reliability and scalability
3) development of support scenarios and requirements
The committee will report to the Board at its next meeting in July."

NEW QSL ROUTE. Phil, VE1BVD, informs OPDX that effective immediately he will be Alan's, VE1AL, QSL Manager. He intends to leave his LoTW account active for the immediate future but will attempt to answer any incoming Bureau or direct cards. Phil's mailing address is correct on QRZ.com or any callbook.

QSL RECEIVED VIA LoTW: 9M6XRO, ED5T, FG/G6ITD, JA2VHO, JA7BME, JH1FNU, JH1OES, JH3CUL, JJ2LPV, LU6DU, TF2CL and UA1OIZ

QSLS RECEIVED VIA MAIL: 5M2TT, 5V7TT, 6Y3M, 7Z7AB, 9U4U, HI8W, HK0/F6BFH, HT9H, KC4AAA, PT0S, PY0F/PP1CZ, S21XV, SV5BYR, T46RRC, T47RRC, T48RRC, V73TS, VK0JJJ, XT2TT and XW0ZJZ

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

T42, CUBA. Cuban operators will activate the special callsign T42T from Cuba (NA-015, WLOTA 0032) during the 47th A. Volta RTTY Contest (May 11-12th. Operators mentioned are Lazaro/CO2WL, Gustavo/CO2NO and Rene/CO2RVA. QSL via HA3JB.

T6, AFGHANISTAN. Jesse, KB2OBQ will once again be active as T6JP from Panjwai in the Kandahar Province starting May 15th through August 2014. Activity will be on 160-10 meters (mostly 40/20/10m) using 100 watts, on CW and SSB. Logs will be uploaded daily (if possible) to LoTW, eQSL, QRZ.com. For more details, see QRZ.com (under T6JP).

T6, AFGHANISTAN. Tim, KB2RLB (ex-DA2TF and YI9RLB), is currently operating in Afghanistan as T6TM from a military base near Kabul. He states on QRZ.com, "Licensed in 1994, I am mainly into HF (SSB/Digital) and will be working on learning more digital modes. I am interested in EMCOMMS and completed Level I of the ARRL EMCOMM Course. I retired in 2007 after 21 years of service with the US Army. I am currently living and working in Afghanistan as a communications advisor." QSL via KB2RLB.
ADDED NOTE: Mike has informed OPDX that he will be there until April 25th, but is expecting to return within 2 months (not yet planned). Activity will be on 20 and 10 meters SSB using 80 watts and dipoles

at 25ft.

TC57, TURKEY (Special Event). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will once again activate special event station TC57A from the battlefields of Gallipoli/Gelibolu. First activated as TC57ALAY in 2007, the special event/commemorative station for the 57th Regiment Martyrs is active every year at the end of April as TC57A. Metin, TA1ED, and a team operators will arrive at the Kocacimen Hill on April 19th, and will be on the air on all HF bands using CW and SSB. They will also try 2m contacts. QSL via TA1HZ at: POB 73, Karakoy, 34421 Istanbul, TURKEY (or by the Bureau). Visit the TCSWAT Web page at: http://www.tcswat.org

TS8, TUNISIA (Update/Operators/QSL Routes). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, are planning a second IOTA DXpedition to Djerba Island (AF-083, WW. Loc. JM53KT, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), as TS8TI between April 29th and May 6th. Activity will be on all HF bands, including the 30/17/12/6 meter bands using CW, SSB, RTTY and PSK31/63/125 modes. Operators mentioned are Ashraf/KF5EYY, 3V8SA (ARCS of Tunisian Scout), 3V8ST (ARC of Tunis), 3V8ESG (Department of Communications and Networking National Engeneering School of Gabès), 3V8SF (Scout Radio Club of Sfax), Leopoldo/I8LWL, Fred/IK7JWX (Team Leader), Antonello/IK2DUW, Ampelio/IS0AGY, Rosy/IW2NLC (YL), Stefano/ IK6JRI, Vincenzo/IZ8LFI, Heathem/YI1UNH. QSL route is as follows:
1) For Italian stations via IK7JWX, direct or by the Bureau.
2) Outside Italy via IK2DUW, direct or by the Bureau.
3) Free internal QSL service available for all MDXC Members.
The Mediterraneo DX Club (MDXC) is a sponsor of TS8TI.
Logs will be available on LoTW, as well as:
http://www.mdxc.org/ts8ti/log-on-line
http://www.ik2duw.it
http://www.enzolog.org
The team is still in need of sponsors and individual contributions.
Contact: ik7jwx2003@...
For more info updates and pictures, watch the following Web pages:
http://www.qrz.com/db/ts8ti

http://www.ik2duw.it

UA0, ASIATIC RUSSIA. Vlado, UA0LCZ (ex-RI0NZ), will be active as UA0LCZ/0 from the rare Kamchatka (Land of Volcanos) between May 15-21st. Activity will be on 80-10 meters CW. QSL via his home callsign.

V2, ANTIGUA. Paul, KB4GYT, will be active as V25PM from Falmouth Harbor, Antigua (NA-100, WLOTA 1118), between April 27th and May 4th. Activity will be holiday style and sporadic. Operations will be mainly CW, but he plans on operating some SSB and PSK31. Paul will be using his Elecraft KX3 with 10 watts or less using various wire antennas strung above the swimming pool. QSL via KB4GYT, direct only (QRZ.com).

V3, BELIZE. In celebration of the 75th anniversary of the "First Class CW Operators' Club" (FOC), Belize operator Joe "Palooka", V31JP (aka K8JP), will be operating with a special callsign V3FOC during the month of May. QSL via V31JP. Note: there is no "1" after the call. Also, see: http://www.qrz.com/db/V3FOC

VU7, LACCADIVES ISLANDS (Lakshadweep Islands). Krish, W4VKU/VU2VKU, reports on QRZ.com: "Received permission from the Ministry of Communications, Govt of India to operate Amateur radio from Kavaratti, Laccadive Islands from Apr 23 to May 5th, 2013. The VU7 permission arrived a bit too late and plans are already firm to activate 8Q7KP from April 23rd to April 30th. Unfortunately, getting to the VU7 island has become a challenge due to the non availabilty of seats via the overnight ship. There is just one expensive alternative, and I am looking into the logistics involved. The plan is for SSB and some RTTY on 10-80m with a TS-480Sat and TenTec Hercules 2 amp using a Butternut HF9V and a 2ele steppir yagi + 30/40m trombone. Basically the same equipment in use at 8Q7KP.
Hope to monitor the cluster and possibly with realtime logging via Clublogs and the last 10 QSO's displayed right here on QRZ.com. Keeping fingers crossed and hope we will be able to work through all the logistic hoops to activate VU7KV..... 73s de Krish, W4VKU, VU2VKU"

21149. Software available for visualizing propagation using RBN

Yahoo group: DX-IS (2013)
Date: 2013-04-22 01:19:00 UTC
From: Rick Kiessig
Topic: 21149 Message: 21149

I've been working on some software over the last few months for visualizing *your* HF propagation using spots from the RBN, individual CW Skimmers, and cluster servers.

The software is called ViewProp. Basically, the way it works is this: You enter your call and lat/lon and the connection details for several Skimmers or clusters. ViewProp then determines which spots are coming *to or from* the area near you, plots them in real-time on a map provided by DxAtlas, and puts them in a sortable table. It also creates real-time charts that show which bands are open *for you* and how active they are. Would you like to know when each band is at its peak? Or when certain beam headings are most active? ViewProp can tell you. It also lets you view and optimize antenna pointing directions.

To run ViewProp, you will need DxAtlas (you can download a full-featured 30-day trial, if you don't already have it). If you have a qrz.com XML subscription, you can use it to enhance the accuracy with which ViewProp locates both spotters and spotted stations, but it is not absolutely necessary, particularly for a trial.

I use ViewProp every day myself, and have found it to be a useful planning tool for both DX and contesting. There's something very empowering about being able to instantly visualize current propagation that's based on measurements rather than simulations.

I've set up a simple 1-page Wiki with more details and a few screenshots: http://zl2ham.wikispaces.com/

The software (freeware) has been going through a limited beta for the last few months, and is now available for an open, public, beta. You can download it from the files section of the Yahoo discussion group, after joining at http://groups.yahoo.com/group/viewprop/

73, Rick ZL2HAM

21150. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-04-22 14:01:02 UTC

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30422
SIDC SOLAR BULLETIN 22 Apr 2013, 1049UT
SIDC FORECAST (valid from 1230UT, 22 Apr 2013 until 24 Apr 2013)
SOLAR FLARES : Active (M-class flares expected, probability >= 50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition
PREDICTIONS FOR 22 Apr 2013 10CM FLUX: 109 / AP: 005
PREDICTIONS FOR 23 Apr 2013 10CM FLUX: 109 / AP: 004
PREDICTIONS FOR 24 Apr 2013 10CM FLUX: 109 / AP: 020
COMMENT: A recurrent coronal hole will influence geomagnetic conditions
from April 24 onwards. In the last rotation, this coronal hole increased
the solar wind speed up to 550 km/s and resulted in minor storm
conditions (Kp=5). The CACTus CME detection software issued yesterday
two automated halo CME alerts but these are not Earth-directed. Flaring
conditions. NOAA AR 1726 keeps the potential for major flares although
its magnetic complexity has decreased in the past 24 hours: a parasitic
patch of opposite polarity has disappeared from the leading sunspot.
Still M-class flares are likely. Proton >10 MeV fluxes are enhanced
since yesterday 09:54 but not cross event thresholds. A warning
conditions for more proton flux enhancements has been issued.

21151. I have seen the future - and it is COOL

Yahoo group: DX-IS (2013)
Date: 2013-04-23 10:12:12 UTC
From: Pete Smith N4ZR
Topic: 21151 Message: 21151

For those who may have missed it, ZL2HAM's ViewProp is now available free in a public beta test. Before you yawn and dismiss ViewProp as just another propagation program, hear me out. This thing is different!

All the propagation prediction programs we are used to - IONCAP, VOACAP and their cousins - are based on historical understanding of propagation. They make predictions based on solar parameters and their authors quite honestly explain that their results are monthly averages, rather than predictions that reflect what you can expect today or tomorrow.

ViewProp is something new. It bases its reporting on what is happening today, on paths between your QTH and locations of interest around the world. It does this by drawing on the Reverse Beacon Network's array of hundreds of Skimmers worldwideto keep track of what is being spotted by Skimmers in your vicinity, as well as what stations in your vicinity are being spotted anywhere else. The result is a dynamic portrait of propagation from your QTH to and from wherever in the world, which bands are open and how well.

In addition to showing you a map display of the paths being reported, and on what bands, ViewProp also charts the level of activity on different bands over the course of each day in a readily-understandable format. There's much more to it, too, as you can learn by reading the Wiki with more details and a few screenshots: http://zl2ham.wikispaces.com/

I believe this is the first truly revolutionary use of the capabilities of the RBN to promote understanding of *your* HF propagation. Try it, and tell us if you agree. The only thing that Rick asks is that you join the Viewprop Yahoo group at http://groups.yahoo.com/group/viewprop/, and then you can download the beta version from the group's Files section.

Try it, and tell him what you like, what you don't, and what you think should be added. I promise you, he is listening.

--

73, Pete N4ZR
Check out the Reverse Beacon Network at
http://reversebeacon.net,
blog at reversebeacon.blogspot.com.
For spots, please go to your favorite
ARC V6 or VE7CC DX cluster node.

21152. Report SIDC Ursigram

21154. OT: Half inch Andrews Heliax LDF4-50A vs LMR-400

Yahoo group: DX-IS (2013)
Date: 2013-04-24 16:37:49 UTC
From: GARY HUBER
Topic: 21154 Message: 21154

As I consider the materials required to replace my 30 year old tower, rotor, antenna and cables, I have several like new runs on LDF4-50A terminated with N-male which could run from my ground window (UHF female) to the top of my 53 foot tower (60 feet max LDF4-50A cable run) where a flexible low-loss 10 foot jumper would terminate on a new BN-4000 and new TH-7 tribander. This configuration would require the 60 feet max LDF4-50A cable run, two half inch N female to UHF male adapters, one UHF double female and 10 feet of high quality RG8 cable as the jumper to the BN-4000.

The alternative which I'm leaning towards as it seems less likely to have connector/adapter loss and other potential problems is a single run of 75 feet of LMR-400 with factory terminated PL-259s between the BN-4000 and ground window UHF female termination. My current installation is 60 feet of RG-9913, a UHF double female adapter and a ten foot RG-8214 jumper.

I know the half inch Andrews Heliax has a much lower loss figure (0.357 db per 100 feet at 30MHz) for a given length versus the same length of LMR 400 (0.7 db per 100 feet at 30MHz) , but I'm thinking those three adapters (six connection points for loss) and their potential problems make it a wash or maybe the advantage goes to the 75 foot run of LMR-400.

I'd be interested in any comments or experiences you might have on the subject.

73 ES DX,
Gary -- AB9M

21155. Re: OT: Half inch Andrews Heliax LDF4-50A vs LMR-400

Yahoo group: DX-IS (2013)
Date: 2013-04-24 23:01:23 UTC
From: Steve Lybarger
Topic: 21154 Message: 21155

Gary

Although I have found some connectors with less than 1/10th of a dB loss, go with fewer connectors option. It is cleaner and lower chance of a problem, and, probably less overall loss than the heliax option. Avoid sharp bends in the coax.
Good luck and Good DX.
Steve, NU7T

SIDC SOLAR BULLETIN 25 Apr 2013, 1204UT
SIDC FORECAST (valid from 1230UT, 25 Apr 2013 until 27 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 25 Apr 2013 10CM FLUX: 115 / AP: 005
PREDICTIONS FOR 26 Apr 2013 10CM FLUX: 114 / AP: 004
PREDICTIONS FOR 27 Apr 2013 10CM FLUX: 113 / AP: 004
COMMENT:NOAA AR 1726 remains very dynamic. As it rotates over the solar west limb in the
coming 24h, it could still produce a large flare before disappearing out of Earth view.
The solar wind speed is still increasing as a result of the influence of a recurrent
coronal hole. Nevertheless we expect that most of the resulting geomagnetic activity has
passed. Hence we predict quiet geomagnetic conditions. A halo CME was observed by

DX Bulletin 17 ARLD017
>From ARRL Headquarters
Newington CT April 25, 2013
To all radio amateurs

SB DX ARL ARLD017
ARLD017 DX news

This week's bulletin was made possible with information provided by 5T0JL, NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. A group of operators will be QRV as TS8TI from Djerba Island, IOTA AF-083, from April 29 to May 6. Activity will be on 160 to 6 meters, using CW, SSB, RTTY and various PSK modes. Italian stations QSL via IK7JWX and all others via IK2DUW.

ISRAEL, 4X. A group of operators will be QRV as 4X75FOC during the month of May in celebration of the 75th anniversary of the First Class CW Operators' Club. QSL via 4Z4KX.

CYPRUS, 5B. Gabriele, I2VGW is QRV as 5B4/I2VGW until May 2 from various locations along the coast of Cyprus. QSL to home call.

MAURITANIA, 5T. Jean, 5T0JL will be QRV as 5T1FOC from May 1 to 31 in celebration of the 75th anniversary of the First Class CW Operators' Club. QSL to home call.

NIGER, 5U. Pierre, HB9AMO is QRV as 5U9AMO until May 30. Activity is holiday style on 80 to 10 meters using CW. QSL via M0URX.

SENEGAL, 6V. Luc, F5RAV is QRV as 6V7T from Somone until May 5. Activity is on the HF bands using SSB and PSK. QSL direct to home call.

PHILIPPINES, DU. Victor, R6AF will be QRV as DU1/R6AF from Busuanga Island, IOTA OC-090, from April 27 to May 3. QSL to home call.

ENGLAND, G. Look for GB75FOC and M0RSE to be QRV during the month of May in celebration of the 75th anniversary of the First Class CW Operators' Club. QSL via operators' instructions.

OGASAWARA, JD1. Harry, JG7PSJ is QRV as JD1BMH from Chichijima Island, IOTA AS-031, until May 4. Activity is on 40 to 10 meters using CW, SSB and RTTY. QSL to home call.

MARIANA ISLANDS, KH0. A group of operators will be QRV as NH0J from Tinian Island, IOTA OC-086, from April 27 to May 1. Activity will be on 80 to 10 meters using CW, SSB and RTTY. QSL via JJ2VLY.

LITHUANIA, LY. Special event station LY550W is QRV until May 20 in celebration of the 1463 expansion of the privileges of the city of Kaunas, led by Kazimieras Jogailaitis. QSL via LY5W.

LEBANON, OD. Walid, OD5ZZ has been QRV on 17 meters using SSB around 1530z. QSL via NI5DX.

GABON, TR. Thorbjorn, SM7RME is QRV as TR0A/p from Port Gentil, Mandji Island, IOTA AF-098, until April 29. QSL via SM7EHU.

ANTIGUA, V2. Paul, KB4GYT will be QRV as V25PM from Falmouth Harbor from April 27 to May 4. Activity will be holiday style on the HF bands using mainly CW with some SSB and PSK31. QSL direct to home call.

BELIZE, V3. Joe, K8JP will be QRV as V3FOC during the month of May in celebration of the 75th anniversary of the First Class CW Operators' Club. QSL via V31JP.

MICRONESIA, V6. Takio, JH3QFL and Keizo, JH3AZC will be QRV as V6H and V6S, respectively, from Pohnpei, IOTA OC-010, from April 29 to May 5. Activity will be on 80 to 6 meters using CW, SSB, RTTY and JT65. QSL to home calls.

MONTSERRAT, VP2M. Nao, JN1RVS will be QRV as VP2MRV from April 27 to May 3. Activity will be on 40 to 10 meters using CW and RTTY. QSL via JA1HGY.

LAKSHADWEEP ISLANDS, VU7. Krish, W4VKU will be QRV as VU7KV from Kavaratti Island, IOTA AS-011, from May 2 to 5. Activity will be on 80 to 10 meters using SSB and some RTTY. QSL to home call.

INDONESIA, YB. A group of operators are QRV as YE8B from Banggai Island, IOTA OC-208, until May 2. They are active on 80 to 10 meters using CW, SSB, and RTTY. QSL direct via YB8BRI.

SOUTH SUDAN, Z8. Olli, OH0XX is QRV as Z81X from Juba. Of late, he has been active on 17 and 15 meters using CW. QSL to home call.

THIS WEEKEND ON THE RADIO. The 10-10 International Digital Spring Contest, NCCC RTTY Sprint, NCCC Sprint CW Ladder, SP DX RTTY Contest, Helvetia Contest, QRP to the Field, Florida QSO Party and the BARTG Sprint 75 are all scheduled for this weekend. The AGCW QRP/QRP CW Party is scheduled for May 1. Please see April QST, page 84, and the ARRL and WA7BNM Contest websites for details.

From: jjreisert@...
Topic: 3663 Message: 21159

SB PROP @ ARL $ARLP017
ARLP017 Propagation de K7RA

ZCZC AP17
QST de W1AW
Propagation Forecast Bulletin 17 ARLP017
>From Tad Cook, K7RA
Seattle, WA April 26, 2013
To all radio amateurs

SB PROP ARL ARLP017
ARLP017 Propagation de K7RA

Solar activity quieted this week. The average daily sunspot number declined nearly 23 points to 90.6. Average daily solar flux values were down nearly 13 points to 109.1. The most active day was April 24, with a planetary A index of 19 and mid-latitude A index of 15. But that is still quite moderate activity. The average daily mid-latitude A index was the same this week as last, 4.9.

The predicted solar flux is 120 on April 26-29, 125 on April 30 through May 1, 130 on May 2-3, 125 on May 4-5, 120 on May 6, 115 on May 7-8, 120 on May 9-11, 115 on May 12-13, 110 on May 14-15, 105 on May 16-18, 110 on May 19 and 120 on May 20.

The predicted planetary A index is 12 on April 26, 5 on April 27 through May 4, 8 on May 5, 5 on May 6-18, and 8, 12, 12, 15, 12 and 5 on May 19-24.

F.K. Janda, OK1HH predicts the geomagnetic field will be quiet to active April 26, quiet to unsettled April 27 to May 10, quiet to active May 11-12, and quiet to unsettled May 13-19.

The Australian government's Ionospheric Prediction Service issued a geomagnetic disturbance warning at 0503 UTC on April 26. Increased geomagnetic activity is expected due to a high speed solar wind stream from a low-latitude coronal hole. Minor storm levels are possible. Active to minor storm levels are expected April 26, and unsettled to active levels are expected April 26-27.

See http://www.ips.gov.au/. You can go to http://www.ips.gov.au/mailman/listinfo/ to subscribe to their alert messages.

Bob Logan, NZ5A lives in Manor, a tiny town in central Texas. On Sunday, April 14 at 2032 UTC he was surprised to work HC2UA (Ecuador) on 6 meter CW. Bob ran 4 watts with a Flex 1500. The

antenna was unusual, an 80 meter inverted vee with the center at 35 feet, fed with ladder line and an HF antenna tuner, which Bob says "is not designed to tune 6 meters, but it does!" He also worked them at 2043 UTC on SSB, although they were not able to copy his report. "Quite exciting for me!" says Bob.

Jeff Hartley, N8II of Shepherdstown, West Virginia wrote on April 19: "10 and 12 meters have been quite poor with the recent solar activity decline, but 15 and lower continue to delight with 20 open to western EU and the middle East thru most if not all of their night. There were tremendous signals on 10 meters from south central and SE EU during the recent flux in 140s, the best days being April 10th and 11th.

"The highlight of propagation was working VK9CZ (Cocos-Keeling) on 10 CW easily around 1400 UTC and hearing JAs around 2230-2330 UTC on 10 one night with one JA QSO. I had a run of JAs on 12 meter SSB with the loudest over S9."

Scott Bidstrup, TI3/W7RI sent an article about a study with a pair of sounding rockets to see if turbulence in the E-region of the ionosphere at sunset could serve as a warning of disturbance in the F-layer an 1-2 hours later. Read it at http://phys.org/news/2013-04-rocket-mission-disrupts-radio.html.

NASA has a new video of the Sun showing three years of continuous images. In that time, if the Sun rotates relative to Earth about every 27.5 days, then this video should show 398 rotations of the Sun, in less than 4 minutes. Watch it at, http://www.nasa.gov/mission_pages/sdo/news/first-light-3rd.html.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for April 18 through 24 were 86, 101, 101, 76, 83, 95, and 92, with a mean of 90.6. 10.7 cm flux was 105, 99.4, 104.9, 109.3, 112.9, 117.5, and 114.7, with a mean of 109.1. Estimated

planetary A indices were 3, 2, 4, 3, 4, 7, and 19, with a mean of 6.
Estimated mid-latitude A indices were 2, 1, 2, 3, 5, 6, and 15, with
a mean of 4.9.

27 April 2013 A.R.I. DX Bulletin
No 1147
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3V - The operators and clubs participating in the TS8TI operation [425DXN 1137] from Djerba Island (AF-083) are 3V8ESG, 3V8SA, 3V8SF, 3V8ST, Leopoldo I8LWL, Antonello IK2DUW, Stefano IK6JRI, Fred IK7JWX, Ampelio IS0AGY, Rosy IW2NLC, Vincenzo IZ8LFI, Ashraf KF5EYY and Heathem YI1UNH. They plan to operate CW, SSB and digital modes on all bands, 6 metres included, between 30 April and 5 May. QSL via IK7JWX (for Italian stations, direct or bureau) and via IK2DUW (rest of the world, direct or bureau). Further information and logsearch at http://www.mdxc.org/ts8ti/ [TNX IK7JWX]
5B - Gabriele, I2VGW will be active as 5B4/I2VGW from four different locations along the coasts of Cyprus (AS-004) from 26 April to 2 May. As usual, he will focus on digital modes and 30, 17 and 12 metres. QSL via home call.
5U - Pierre, HB9AMO is active holiday style as 5U9AMO from Niger until 30 May. He operates CW on 80-10 metres. QSL via M0URX and LoTW. Logsearch at www.hb9amo.net/5u9amo.php
A3 - Vadym, UT6UD will be active as A35UD from Tongatapu Island (OC-049) on 1-7 May. He will operate CW, SSB and RTTY on 40-10 metres. QSL via UT6UD. [TNX NG3K]
CO - Lazaro CO2WL, Gustavo CO2NO and Rene CO2RVA will be active as T42T during the 47th Volta RTTY Contest (www.contestvolta.it) on 11-12 May. QSL via HA3JB. [TNX HA3JB]
E5_sc - Bruce, ZL1AAO will be active as E51AAO from Rarotonga (OC-013), South Cook Islands on 3-17 May. He will operate holiday style on 40-10 metres SSB. QSL via home call, direct or bureau, plus LoTW and eQSL. [TNX DX World]
F - Tim ON5HC, Jurgen ON5MF, Patrick ON7PQ, Geert ON7USB and Francis ON8AZ will be active as TM3B from Batz Island (EU-105) on 4-11 May. They will operate SSB, CW and digital modes on 80-10 metres. QSL via ON8AZ, direct or bureau. Further information can be found at www.eu105.be
F - A team of operators from the Radio-Club Vendeen will be active as F6KUF/p from Noirmoutier Island (EU-064) on 18-20 May. They will operate SSB, CW and RTTY with three stations on 80-2 metres. QSL via F6KUF. [TNX F5TRO]

FT5Z - This is the tentative schedule for FT5ZM [425DXN 1145]: the MV Braveheart will leave Freemantle (Australia) for Amsterdam Island on 15 January 2014. The journey will take 9 days, with an estimated arrival date of 24 January. Landing operations will commence as soon as the sea conditions and weather allow. Once the team is ashore, they will have 18 days to set up, conduct the DXpedition and tear down for departure. The team anticipates being back in Fremantle by 23 February. Bookmark www.amsterdamdx.org for updates and further information.
G - Special event callsigns GB70BOA (from Fort Perch Rock at the Mersey entrance) and GB70WA (from Leasowe Lighthouse) will be activated on 20-27 May to commemorate the 70th anniversary of the Battle of the Atlantic in World War II. Look for activity on 80-10 metres (as well as on 144 and 432 MHz) all modes. [TNX WB2YIP]
GJ - David, ON4DN will be active holiday style as MJ/ON4DN/p from Jersey (EU-013) on 6-9 May. He plans to operate from various lighthouses and WFF references. QSL via home call, direct or bureau. [TNX ON4DN]
I - ARI Siracusa will be active as IQ9SY between 11 May and 23 June during the XLIX Greek Theatre Festival. QSL via IT9DAA, direct or bureau. [TNX IT9NVA]
JA - Look for JS6RRR (QSL via bureau), JI3DST/JS6 (QSL via bureau) and JA3YEC/JS6 (QSOs confirmed automatically) to be active on all bands from Miyako Island (AS-079) from 27 April to 7 May.
LY - LY550W is active until 20 May for the Days of Kaunas City, an annual series of cultural events that celebrate the expansion of the city's privileges granted in 1463 by Grand Duke Casimir IV Jagiellon. QSL via LY5W. [TNX LY5W]
LZ - Special station LZ2013KM will be active on all bands and modes on 1-31 May to celebrate St. Kiril and Methodius' Day. QSL via LZ1BJ (email requests for bureau cards to lz1bj[@]yahoo.com) and LoTW.
OH0 - Members of the OI3V Radio Club will be active as OH0/OI3V from the Aland Islands (EU-002) on 3-5 May. They will be QRV on 80-10 metres CW, SSB and possibly also digital modes. QSL via bureau to OI3V. [TNX islandchaser.com]
OX - Henning, OZ1BII will be active again as XP2I from Kangerlussuaq, Greenland (NA-018) on 23-27 May. He will operate CW only and will participate in the CQ WW WPX CW Contest. QSL via OZ1BII, direct or bureau, and LoTW. [TNX NG3K]
PA - Celebrating the inauguration of King Willem-Alexander, the Kempische Amateur Radio Club (PI4KAR) will operate as PA00KING on 30 April.
PA - On 5 May 1923 the Governor General of the Netherlands East Indies opened officially the two-way telegraphy radio service from Radio Malabar (callsign PKX) to Radio Kootwijk in The Netherlands (callsign PCG). Celebrating the 90th anniversary from the Dutch side, special callsign PI90PCG will be active on 4-28 May. QSL via bureau. See YB below for information about the special station from Indonesia.
SM - Mel, SM0MPV will be active as SM0MPV/5 from Vassaro Island

(EU-084) between 1 May and 16 June. He will be a staff member at
the Vassaro Scout Center and will be QRV during his spare time.
QSL via home call (bureau preferred) and LoTW. [TNX rsgbiota.org]
SM - Fred, SM7DAY/p will be active again from Senoren Island (EU-138)
from 25 May to 1 June. He will operate CW and SSB on the HF bands.
QSL via home call, direct or bureau. [TNX SM7DAY]
VE - Members of the "NA-128 Contest Group" will be active as CF2I from
Ile Verte (NA-128) on 24-28 July, including the IOTA Contest. The
group will operate many stations from the lighthouse keeper's
quarters on many bands and modes (SSB, CW and RTTY, PSK63) before
and after the contest. QSL via VE2CQ and LoTW. [TNX VE2EBK]
VP2M - Once again Nao, JN1RVS will be active as VP2MRV from Montserrat
(NA-103) from 27 April to 3 May. He will operate CW and RTTY on
40-10 metres. QSL via JA1HGY, direct or bureau, and LoTW;
logsearch on Club Log.
VU7 - Krish, W4VKU (VU2VKU) now plans to be active as VU7KV from the
Lakshadweep Islands [425DXN 1146] from 2 May until his licence
expires, i.e. at 1829 UTC on 5 May. Expect him to be QRV on 80-10
metres SSB with some RTTY. QSL via W4VKU. [TNX QRZ DX]
W - Once again Team HAMCOW (http://hamcow.net) will be active as
W1ACT/p from Martha's Vineyard (NA-046) on 2-5 May. QSL via N1JOY,
direct only. [TNX rsgbiota.org]
YB - The IOTA activity by YB5NOF and YB5QZ from the Banggai Islands
(OC-208), which was announced to start on 26 April [425DXN 1139],
has been postponed. Hopefully the special callsign (possibly YE8P)
will be issued in late April, and operations might take place
around mid-May. Should the special callsign not be issued, John
and Anton will be QRV as YB5NOF/8 and YB5QZ/8. [TNX JN6RZM]
YB - Commemorating the 90th anniversary of Radio Malabar, special event
station YE90PK will be active on 3-5 May from the site of the
former radio station, at Gunung Puntang in West Java. QSL via
YB1LZ (OQRS on Club Log) and LoTW.

FOC SPECIAL EVENT ---> "FOC" suffix callsigns that are expected to be on
the air between 1 and 31 May to celebrate the 75th anniversary of the First
Class CW Operators' Club [425DXN 1143] include:
Belize V3FOC
Bulgaria LZ75FOC
Canada VA3FOC, VE6FOC
Chagos Isls VQ975FOC
Cyprus 5B75FOC

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

MISSION GOODWILL SOUTH SUDAN ---> The initial activity (ST0R) covered DXCC demand, and has been followed by a handful of hams working in the country and QRV with Z8 callsigns. However, South Sudan's "amateur radio infrastructure is not yet established. This include regulations, licensing procedures, visitor licensing and considerations on calling for locals to get involved. Radio Arcala has taken up the initiative to work with the local Telecom administrators and provide them with assistance and helping hand". Olli, OH0XX and Martti, OH2BH are currently in Juba, the capital, and are active as Z81X during their spare time. QSL via OH0XX. [TNX DX World]

NCDXF NEWS ---> The annual meeting of the Northern California DX Foundation board of directors was held during the International DX Convention in Visalia, California, on 20 April. Officers will remain unchanged for the next year with Rusty Epps W6OAT (President), Glenn Johnson W0GJ (Vice President), Don Greenbaum N1DG (Treasurer) and Kip Edwards W6SZN (Secretary). Reelected to the board of directors were Ned Stearns AA7A, Glenn Rattmann K6NA, Steve Merchant K6AW, Tom Berson ND2T, John Miller K6MM, Glenn Vinson W6OTC and Ken Anderson K6TA.
Contributions from clubs and individuals remain strong, helping NCDXF keep up with the increasing expenses of DXpeditions to rare, remote and dangerous entities. Please visit www.ncdxf.org for joining or renewing membership. NCDXF officially presented a $50,000 grant to the FT5ZM

Amsterdam Island DXpedition. This is the second largest grant in the 41 year history of NCDXF. During this time NCDXF has supported over 500 DXpeditions with over $1.8 million dollars.
The Northern California DX Foundation is also committed to bringing younger DXers and Contesters into our hobby. NCDXF will provide full tuition scholarships for hams 25 years of age and younger at all DX University and Contest University sessions held in North America for the next year. This includes those held at the Dayton Hamvention next month. Funding for this project comes from NCDXF's Scholarship Endowment Fund, which is separate from its General Fund used to support DXpeditions. [TNX W0GJ]

PIRATE ---> Peter, OX3XR has received information from the Greenlandic Communication Authorities that Leo Wolsing (OX3LW) "requested to terminate the call" back in August 1975. The callsign has not been reissued since then, so do not waste your time on working the station currently signing OX3LW as it is a pirate.

QSL HK6AAY & HK6DOS ---> Oscar, HK6DOS reports that EA5KB is no longer his QSL manager. The same applies to Carlos, HK6AAY. QSL for both is now "via bureau or e-QSL".

QSL ZP5YW ---> Effective immediately, Randy W5UE has agreed to serve as QSL manager for Mike ZP5YW. Mike's former manager, WA3HUP has retired from this service. Mike uploads his logs regularly to LoTW and eQSL, and is providing Randy all of his logs. New QSLs are being ordered so there may be a slight delay in replies. Direct requests should go to Randy Becnel, P.O. Box 170, Kiln MS 39556-0170, USA. OQRS (for ZP5YW as well as for other stations Randy manages) at http://w5ue.net/qsl-w5ue.html. [TNX W5UE]

THE INTREPID SPIRIT AWARD ---> "Tonight [20 April, at the IDXC 2013 in Visalia, Ed.] the Intrepid-DX Group is very proud present our 'Intrepid Spirit Award' to a notable DXer and DXpeditioner that we have come to respect and admire greatly, Mr. Silvano Borsa I2YSB. This award is to recognize Silvano's outstanding efforts to activate Somalia on three different activations, as well as Chad and most recently Burkina Faso.
We acknowledge Silvano's pursuit of Dxpedition excellence and his quest to activate the rare and often dangerous entities. It is for these reasons that we honor him tonight with our 'Intrepid Spirit Award'.
This 'Intrepid Spirit Award' is made in memory of our fallen friend and member, James McLaughlin, T6AF who was killed in Kabul, Afghanistan just two years ago this month". [Paul S. Ewing N6PSE, President, The Intrepid-DX Group]

THE P5 PROJECT ---> On 20 April, at the IDXC 2013 in Visalia, the Intrepid-DX Group, in partnership with the World-Wide DX Group, announced their "sustained and ongoing effort to activate North Korea", the most wanted DXCC entity world-wide. "We are committed to work as hard and as long as it takes to activate this rare and much needed entity. We will continue negotiating and flying into and out of the DPRK as needed during this process to lay the groundwork and to build the trust to ensure that a favorable outcome can be created". Read the full press release at

www.intrepid-dx.com/p5/ [TNX N6PSE]

QSLs received direct or through managers: 3B8/HB9ARY, 3B9FR, 3D2C, 3D2MF, 3D2OU, 3D2RO (OC-060), 3V8BB, 4L1MA, 4L8A, 5B8AD, 5M2TT, 5T0JL, 5T0SP, 5V7TT, 5X8C, 6O3A, 6Y3M, 6Y5WJ, 7X4AN, 7Z7AB, 9K2/SP4R, 9K2VO, 9M0L, 9Q6CC, 9U4U, 9Y4VU, A5A, A61ZX, A63HI, A92IO, AP2MB, BA8AG, BU2AQ, C31CT, CT9/DL5AXX, CW5X, CX2AQ, D3AA, D44BS, DB100AWPB, DL2RVL/HI9, E51E, E51WL, EA9/DL2RVL, EP3SMH, EW6DX, EX/UA4WHX, EY8/UA4WHX, FK/F4BKV, H44KW, H44RK, HA30S, HB30OK, HC2/UA4WHX, HD2A, HI3EPR, HI8W, HK0/F6BFH (NA-049), HK1/F6BFH (SA-040), HK6F, HT9H, JG8NQI/JD1, JX5O, JX9JKA, KC4AAA, KH2/G3ZEM, L22D (SA-022), LU6W (SA-096),LX1HD, NP2/N5RZ, OD5NJ, OY1CT, PT0S, PY0F/PP1CZ, RA2FF, S21XV, SV5BYR, T46RRC (NA-204), T47RRC (NA-086), T48RRC (NA-218), T6LG, T77KS, TC3DEU, TJ3AY, TT8TT, TX7M, TZ6BB, UK/UAWHX, V63UG, V63ZM, V73TS, VK0JJJ, VP2EC, VP2V/KE2VB, VP5/K0UU, VP8LIZ, VP8ROT, VP9I, VY0/VE3VID (NA-174), XR0YG, XT2CJA, XT2TT, XW0ZJZ, YB26SEAG, YB6N (OC-161), YE9IOTA (OC-150), YN7SU, Z81D, ZD8W, ZK3SB, ZL9HR.

PERIOD CALL REF
till 27/04 9A/HA5AUC, 9A/HA5BWW, 9A/HA7PC: Rab Island (EU-136) 1145
till 28/04 5B/G4IAR/p, 5B/G4IAQ/p, 5B/G0SGB/p: Cyprus (AS-004) 1146
till 28/04 5H1DX: Pemba Island (AF-063) 1145
till 28/04 IY4MKD: special Marconi station 1146
till 28/04 K5KUA/5: Galveston Island (NA-143) 1145
till 28/04 PA150BA: special callsign 1143
till 28/04 T6MO: Afghanistan 1145
till 29/04 FR/F5MNW: Reunion Island (AF-016) 1143
till 29/04 VA7AQ and VE7ACN: Gambier Island (NA-091) 1146
till 30/04 8J6ISG: special event station 1138
till 30/04 8Q7KP: Maldives (AS-013) 1146
till 30/04 PA13KING: special callsign 1143
till 30/04 XR86PL: special event callsign 1144
till 30/04 ZK3N: Tokelau (OC-048) 1143
till 01/05 PB33Q: special callsign 1143
till 02/05 5B4/I2VGW: Cyprus (AS-004) 1147
till 02/05 PC13KING: special event station 1143
till 02/05 TO4IPA: Martinique (NA-107) 1146
till 04/05 JD1BMH: Chichijima (AS-031), Ogasawara 1140
till 04/05 TO5PX: Martinique (NA-107) 1144
till 05/05 6V7T: Senegal 1145
till 05/05 PA200KING: special event station 1143
till 07/05 PJ2/DH2AK and PJ2/DL1THM: Curacao (SA-099) 1146
till 08/05 5H3MB: Tanzania 1139
till 08/05 PB200KING: special callsign 1143
till 11/05 PG6KING: special callsign 1143
till 12/05 PB2013KING: special callsign 1143
till 20/05 LY550W: special callsign 1147
till 23/05 PA33KBX: special callsign 1143
till 30/05 5U9AMO: Niger 1147
till 30/05 7T50ARA and 7T9A: special callsigns (Algeria) 1139
till 30/05 SV3/ON4LO/p: Greece 1145
till 31/05 HG52FC: special event station 1141
till May 9G5MS: Ghana 1134

till 30/06 J49C: special callsign 1144
till 17/07 R27, RA27, RT27, RU27: special prefixes 1145
till October T6MH: Afghanistan 1125
till 31/12 4A1TD: special callsign 1143
till 31/12 DL50FRANCE: special station 1131
till 31/12 EI13CLAN: special callsign 1130
till 31/12 Gx100C: special callsign 1134

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30427
SIDC SOLAR BULLETIN 27 Apr 2013, 1104UT
SIDC FORECAST (valid from 1230UT, 27 Apr 2013 until 29 Apr 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 27 Apr 2013 10CM FLUX: 122 / AP: 007
PREDICTIONS FOR 28 Apr 2013 10CM FLUX: 122 / AP: 007
PREDICTIONS FOR 29 Apr 2013 10CM FLUX: 122 / AP: 007
COMMENT:Flaring activity is expected to decrease as NOAA AR 1726 (Cat 51) is rotating
further behind the limb. NOAA AR 1731 is relatively quiet up till now, despite a beta-gamma
configuration.
We are still inside a speed solar
wind stream but most of the resulting geomagnetic activity is
behind us. Quiet geomagnetic conditions are expected in the coming days.
TODAY'S ESTIMATED ISN : 075, BASED ON 09 STATIONS.

SOLAR INDICES FOR 26 Apr 2013

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1110
BID: $OPDX.1110
April 29, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, KB2RLB, KH2AR/W4, W2GB, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, W5UE, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, W0GJ, AT International, DK8JB & The DX News Letter, DL1SBF, DL4AAE, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK1SOW, JS6RRR, LZ1BJ, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and YF1AR for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st-April, through Sunday, 28th-April there were 225 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2 & ZF2, FIJI AND CAYMAN ISLANDS. "The Daily DX" is reporting that Harry, AA2WN, will be active as 3D2WN from Fiji between June 1-7th. He will then travel to the Cayman Islands and be active as ZF2WN between July 13-20th. The main purpose of both trips is scuba diving, but he

"will be active when [he's] not diving. He'll be running 100 watts from an IC706MKII using a dipole mostly on 17 and 20 meters CW, SSB and possibly some digital modes. QSL via AA2WN and LoTW.

5B, CYPRUS. By the time you read this, Gabriele, I2VGW, will be active 5B4/I2VGW from four different QTHs along the coasts of Cyprus (AS-002) until May 2nd. Activity will be holiday style with a focus on the Digital modes and the 30/17/12 meter bands using his IC-7200 and Buddipole. QSL via I2VGW.

9H25, MALTA (Special Event). Members of the Dutch Society of Radio Amateurs (VRZA Afd. Kagerland)club station (PI4KGL) will be active as 9H25 (that is the whole callsign) from Qawra between May 20th and June 4th. Activity is to celebrate their 25th Holiday DXpedition to Malta. Operations will be on 80-6 meters using CW and SSB. Suggested frequencies are:
CW - 3530, 7025, 10115, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
6m - 50095/CW and 50130/SSB

Operators mentioned are Wim/PG9W (9H3ON), Marion/PD3MV (9H3MV), Floris/ PA1FW (9H3E), Rinus/PA2HEM (9H3MS), André/PA3HGP (9H3S), Jasper/PB2JJ (9H3JN), Sjirk/PE1OFJ (9H3YM), Hans/PA0JBB and Aad/PA11137. QSL via PI4KGL. A log search is available at the 9H25 Web page: http://members.ziggo.nl/9h25

E4, PALESTINE. Peri, HB9IQB, has been granted a renewed license by the Ministry of Telecommunications & Technology in Ramallah and plans to be active again as E44PM later in the year. For more details on his past operation and updates, visit the following Web page at: http://www.hb9iqb.ch/palestine.html

E5, SOUTH COOK ISLANDS. Just a reminder that Bruce, ZL1AAO, will once again be active as E51AAO from Rarotonga Island (OC-013) between May 3-17th. Activity will be holiday style, and he will be operational on SSB only, 40-10 meters, using 100 watts to a dipole or 1/4 wave GP antennas. QSL via LoTW, eQSL and direct only; sorry no Bureau cards. He will upload the log when he returns home.

FO & FO/A, FRENCH POLYNESIA AND AUSTRAL ISLANDS. Yoshi, JJ8DEN/KH0PR, will be active as FO/KH0PR from two French Polynesian Islands starting at the end of the month as follows:
April 30th-May 7th - Pukapuka Island (OC-062); DXCC French Polynesia
May 8-15th - Raivavae Island (OC-114); DXCC Austral
Activity from both islands will be on 40-10 meters using CW, RTTY, PSK31 and JT65A. Suggested frequencies are:
CW - 7004, 10104, 14004, 18074, 21004, 24894 and 28004 kHz
RTTY - 7034, 10144, 14084, 18104, 21084, 24924 and 28084 kHz
AC Power on Pukapuka Island only runs between 0630-2400 LOCAL TIME. He will try using a car battery at night. This plan is dependent on gasoline at Pukapuka. On Raivavae Island, he will have AC power all day. His equipment is an IC-7000 w/100 watts into an inverted V. QSL via JJ8DEN, direct with SASE and 2 USDs or by the Bureau. There is a chance that his plans might be cancelled due to the flights to the remote islands.

FOC SPECIAL EVENT. Just a reminder that starting May 1st, look for stations signing "FOC" in their suffix callsigns throughout the end of the month. Activity is to celebrate the 75th anniversary of the "First Class CW Operators' Club". List of "FOC" stations are available at: http://www.g4foc.org/Default.aspx?pageId=1537891
Complete details, as well as special awards are available, at the FOC Web page: http://www.g4foc.org

HB0, LIECHTENSTEIN. Operators Roman/DL3TU and Uwe/DL4AAE will be active as HB0/DL3TU and HB0/DL4AAE on the second or third full weekend of September. Weather permitting, they will attempt to operate from the summit Augstenberg (2359 meters A.S.L.) using CW only on the higher bands with an emphasis on Asia. QSL via their home callsigns, direct or by the Bureau. For updates and details, visit Roman's Web page at: http://www.mydarc.de/dl3tu

HH, HAITI. Tom, KC0W, will be active as HH5/KC0W from the extreme northern tip of Haiti for 18 days in July. Activity will be 80-6 meters using CW only. He will use a vertical antenna placed directly over salt water. Tom states, "My operating location in Haiti has unobstructed HF takeoffs to North America, Europe & Africa. Haiti has been underrepresented on CW so hopefully HH5/KC0W will go into many CW enthusiast's logbooks." QSL only direct to his home callsign. Look for more HH5/KC0W information as July approaches.

IOTA NEWS.....
AF-109. (New IOTA) Just a reminder that members of the Egyptian Radio Amateur Society for Development (ERASD) plan to be active as SU8N from Geziret Disuqi (aka Nelson's Island), an island in the Nile Delta and Sinai Region Group, during May for one week (May 3-10th). "Nelson's Island" is approximately 20 kilometers east of the Egyptian port of Alexandria, four kilometers north of Cape Aboukir. Nelson's Island is approximately 350 meters by 150 meters. Activity will be on most HF bands. Operators mentioned are Said/SU1SK, Ateff/SU1AO, Hossam/SU1HM and Ayman/SU1AR. Look for more info to be forthcoming. Also, watch the ERASD's Web page at: http://www.qsl.net/egyptham
Also, watch: https://www.facebook.com/events/441478712566533

AS-079. Take, JI3DST, will be active from Miyako Island between 0900z, April 27th and 0000z, May 7th. He states that he will use three different callsigns on the island: JS6RRR (Main), JI3DST/JS6 (Sub) and JA3YEC/JS6 (For JA). Activity will be on 160/80/75/40/30/20/17/15/12/10/6 meters using CW, SSB, FM, RTTY and PSK31. Operations may vary in case of heavy rains or other conditions. QSL routes are as follows: JS6RRR via JS6RRR, JI3DST/JS6 via JI3DST and JA3YEC/JS6 is only 1 way, and he does not need your QSL. Via bureau is best. Please check QRZ.com for more details.

EU-064. Members of the Radio Club Vendéen (F6KUF) will once again be active as F6KUF/p from the Sebastopol Polder (FFF-218) on

Noirmoutier Island between May 18-20th. Activity will be on
80-2 meters on the usual WFF frequencies, +/- QRM permitting,
and using CW, SSB and RTTY. QSL cards are via the Bureau;
SWL cards are welcome.

EU-095. Members of the Castres DX Gang will be active as TM5FI from
Ratonneau Island (DIFM ME003, DFCF 13-061) between May 15-22nd.
Activity will be on the HF bands. QSL via F5XX.

EU-125. Operators Olaf/DL4HG and Andy/DL7AT will be active as OZ0TX
from Mando Island (DIA NS-003, WWFF OZFF-004) between July
26-28th. Activity will be on all HF bands using CW and SSB.
They also plan to be in the RSGB IOTA Contest (July 27-28th).
QSL via DL7AT.

EU-129. Operators Gunter/DL4WA, Frank/DL1WA Joerg/DL3ARM will be
active DL1WA/p from Usedom Island during the RSGB IOTA Contest
(July 27-28th). QSL via his home callsign.

EU-064. Gil, F4FET, will be active as F4FET/P from Yeu Island (DIFM
AT013) for 2 hours on May 5th. QSL via his home callsign.

EU-107. Gil, F4FET, will be active as F4FET/P from Petite Island
(DIFM MA055) and Er Island (DIFM MA013) for 1-2 days between
May 30th and June 5th. QSL via his home callsign.

EU-138. Fred, SM7DAY, will once again be active as SM7DAY/p from Senoren
Island between May 25th and June 1st. Activity will be on all
HF bands using CW and SSB. QSL via his home callsign, by the
Bureau or direct (QRZ.com).

EU-157. Gil, F4FET, will be active as F4FET/P from Cezembre Island
(DIFM MA008) during the RSGB IOTA Contest (July 27-28th) as
a Single-Op/24-HRS/SSB-Mode/High-Power entry. QSL via his
home callsign.

ISWL CALLSIGNS (For May). The following ISWL club callsigns will be
used throughout the month of May 2013:

GX4BJC/A - Operated from Eastbourne, in East Sussex, by Peter, G0NQZ.
(WAB Square TQ50, England, IOTA EU-005 and WLOTA LH-1841).

MX1SWL/A - Operated from Hove, in Sussex, by George, G3VBE. (WAB
Square TQ20, England, IOTA EU-005 and WLOTA LH-1841).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual
operator. The I.S.W.L. is a member of the European PSK Club. All QSL
info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>.
NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see
<www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for
their awards.

KG4, GUANTANAMO BAY (6m Op). Operators Terry/K4RX (KG4RX), Ken/AC4TO (KG4TO) and Tip/N4SIA (KG4AS) will be active from GITMO for a 6 meter DXpedition in WW, grid FK29kv between June 22nd-29th. They will use a K3 with PR6 and KPA500 into a 6M5XHG optimized 6 element yagi. There will also be some simultaneous CW HF operations on all bands. KG4RX and KG4TO will have their logs on ClubLog. QSL to their respective home callsigns.

KH6BZF PROPAGATION FORECAST/REPORT (April 29th-May 5th)....

KH8, AMERICAN SAMOA (Update/Special Event). Operators Aki/ZL1GO (JE4EKO), Masahiro/JH3PRR, Kip/W6SZN and Jacky/ZL3CW (F2CW/WE3B) will be active using the special event callsign N8A from the Turtle and Shark Lodge, Village of Vaitogi, on the southeast coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385) between November 12-27th. Activity will be on the HF bands, 160-10 meters, with a significant effort on 160 meters. Focus will be on EU for the high bands. CW will be the primary mode with some SSB and RTTY possible. Their location will be well south of Pago Pago to limit mountain low angle blockage. Their operations will include the CQWW DX CW Contest but with extended pre-contest activity intended to make KH8 widely available. QSL via ZL3CW. The N8A Web page is now available online at: http://www.n8a.eu

LZ2013, BULGARIA (Special Event). Members of Bulgarian Federation of Radio Amateurs will activate special event station LZ2013KM between May 1-31st. Activity is to celebrate "National St. Cyril (Kiril) and Methodius Day (creators of Cyrillic alphabet). Operations will be on all bands and modes. QSL via LZ QSL Bureau to LZ1BJ (see details on QRZ.com for E-mail requests). The log will be uploaded into LoTW after the end of activity.

NCDXF PRESS RELEASES (Two - Visalia Report and NCDXF DX/Contest University Scholarships). Dated April 22nd:
1) NCDXF annual board meeting - The annual meeting of the Northern California DX Foundation board of directors was held during the International DX Convention in Visalia, California, on April 20, 2013. Officers will remain unchanged for the next year with Rusty Epps, W6OAT, President; Glenn Johnson, W0GJ, Vice President; Don Greenbaum,

N1DG, Treasurer; and Kip Edwards, W6SZN, Secretary. Reelected to NCDXF's board of directors were Ned Stearns, AA7A, Glenn Rattmann, K6NA, Steve Merchant, K6AW, Tom Berson, ND2T, John Miller, K6MM, Glenn Vinson, W6OTC and Ken Anderson, K6TA.
Contributions from clubs and individuals remain strong, helping NCDXF keep up with the increasing expenses of DXpeditions to rare, remote and dangerous entities. NCDXF officially presented a 50,000 USDs grant to the FT5ZM Amsterdam Island DXpedition. This is the second largest grant in the 41 year history of NCDXF. During this time NCDXF has supported over 500 DXpeditions with over 1.8 million US dollars.
See pictures from the Visalia DX convention where NCDXF gave out grants checks for over $60,000 to various DXpeditions:
https://sphotos-b.xx.fbcdn.net/hphotos-ash4/p480x480/399576_10151615197083210_1374193429_n.jpg
https://sphotos-b.xx.fbcdn.net/hphotos-prn1/48039_10151615197258210_1499237512_n.jpg

2) NCDXF DX University and Contest University Scholarships - NCDXF is committed to bringing younger DXers and Contesters into our hobby. NCDXF will provide full tuition scholarships for hams 25 years of age and younger at all DX University and Contest University sessions held in North America for the next year. This includes those held at the Dayton Hamvention next month.
Funding for this project comes from NCDXF□s Scholarship Endowment Fund, which is separate from its General Fund used to support DXpeditions.
Credit for the success of NCDXF is made possible by our contributors, individuals and clubs.
Joining or renewing membership has never been easier. Please visit our website at : http://www.ncdxf.org
Glenn Johnson, W0GJ
Vice President, NCDXF
w0gj@...

OG0, ALAND ISLAND. Timo, OH6EI, will once again be active as OG0Z during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band/High-Power entry. QSL via W0MM.

P4, ARUBA. John, KK9A, will once again be active as P40A. Activity will be during the CQWW WPX SSB Contest (May 25-26th) as a Single-Op/All-Band entry. Outside of the contest, activity will be on all bands using CW and SSB. QSL via WD9DZV.

H44KW QSL STATUS. Phil, G3SWH, reported on April 22nd: "Just to let you know that I have processed all the H44KW direct QSL requests received to date via snail mail and taken them to the local post office. I'm now working on the OQRS bureau requests."

ZP5YW QSL MANAGER UPDATE. Randy, W5UE, reports: "Effective immediately, I have agreed to serve as QSL manager for Mike, ZP5YW. Mike's former manager, WA3HUP has retired from this service. Mike uploads his logs regularly to LoTW and eQSL. Mike is providing me all of his logs. New QSLs are being ordered, so there may be a slight delay in replies. Direct requests should go to Randy Becnel, W5UE, P.O. Box 170, Kiln, MS, 39556-0170, USA. OQRS requests can be made for ZP5YW as well as other stations I manage from my web site: http://w5ue.net/qsl-w5ue.html Please help get the word out."

QSL RECEIVED VIA LoTW: 3C0E, 3C6A, 4A8MDR, 5W0W, 6W1/N2WQC, 7N2JZT/6, 8Q7NC, 9A1A, 9M2/R6AF/P, 9U4U, A45XR, A92IO, BA7NO, C6AKQ, D2QV, D3AA, EY8MM, F6CSR, H44KW, H44RK, HK0JJH, HK6F, J6/N7QT, NP2/N5RZ, OD5PY, RI1ANP, RU27ON, SP3SLA, T2T, UT3IB, V31YK, V44KAI, VK9CZ, WH7W, YI1RZ and ZF1DZ

QSLS RECEIVED VIA MAIL: 3D2C, 4L1MA, 9K2/SP4R, 9Q6CC, 9U4U, BY8AC, BY8DX, CP6UA, D3AA, D44BS, E40VB, H44KW, H44RK, HD2A, HK0/F6BFH, OD5NJ, OY1CT, PT0S, PY0F/PP1CZ, S21XV, T46RRC, T47RRC, T48RRC, TR8CA, TT8TT, TU2T, UA0ABK, UK8OM, VK6ANC, VU2PAI, XR0YG, XT8TT, ZL9HR and ZP9MCE

QSLS RECEIVED VIA THE BUREAU: 4K7Z, 5N6/YL2SW, 5B4AJC, 6V7D, 6W/RK4FG, 7O6T, 8Q7DV, A61AR, A65BP, CA3OEV, CT9/YL1ZF, D44TBE, EF8M, HB0WR, HK3W, J38XX, J5NAR, JY4NE, TK/DF6ZY, RI1ANC, RI0FM, VR2/UA3QNS, ZK3OU and ZM4T

SW5, DODECANESE. Rich, M5RIC, will be active as SW5CC (yet to be confirmed) from Rhodes Island (EU-001) starting October 23rd until the end of the month. Activity will be on 30-10 meters, especially 30/17/12 meters, using SSB and RTTY. He also plans to be in the CQWW SSB DX Contest (October 26-27th) as a Single-Op/Single-Band (??)/High-Power entry. For updates, visit his Webpage at: http://m5ric.co.uk/sw5cc-october-2013

T6, AFGHANISTAN. Doug, ND9Q, is now active as T6DA from Panjwayi, Kandahar, until sometime in August. He is currently operating with a FT-857D with a maximum of 20w through an end-fed dipole for 10/20/40m. He will be changing antennas soon to allow 100w operations on all bands, and he will

also be adding PSK31 and other Digital modes when his equipment arrives in country. He states, "Due to an extensive (80+ hour) work week, I will be unable to schedule operating times in advance."

T6, AFGHANISTAN (Update/Correction). Tim, KB2RLB (ex-DA2TF and YI9RLB), is currently operating in Afghanistan as T6TM in Eastern Kabul on an American military compound (inside an Afghan compound). He informs OPDX, "The T6 call was received after submitting my application through the military channels here. I plan on being here for at least another year and will be working mainly Fridays between the hours of 0400 and 1300 UTC. My OP Conditions: FT-897D, Clover leaf G5RV (Working to put up some other wire), Z11Pro Tuner. I will be working PSK, SSB and might do some CW (if I get the nerve up since it has been a while for me)." QSL via KB2RLB. CORRECTION TO OPDX.1109. Your editor mixed up some info last week between T6JP and T6TM. It is Mike, T6JP (not Tim, T6TM), who is expected to leave on April 25th, but is expected to return within 2 months (see below). However, Tim did tell us this week that he will be going on vacation sometime in June.

T6, AFGHANISTAN (Update/Correction). Jesse, KB2OBQ, was once again active as T6JP from Panjwai in the Kandahar Province starting May 15th. However, he was planning to leave on April 25th, but is expecting to return within 2 months (not yet planned). He states he can be active as T6JP through August 2014. Activity will be on 160-10 meters (mostly 40/20/10m) using 100 watts, on CW and SSB. Logs will be uploaded daily (if possible) to LoTW, eQSL, QRZ.com. For more details and updates, watch QRZ.com (under T6JP).

TR, GABON. Thorbjorn, SM7RME, is once again active as TR0A/p from Port Gentil, Mandji Island (AF-089), until April 30th. QSL via SM7EHU.

V6, MICRONESIA. Just a reminder that operators Takio/JH3QFL and Keizo/JH3AZC will be active as V6H and V6S, respectively, from the South Park Hotel in Pohnpei between April 29th and May 5th. Activity will be on 80-6 meters using CW, SSB, RTTY and JT65. QSL via their home callsign.

VK9N, NORFOLK ISLAND. Just a reminder that twelve operators and members of the Oceania DX Group (ODXG) will be active as VK9NT from Norfolk Island (OC-005) between May 3-13th. The group plans to have 4 stations covering all bands 80-10 meters on CW, SSB and RTTY. Operators mentioned are Chris/VK3QB (Team Leader), Luke/VK3HJ, Lee/VK3GK, Benton/VK3CBV, Allan/VK2CA (QSL Manager/Webmaster), Catherine/VK4GH, John/VK4IO, Roy/VK3GB, Peter/VK3IJ, Graeme/VK3GL and San/K5YY. An "Online QSL Request Service" will be available for Bureau, and direct cards on ClubLog which is the PREFERRED method. If for some reason you cannot use the OQRS or LoTW, QSL can go direct to VK2CA. For more details and updates, visit the VK9NT Web page at: http://vk9nt.odxg.org

VP2M, MONTSERRT. By the time you read this, Nao, JN1RVS, will once again be active as VP2MRV from Montserrat (NA-103, WLOTA 1475) until May 3rd. Activity will be on 40-10 meters using CW and RTTY. QSL via JA1HGY, direct or by the Bureau, and LoTW. There is a log search on ClubLog.

VU7, LACCADIVES ISLANDS (Update to OPDX.1109 - Lakshadweep Islands).
A couple of sources are reporting that Krish, W4VKU/VU2VKU, who is now
active as 8Q7KP, has received his plane tickets to fly to an island in
the VU7 chain, either Kavaratti or Agatti. He will be active as VU7KV
between May 2-5th. Remember, his plan is for SSB and some RTTY on 80-10
meters using a TS-480Sat and TenTec Hercules 2 amp into a Butternut HF9V
and a 2 element SteppIR yagi + 30/40m trombone. Basically the same equip-
ment used at 8Q7KP. QSL via W4VKU, by the Bureau, LoTW or eQSL.

XP, GREENLAND. Henning, OU2I/OZ1BII, will once again be active as XP2I
from Kanger-lussuaq between May 23-27th. Activity will be CW only. He
will participate during the CQWW WPX CW Contest (May 25-26th) as a Single-
Op/All-Band/Low-Power entry. QSL via OZ1BII (see www.oz1bii.dk/qsl-info.htm).

XU, CAMBODIA (XZ Possible!). Alex, M6CFW, reports on QRZ.com that he
recently received a license to operate as XU7WXA from Phnom Penh and
will be using it when he visits the country for work. Alex states, "Future
dates will be posted here (QRZ.com), and I will try to be on-air as much
as work permits. These trips are NOT designed to be full blown DXpeditions.
Having said that if you need an XU7 for an award, then I'd be happy to
arrange a sked and try to make contact. I will be using all HF bands,
SSB and PSK31/63. I'm limited to 100W, but given how flat Cambodia is,
I should still be able to reach pretty much anywhere. QSLs will be
uploaded pretty much immediately to LoTW and eQSL. If you need a paper
card then I'm happy to provide them, but ONLY directly via my UK address
M6CFW, and ONLY with $2, □2, £2 or 2 VALID IRCs. I will hopefully be
operating soon from XY/XZ (Myanmar). Negotiations for licenses are well
advanced, and once I have it then I will mount a one man DXpedition."

XZ, MYANMAR. Simon, HS0ZIB, announced on QRZ.com: "During the months of
May and June 2013, I will again operate XZ1K from Tanintharyi State. I
will only operate on PSK31, according to when I have free time. From 1st
July, I will be working in Laos, but I will try to return each holiday
to re-activate XZ1K. QSLs will only be available via online verification.
There is, of course, no bureau in Myanmar and I will have no permanent
address there. I will mail out a hard-copy QSL for each QSO verification.
SWLs may also submit their reception reports."

YE90, INDONESIA (Special Event). Members of the ORARI Jawa Barat and YB
Club DX, along with the Bandung Heritage Community will activate the
special event station YE90PK between May 3-5th. Activity is to commemorate
the 90th anniversary of Radio Malabar. Activity will be on all modes and
HF band. The location of Radio Malabar is in Puntang, Mount Malabar,
South of Bandung, West Java. For more details, see:
http://www.qrz.com/db/YE90PK

Z8, SOUTH SUDAN. Olli, OH0XX, is now active as Z81X from Juba. The length
of his stay is not known. Activity has been on 17/15 meters CW. QSL via
OH0XX. Hopefully, more details will be forthcoming.

ZD8, ASCENSION ISLAND. Bob, G4DBW, will once again be active as ZD8RH
from Ascension Island between April 29th and May 3rd. Since Bob is working

on the island, his activity will be limited. Operations will be mainly
on CW. Suggested frequencies are around 7007, 10105, 14007, 18073, 21007,
24897 and 28007 kHz. Equipment is a FT857 w/100 watts and a modified MP-1
portable whip antenna. QSL direct via G4DBW with 2 'green stamps' or IRC
or via RSGB Bureau. Bureau replies can take up to 18 months.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30429
SIDC SOLAR BULLETIN 29 Apr 2013, 1304UT
SIDC FORECAST (valid from 1230UT, 29 Apr 2013 until 01 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 29 Apr 2013 10CM FLUX: 137 / AP: 010
PREDICTIONS FOR 30 Apr 2013 10CM FLUX: 139 / AP: 001
PREDICTIONS FOR 01 May 2013 10CM FLUX: 140 / AP: 001
COMMENT:Solar activity was moderate during the last 24 hours, with several C-class
flares occurring in NOAA ARs 1731, 1733 and a yet unnumbered AR at S19E79
(Catania 59). These 3 regions are the main candidates for further C class
flares in the next 48 hours, with even a risk for an isolated M flare from
NOAA ARs 1731 and 1733. Several CMEs occurred in the last 24 hours, one at
1325 UT on April 28, in the vicinity of Cat. AR 59, behind the limb, one at
2112 UT on the same day, related to a C4.4 flare in NOAA AR 1733, and one
on April 29 around 0324 UT, linked to a filament eruption in the vicinity
of AR 1732. None of these events appear to be geoeffective. We expect
geomagnetic activity to remain at quiet levels for the next 48 hours.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30430
SIDC SOLAR BULLETIN 30 Apr 2013, 1204UT
SIDC FORECAST (valid from 1230UT, 30 Apr 2013 until 02 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 30 Apr 2013 10CM FLUX: 151 / AP: 003
PREDICTIONS FOR 01 May 2013 10CM FLUX: 155 / AP: 001
PREDICTIONS FOR 02 May 2013 10CM FLUX: 158 / AP: 001
COMMENT:Solar activity is on the rise with M class flares likely from NOAA ARs 1731
and 1730. The latter showed quick evolution from yesterday and is it now a
beta-gamma-delta region. C flares are expected from NOAA ARs 1732, 1733 and
to a lesser extent AR 1734. Warning conditions are raised for protons, due
to the position of AR 1730 on the disk and the risk of M class flare. The
strongest flare of the last 24 hours was a C5.9 at 2032 UT peak time, in
NOAA AR 1730. No CME is associated with this event. We expect mostly quiet
conditions for the geomagnetic activity during the next 48 hours. Current
conditions are quiet. ACE observations show a slight increase of the solar
wind speed and weak excursions of the interplanetary magnetic field.

Joe, W9JUV became a Silent Key this morning.

Joe had worked almost everything there was to work.
A consummate DX'er and a true gentleman.
Joe was one of the founding members of the Northern Illinois DX Assn.

There is a nice writeup on Joe in the May QST.

RIP Joe, we will miss you greatly.

I think everyone knows what a GCR list is, but what does "GCR" stand for? Is it strictly a ham radio thing or does it have wider usage?

I (dumb newbie no-code extra) had never head of a GCR list, but:

Hi John:

GCR stands for *"General Certification Rule*". Most awards managers
don't want to see the cards used to earn the awards. (DXCC and WAZ
being MAJOR exceptions.) They will be satisfied with your application
containing one or two signatures of witnesses who certify that they have
seen the cards, and that the ones listed are actually in the possession
of the applicant.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30501
SIDC SOLAR BULLETIN 01 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 01 May 2013 until 03 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 01 May 2013 10CM FLUX: 160 / AP: 016
PREDICTIONS FOR 02 May 2013 10CM FLUX: 163 / AP: 007
PREDICTIONS FOR 03 May 2013 10CM FLUX: 163 / AP: 007
COMMENT:We expect active conditions (M-class flares likely) to prevail for the next
48 hours. NOAA ARs 1730 and 1731 can still produce an isolated flare of
that magnitude. C-class flares are expected from NOAA ARs 1732 and 1734.
On May 1st, NOAA AR 1730 produced a C9.6 flare at 01:26 UT (peak time) and
a C5.5 flare at 0729 UT (peak time), but no associated CME can be observed.
In contrast, a rather wide CME occurred on May 1st around 0248 UT (LASCO C2
observations) on the East limb, but it is a backside event and is not
geoeffective. Geomagnetic activity is expected to be mostly quiet within
the next 48 hours, with isolated periods of active conditions. Current
conditions are unsettled to active at planetary level (Kp=4) and at local
level (K=4 at Dourbes between 06 and 09 UT). ACE data show, during the last
18 hours, a smooth decrease of the Bz component of the interplanetary
magnetic field down to -10 nT, with stronger variations between 0 and -10
nT from 06 UT onward. The source of this activity is not clear at the
moment.

PREDICTIONS FOR 04 May 2013 10CM FLUX: 152 / AP: 001
COMMENT:An M1.1 class flare occurred on May 2nd, at 0510 UT (peak time), in NOAA AR
1731, accompanied by a type II burst and a CME. This region still has the
potential for an extra M class flare in the next 24 to 48 hours, and we
therefore expect active conditions for this time period. NOAA AR 1730 is
slightly less complex but an isolated M flare is not excluded. C flares are
expected from NOAA ARs 1732 and 1734. The bulk of the CME from this
morning is heading northward, but its southern flank might pass by the
Earth. We expect an arrival in the morning of May 6th, triggering active
to possibly minor storm conditions. For the next 48 hours, geomagnetic
conditions are expected to be mostly quiet to unsettled. Conditions were
mostly active during the past 24 hours, with several periods at K=4 at
planetary levels. This corresponds, as observed by ACE, to a period of
negative Bz component down to -10 nT, and to a slight increase in speed,
which might be linked to a small coronal hole to the west of NOAA AR 1731.

SB DX ARL ARLD018
ARLD018 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TONGA, A3. Masato, JA0RQV is QRV as A35JP from Tongatapu Island, IOTA OC-049, until May 22. Activity is on 80 to 10 meters using CW and SSB. QSL to home call.

MOZAMBIQUE, C9. Gert, ZS6AYU is QRV as C91GR from Bilene, Gaza Province, until May 7. Activity is holiday style on 40 to 10 meters. QSL to home call.

FEDERAL REPUBLIC OF GERMANY, DA. Special event station DR0PALAEON is QRV until March 31, 2014 in commemoration of the discovery of the oldest human-made weapons in an archaeological exploration near Schoeningen. The discovered spears date back approximately 300000 years. QSL via bureau.

SOUTH COOK ISLANDS, E5. Bruce, ZL1AAO is QRV as E51AAO from Rarotonga Island, IOTA OC-013, until May 14. Activity is on 40 to 10 meters using SSB. QSL to home call.

AUSTRAL ISLANDS, FO. Yoshi, JJ8DEN will be QRV as FO/KH0PR from Raivavae Island, IOTA OC-114, from May 8 to 15. Activity will be on 40 to 10 meters using CW, RTTY, PSK31 and JT65A. QSL to home call.

GALAPAGOS ISLANDS, HC8. Daniel, DL5YWM will be QRV as HC8/DL5YWM from May 4 to 11. Activity will be holiday style on 40 to 6 meters using CW and SSB. QSL to home call.

ALAND ISLAND, OH0. Members of the Radio Club of Lyly Signals Depot are QRV as OH0/OI3V from Eckero Island until May 5. Activity is on 80 to 10 meters using CW, SSB and various digital modes. QSL via

OI3V.

BRAZIL, PY. Special event station ZW1CCOM54 celebrates the graduation of the Signal Corps' Academy 54th class. QSL via operators' instructions.

EGYPT, SU. Operators SU1SK, SU1AO, SU1AR and SU3YM are QRV as SU8N from Nelson's Island, IOTA AF-109, until May 10. This is the first time this island will be activated. QSL direct via SM5AQD.

NORFOLK ISLAND, VK9N. A group of operators are QRV as VK9NT until May 13. Activity is on 80 to 10 meters using CW, SSB and RTTY. QSL via VK2CA.

CAMBODIA, XU. Alex, M6CFW has his permit as XU7WXA and plans to soon be QRV during his job-related visits. He will be active on the HF bands using SSB, PSK31 and PSK63. QSL direct to home call.

MYANMAR, XZ. Simon, HS0ZIB is QRV as XZ1K from Tanintharyi State until June 30. Activity will be on the HF bands using only PSK31 and in his spare time. QSL via operator's instructions.

INDONESIA, YB. A group of operators are QRV as YE90PK until May 5 to commemorate 90 years of the Radio Malabar station in the south of Bandung. QSL via YB1LZ.

THIS WEEKEND ON THE RADIO. The New England QSO Party, NCCC Sprint CW Ladder, Araucaria VHF Contest, Microwave Spring Sprint, ARI International DX Contest, 7th Call Area QSO Party, Indiana QSO Party, MIE 33 Contest and the WAB LF Phone are all on tap for this upcoming weekend. RSGB 80-Meter Club SSB Championship is scheduled for May 6. The ARS Spartan CW Sprint is scheduled for May 7. The CWops Mini-CWT Test and NAQCC-EU Monthly CW Sprint are scheduled for May 8. Please see May QST, page 80, and the ARRL and WA7BNM Contest websites for details.

SIDC SOLAR BULLETIN 03 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 03 May 2013 until 05 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 03 May 2013 10CM FLUX: 148 / AP: 005
PREDICTIONS FOR 04 May 2013 10CM FLUX: 145 / AP: 011
PREDICTIONS FOR 05 May 2013 10CM FLUX: 142 / AP: 022
COMMENT:Solar activity was moderate during the last 24 hours, with only C class
flares observed. The strongest event was a C2.8 flare, in NOAA AR 1734, at
2049 UT (peak time). NOAA AR 1731 still presents a risk for an isolated M
flare in the next 48 hours, which means that active conditions are
expected. AR 1734 is likely to produce C class flares, with a slight risk
for an M class event. A filament eruption was observed on May 2, around
1400 UT in the vicinity of AR 1730, triggering a CME observed by LASCO C2.
We do not expect any geomagnetic effect from that event. Concerning the CME
of May 2, linked to a M1.1 flare, LASCO C2 observations confirmed that the
event goes essentially north of the ecliptic plane. There is, however a
small chance that the southern flank of the CME structure will cross the
Earth early on May 6, possibly triggering unsettled to active conditions on
that day. For the next 24 hours, we expect quiet geomagnetic conditions to
prevail, and then by the end of May 4, beginning of May 5, active
conditions due to a coronal hole. Current solar wind conditions are quiet,
as observed by ACE.

04 May 2013 A.R.I. DX Bulletin
No 1148
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9H - 9H25Y is the callsign actually issued to the Dutch group [425DXN 1146] to celebrate their 25th trip to Malta. Look for them to be active from 20 May to 4 June. QSL via PI4KGL. Logsearch at http://members.ziggo.nl/9h25y [TNX PB2JJ]
CE0Z - Fabrizio IW3SQY, Franco IZ8GCE, Josep EA3AKY, Art WA7NB, Les SP3DOI, Paolo IV3DSH and Dino CE3PG will be active as XR0ZR from Robinson Crusoe Island, Juan Fernandez (SA-005) on 8-20 November. They will operate four stations on 160-6 metres CW, SSB and RTTY. QSL via IV3DSH, direct or bureau (OQRS preferred), and LoTW "after 6 months". QSLling details and further information at www.juanfernandez2013.com
DL - Look for DJ6OI/p to be QRV from the islands of Fehmarn (EU-128) on 3-8 May and Helgoland (EU-127) on 10-15 May. QSL via home call.
E5_sc - Tony, ZL2AGY will be active again as E51AGY from Rarotonga (OC-013), South Cook Islands for "about 24 days" starting around 7 May. He will operate CW only, possibly with some activity during the CQ WW WPX CW Contest. QSL via home call.
EI - A large group from the Westnet DX Group will be active as EJ7NET from the Aran Islands (EU-006) on 10-15 May. QSL via EI6FR. [TNX rsgbiota.org]
FO - Yoshi, JJ8DEN will be active as FO/KH0PR from Pukapuka Island (OC-062, French Polynesia) until 7 May and from Raivavae Island (OC-114, Austral Islands) on 8-15 May. He operates CW and digital modes on 40-10 metres. QSL via JJ8DEN, direct or bureau. Further information at www.qrz.com/db/KH0PR.
GM - Members of the Riverway Amateur Radio Society will be active as MS0RWR from the Isle of Skye (EU-008) on 4-11 May. They plan to operate on 160-10 metres all modes. QSL via bureau or direct to G7TCW.
HA - Klara, HA5BA got her personal license back in 1973, when she was 16 years old. Celebrating her 40th anniversary in amateur radio, she is now active as HA1973BA until 31 December. She operates mainly CW. QSL via home call. [TNX HA5BA]
HC8 - After operating as HC3/DL5YWM and HC2IWM/3 (30 April-2 May) from Isla Jambeli (SA-034), Daniel, DL5YWM will be active holiday style as HC2IWM/8 from Santa Cruz, Galapagos Islands (SA-004) on 4-11

May. He operates CW and SSB. QSL via home call. [TNX DX World]
HI - Ronny, OT4R (ON4ARV) will be active as HI7/OT4R from Punta Cana, Dominican Republic (NA-096) from 11-31 May. He will be QRV on 20, 15 and 10 metres SSB ans PSK. QSL via LoTW and eQSL, no paper cards will be issued. [TNX NG3K]
HR - Dan, HM2DMR is organizing three IOTA operations to take place between late May to July: Cayos Cochinos (NA-160, tentative call HQ3W), Vivorillos Bank (NA-223, tentative call HQ8D) and Swan Islands (NA-035, HQ8S). He is likely to start from NA-160 around 28-31 May (actual dates depend on Navy permission). QSL all calls via KD4POJ. Bookmark http://hriotas.com/ for further information and updates. [TNX DX World]
PA - Roland, DL1EAL will be active again as PA/DL1EAL from Texel Island (EU-038) on 4-16 May. He will be QRV mainly on 10, 15, 20 and 30 metres. QSL via home call, direct or bureau (email requests for bureau cards to dl1eal[@]darc.de), plus LoTW and eQSL.
PA - Bernard, PD7BZ and others will be active as PD13MILL on 11-12 May from "de Eendracht" in Gieterveen for Holland's National Windmill Day. Look for them on 40, 20 and 10 metres SSB and digital modes. All of the QSOs will be confirmed automatically via the bureau, LoTW and eQSL. Direct cards via PD7BZ. Information on the Windmills On The Air event can be found at www.pd6mill.com
PY - Pedro PR8ZX, Ronaldo PS8RV, Gabriel PU8RGV, Fernando PU8WZT, Ewerton PY8AA and Renato PY8WW will be active as PX8Z from Cotijuba Island (SA-060) on 26-28 July. They will operate SSB and CW and will participate in the IOTA Contest. QSL via PY8WW. [TNX PS7AB]
SM - Joakim, SA7BGN will be active from Krokholmen Island (EU-043) on 5-8 May. He will be QRV on 40, 20 and 17 metres. QSL via SM5DJZ. [TNX rsgbiota.org]
SP - HF55O is a special callsign to be used until 31 May (including participation in the CQ WW WPX CW Contest) to celebrate the 55th anniversary of the Polish Amateur Radio Union's branch in the Province of Opole. QSL via SP6PAZ. [TNX SP6DVP]
SU - SU8N, the IOTA expedition to Nelson's Island (AF-109, new one) [425DXN 1139], is still expected to start on 3 May. The team "will try to be there 24 hours around the clock", their QSL manager reports, "but it's possible that they can only be there for 10-12 hours during the day - the military determine length of stay". They have been granted permission for one week, he adds, "but it costs around 400 USD per day so right now they will be there for three days". The operators are Said SU1SK, Ateff SU1AO, Ayman SU1AR and Yasser SU3YM; they plan to be QRV on 40, 20, 17, 15, 12 and 10 metres. QSL via SM5AQD (QSLling instructions on qrz.com). [TNX DX World]
UA - A very large number of Russian stations using special prefix RP68 (where the letter P stands for 'pobeda', i.e. 'victory') will be active until 9 May to celebrate the 68th anniversary of the end of World War II. See the list maintained by Alan, 5B4AHJ on Club Log's Help Desk (http://clublog.freshdesk.com/support/home)

VP2E - Rich, KE1B (VP2EAQ) and Anna, W6NN (VP2EAR) will be active from Anguilla (NA-022) on 9-16 May. They will operate holiday style on 40-10 metres CW, SSB and RTTY with 100 watts and a Buddipole antenna system directly adjacent to the sea. QSL via home calls, direct or bureau, plus LoTW and eQSL. Logsearch and OQRS on Club Log.
XZ - "During the months of May and June, I may operate XZ1K from Tanintharyi State", Simon, HS0ZIB says. "I will only operate on PSK-31, according to when I have free time. From 1st July, I will be working in Laos, but I will try to return each holiday to re-activate XZ1K. QSLs will only be available via online verification. I will mail out a hard-copy QSL for each QSO verification. I now have a copy of the licence that was issued to me last May for the callsign XZ1K. I have sent this copy, plus other required documents, by courier to the ARRL, for both DXCC consideration and for issue of a LoTW certificate so that I can easily upload any new QSOs to LOTW". [TNX DX World]
YB - Adhi, YB3MM will be active as YB3MM/p from Madura Island (OC-237) on 4-5 May. He will operate SSB only on 15 metres.
YB - Two special callsigns have been issued to John, YB5NOF for his IOTA operations in May [425DXN 1147]. Current plans are for John, Anton YB5QZ and other two operators to be active as YB8P from the Banggai Islands (OC-208) on 16-19 May, and as YE8P from the Togian Islands (OC-213) on 22-26 May. [TNX JN6RZM]

BALTIC SEA WPX TROPHY ---> This plaque is issued for working stations with Different prefixes (200 for LY and Europe, 100 for DX) located in the ten Baltic Sea countries. Details can be found on the Vytautas Magnus University Radio Club's website (http://rk.vdu.lt). [TNX LY5W]

DX MARATHON ---> A completely new version of the ADIF to CQ Marathon Conversion Program written by Jim AD1C is now available for download at http://software.ad1c.us/marathon/. Version 13.1 creates a completed DX Marathon score sheet from your ADIF file - no more copy/paste required. Version 13.1 will only work with the DX Marathon Scoresheet version 2013.5 or later (which can be downloaded at http://www.dxmarathon.com). [TNX K9EL]

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Fifteen different galleries include more than 10,800 cards for the ten Most Wanted DXCC Entities (2004-12), the 61 deleted DXCC Entities, obsolete prefixes, stations from Maghreb from 1945 to 1962, Allied Forces stations in Germany (1946-69), special stations commemorating ITU and IARU (new gallery), Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island

Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1970), pre-1945 countries, French Departments and CONUS, plus a gallery for cards not accepted by DXCC. Your participation is encouraged - please visit www.LesNouvellesdx.fr [TNX F6AJA]

+ SILENT KEY + Joe Shroeder, W9JUV passed away on 30 April at 83 years of age. With 4X4DK and W2OKM he shared the top position of the Mixed DXCC standings with 394 confirmed entities.

Propagation Forecast Bulletin 18 ARLP018
>From Tad Cook, K7RA
Seattle, WA May 3, 2013
To all radio amateurs

SB PROP ARL ARLP018
ARLP018 Propagation de K7RA

Solar activity made a healthy jump over the past week, with average daily sunspot numbers up over 30 points to 120.9, and average daily solar flux increasing over 27 points to 136.5.

The most active day for geomagnetic indices was May 1, when the planetary A index reached 21 and the high-latitude college A index (measured near Fairbanks, Alaska) was a whopping 57. That number has been higher, but only twice in the past six months, when it was 64 on March 1 and 79 on March 17.

The latest forecast has solar flux at 155 on May 3-4, 150 on May 5-6, 145 on May 7-9, then 140, 125 and 120 on May 10-12, 125 on May 13-15, 120 on May 16-17, then 125, 120, and 130 on May 18-20, 135 on May 21-22 and 130 on May 23-24.

Predicted planetary A index is 8 on May 3-4, 12 on May 5, 8 on May 6, 5 on May 7-20, then 15, 10 and 15 on May 21-23, and then 5 forever after that. This is from a 45 day forecast, so we won't really see quiet conditions forever, but the forecast ends on June 16 with planetary A index of 5 until then.

F.K. Janda, OK1HH has another short forecast for geomagnetic conditions, like last week. He sees the geomagnetic field quiet to unsettled May 3-10, quiet to active May 11-12, and quiet to unsettled May 13-19. That's it!

NASA released a new solar cycle prediction on May 1, but it wasn't really new. These arrive at the start of every month, and remain the same since March 1. On March 1, 2013 the prediction for the smoothed International Sunspot Number at the cycle peak shifted from 69 to 66 for Fall 2013. The 2013 Autumnal Equinox begins in about four months and three weeks. This week the May 2013 issue of CQ Magazine arrived, and across the top of the cover was this headline: "Another Double-Peak Sunspot Cycle?" We certainly hope so.

Time to review our 3-month moving average of sunspot numbers, which has increased. The average daily sunspot number for February, March and April was 85.2. The average daily sunspot number for the three month periods centered on September 2012 through March 2013 were 81.2, 82.3, 74.4, 82.8, 73.6, 80.7 and 85.2. This is a moving average, so 81.2 was the average for August through October 2012, 82.3 was September through November 2012 and so on. But this involves a bit of cherry picking of the data, as the three previous period's averages were 96.5, 91.9 and 89.9.

The average sunspot number for the month of April was 112.8, for March it was 81.1 and February was 60.1.

Eric Ferguson, VE3CR of Burlington, Ontario sent his father-in-law Bruce Jones an article about solar flares, and they both wondered why there are no solar flares at the Sun's poles.

I passed this question on to Robert Steenburgh, KA8JBY who is a Senior Space Weather Forecaster at the NOAA Space Weather Prediction Center.

Robert wrote, "Flares are thought to originate from the deformation of magnetic field lines which break and reconnect. There is a latitudinal band in which this magnetic flux emergence (and hence sunspot formation) and deformation occurs.

"Sunspots typically form at mid-latitudes (equatorward of around 40 degrees) at the beginning of the solar cycle, and the breeding grounds drift towards the equator over the course of the cycle. This behavior is attributed to the solar dynamo. See http://solarscience.msfc.nasa.gov/dynamo.shtml.

"A cartoon depiction of the dynamo process is here:

http://www.nasa.gov/images/content/144061main_CycleDiagramLG.jpg

"You can find a paper on flare distribution for Solar Cycle 23 here:

http://www.ias.ac.in/jaa/junsep2006/JAA10.pdf

"There were 4 flares identified poleward of 50 degrees latitude in that paper, out of a total of 20,186.

"The poles are usually dominated by coronal holes and 'open' magnetic field lines that extend out into the heliosphere. So the mechanisms for flare formation are generally absent."

David Moore sent a link to a NASA video showing ten coronal mass ejections over five days in April:

http://www.nasa.gov/multimedia/videogallery/index.html?media_id=162261751

Mike Snyder, KN8J who lives a few miles south of Harrisville, West Virginia in EM99lf wrote this morning, May 3: "My wife and I are early risers. I mean real early. We're up about 3AM. Generally

speaking, 3 to 5AM produces some fair DX for me.

"Lately it's been getting a bit better on the 20 and 30 meter bands. The South Pacific is usually open at these hours. I've managed a couple QRP contacts with Hawaii. I've noticed parts of Europe open as well. I had a solid QSO with OK1HB from the Czech Republic on 14.062MHz. I was running 100 watts barefoot for this one.

"This morning I finally worked a new one: A35JP in Tonga on 14.003 MHz running up two at 0736 UTC.

"Well, gotta go...someone just spotted FO/KH0PR!"

Mike runs a Cushcraft A4 antenna on a 40 foot tower with the two rear elements askew due to high winds last month. On 160 and 30 meters he uses a fan inverted vee dipole at 35 feet.

He sent this final note: "Just worked A35UD on 10.108 MHz at 1010 UTC. Too bad I gotta go to work now!"

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for April 25 through May 1 were 93, 104, 100, 97, 136, 165, and 151, with a mean of 120.9. 10.7 cm flux was 119.2, 121.9, 127, 131.7, 142.4, 154.4, and 159.2, with a mean of 136.5. Estimated planetary A indices were 8, 17, 6, 5, 5, 7, and 21, with a mean of 9.9. Estimated mid-latitude A indices were 14, 18, 6, 4, 5, 6, and 16, with a mean of 9.9.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30504
SIDC SOLAR BULLETIN 04 May 2013, 1105UT
SIDC FORECAST (valid from 1230UT, 04 May 2013 until 06 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 04 May 2013 10CM FLUX: 145 / AP: 014
PREDICTIONS FOR 05 May 2013 10CM FLUX: 142 / AP: 022
PREDICTIONS FOR 06 May 2013 10CM FLUX: 142 / AP: 022
COMMENT:In the last 24 hours two M flares were detected by the GOES satellite: a
moderate M1.3 flare, in NOAA AR 1731, at 1655 UT (peak time), and a M5.7
flare in NOAA AR 1739, at 1732 UT (peak time). This region should be
monitored for further M class flares in the coming days, as it begins its
transit on the disk. AR 1731 is still complex enough to produce an isolated
(but likely moderate) M flare as well, and we foresee active conditions for
the next 48 hours. AR 1734 is likely to produce C flares with a slight
chance of an M class event. The M5.7 flare was associated with a wide CME
spotted on the East limb (at 1800 UT on LASCO C2), with an estimated speed
of at least 600 km/s (CACTUS detection). Another CME took off to the south
of AR 1739 at 2200UT. We do not expect these events to be geoeffective. A
filament eruption took place near the central meridian (about 15 degree
North), on May 4th around 0245 UT but no CME can be linked to this event.
We expect geomagnetic activity to reach active conditions by the end of May
4 beginning of May 5 due to a coronal hole and its associated high speed
solar wind stream. Active conditions might continue on May 6 due to the
arrival of the CME of May 2nd.
TODAY'S ESTIMATED ISN : 079, BASED ON 11 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30505
SIDC SOLAR BULLETIN 05 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 05 May 2013 until 07 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 05 May 2013 10CM FLUX: 138 / AP: 019
PREDICTIONS FOR 06 May 2013 10CM FLUX: 135 / AP: 021
PREDICTIONS FOR 07 May 2013 10CM FLUX: 135 / AP: 010
COMMENT:Solar activity is currently dominated by NOAA AR 1739, which produced a C8
and a C8.4 flare at respectively 0049 and 0644 UT (peak time) on May 5.
Active conditions are expected with M flares possible from ARs 1739 and
1734, and to a lesser extent from AR 1731. Geomagnetic activity is
expected to reach active levels today and tomorrow, due an expected high
speed solar wind stream linked to a coronal hole, and the possible arrival
on May 6 of the CME of May 2. Current conditions are quiet as observed by
the ACE spacecraft.
TODAY'S ESTIMATED ISN : 072, BASED ON 14 STATIONS.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2013 AFD. In celebration of the 63rd anniversary of Armed Forces Day (AFD), the Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test. Although Armed Forces Day is traditionally celebrated on the third Saturday in May

-- May 18th -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 11th to prevent conflict with the Dayton Hamvention, scheduled for May 17-19th. The annual celebration features traditional military-to-amateur crossband communications SSB voice and Morse code tests. These tests give Amateur Radio operators and short wave listeners an opportunity to demonstrate their individual technical skills and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to stations making contact with the military stations. Military-to-amateur crossband operations will take place on the dates and time in UTC on the frequencies listed for the Army, Air Force and Navy/Marine Corps and Coast Guard MARS stations. Voice contacts will include operations in single sideband voice (SSB); some stations will use CW to provide the opportunity to check in by Morse code. Depending on propagation and staffing, some stations may not operate the entire period. Participating military stations will transmit on selected military MARS frequencies and listen for Amateur Radio stations in the amateur bands. The military station operator will announce the specific amateur band frequency being monitored. Duration of each voice contact should be limited to 1-2 minutes. The annual Secretary of Defense message will be transmitted via digital modes, including RTTY, PACTOR, AMTOR, PSK-31, MFSK and MT63 from certain stations. Check the MARS Armed Forces Crossband Test website for schedules and frequencies of participating military stations, including a list of stations that will be transmitting the annual Secretary of Defense message at:
http://www.usarmymars.org/home/announcements
Instructions on how to copy and submit the message are also included.

3D2, FIJI. Laci, HA0NAR, will be active as 3D2AR from Viti Levu Island (OC-016, WLOTA 0055), in the Fiji Island group, sometime in October. Activity will probably be on all HF bands, 160-10 meters using CW, SSB and RTTY. QSL via his home callsign. For updates, watch:
http://www.ha0nar.hu

4J, AZERBAIJAN (Special Event). Look for special event callsigns 4J20RO and 4K20RO to be active until the end of the year. Operations seems to be mainly CW so far on 30-10 meters. Activity is to celebrate the 20th anniversary of the "Russian Centre of Science and Culture" in Baku.
QSL via 4J6RO.

4J/4K, AZERBAIJAN (WFF Op). Members of the "Safari DX-Activators Club" are planning to conduct a DXpedition to the Pirgulu Natural Reserve (WFF reference ☐ 4JFF-012, coordinates - 40°47'14"N / 48°34'43"E) between May 9-10th. This will be a first time activation (i.e. "new one").
Activity will be on 40-20 meters; possibly other bands - depending on local and propagation conditions. Two callsigns will be used for this operation: 4J0SFR - CW mostly (QSL via 4J5T)
4K6AE - PSK31 and RTTY mostly
Updated QSL info will be posted on QRZ.com.

9H25, MALTA (Update to OPDX.1110 - Callsign Change). Members of the Dutch Society of Radio Amateurs (VRZA Afd. Kagerland)club station (PI4KGL) will

be active as 9H25Y (not 9H25 as first announced) from Qawra between May 20th and June 4th. The VRZA DXpedition Group had been issued the special callsign 9H25 by the MCA Malta Communications Authority's originally, but they changed their minds and gave them 9H25Y instead! They were not happy at all by this! The group also had to change their Web site! Please note the change: http://members.ziggo.nl/9h25y

A3, TONGA. Just a reminder that Masato "Masa", JA0RQV, will be active as A35JP from Tongatapu Island (OC-049) between May 5-22nd. Activity will be limited as Masa is there working for the Tongan government, so look for him possibly every night (local time) after his work. Operations will be on 80-10 meters using CW and SSB. QSL via his home callsign, by the Bureau or direct. For more info, visit Masa new Web page at: http://www.sato3.com/a35jp/index.html

CQ DX MARATHON (Announcing Version 13.1 - ADIF to DX Marathon Conversion Program). John, K9EL, DX Marathon Manager, reports on April 28th: "Today we are announcing a completely new version of the ADIF to CQ Marathon Conversion Program written by Jim, AD1C. Version 13.1, which is now available for download, is a significant enhancement of the previous ADIF conversion program. Version 13.1 creates a completed DX Marathon score sheet from your ADIF file ☐ no more copy/paste required.
Version 13.1 will only work with the Excel version of the DX Marathon Score Sheet version 2013.5 or later, so please delete any copies of earlier score sheets you may have. The latest scoresheet can be downloaded here: http://www.dxmarathon.com/Submission/2013/Submission2013.htm
Although this new program has been thoroughly tested, there may still be bugs and we would appreciate hearing about any issues. As always, this program is a tool to assist you in submitting your DX Marathon score ☐ you must review the final output and the author assumes no responsibility for any errors or omissions in your submission.
Version 13.1 of the program can be downloaded here:
http://software.ad1c.us/marathon
I wish to recognize the superb efforts by Jim, AD1C, in creating this excellent DX Marathon tool..... 73, John K9EL DX Marathon Manager"
Join the DXMarathon Group on Yahoo Groups!

CR5, PORTUGAL (Castle Op). Members of the "Clube Radioamadores do Entroncamento" (CRE) will use the special callsign CR5AT on May 18th from Amieira do Tejo Castel (WCA reference CT-0086, DCFP reference C-086, DMHP reference PG-010 and DMP reference 1212 for the Portuguese Castles Award). Operation will be on the HF bands using CW, SSB and Digital modes. Amieira do Tejo Castel is located in the Province of Portalegre. QSL via CS5CRE.
CRE Web Page: https://sites.google.com/site/radioamadoresentroncamento
CRE FACEBOOK Page: https://www.facebook.com/groups/cs5cre

DAYTON HAMVENTION NEWS (DX Activities Featured at ARRL EXPO). The ARRL Letter reports this week: "The ARRL will present a variety of DX activities as part of the ARRL EXPO -- the ARRL's 'show within a show' at the 2013 Dayton Hamvention, to be held May 17-19th at Hara Arena, near Dayton, Ohio. Activities will include DXCC card checking and the opportunity to

drop off QSL cards for the ARRL Outgoing QSL Bureau, as well as to apply for awards, such as the IARU Worked All Continents Award, the IARU Region 3 Operating Award and several awards administered by the Japan Amateur Radio League. In addition, representatives from the International Amateur Radio Union and several IARU Member Societies will be on hand within the EXPO area." For complete details, see:
http://www.arrl.org/news/dx-activities-featured-at-arrl-expo-at-the-2013-dayton-hamvention

E5, SOUTH COOK ISLANDS (Update/75th FOC Op). Tony, ZL2AGY, who will once again be active as E51AGY from Rarotonga Island (OC-013) starting May 7th for about 24 days, announced on May 5th [edited]: "I may be active with this callsign [E51FOC] during the period May 9-29th, from Matavera, Rarotonga. This will be a holiday style operation, CW only, running my K3 barefoot. Note, I am a member of the 'First Class CW Operator's Club', which is currently celebrating its 75th anniversary during May. A QSO with an 'FOC' suffixed call will give you extra points for the award commemorating this event. See <www.g4foc.org> for details. My 'normal' Cook Islands call is E51AGY, which I may also be using. Hoping to see you on the bands....73, Tony"

FO, FRENCH POLYNESIA. By the time you read this, Al, KZ3AB, aboard the "MS Paul Gauguin", is expected to activate some of the Polynesian Islands as a portable set up on 40/20/15/10 meters SSB until May 13th. The islands mentioned are Moorea (OC-046, DIFO FO-010, WLOTA 0465), Tahiti (OC-046, DIFO FO-002, WLOTA 0885), Bora Bora (OC-067, DIFO FO-003, WLOTA 0430), Raiatea (OC-067, DIFO FO-012, WLOTA 1977) and Taha'a (OC-067, DIFO FO-013, WLOTA 3909). QSL via WA3EOP.

FT5Z, AMSTERDAM ISLAND (Press Release). The following press release was sent out by Ralph Fedor, K0IR, team leader of the January 2014 Amsterdam Island (FT5ZM) DXpedition, on May 3rd [edited]: "Since our last Press release early last month, we have a great deal of news to report.
We have received the callsign FT5ZM. It is a good callsign and we thank the TAAF for their cooperation. Two new team members have joined the team of fourteen. They are Neil, VA7DX and Andy, UA3AB. Both men are veterans of many DXpedtions and add expertise to the list of operators.
Several more sponsors have joined in with their support, Spiderbeam, Cycle 24 Antennas, and Array Solutions. Array Solutions will be providing the new OM Power amplifiers for our low band operations.
The team will assemble in Perth, Australia, on January 10/11, 2014.
The DXpedition vessel Braveheart will arrive on January 12th, and loading of equipment and personal items will begin. The North Coast Radio Group of Western Australia, along with Alek, VK6APK, will be offering logistical support to the FT5ZM Amsterdam Island DXpedition Team. The VK6's will assist in obtaining masts, ground rods, electrical hardware, and some medical supplies. This will result in a substantial decrease in the bulk and weight of material that the team has to ship from the U.S. We plan to depart for the 9 day trip to Amsterdam Island on January 15th.
We are grateful to the growing list of DX Foundations, DX Clubs and individual DXers who have contributed toward the DXpeditions expenses. NCDXF, INDEXA, ARRL/Colvin and several European based DX Foundations

have made unusually large commitments. They are aware of the extreme
cost of the venture at over 400,000 USDs. (see our budget on the website.)
However, thus far, we have only raised just over 53% of the money that
we need to complete this DXpedition. As payments on the vessel begin
next month, we must ask the world-wide DX community for their support.
Visit our website at: <www.amsterdamdx.org> and contribute whatever
you can. We need your help.
Thanks... we will update you monthly until departure."

GH3, JERSEY. Members of the Jersey Contest Group from GJ2A contest
station will activate the special callsign GH3IT between May 11-12th.
The GH3IT callsign will be used for pile-up training purposes prior to
major contests. Activity will be on all HF bands, with a focus on the
the lower bands and 30/17/12 meter bands using CW and SSB. Operators
mentioned are Paul/MJ0PMA, Mathieu/MJ0ASP, Phil/GJ4CBQ and Steve/MJ0ULE.
The log will be uploaded promptly to LoTW and Clublog after each operation.
Use the OQRS for direct and Bureau cards (Your QSL is not needed) at:
https://secure.clublog.org/logsearch/GH3IT

HC8, GALAPAGOS ISLANDS. By the time you read this, Daniel, DL5YWM, who
was active as HC3/DL5YWM from Isla Jambeli (SA-034) this past week,
should be active as HC2IWM/8 from Santa Cruz Island (SA-004) in the
Galapagos Island group until May 11th. Activity will be holiday style
on 40-6 meters using CW and SSB. QSL via his home callsign.

HD8, GALAPAGOS ISLAND (A Rare Prefix To Be Activated!). Operators Alex/HD2A
and Alberto/HC2AQ will be active as HD8A from Santa Cruz Islands (SA-004,
WLOTA 1667, WWFF HCFF-004), Galapagos Islands, for 4 days starting May
15th. Activity will be on the HF bands using a TS-590 with an amp into a
TH6 beam and wire antennas. QSL via HD2A, direct only (QRZ.com).

HONDURAN IOTA EXPEDITION. Dan, HM2DMR, plans to activate the following
Honduran IOTA Islands between late May to July (dates depend on Navy
permission: NA-223 ☐ Vivorillos (callsign HQ8D), NA-035 ☐ Santanilla
(callsign HQ8S) and NA-160 ☐ Cochinos (callsign HQ3W). He states, "It's
likely that Cochinos NA-160 will be activated first, around the period
May 28-31st. Callsigns have been requested and currently tentative.
Activity will be on 160-10 meters. For more details and updates, watch:
http://hriotas.com

IOTA NEWS.............
AS-073. A Web page, with pictures, video and wrap-up of the recent
Malaysian Special Expedition Team's activity as 9M2SE from
Perhentian Besar Island between May 1-3rd, is now available
at: http://9m2pju.blogspot.com/2013/05/9m2se-perhentian-island-iota-as-073.html

AF-109. (New IOTA) The DX-World.net reported on Sunday, May 5th:
"FLASH NEWS @ 0830z ☐ The SU8N [Nelson's Island] team are
currently QRT due to a broken generator. They plan to return
to the island but no firm time-frame has been set. Update to
follow.."

EU-009. Operators Pierre/ON7PC and Fred/ON6QR will be active as MM/ON6QR
from Orkney Islands, West Mainland, during the RSGB IOTA Contest
(July 27-28th) as a Multi-Op/All-Band/All-Modes/Low-Power entry.
QSL via the home callsign.

EU-010. Paul, M3KBU, will be active as MM3KBU/p from South Uist Island
(IOSA OH03, SCOTIA HI06, WLOTA 2972), Outer Hebrides, between
July 26th and August 2nd. Activivty will include the RSGB IOTA
Contest (July 27-28th). QSL via M3KBU, direct only (QRZ.com).

EU-023. Bruno, F4CZU, will be active as 9H3ZU from Gozo Island, Malta,
between May 11-18th. Activity will be on the HF bands, probably
40-10 meters. QSL via his home callsign.

EU-038. Roland, DL1EAL, will be active as PA/DL1EAL from Texel Island
(WLOTA 0043) until May 15th. Activity will be holiday style
on 40-10 meters using 100 watts into vertical antennas. QSL
via his home callsign, by the Bureau or direct.

EU-043. Joakim, SA7BGN, will be active as homecall/p from Krokholmen
Island, an uninhabited island in the Skagerak Sea, between
May 5-8th. Activity will be on 40/20/17 meters on SSB using
a simple wire antenna and 100 watts. QSL via SM5DJZ.

EU-048. Members of the Club Radio Amateurs of Lanester [CRAL] (F6KPQ)
will be active as TM2BI from Belle Ile en Mer Island between
July 24-31st Activity will be on 160-10 meters using CW, SSB
and the Digital modes. They will also participate in the RSGB
IOTA Contest. Operators mentioned are Michel/F1SRC, Jean-Yves/
F4EHM, Gwena/F4FHZ, Mickael/F4FFZ, David/F4FDA, Jean-François/
F6DZD, Philippe/F6AUP, Chris/F5CBQ and Philippe/F5PHW. QSL
via F6KPQ, direct, by the Bureau and via LoTW. Visit their
Web page at: http://iota.f6kpq.org

EU-107. Members of the Babaow Island Gang will be active as TM0BIG
from Petite Island (DIFM MA055) between 0700z, June 4th and
1300z, June 5th. Operators mentioned are Gil/F4FET, Diego/
F4HAU and SWL Ludo. Activity will be on 40/20/17/15/10 meters.
QSL via F4FET.

EU-172. Noel, OO4O, will be active again as OZ/OO4O from Langeland
Island (WLOTA 0590) between May 19-25th. Activity will be
mainly SSB/CW on the HF bands. QSL via LoTW and the Belgian
QSL Bureau.

SA-060. (Update) Operators Renato/PY8WW, Ewerton/PY8AA, Fernando/PU8WZT,
Ronaldo/PS8RV, Pedro/PR8ZX and Gabriel/PU8RGV will be active
as PX8Z from Cotijuba Island (DIB PA-14, ARLHS-278, DFB PA-13,
WLOTA 2855) between July 26-28th. Activity coincides with the
RSGB IOTA Contest weekend. Operations will be on all bands
using CW and SSB. QSL via PY8WW.

KH9, WAKE ISLAND (Press Release). Joe, W8GEX, sent out the following press release on May 5th [edited]: "Press Release #3 - Wake Atoll Commemorative DXpedition -- The Wake Atoll commemorative team's operation at the beginning of October, 2013 is progressing nicely.
The initial phase of the operation, planning, is essentially complete and the Team has moved into equipment procurement and staging operations. The equipment will be pre-staged in California and Hawaii prior to transport to Wake. Staging, pre-testing, packing, and shipping under the direction of Tom, ND2T, and Kimo, KH6U, are major undertakings for DXpeditions and are essential to assure equipment arriving on-time and safely on Wake.
Our support Team has been expanded to include these additional Pilot Stations: Hiroo, JA1WSX (Japan/Asia); Stan, KH6CG (Oceania) and Rich, KY6R (USA). Additionally, Val, NV9L, has agreed to be the chief pilot for the operation. As mentioned in the previous release, this support Team is an essential part of the DXpedition's operation. The information they gather from the DX communities' feedback during the event, allows the 'on island team' to adjust their activities to meet changing band conditions and optimize QSOs worldwide.
Stu, K6TU, will be developing in-depth propagation summaries which will be posted on our website and Don, N1DG, has been guiding the team on Logistical issues.
The Team wants to thank the DX Community, including generous worldwide Foundations and Clubs, equipment manufacturers and outlets for their outstanding support of the Wake Commemorative efforts. These DXpeditions are extremely expensive and could not be accomplished without the support of the entire DX Community. Please visit the <wake2013.org> website to view our Sponsors and make your personal donation.
Please check our website often for updates. http://www.wake2013.org/
73, K9W Wake Atoll Management Team"

OA, PERU. DXer and World Traveller Vlad, UA4WHX, is currently active as OA4/UA4WHX from Peru. His length of stay is unknown at this time. Activity has been on 30/17/12m RTTY. QSL via details on QRZ.com.

OW75, FAROE ISLANDS (75th FOC Event). Carsten, OY1CT, will be active as OW75FOC from Faroe Islands during the month of May, to celebrate the 75th anniversary of the "First Class CW Operators' Club". Activity will be on the HF bands. QSL via OY1CT.

NEW QSL MANAGER. Ron, AC7DX, reports that he is now be the QSL manager for the "Six Stars Contest Station" - LP5D. QSL via AC7DX, direct, by

the Bureau or LoTW. Please see mailing info QRZ.com.

VY0/VE3VID (NA-174) QSL STATUS. David, VE3VID, states, "QSL cards are being sent out, and he is half way through answering QSL requests that have arrived". Please hold you E-mail inquiries.

QSL RECEIVED VIA LoTW: 5H1DX, 5U9AMO, D2EB, DU1IST, F6CSR, HA5BSW, JG7MFN, JH1BED, OX3IO, OZ/PA1H, RA0CHK, S55O, TO2D and ZS8M

QSLS RECEIVED VIA MAIL: 9M4SLL, EA9/DL2RNS, HD2A, PJ7AA, PT0S, T2TT, TB4/DJ7RJ, VK3TZ/3, XR0YG, XV1X, XW4XR, ZK3T and ZL9HR

QSLS RECEIVED VIA THE BUREAU: 4L5O, 5X4DEL, 6W/AA1AC, 8P1A, AL9A, CR3E, CX1AA, E4/OM2DX, EY8/K4ZW, FM5WD, HI3/W1JNZ, HT2N, HZ1DX, IS0/OM3PC, J79UN, JY4NE, KH2L, KL1V, KL2RD, KL5E, KL7GLL, KL7IWC, NP2L, OX3PG, P40A, P40M, P41USA, PJ2T, PJ2/K2NV, PJ2/W8QID, PJ2/W9VA, PJ4W, PJ4/W9NJY, PY0FF, SV9/OM4KK, TF/OM5CD, UK8FF, V85TX, VP5/NE7D, VP5/K9PPY, VQ90JC, VQ99JC, YB0AZ, YI9AJ, ZF2DF, ZK2V, ZK2X and ZS6TQ

V3, BELIZE. Just a reminder that Bob, K4UUK, will be active as V31RD from Belize until May 18th. Activity will be on 80-6 meters SSB. QSL via his home callsign, direct (preferred) or by the Bureau.

V4, ST. KITTS (New Contest Callsign). John, W5JON/V47JA, informs OPDX that he has a new contest callsign for his vacation home in Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG). Look for him to sign V49J during the contests between July 9th and August 10th. His contest callsign is good until the end of the year, but he plans to renew it for two more years when he renews his V47JA and Cathy's, V47HAM for another two years this November. ALL QSLs go to W5JON direct or via LoTW. NO Bureau QSLs.

XR0, JUAN FERNANDEZ (Update/Press Release) [edited]. "After many months of careful planning, the XR0ZR team is pleased and proud to announce preparations for a multi-national Dxpedition to Robinson Crusoe Island in the Juan Fernandez Archipelago (CE0Z), using the callsign XR0ZR. It is our privilege to activate this entity during the period November 8□20th, 2013.
The Juan Fernández Islands (Spanish: Archipiélago Juan Fernández) are a sparsely inhabited island group reliant on tourism and fishing in the South Pacific Ocean, situated about 600 kilometers off the coast of Chile, and is composed of three main volcanic islands; Robinson Crusoe Island, Alejandro Selkirk Island and Santa Clara Island.
On the Club-Log's most wanted DXCC list, Juan Fernandez, CE0Z ranks as #35 on the most wanted list for all amateur radio operators, #23 on the most wanted list for Asia, #27 on the most needed list for CW operations, and #18 on the most needed list for Digital Operations.
The Team is meeting in Santiago, Chile, and will depart by a chartered aircraft on November 7th. The Team expects become active on November 8th.
The main goals of this DXpedition are to work every amateur radio operator who needs Juan Fernandez, (CE0Z) for a new DXCC country. In addition, we will be active on all bands and modes from 1.8 MHz to 50 MHz with special attention to be made to accommodate distant stations during periods when

propagation permits. We are planning to have 4 stations running simultaneously and hope to make thousand contacts worldwide.
We are kindly seeking Club and Individual Sponsors to help us defray the costs of carrying out this important Dxpedition.
Our team will consist of the following Operators: Fabri-IW3SQY (Team Leader), Franco-IZ8GCE, Paolo-IV3DSH, Josep-EA3AKY, Les-SP3DOI, Dino-CE3PG, and Art-WA7NB.
We wish everyone good propagation and we hope that you enjoy working the XR0ZR Team.
Thank you for your assistance in helping make this a world class DXpedition. You can follow us on:
Website : http://www.juanfernandez2013.com
Facebook : https://www.facebook.com/groups/xr0zr/
Twitter : @xr0zr
73 de XR0ZR Team"

YE30, INDONESIA (Special Event). Members of the Organisasi Amateur Radio Indonesia (ORARI) will be active as YE30P from Merauke between 0000z, May 15th and 2400z, May 17th. Activity is to celebrate the 30th Anniversary and Provincial Congress of "ORARI Daerah Papua". Operations will be on all modes (CW/SSB/RTTY) by 2 stations on at the same time. QSL Manager is YB9WR. All qsl card should be addressed ONLY to: PO BOX 1096, Jakarta 10010 Indonesia (see details on QRZ.com). For more details, see their Web page at: http://ye30p.wordpress.com

YB8/YE8, INDONESIA (IOTA Op). Operators John/YB5NOF, Anton/YB5QZ Anton and possibly two others will activate two IOTA islands in Indonesia. The tentative days, callsigns and IOTAs are as follows:
May 16-19th - Callsign YE8P; Banggai Island (OC-208), located at the far eastern end of Central Sulawesi, Indonesia.
May 22-26th - Callsign YB8P; Togian Island (OC-213), in the Gulf of Tomini, off the coast of Central Sulawesi, Indonesia.
Watch the IOTA frequencies. QSL Manager will be announced soon.

Z8, SOUTH SUDAN (Mission Goodwill To Juba). Operators Olli/OH0XX and Martti/OH2BH posted a press release/update on May 3rd, about their operations in Juba on QRZ.com at: http://www.qrz.com/db/Z81X

:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30506
SIDC SOLAR BULLETIN 06 May 2013, 1305UT
SIDC FORECAST (valid from 1230UT, 06 May 2013 until 08 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 06 May 2013 10CM FLUX: 139 / AP: 016
PREDICTIONS FOR 07 May 2013 10CM FLUX: 127 / AP: 010
PREDICTIONS FOR 08 May 2013 10CM FLUX: 125 / AP: 007
COMMENT:Solar activity has been active during the past 24 hours, featuring one M1.4
flare released by NOAA AR 11739on May 5 with peak time 17:56 UT. In
addition, 13 C flares were registered. More C-level flares are expected
within the next 48 hours, with a chance for an M flare from AR 11739 and
11734. The IMF started rising at about 7h UT on May 5 (4 nT), and has been
turbulent since about 15h UT on May 5. Current values lie around 12 nT, but
no large negative excursions of Bz occurred since then. Solar wind speeds
as observed by ACE started a turbulent rise at about 15h UT on May 5 (400
km/s), and are now near 520 km/s. These effects are probably caused by a
co-rotating interaction region followed by a positive-polarity coronal hole
high speed stream. The influence of this high speed stream is expected to
decrease on May 7. Geomagnetic activity was at quiet to active levels (K
Dourbes between 0 and 4; NOAA Kp between 1 and 3) during the past 24 hours.
Quiet to Active (K Dourbes < 5) conditions are expected for May 6 to 8.
TODAY'S ESTIMATED ISN : 078, BASED ON 17 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30507
SIDC SOLAR BULLETIN 07 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 07 May 2013 until 09 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 07 May 2013 10CM FLUX: 127 / AP: 012
PREDICTIONS FOR 08 May 2013 10CM FLUX: 125 / AP: 010
PREDICTIONS FOR 09 May 2013 10CM FLUX: 125 / AP: 007
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring three
C flares from NOAA AR 11731, 11734 and new region 11736. More C-level
flares are expected within the next 48 hours, with a slight chance for an M
flare. In the last 24 hours, the IMF has decreased from 14 to 6 nT,
probably due to the influence of a coronal hole high speed stream. Solar
wind speeds have ranged between about 460 and 540 km/s, and currently lie
around 520 km/s. Bz has been mainly positive, hence geomagnetic activity
has been at quiet levels (K Dourbes between 2 and 3; NOAA Kp between 2 and
3) during the past 24 hours. Quiet geomagnetic conditions (K Dourbes < 4)
are expected for May 7 to 9.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30508
SIDC SOLAR BULLETIN 08 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 08 May 2013 until 10 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 08 May 2013 10CM FLUX: 127 / AP: 010
PREDICTIONS FOR 09 May 2013 10CM FLUX: 127 / AP: 007
PREDICTIONS FOR 10 May 2013 10CM FLUX: 127 / AP: 007
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring five C
flares from NOAA AR 11731, 11738, and a new unnumbered region near N03E89.
More C-level flares are expected within the next 48 hours, with a slight
chance for an M flare. In the last 24 hours, the IMF has decreased further
from 6 to 4 nT. Due to the influence of a coronal hole high speed stream,
solar wind speeds have ranged between about 480 and 560 km/s, and currently
lie around 500 km/s. Similar solar wind speeds are likely on May 8 and 9,
with a probably return to lower values on May 10. Geomagnetic activity has
been at quiet levels (K Dourbes between 2 and 3; NOAA Kp between 2 and 3)
during the past 24 hours. Quiet geomagnetic conditions (K Dourbes < 4) are
expected for May 8 to 10.
TODAY'S ESTIMATED ISN : 079, BASED ON 10 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30509
SIDC SOLAR BULLETIN 09 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 09 May 2013 until 11 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 09 May 2013 10CM FLUX: 127 / AP: 007
PREDICTIONS FOR 10 May 2013 10CM FLUX: 127 / AP: 007
PREDICTIONS FOR 11 May 2013 10CM FLUX: 128 / AP: 007
COMMENT:Flaring activity remains at low level. A C3.4 flare peaked at 05:23 UT in
NOAA AR 1734 (Cat 59). More C-class flaring can be expected in the coming
days, with a slight chance for an M-flare. Two filament eruptions are
visible in AIA 304 data around 05:20 UT, one to the north and one to the
south. Several CMEs were observed in coronagraph data, but none are earth-
directed. Geomagnetic conditions remain quiet. The solar wind speed
remains elevated (around 500 km/s) due to the influence of a coronal hole.

DX Bulletin 19 ARLD019
>From ARRL Headquarters
Newington CT May 9, 2013
To all radio amateurs

SB DX ARL ARLD019
ARLD019 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AZERBAIJAN, 4J. Special event stations 4J20RO and 4K20RO are QRV to the end of 2013 in celebration of the 20th anniversary of the Russian Centre of Science and Culture in Baku. Activity of late has been on 30 to 10 meters using mainly CW. QSL both calls via 4J6RO.

MALDIVES, 8Q. Jim, G3VDB will be QRV as 8Q7EJ from Komandoo Island, IOTA AS-013, from May 13 to 26. Activity will be holiday style mainly on 20 meets using CW and SSB. QSL to home call.

CUBA, CO. Lazaro, CO2WL, Gustavo, CO2NO, and Rene, CO2RVA will be QRV as T42T for the Volta World Wide RTTY Contest. QSL via HA3JB.

JERSEY, GJ. Members of the Jersey Contest Group will be QRV with special call sign GH3IT on May 11 and 12. The purpose of this operation is for pile-up training purposes prior to major contests. Activity will be on all HF bands using CW and SSB. QSL via operators' instructions.

SCOTLAND, GM. Members of the Camb-Hams are QRV as GS3PYE/p from the Isle of Mull, IOTA EU-008, until May 16. Activity is with five stations on 160 to 10 meters, including 60 meters and possibly 6, 4 and 2 meter with some EME if conditions allow. They may also be active on 472 kHz. QSL via operators' instructions.

GALAPAGOS ISLAND, HC8. Operators Alex, HD2A and Alberto, HC2AQ will be QRV as HD8A from Santa Cruz Island, IOTA SA-004, from May 15 to 19. Activity will be on the HF bands. QSL direct via HD2A.

DOMINICAN REPUBLIC, HI. Ronny, OT4R is QRV as HI7/OT4R from Punta Cana, IOTA NA-096, until June 1. Activity is on 20, 15 and 10 meters each day around 2000 to 2200z. QSL to home call.

JAPAN, JA. Special event station 8J2KSG7X is QRV until October 31 in celebration of the 70 year jubilee of the city of Kasugai. Activity is on all bands and modes. QSL via bureau.

FAROE ISLANDS, OY. Carsten, OY1CT is QRV as OW75FOC during the month of May in celebration of the 75th anniversary of the First Class CW Operators' Club. Activity is on the HF bands. QSL to home call.

NETHERLANDS, PA. A group of operators will be QRV as PF24MILL on May 11 and 12 in celebration of Holland's National Windmill Day. Activity will be on 40, 20 and 10 meters using SSB and digital modes. QSL via bureau.

POLAND, SP. Special event station HF500PILA is QRV until May 31 in celebration of 500 years of the city Saw and 100 years of Pila airport. QSL via SP3YAC.

DODECANESE, SV5. A group of operators are QRV as SX5KL from Kalolimnos Island, IOTA EU-001, until May 20. Activity is on all bands and modes. QSL via SV1GRM.

CRETE, SV9. Alessandro, IK4ALM and Carlo, IZ4WJA will be QRV as SV9/home calls from May 13 to 20. Activity will be on 40 to 10 meters using CW and SSB. QSL to home calls.

ANGUILLA, VP2E. Rich, KE1B and Anna, W6NN are QRV as VP2EAQ and VP2EAR, respectively, until May 16. Activity is on 40 to 10 meters using CW, SSB and RTTY. QSL to home calls.

INDONESIA, YB. Members of the Organisasi Amateur Radio Indonesia will be active as YE30P from Merauke from May 15 to 17 in celebration of the 30th Anniversary and Provincial Congress of ORARI Daerah Papua. Activity will be on all HF bands and modes with two Stations. QSL via YB9WR.

PRINCE EDWARD AND MARION ISLANDS, ZS8. Carson, ZR6CWI and David, ZS1BCE will be QRV as ZS8C and ZS8Z, respectively, from Marion Island, IOTA AF-021, while on work assignment until April 2014. QSL via ZS1HF.

THIS WEEKEND ON THE RADIO. The CQ-M International DX Contest, Portuguese Navy Day Contest, FISTS Spring CW Sprint, NCCC RTTY Sprint, NCCC Sprint CW Ladder, Slobozhansky Sprint Contest, VK/Trans-Tasman 80-Meter Phone Contest, EUCW Fraternizing CW QSO Party, SKCC Weekend CW Sprintathon, VOLTA World Wide RTTY Contest, HPC World Wide DX BPSK63 Contest, Nevada Mustang Roundup and the 50 MHz Spring Sprint will certainly keep contesters busy this upcoming weekend. The RSGB 80-Meter Club Data Championship is scheduled for May 15. Please see May QST, page 80, and the ARRL and WA7BNM

Contest websites for details.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30510
SIDC SOLAR BULLETIN 10 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 10 May 2013 until 12 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 May 2013 10CM FLUX: 133 / AP: 006
PREDICTIONS FOR 11 May 2013 10CM FLUX: 133 / AP: 007
PREDICTIONS FOR 12 May 2013 10CM FLUX: 128 / AP: 017
COMMENT:Solar activity has been active during the past 24 hours, featuring eleven C
flares and one M3.9 flare. The M flare was produced by AR 11744 (which also
released the majority of the C flares) and had its peak around 00:57 UT on
May 10. More C-level flares are expected within the next 48 hours, with a
good chance for an M flare, especially from NOAA AR 11744. A large filament
eruption was observed in the southwest by AIA imagery around 17h UT on May
9. A bright associated CME was registered by LASCO C2 and STEREO COR2 A and
B around 19h UT. This CME and its shock wave will likely not reach Earth.
In the last 24 hours, the IMF has been steady around 4 nT, while solar wind
speeds have decreased from about 480 and to 430 km/s. A further decrease is
expected, up to May 12, when a weak coronal hole high speed stream may
cause solar wind speeds to increase again. Geomagnetic activity has been at
quiet levels (K Dourbes between 0 and 3; NOAA Kp = 1) during the past 24
hours. Quiet geomagnetic conditions (K Dourbes < 4) are expected for May 10
to 12, with a chance for active levels (K Dourbes = 4) on May 12, due to a
weak coronal hole high speed stream.

11 May 2013 A.R.I. DX Bulletin
No 1149
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

8Q - Jim, G3VDB will be active again as 8Q7EJ from the Maldives (AS-013) on 13-26 May. He will operate holiday style on 20 metres CW and possibly SSB. Logsearch on Club Log; QSL via home call and LoTW.
9A - Once again Jan, PA4JJ will be active holiday style as 9A/PA4JJ from Porec (Croatian mainland) from 20 May to 6 June. He will operate mainly digital modes on 30, 17 and 12 metres. QSL via home call. Logsearch at www.pa4jj.nl. [TNX PA4JJ]
9A - Look for Stefano 9A/IV3LZQ, Paolo 9A/IV3PUT, Francesco 9A/IV3EDU and Andy 9A3JH to be active from the island of Sveti Nikola (EU-110) on 25-29 July. They will operate CW and SSB on 80-6 metres, and will participate in the IOTA Contest as 9A/IV3LZQ. QSL via IV3LZQ. Online logs will be available on www.arimanzano.it. [TNX IV3LZQ]
CO - CL6RLD, CO6EC, CO6LC, CO6LP, CO6WYR and CO6YAC will be active as T46C from IOTA group NA-204 on 13-17 June. They will operate SSB, CW and RTTY on all bands with three stations. QSL via EA5GL. [TNX NG3K]
DL - Hans, DL2RU will be active as DL2RU/p from Schlossinsel (not IOTA, GIA O-31 for the German Islands Award) on 19 or 20 May. He plans to start around 13 UTC on 7028 kHz. [TNX DL2RU]
E5_sc - Tony, ZL2AGY will be active as E51AGY [425DXN 1148] from Rarotonga (OC-013), South Cook Islands on 9-29 May. Being a member of the First Class CW Operators' Club, he might also apply for and be QRV as E51FOC to celebrate FOC's 75th anniversary. QSL via home call (direct).
EI - Lukas, IW3FWT will be active as EJ/IW3FWT from Bere Island (EU-121) on 10-12 May. He will operate SSB and digital modes on 40-10 metres. QSL via home call, direct or bureau, and LoTW. [TNX IW3FWT]
EX - Special event station EX20ARUK will be active on 12-18 May to celebrate the 20th anniversary of the Amateur Radio Union of Kyrgyzstan. QSL via operator's instructions. Information on the "Kyrgyzstan Award" at http://www.qrz.ru/awards/detail/2213.html (scroll down the page for the English version). [TNX EX8AB]
F - A group of operators from the Castres DX Gang will be active as

TM5FI from Ratonneau Island (EU-095) on 15-22 May. QSL via F5XX.
F - Gil, F4FET and Rodolphe, F0FMI will be active as TM0AI from Anneret Island (EU-039) on 18-20 May. They plan to be QRV on 40, 20, 17, 15 and 10 metres. QSL via F4FET.
F - Gil, F4FET and Diego, F4HAU will be active as TM0BIG from La Petite Ile (EU-107) from around 7 UTC on 4 June until around 13 UTC on the 5th. They will be QRV on 40, 20, 17, 15 and 10 metres. QSL via F4FET.
G - The Cray Valley Radio Society will be active as GB6MW from Meopham Windmill on 11-12 May for the Mills on the Air weekend (www.mills-on-the-air.net). QSL via G4DFI. [TNX M0MCV]
GJ - Roger, G3SXW and Nigel, G3TXF will be active as GH4FOC (QSL via G3SWH) from Jersey until 12 May. This operation is part of the month-long 75th anniversary celebration activity being organised by the FOC First Class CW Operators' Club. During the weekend there may also be some operation as GJ3SXW (QSL via G3SXW) and GJ3TXF (QSL via G3TXF). All logs will be uploaded to both Club Log and LoTW.
GJ - Raf ON5RZ , Eddy ON6EF and Mick ON4RAW will be active as MJ/OT1S from Saint Brelade, Jersey (EU-013) on 16-19 May. They will operate mainly SSB on 80-6 metres. QSL via ON6EF, direct or bureau.
HC8 - Two operators will be active as HD8A from the Galapagos Islands (SA-004) on 15-19 May. QSL via HD2A.
HR - The tentative dates for HM2DMR's three IOTA operations [425DXN 1148] are as follows:
27-30 May HQ3W Cayos Cochinos (NA-160)
16-20 June HQ8S Swan Islands (NA-035)
16-20 July HQ8D Vivorillos Bank (NA-223)
QSL all calls via KD4POJ. Bookmark http://hriotas.com/ for updates and further information.
I - A large multi-national team (HA1YA, IT9BUN, IW9ELR, JH5GHM, LZ1QN, N3BNA, ON4LG, PC5A, PE1ETR, RT4RO, S52RU, S54W, S57UN and S59A) will be active as IG9Y from Lampedusa Island (AF-019) on 17-30 October. They will run four stations on 160-2 metres SSB, CW and RTTY, and will participate in the CQ WW DX SSB Contest as a Multi-Two entry. QSL via ON4LG, direct or bureau. QSLling instructions and further information at http://ig9.ii9p.com/
JA - Look for Masa, JF3ELH/6 to be active from Iki Island (AS-036) on 10-11 May. He will be QRV on 80-10 and maybe 6 metres mainly CW. QSL via home call. [TNX JI3DST]
OZ - Noel, OO4O (ON4APU) will be active again as OZ/OO4O from Langeland Island (EU-172) on 19-25 May. He will operate SSB and CW on the HF bands. QSL via home call (bureau preferred) and LoTW. [TNX OO4O]
OZ - Ric, DL2VFR will be active as OU1RAEM from Samso Island (EU-172) on 18-24 May. He will operate mainly CW. All of the QSOs will be confirmed automatically via the bureau. Direct cards go to DF5LW. [TNX rsgbiota.org]
OZ - Tom, DL7UZO will be active as 5P9Z from Bornholm Island (EU-030) from 25 May to 1 June. He will operate CW, RTTY and SSB on 80-10 metres. QSL via DL7UZO, direct and bureau. Further information and

logsearch at www.5p9z.com
PJ6 - Bob K4UEE, Steve VE7CT, Gregg W6IZT and Roger G3SXW will
participate in the CQ WW WPX CW Contest as PJ6A from Saba
(NA-145). Activity is planned before and one day after the
contest. Logs will be uploaded to LoTW quickly after their return,
paper QSLs go via N4NX. [TNX K4UEE]
VP5 - Dave, W5CW will be active again as VP5/W5CW from the Caicos
Islands (NA-002) from 16 May to 11 June. He will operate CW and
SSB on 160-6 metres. [TNX DL6GV]
YB - Look for YB8RB/p, YB8REY/p, YB8RW/p, YB8STP/p, YB8TK/p, YB8TON/p,
YB8UFL/p, YC1BPO/p, YC8RRC/p, YC8RU/p, YC8RUC/p, YC8RUU/p,
YC8TV/p, YD8ROQ/p and YD8UBY/p to be active from Bunaken Island
(OC-236) until 12 May. They plan to operate SSB and possibly some
CW on 160, 80, 40, 20, 17, 15, 10 metres. QSL via operator's
instructions. [TNX JN6RZM]
YB - Special event station YE30P (http://ye30p.wordpress.com) will be
active from the city of Merauke (New Guinea, OC-034) on 15-17 May
to celebrate the 30th anniversary and congress of the Papua
Province branch of ORARI. Plans are to operate CW, SSB and RTTY on
80-10 metres with two stations. Logsearch will be provided by Club
Log; QSL via YB9WR direct to P.O. Box 4245 JKTM, Jakarta 12700,
Indonesia. [TNX YE30P]
YB - YB3BOA, YB3EDD, YB3GZS and YB3VPP will be active as YE3I from Gili
Ketapang (OC-237) on 7-9 June. QSL direct to YB3EDD.
YJ - Bill, K2PO will participate in the CQ WW WPX CW Contest as YJ0PO
from Efate (OC-035), Vanuatu. He will be QRV on 80-10 metres for a
few days before and after the contest. QSL via home call and LoTW.

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The April 2013 issue is now available for
download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

9M2SE ---> A web page, with pictures, video and wrap-up of the recent
Malaysian Special Expedition Team's activity as 9M2SE from Perhentian Besar
Island (AS-073) can be found at http://9m2pju.blogspot.com [TNX 9M2PJU]

AMSTERDAM 2014 ---> Two new team members - Neil VA7DX and Andy UA3AB - have
joined the FT5ZM DXpedition to Amsterdam Island [425DXN 1147]. The team will
assemble in Perth, Australia on 10-11 January 2014 and depart for their
9-day voyage on the 15th. Once ashore, they will have 18 days to set up,
conduct the DXpedition and tear down for departure. "Thus far, we have only
raised just over 53% of the money that we need to complete this DXpedition",
the team says. "As payments on the vessel begin next month, we must ask the
world-wide DX community for their support. Visit our website at
www.amsterdamdx.org and contribute whatever you can. We need your help".

[TNX K0IR]

GRENADA ---> AC8G and J39AL are putting together a team to cover the CQ WW SSB contest from Grenada, with time for individual DX activity. The group will have access to antennas and amplifiers "for a major entry in the contest", but each member will have to provide transceivers, related accessories and computers. Please contact Harry, AC8G for detailed information (htflasher[@]gmail.com, Skype flasher-ac8g). [TNX AC8G]

W9DXCC DX CONVENTION ---> A six session class, designed for both new and experienced DXers, will be held on 20 September in conjunction with the 61st W9DXCC DX Convention. Each session will cover a different aspect of DXing, including operating practices, digital DXing, chasing awards, QSLling, antennas and propagation. Registration for the class may be done online at the W9DXCC web site (www.w9dxcc.com) when Convention registration is active. Please contact W9MU (jack[@]w9mu.net) for additional information. [TNX K9EL]

WAKE 2013 ---> K9W, the Commemorative DXpedition to Wake Atoll in early October [425DXN 1141], "is progressing nicely. The initial phase of the operation, planning, is essentially complete and the team has moved into equipment procurement and staging operations". Read the latest information (Press Release #3) and details on how contribute to this expensive project on the expedition's website (www.wake2013.org) [TNX W8GEX]

YASME ---> At its annual meeting held at the International DX Convention in Visalia, the Board of Directors elected Ward Silver, N0AX, as its new President. The remaining officers were re-elected. Fred Laun (K3ZO, Director and Vice-President), Rusty Epps (W6OAT, Director and Treasurer), Kip Edwards (W6SZN, Director and Secretary), Martti Laine (OH2BH, Director), Mac McHenry (W6BSY, Director) and Robert Vallio (W6RGG, Director).
The necessity of an election for a new President was occasioned by the resignation of Wayne Mills, N7NG. Wayne has founded DX University (www.dxuniversity.com) and takes over as the new DX Editor for CQ Magazine. The Board also decided to acknowledge Mr. Mills' many years of service to the Yasme Foundation by making a contribution to DX University in support of the goals shared by the two organizations. Additional information about The Yasme Foundation can be found at www.yasme.org. [TNX W6SZN]

+ SILENT KEY + Maurizio Potenza, I1YUM is one of the victims of the tragic accident occurred at the port of Genoa on 7 May, when a container ship smashed into the 50m control tower, bringing it crashing down. Seven people died, four were injured and two are still missing.

QSLs received direct or through managers: 1A0C, 3B8/HB9ARY, 3B9/OH1LEG, 3D2C, 3D2RX, 4L1MA, 5W0AP, 5X8C, 6Y5WJ, 7Z7AB (AS-190), 8P6DR, 9K2/SP4R, 9M4SLL, 9U4U, BM0LF, BY8AC, BY8DX, C6AVA (NA-054), CE3/LU1FAM, CP6UA, CW2C, D3AA, D44BS, DL2RVL/HI9, E40VB, EA9/DL2RNS, EA9/DL2RVL, EP3SMH, ES5QD, FH/DL7BC, H44KW, H44RK, HC1HC, HD2A, HK0/F6BFH, HK6F, HS0ZKG (AS-101), HV0A, J28NC, J5NAR, J6/KA9P, J8/G4DVB, JX5O, JX9JKA, KH2L, KH9/WA2YUN,

Date: 2013-05-10 17:57:54 UTC
From: jjreisert@...
Topic: 3929 Message: 21191

SB PROP @ ARL $ARLP019
ARLP019 Propagation de K7RA

ZCZC AP19
QST de W1AW
Propagation Forecast Bulletin 19 ARLP019
>From Tad Cook, K7RA
Seattle, WA May 10, 2013
To all radio amateurs

SB PROP ARL ARLP019
ARLP019 Propagation de K7RA

Average daily sunspot numbers remained about the same this week, with the number nudging up from 120.9 to 121.7. The average of the daily solar flux numbers went from 136.5 to 137.5.

An odd thing happened too. For two weeks in a row the average planetary A index was the same as the mid-latitude A index. Last week they were both 9.9, and this week both values were 8.

Predicted solar flux for the near future is 125 on May 10, 115 on May 11-13, 110 on May 14, 105 on May 15-16, 110 on May 17, 120 on May 18, 130 on May 19-20, 135 on May 21-22, then rising to 160 on May 28.

Predicted planetary A index is 5 on May 10-11, 8 on May 12-13, 5 on May 14-20, then 15, 10 and 15 on May 21-23, 5 on May 24-27 and 15 and 10 on May 28-29.

F.K. Janda, OK1HH predicts the geomagnetic field will be quiet to unsettled on May 10, quiet to active May 11-12, and quiet to unsettled May 13-19.

The forecasts from OK1HH have been getting shorter. At first the text was shorter because there was less variation over the forecast period. So instead of shifting between five different levels of activity over the course of nearly four weeks, we've seen two levels, as in this week's forecast.

When I checked every bulletin since the first of the year, I found that the number of days the forecast covers varied. The first two bulletins of 2013 each covered 23 days, the next was 25 days, then the fourth bulletin was 23 days, followed by 24 days on each of the next three. The eighth (Propagation Forecast Bulletin ARLP008) covered just 17 days, and the next six weeks varied from 21-24 days. For bulletins ARLP014 through ARLP019 (this bulletin) the coverage

was 23, 19, 25, 24, 17 and 10 days. So the predictions for this bulletin and the previous two all end on the same date, May 19. I will see if I can find out what his methods are, and if perhaps variation in conditions leading up the date of the forecast in some way limits the number of days that are predicted.

At 0119 UTC today (May 10) I received an alert from http://SpaceWeatherLive.com (not to be confused with http://spaceweather.com). The message is in Dutch, and it looks like it says there was a "Class M3.95" solar flare. But the message does not say whether the flare was geo-effective (Earth directed) or how long it lasted.

I note that http://spaceweather.com says the flare was just over the Sun's eastern horizon, so it was not aimed at Earth, but it will move toward Earth "in the days ahead." An event at the eastern horizon should take about a week to move into a position where it is aimed toward Earth, although another variable is the latitude of the region.

The English version of their web site is http://www.spaceweatherlive.com/en. In the group of six graphs at the top, five of them cover the previous two hours, and the Kp Index covers the previous 24 hours.

At the bottom of the page is a flattened version of the STEREO image at http://stereo.gsfc.nasa.gov/. Instead of watching the rotating globe, you see all sides of the sun at once.

David Moore sent a link to Phil Plait's "Bad Astronomy" blog (see http://www.slate.com/blogs/bad_astronomy/2013/05/08/solar_eruption_different_spacecraft_see_a_solar_eruption_from_different.html) with an article and an impressive NASA video showing a May 1 solar event, as seen from SOHO, SDO and STEREO. You can see Phil's website at http://www.badastronomy.com/index.html. Bad Astronomy refers to Phil's attempts to correct popular misconceptions about science.

Lance Collister, W7GJ of Frenchtown, Montana wrote about recent 6-meter adventures: "Well, I think the SFI being over 145 on Saturday May 4 probably moved the TEP further north than usual - and with the early onset of Es, which just happened to connect me to Texas just at the right time of late afternoon - I got my first ionospheric link to South America on TEP this cycle. Saturday I completed CW contacts with CX3AN, LW3EX, LU2DPW, LU5FZ, CX9AU, LU5FF, and PY3FF. CX1FK, LU2DEK, LU9DO, CX5CR, LU6DC, PY3OR and LU9EHF were worked on SSB. On Sunday, May 5, the SFI was still over 135 and I worked CE2AWW weakly on CW, although I didn't seem to have a good strong Es link like on Saturday. Still searching for HC, CP and PZ."

TEP refers to Trans-Equatorial Propagation. Check the W7GJ website at http://www.bigskyspaces.com/w7gj/. Lance invites us to use EME

(moonbounce) and check some of the references on his website.

Paul Harden, NA5N of Socorro, New Mexico wrote about a fascinating project at the Very Large Array, the world's largest radiotelescope, where he works:

"I am an electronics engineer at the Very Large Array (VLA) radio telescope. My current project is our low-band system (60-500 MHz) and the Long Wavelength Array (LWA) for 10-88 MHz. Though a few years away, one of the science goals of LWA is to make real time 3D maps of the ionosphere. The prototype system clearly paints the locations of the E/F layers and it's depths as it migrates around. Really cool, and when completed, should be made publicly available on the web and a great tool for hams."

He sent this link to the project:
http://www.aoc.nrao.edu/~pharden/LBR/lbr.htm.

Jay Miller, N4NUI of Sandy, Utah wrote about what happened on 6-meters on May 2:

"During the afternoon of May 2 there was a great opening on 6-meters. It was obvious there were many paths open north and south from the QSOs I could hear. I was mobile up in Antioch, Illinois (EN52wk) and heard stations to the SE down to South Florida and SW to West Texas. It was pouring rain and I couldn't get out of the vehicle to tune the manual screwdriver without getting soaked to the bone.

"I fixed that problem this afternoon (May 3) by driving up to Milwaukee and buying a Little Tarheel II. I got it on the vehicle in time to make a contact in the early evening with K5WLT and WP4O with good signals as the opening started to close. Let's hope this is a harbinger of things to come this summer.

"I travel for my job and I am sure glad I haul around a HF rig and a Gorilla magnetic mount for the rental cars. A traveling ham using rental cars has to ask for the same rental models each time once one finds out how to get through specific firewalls to the battery."

Floyd Chowning, K5LA of El Paso, Texas wrote on May 4: "I had a nice contact on 2-meter SSB this morning on 144.2 MHz at 1516 UTC with WA7KYM in Cheyenne, Wyoming. Cheyenne is 639 miles from El Paso, TX according to QRZ using grid squares. I am in DM61 and WA7KYM is in DN71. This was my first contact with a Wyoming station."

Jon Jones, N0JK of Kansas wrote on May 4: "Interesting opening today from the Midwest to South America.

"I was mobile (XYL driving) on K-10 just east of the K-7 intersection in Olathe and heard K3PA, K0HA and N0XA CQing or calling some of the DX.

"No DX heard until 2150 UTC when PY3RO showed up on 50.115 MHz SSB. He worked a local in Kansas City and I called after their Q. Had a quick QSO with Raoul, he peaked to 5x7. During our QSO another KC local came up on freq. and said my transmit audio was bad! (It was due to voltage drop using a cigarette lighter plug to run the radio in the car. I normally use jumper cables directly off the car battery to run the radio). The next couple of times I went back to PY3RO and listened, the local kept telling me 'OM your audio is bad.' Guess he didn't hear the PY. First Brazil 6 meter QSO since 2001. I did not hear any other DX stations. My mobile set up is a 2 meter 5/8 wave whip and the FT-897."

Jeff Hartley, N8II of West Virginia wrote on May 7 about great conditions back on April 7-11. He worked both Europe and Asia on 12 meters, and on April 9 on 10 meter CW running 5 watts he worked 9A4WY in Croatia who gave Jeff a signal repot of S9 plus 10 dB.

Jeff continued, "Throughout the last month, except during disturbed conditions, 15 has been open to EU many hours, sometimes as late as 2200-2400 UTC and open about 90% of the days to Indonesia with good signals from around 1300-1600Z. 20 meters is consistent every morning with good VK signals from about 1115-1430 UTC or so and long path southern Africans. On April 28, 15 meters was in good shape to Russia in the UA1DZ contest logging Many stations in northern Europe as well as UP0, UC0, and RN9. Many St. Petersburg area Russians were active and it was fun working them as well as hearing them working each other.

"On the April 29-30 with only 200 watts between 0200-0315 UTC, I had a huge number of Russian stations call on 20 CW, some of the most fun and biggest number of Russian callers in 40 years on the air. 43 stations were logged in an hour. Conditions were extremely good from central Asia all the way east to DL on April 29, logging all Russian call areas except for 0 as well as EX8AD and many Ukrainians. On April 30, Asia was not quite as good, but many UA3 and UA6 area stations called with the third QSO of the run being UA0YM in zone 23. Earlier around 2340-0030 UTC there was a large increase in EU and Middle East activity on 17 meter CW logging UT3, A65BR, YO5, SV1NN/3, and MU0FAL. On 20 CW I logged Z33Z. there was a real air of excitement on both sides of the Atlantic over the great conditions."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for May 2 through 8 were 102, 139, 156, 103, 122, 118, and 112, with a mean of 121.7. 10.7 cm flux was 149.4, 147.9, 141.6, 137.1, 130.7, 128.7, and 126.9, with a mean of 137.5. Estimated planetary A indices were 13, 6, 5, 7, 8, 10, and 7, with a mean of 8. Estimated mid-latitude A indices were 11, 5, 5, 7, 9, 11, and 8, with a mean of 8.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30511
SIDC SOLAR BULLETIN 11 May 2013, 1105UT
SIDC FORECAST (valid from 1230UT, 11 May 2013 until 13 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 11 May 2013 10CM FLUX: 125 / AP: 003
PREDICTIONS FOR 12 May 2013 10CM FLUX: 125 / AP: 014
PREDICTIONS FOR 13 May 2013 10CM FLUX: 125 / AP: 007
COMMENT:Solar activity has been active during the past 24 hours, featuring four C
flares and one M1.3 flare. The M flare was produced by AR 11745 (which also
released the majority of the C flares) and had its peak around 12:56 UT on
May 10. More C flares and even M flares are likely within the next 48
hours, especially from NOAA AR 11745. In the last 24 hours, the IMF has
been steady around 4 nT, while solar wind speeds have decreased from about
440 and to 390 km/s. On May 12, a weak coronal hole high speed stream may
cause solar wind speeds to increase again up to 500 km/s. Geomagnetic
activity has been at quiet levels (K Dourbes between 0 and 3; NOAA Kp
between 0 and 2) during the past 24 hours. Quiet geomagnetic conditions (K
Dourbes < 4) are expected for May 11 to 13, with a chance for active levels
(K Dourbes = 4) on May 12, due to a weak coronal hole high speed stream.
TODAY'S ESTIMATED ISN : 087, BASED ON 06 STATIONS.

SIDC URSIGRAM 30512
SIDC SOLAR BULLETIN 12 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 12 May 2013 until 14 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 12 May 2013 10CM FLUX: 142 / AP: 011
PREDICTIONS FOR 13 May 2013 10CM FLUX: 142 / AP: 010
PREDICTIONS FOR 14 May 2013 10CM FLUX: 139 / AP: 007
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring
eighteen C flares. The largest flare was released by NOAA AR 11746 and
reached a C8.0 peak around 19:48 UT on May 11. More C flares and even M
flares are likely within the next 48 hours, especially from NOAA AR 11744,
11745, and 11746. A large filament eruption took place near 40W 35N around
21:45 UT on May 11. An associated CME was registered by LASCO C2, STEREO
COR2 A and B. A glancing blow from this CME is possible, with an expected
arrival time at Earth in the first half of May 15. In the last 24 hours,
the IMF has varied between 2.5 and 3.5 nT, while solar wind speeds have
decreased from about 400 and to 360 km/s. In the second half of May 12, a
weak coronal hole high speed stream may cause solar wind speeds to increase
again up to 500 km/s. Geomagnetic activity has been at quiet levels (K
Dourbes between 0 and 3; NOAA Kp between 1 and 2) during the past 24 hours.
Quiet geomagnetic conditions (K Dourbes < 4) are expected for May 12 to 14,
with a chance for active levels (K Dourbes = 4) in the second half of May
12, due to a weak coronal hole high speed stream.

Ohio/Penn DX Bulletin No. 1112

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1112
BID: $OPDX.1112
May 13, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, K4UEE, N4AA & QRZ DX, N4JF, N4RR, W4VQ, KH6BZF, W6SZN, KL7JR, AC8G, K8GI, K8YSE, W8GEX & 60m News, K9EL, W9ILY, ARVM, AT International, DK8JB & The DX News Letter, DL1SBF, DL5YWM, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWX, JI3DST, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SV1HER, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): There will not be an OPDX Bulletin next week and "possibly the week after". I will be attending the Dayton HamVention (HOPEFULLY!!!!!). It is totally up in the air right now. Over the last several weeks, I have been experiencing shortness of breath. On Tuesday, May 7th, I had a "THALLIUM STRESS TEST" which showed some abnormalities. On May 10th, the Cardiac Doctor told me, or should I say she read me the riot-act, "no traveling or stressful work" until I have a heart catheterization. So some time this Monday before the HamVention, I will be at the Cleveland Clinic to have this procedure. If all goes well, I will be at Dayton. Some may remember that I had a double bypass in 2002. Let's hope I do not go there again.....
"IF" I receive a major announcements, (and if I am able to) I will probably send out a special bulletin. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-May, through Sunday, 12th-May there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY,

LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VK9N, VP2E, VP2M, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, XZ, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5K3, COLOMBIA. Look for special event station 5K3YL to be active Sunday, May 18th, operated by a group of YLs during the "Ladies on the Air Contest". Activity is to honor women participating in amateur radio contests, as well as nationally and internationally. Operators mentioned are Sandra/HK3JJB, Mery/HJ3MCT, Paty/HK3KFM, Janeth/HK3PUE, Dora/HK3IAI, Maria/HJ8MFF, Yolanda/HK7YMF, Laura/HJ7LDV, Yuli/HJ3KMV, Cristina/HK3QYV, Dalia/HK3JI and Patricia/HK3IWL. Operations will be on 40 and 20 meters SSB. QSL via EA3DUF. A certificate is available (see QRZ.com).

6V, SENEGAL (Reminder). Vladimir "Vlad", RK4FF, will once again be active as 6V7S from Le Calao in Ngaparou between May 13-30th. Activity will probably be on 80/40/20/ 15/10 meters using CW, SSB and RTTY. He is scheduled to be here two more times this year: July 1-16th and October 22nd-November 27th. QSL via RK4FF.

8Q, MALDIVES. Just a reminder that Jim, G3VDB, will be once again active as 8Q7EJ, but this time from Komandoo Island (AS-013) between May 13-26th. Activity will be holiday style mainly on 20 meters using CW and SSB. If conditions are poor, then it will be CW only. Suggested frequencies are: CW - 14020-14025 kHz and SSB 14212 kHz. QSL via his home callsign. The 2009/2010/2011/2012 8Q7EJ logs are available on the Clublog Web page at: http://www.clublog.org/logsearch/8Q7EJ

ARCTIC/ANTARCTIC INFO NEEDED! John, KL7JR, is once again requesting that if you or any of your radio friends, SWL or Ham operators, have worked or heard any Arctic or Antarctic stations, he would love to hear from you for his monthly Arctic and Antarctic DX column which goes to CIDX (Canadian Int'l. DX Club) for publication in the monthly "Messenger". Scanned copies of QSLs or reception reports from anywhere north of 60 degrees or the Antarctica are also welcomed. You can receive a sample of his column by E-mailing him at: KL7JR@...

CS25, PORTUGAL (Special Event). A special event station signing CS25ARVM will be active between May 20-26th. Activity is to celebrate the 25th aniversary of ARVM - Associação de Radioamadores da Vila de Moscavide - Radioamadores do Concelho de Loures. Operations will be on 10, 15, 20, 40 and 80 meters, using CW and SSB, and also V/UHF at 145.350 MHz and 434.350 MHz. Qsl via CT1RVM.

DAYTON HAMVENTION CTU NEWS. Tim Duffy, K3LR, reports the following: "About 250 contesters will attend Contest University (CTU) USA this

coming Thursday (May 16) in Dayton, Ohio.
Starting at 8:00 AM EDT there will be a live webcast available from the CTU website <http://contestuniversity.com>. Go to the CTU website on Thursday and you will see a button to click on that will allow you to see and hear some of the topics being presented live. With four classrooms going most of the time, it is not possible to live stream everything, but you will definitely enjoy watching some of CTU from wherever you are. Last year hundreds of guys from all over the world got to experience CTU live via the web. Some of the Dayton CTU students even sat in one classroom session and watched the live CTU stream for another session on their smart phone or laptop - at the same time - is this SO2CC? Single Operator Two CTU Classes!
Thanks to the support of the Northern California DX Foundation, if you know of any amateur radio operator under the age of 26 that will be in Dayton and would like to attend CTU tuition free, please tell them to go to the CTU home page and click on Scholarships. Or just click here: <http://www.contestuniversity.com/main/page_scholarships.html>
Then use the contact us button to be considered for a scholarship. Or you can click here: http://www.contestuniversity.com/main/page_contact_us.html
Pat, N9RV's, 'Contesting Terminology Glossary' on the CTU website has recently been updated. It is in the files section. If you or someone you know is just getting started in contesting, this is an excellent resource that explains lots of the contesting language. Here is the direct link: http://www.contestuniversity.com/main/page_files.html
We are hoping to also live stream the 21st Annual Contest dinner live next Saturday night. Watch the Contest Dinner website for times and live stream connection information. <http://contestdinner.com>"

DAYTON HAMVENTION DX HOSPITALITY SUITE. The Northern Ohio DX Association (along with Janeen Hire, W8ZET) will once again sponsor a Hospitality Suite (17th year) at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th floor of the Crowne Plaza Hotel on Thursday, Friday and Saturday evenings (Look for signs!). All DXers/Contesters are welcome. Munchies and refreshments will be available. Come and meet the members and friends of NODXA.

FS, ST. MARTIN. John, K9EL, will once again activate FS/K9EL in June. Operating dates this year are June 11-28th. Activity will be on 80-6 meters. Daily uploads to ClubLog and LoTW are planned. John has a new QTH this year and should have a better signal to the USA on 6 meters. QSL via his home callsign.

HH, HAITI (Update). Tom, KC0W, will be active as HH5/KC0W from the extreme northern tip of Haiti between July 6-25th. Activity will be 160-6 meters using CW only. He will use a vertical antenna placed directly over salt water. Tom states, "My operating location in Haiti has unobstructed HF takeoffs to North America, Europe & Africa. Haiti has been underrepresented on CW so hopefully HH5/KC0W will go into many CW enthusiast's logbooks." QSL only direct to his home callsign. No LoTW or Bureau QSLs.

HONDURAN IOTA EXPEDITION (Update/Tentative Dates). Dan, HM2DMR, plans to activate the following Honduran IOTA Islands between late May to July (dates depend on Navy permission:
NA-160 Cochinos (callsign HQ3W); May 27-30th
NA-035 Swan (callsign HQ8S); June 16-20th
NA-223 Vivorillos (callsign HQ8D); July 16-20th
Activity will be on 160-10 meters. For more details and updates, watch:
http://hriotas.com

IOTA NEWS.....
AF-083. A short video is available on the Web on the recent TS8TI DXpedition to Djerba Island by ARAT and Italian Team. The link is: http://www.youtube.com/watch?v=v_qXTuF9CgM
The photos and videos are all available on ARAT Facebook Page at: https://www.facebook.com/arat.tunisia
http://www.laselki.net/vb/showthread.php?p=52261#post52261

AS-036. This one was late getting in, but if you worked JF3ELH/6 this past weekend, you work Masa, JF3ELH, on Iki Island (Iki-jima Gounuura-cho Iki-gun Nagasaki-ken). Activity was suppose to be on 80/40/30/20/17/15/12/10/6 meters CW/SSB. It was mentioned that in case of heavy rain or other condition, the operation condition may vary. QSL JF3ELH/6 via JF3ELH. Please check QRZ.com for details.

AS-060. Kang, DS4DRE, is now active as DS4DRE/5 from Hajo Island (WLOTA LH-1006) until December 31st. Activity will be on 80-10 meters using CW and SSB. QSL via his home callsign, direct (he is a stamp collector) or by the Bureau.

EU-008. Operators Andy/M1LOL and Ray/M1REK will be active as MM1REK from the Isle of Coll (IOSA NH05, SCOTIA DI12, WLOTA 2123) in the Inner Hebrides group between August 5-10th. Activity will be on 80-10 meters SSB and the Digital modes. QSL via M1REK, by the Bureau or direct. See the Web site at:
http://www.m1rek.co.uk/isle-of-coll

EU-008. Just a reminder that the members of the Camb-Hams are once again active from the Isle of Mull (IOSA NH15, SCOTIA CN10, WLOTA 2485), Inner Hebrides, as GS3PYE/p until May 16th. Activity will be on all HF bands (600-10m) using five stations with amps. Operations will also be on 6m, 4m and 2m. They will focus more effort on 2m EME and will also be on many of the VHF/UHF satellite passes. QSL via M0VFC (OQRS via QRZ.com). More details and updates can be found at:
http://dx.camb-hams.com

EU-030. Just a reminder that Tom, DL7UZO, will be active as 5P9Z from Bornholm Island (DIA BO-001, WLOTA 2203) between May 25th and June 1st. Activity will be focused on 160 meters and the Digital modes, as well as all bands on CW. QSL via DL7UZO, direct or by the DARC Bureau. A Web page is available at: http://www.5p9z.com

EU-051. Operators Stefano/IK6JRI, Fred/IK7JWX and Vincenzo/IZ8LFI will be active possibly as IE9DX from Ustica Island (IIA PA-001) between July 23-30th. Activity will include the RSGB IOTA Contest (July 27-28th). Before the contest they will be active on 30/17/12/6 meters using CW, SSB and the Digital modes. Days after the contest they will be on any modes and bands. QSL via IK7JWX. ADDED NOTE: Anyone who wants to join the team for the contest (only 2 days) is welcome. For details, contact: ik6jri@... (Team leader)

EU-110. Operators Stefano/IV3LZQ, Paolo/IV3PUT, Francesco/IV3EDU and Andy/9A3JH will be active from Sveti Nikola Island (ACIA IC-016, IOCA CI-118, MIA MC-414, WLOTA 3152) between July 25-29th. Activity will be on 80-6 meters using CW and SSB. They will also be an entry in the RSGB IOTA Contest (July 27-28th) using the callsign 9A/IV3LZQ. QSL direct only via IV3LZQ (see QRZ.com). For details and updates, see: http://www.arimanzano.it

EU-120. A group of operators from the North Northumberland area will be active as GB1VR from the Holy Island of Lindisfarne between 1500, June 7th and 1600, June 9th (local times). Activity is on the anniversary of the First Viking Raid 793AD and will be on all HF bands. Operators mentioned are Dave/M0DSS, Alan/ 2E0ZED, Tom/2E0VAI, Erick/M6ECK, Richard/M0VKX and Brendan/ M6HOS. QSL via eQSL only. For more details, see QRZ.com.

EU-127. Thomas, DJ6OI, is now active as DJ6OI/p from Helgoland Island until May 15th. QSL via info on QRZ.com.

EU-172. Ric, DL2VFR, will be active as OU1RAEM from Samso Island between May 18-24th. This is just one of many activities throughout the year to be used with this special callsign to celebrate the 110th anniversary/birthday of Ernst T. Krenkel. See QRZ.com for details. Ric will operate mainly CW. All QSOs will be confirmed automatically via the Bureau. For direct cards, QSL via DF5LW.

NA-128. Members of the "NA-128 Contest Group" will once again activate Ile Verte (C.IS.A QC-015, Grid FN58, ARLHS CAN-244, WLOTA 1404) using the special callsign CF2I between July 24-28th. Their activity will include the RSGB IOTA Contest (July 27-28th) as a Multi-Single entry. The group will operate many stations from the lighthouse keeper's quarters on many bands (SSB, CW and RTTY, PSK63) before and after the contest. The group will operate ONLY on SSB and CW on 10, 15, 20, 40 and 80m DURING the contest. The complete log will be uploaded to LoTW few days after the contest. Paper QSL is via VE2CQ. For more info, visit their Web page at: http://www.qsl.net/na128cg

NA-204. The Cuban T46A group will activate the special callsign T46C from Santa Maria Island between June 13-17th. The operators mentioned are Ore/CO6LC, Jose/CO6EC, Yordany/CO6YAC, Amaurys/

CO6WYR, CL6RLD and Luis/CO6LP. They will try to maintain three
stations on the air transmitting on 160-10 meters, including
30/17/12 meters, using CW, SSB and RTTY, into yagis, beverages
and verticals. QSL via EA5GL.

OC-237. A group of Indonesian operators will be active as YE3I from
Gili Ketapang between June 7-9th. Operators mentioned are
Edi/YB3EDD, Eddy/YB3VPP, Samsul/YB3GZS and Andy/YB3BOA. Activity
will be on 160-10 meters. QSL via YB3EDD. For more details,
see: http://www.iotadx-giliketapang.blogspot.com/
http://www.facebook.com/yethree.india#

J3, GRENADA (Team Members Needed). Harry, AC8G, is working with Gill,
J39AL, to arrange a team for the CQWW DX SSB Contest (October 26-27th)
with time for individual DXing. Available to the team are antennas,
towers, etc. for a large MULTI-MULTI contest station. About all that is
needed are ops, transceivers (with accessories) and computers. Depending
on team size, Gill's QTH and the local EOC would be used. Harry states,
"I will send an info E-mail with more details to those interested. You
can contact me several ways, <htflasher@...>, 937-434-9616 or
Skype using flasher-ac8g. Between the two locations (within distance
rules), there are four beams already up and room for others. This is a
GREAT chance to be DX and be in a major contest. The major cost is airfare.
Costs on the island are fairly reasonable. This will be covered in my
info E-mail. For those with Goggle Earth, Gill's QTH is at 12 degree
2.971 N. & 61 degree 44.386 W. Feel free to call - I am retired and
home most of time."

PJ4, BONAIRE. Members of the PJ4G club station will be active from the
"Radio House" <http://www.pj4g.com> on Bonaire (SA-006, WLOTA LH-1279)
during the CQWW WPX CW Contest (May 25-26th). Look for John, K4BAI,
to be active as PJ4A during the contest as a Single-Op/Single-Band (40m)
entry. Roger, N4RR, will be Single-Op/Single-Band (15m) entry as PJ4R.
David, NA2AA, will be Single-Op/Single-Band (10 or 20m - depending on
band conditions) entry as PJ4G. The team members will be active several

days before the contest on all bands using PJ4/homecall as their callsign. QSL via the QRZ.com addresses.

PJ6, SABA. "After the successful DXpedition of October 2010 (10-10-10), and a third place finish in the 2011 ARRL CW DX Contest as a Multi-Single, it is time for a return to Saba," states Bob, K4UEE. Operators Bob/K4UEE, Steve/VE7CT, Gregg/W6IZT and Roger/G3SXW will enter the CQWW WPX CW Contest (May 25-26th) as Multi-Op entry. Logs will be uploaded to LoTW quickly after their return, paper QSLs go via N4NX. Activity is planned before and one day after the contest.

KX6BB NOW ON LoTW AND CLUBLOG. Bob, W4VQ, informs: "I have uploaded nearly 9700 QSOs made by me at KX6BB on Kwajalein in 1972-1975 to LoTW and Club Log. The ClubLog link at this time is:
https://secure.clublog.org/logsearch/KX6BB
While this is of interest only to old timers and many of today's calls do not appear there, I wanted to provide the data in an electronic medium for future reference. It should be noted that I have NO paper cards and inquiries to that end will be in vain." He does mention: "Interestingly, I did get 129 LoTW matches for QSOs 40 years old."

OW75FOC INCORRECT QSL INFORMATION. Phil, G3SWH, reports: "Please note that incorrect QSL routing information is in circulation. The correct route is via G3SWH, and *NOT* via OY1CT." Please see the following Web page at: http://www.g3swh.org.uk/ow75foc.html

QSL RECEIVED VIA LoTW: EF7HQ, FK9DD, JA7MSQ, JH1BED, OM3LK, ON8NT and PY3KN

QSLS RECEIVED VIA MAIL: 7Z7AB, 9K2F, 9M4SLL, HP1/IZ6BRN, JX9JKA, KH2L, RG9A, RI0K, TB4/DJ7RJ, TF3FIN, UK/UA1ZEY, XW0ZJZ, XW4XR, XW8XZ, YB8BRI/P, YB8HZ/P, and ZK3T

QSLS RECEIVED VIA THE BUREAU: 1A0KM, 3A/IZ1MHY, 3XY1D, 4K9W, 401OTA, 4U1VIC, 4Z5J, 5B/I5HLK, 5C2J, 5R8PR, 5T0SP, 7P8MM, 8P5A, A25JR, A60ISG, A61AB, A61TT, A61X, A62ER/ZM3, A62END, BD4QA, BD7MVZ, CT3AS, D44TBE, EP3MO, EP3PK, FM5BH, HB0/DK3RED/P, HB0/I2AE, HP1/IZ6BRN, HZ1PS, HZ1SK, IM0/IZ3DBA, IS0BKL, IS0BKS, IS0CDS, IS0ESG/QRP, IS0LFZ, IS0LLJ, IS0MNR, IS0UTA, IS0YTA, IS0/IK4RQJ, JD1BMH, JY4SK, K6VVA/KL7, KH2/N2NL, KH6/K1YR, KH6/K2WR, KL2SX, KL7IDA, KL7/AI5P/M, LX75RL, OA4/IK5ROP, OC3I, OD5LN, OH0Z, OY2H, PJ2/AC8AP, PJ4T, PJ7/IK2QPR, PJ7N, PY0FO, SV5/DF4IE/P, SV5/IZ4JMA, T2T, T6TL, TG9IRP, TK/IK2WZM, TK9E, TL0CW, TO4M, TS8P, TU2T, UA0FUA, UK7F, UK8FF, UK8UC, V5/DL2AZ, VK9GMW, VK9OL, VP2MPL, VP8ORK, XF3/IZ2LSC, XV2W, XV4YY, YI3DX, Z38/IZ4JMA, ZA/I2GPT, ZA/IW7DZJ, ZD7X, ZD8D, ZD8W and ZK2C

SV5, DODECANESE. Members of the "DX Plus Hellenic Amateur M. I. Team" and "Radio Amateur Association of Greece" are now active as SX5KL from Kalolimnos Islet (EU-001, GIOTA DKS-048, WLOTA 0662) until May 20th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are as follows:
CW - 1815, 3525, 10120, 14025, 18070, 21025, 24895 and 28025 kHz
SSB - 1845, 3770, 7110, 14225, 18130, 21275, 24950 and 28400 kHz
RTTY - 3590, 7038, 10140, 14090, 18098, 21090, 24920 and 28090 kHz
6m - 50103/CW and 50150/SSB

Operators mentioned are John/SV1GE, Cliff/SV1JG, Manos/SV1ME, Spiros/SV1RC, George/SV1RP, Vangelis/SV2BFN, Takis/SV2FWV, Mike/SV8GKE and Theodoros/SV1GRM. QSL Manager is SV2FWV (sv2fwv[at]gmail.com). QSL via direct, by the Bureau or OQRS (via ClubLog) and LOTW. For more details see the DXpediton's Web site at: http://SX5KL.no-ip.org

VP8, FALKLAND ISLANDS. Andy, M0HLT, is expected to be active as VP8DOH possibly for 2 years. He is now based on the Falklands as an electrician. Activity will be limited between his work commitments. Operations will be SSB only and mainly on the higher HF bands, preferring 10 meters when conditions allow but will try 20 meters and above. QSL via eQSL only or LoTW.

W9DXCC DX CONVENTION (Press Release). John, K9EL, sent the following dated May 6th [edited]: "W9DXCC DX CONVENTION COMMITTEE ANNOUNCES -- 'DX□ing from the Black Hole 2'
A six session presentation sponsored by NIDXA and DX-u,
in conjunction with the 61st W9DXCC DX Convention

(Schaumburg, Illinois) The W9DXCC convention committee has announced it will offer a six session class on Friday, September 20th, 2013, to help inform all hams interested in DX'ing about general topics of interest to the DX community. The class will be held the day before the W9DXCC convention and has been designed for both new and experienced DX'ers. Each session will cover a different aspect of DX'ing including operating practices, digital DX'ing, chasing awards, QSL'ing, antennas and propagation.
All presenters are accomplished DXers and include NN1N, K9LA, K9AJ, K9EL, K9NU and W9MU. Between them they have over 100 years of experience

that includes participation in DXpedition operations to rare locations around the world and numerous awards.
Registration for the class may be done online at the W9DXCC web site <www.w9dxcc.com> when Convention registration is active. Discounts will be available for persons signing up for both the class and the convention. Please contact W9MU (jack@...) for additional details and information."

XZ, MYANMAR. Simon, HS0ZIB, announced on QRZ.com over the past week that he is now in Kawthaung. He mentioned on May 1st that he will be there during the months of May and June, and will operate as XZ1K from Tanintharyi State. He adds, "I will only operate on PSK-31, according to when I have free time. From 1st July, I will be working in Laos, but I will try to return each holiday to re-activate XZ1K." According to his QRZ.com page, he has made 20 meter PSK QSOs with JA, VU, VK..etc., using Digipan. He suggests for you to transmit up to 1 kHz high of his frequency, and he can do a 'split' QSO. You can check QSOs and request QSLs from his online log at: http://www.myradioclub.org/xz1k
He states on May 11th, "LoTW is not yet available. I submitted documents to the ARRL for DXCC approval and LoTW account on 30/4/13, (by courier service from Yangon), but although the package is shown as delivered to the ARRL, I have had no feedback. If/when I am allocated an LoTW account, I will upload to LoTW for requested QSLs."

YASME FOUNDATION NEWS (Press Release). Kip Edwards, W6SZN, Director and Secretary of the Yasme Foundation, sent out the following press release on May 9th [edited]: "YASME BOARD OF DIRECTORS ELECTS NEW PRESIDENT AND HONORS OUTGOING PRESIDENT WAYNE MILLS, N7NG -- At its annual meeting held at the International DX Convention in Visalia, California, the Board of Directors elected Ward Silver, N0AX, as its new President. The remaining officers were re-elected. The necessity of an election for a new President was occasioned by the resignation of Wayne Mills, N7NG. Wayne has founded DX University (www.dxuniversity.com) and takes over as the new DX Editor for CQ Magazine.
The Board also decided to acknowledge Mr. Mills' many years of service to the Yasme Foundation by making a contribution to DX University in support of the goals shared by the two organizations.
The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing (long distance communication) and the introduction and promotion of Amateur Radio in developing countries. For additional information about The Yasme Foundation, visit our website at <www.yasme.org>.

Ward Silver, N0AX, President Of The Yasme Foundation

Board of Directors:
Fred Laun, K3ZO, Director and Vice-President
Rusty Epps, W6OAT, Director and Treasurer
Kip Edwards, W6SZN, Director and Secretary
Martti Laine, OH2BH, Director
Mac McHenry, W6BSY, Director

Robert Vallio, W6RGG, Director"

ZL, NEW ZEALAND. Holger, ZL3IO, is expected to be active during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band entry. QSL via ZL3IO, direct or by the Bureau.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30513
SIDC SOLAR BULLETIN 13 May 2013, 1305UT
SIDC FORECAST (valid from 1230UT, 13 May 2013 until 15 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 13 May 2013 10CM FLUX: 148 / AP: 010
PREDICTIONS FOR 14 May 2013 10CM FLUX: 150 / AP: 007
PREDICTIONS FOR 15 May 2013 10CM FLUX: 155 / AP: 010
COMMENT:An active region behind the east limb produced an X1.7 flare with peak at
02:17 UT and several M class flares. There were Type II and III radio
bursts and a CME associated with this flare. The CME is not expected to
arrive to the Earth. Active conditions are expected with more M and X class
flares possible, in particular when this AR rotates over the visible disk
in a few days. C and M class flares can be expected mostly from NOAA AR
1744, 1745 and 1746. Geomagnetic conditions are quiet, unsettled conditions
may occur with the expected arrival of a mildly fast speed stream from a
coronal hole today and tomorrow.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30514
SIDC SOLAR BULLETIN 14 May 2013, 1305UT
SIDC FORECAST (valid from 1230UT, 14 May 2013 until 16 May 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 14 May 2013 10CM FLUX: 150 / AP: 007
PREDICTIONS FOR 15 May 2013 10CM FLUX: 153 / AP: 015
PREDICTIONS FOR 16 May 2013 10CM FLUX: 156 / AP: 007
COMMENT:NOAA AR 1748 rotated into view, it is still not possible to infer its
magnetic configuration but it is a big region with mixed magnetic
polarities. It produced two X-class flares in past 24h and can produce
more. The first one was an X2.8 with peak at 16:05 UT on May 13, the second
one an X3.2 at 01:11 UT today. Both were related to radio bursts and fast
limb CMEs. The first CME has a speed of 1500 km/s in the LASCO C3 field of
view (decelerated with respect to the 1800 km/s seen in C2), while the
second one was travelling at 1900 km/s in LASCO C3 (accelerated from the
1600 km/s measured in C2). Due to the source region location right at the
limb, we expect at most a shock arriving to the Earth early on May 15
(09:00 UT for the first one and 13:00 UT for the second one). There is also
a CME from May 12 expected to arrive around the same time as the first CME
from yesterday. The second X flare and corresponding CME produced also a
rise on the proton flux, which is still below the threshold and seems
stable for the moment. NOAA AR 1745 has also potential for M flares. High
solar activity is expected for the next 48h. Geomagnetic conditions are
currently quiet. The possible arrival of a shock from the two halo CMEs and
a mild fast speed stream from a coronal hole may increase conditions to
active and possible minor storm levels in the next 48h.
TODAY'S ESTIMATED ISN : 106, BASED ON 14 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30515
SIDC SOLAR BULLETIN 15 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 15 May 2013 until 17 May 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Proton event expected (10 pfu at >10 MeV)
PREDICTIONS FOR 15 May 2013 10CM FLUX: 150 / AP: 017
PREDICTIONS FOR 16 May 2013 10CM FLUX: 152 / AP: 014
PREDICTIONS FOR 17 May 2013 10CM FLUX: 153 / AP: 011
COMMENT:A class X1.2 solar flare occurred today with peak time 01:48 UT, from NOAA
AR 1748 which has a beta-gamma-delta magnetic configuration. It was
associated with radio bursts and an increase of GOES proton flux levels,
now at 5 protons/cm2-s-sr, the threshold of 10 protons/cm2-s-sr will likely
be reached soon (at >=10 MeV). The increases in proton flux likely come
from the CME driven shock. If the strong flares from this AR continue, the
proton increases will likely be more abrupt when the magnetic connection
between the flare site and the Earth is better (i.e. when the AR is in the
western hemisphere). A CME was associated with the event, a shock and
glancing blow can probably be expected at the Earth late on May 16 (CME
speed 1700 km/s in LASCO C2). Geomagnetic conditions are quiet, but ACE
data shows a disturbance starting this morning, with currently magnetic
intensity close to 15 nT (northwards, so no geomagnetic effect). There is
not enough data yet to discern clearly its cause, but it is likely related
to the CME on May 12 (and possibly those from the two previous days related
to X-flares from NOAA AR 1748). Geomagnetic conditions are expected to be
unsettled to active, with possible isolated minor storm periods.

SB DX @ WW < KB8NW $OPDX.1112.1
Ohio/Penn DX Special Bulletin No. 1112.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1112.1
BID: $OPDX.1112.1
Mary 15, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Cordell Expeditions, OH2BH and W5KUB for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): Just a reminder that there will not be an OPDX Bulletin next week and "possibly the week after". I "will" be attending the Dayton HamVention, but will be limited to conditions and how I feel. As far as the update on my health -- hopefully things are better. Monday, May 13th, I had a heart cathe-terization at the Cleveland Clinic to view my abnormalities. The results were -- I had a balloon angioplasty to the saphenous vein bypass graft to the diagonal anastomosis. There was a 99% blockage where my bypass graph tied into my natural artery (main left artery in the heart). It's now open and blood is flowing again. They could not use a stent because of the difference in size between the bypass graph (vein) and the artery (much smaller). If you would like to see the before and after pictures of my heart cath, go to:
before -
https://sphotos-b.xx.fbcdn.net/hphotos-frc3/970493_261897223955204_1679757670_n.jpg
after - https://fbcdn-sphotos-b-a.akamaihd.net/hphotos-ak-prn1/923415_261897357288524_363321367_n.jpg
I did spend the night in the hospital and was released Tuesday after-noon. I am sore, but feel fine. I would like to thank the many well wishers who E-mailed me, and I hope to see them at Dayton.... 73 de Tedd

DAYTON HAMVENTION BROADCAST. Tom Medlin, W5KUB, reports the following [edited]: "It's time for the 2013 Dayton Hamvention broadcast!! -- Please join us during our live, online broadcast of the Dayton Hamvention this week. To join the broadcast go to <http://W5KUB.com> where the fun begins!
New venue for 2013: We will be located inside Hara Arena at Booth SA302 to provide you with a totally different program. There will be no rain, hail, sleet, or snow on our cameras this year!!
During the Hamvention W5KUB will interview vendors regarding their latest products. We will have many special guests such as Bob Heil

(K9EID) of Heil Sound; Martin F. Jue (K5FLU) founder of MFJ Enterprises; John Amodeo (NN6JA) producer of ABC TV☐s hit show, "Last Man Standing"; and many more.
During the live broadcast, you will also have the opportunity to meet and chat with other ham radio operators from all over the world. During the 2012 Dayton Hamvention we had 47,400 viewers that followed our broadcast for the 5 day broadcast!
You could win one of 43 prizes, valued over $5,300, which will be awarded during the broadcast! The prizes include dual band mobile, HTs, D-star ID-51A, Comet Antenna Analyzer, Heil microphone and headset, antennas, weather station, computer to radio interface, spool LMR-400, auto antenna tuners, and much more. These prizes are made possible because of our relationship with partners; such as, GigaParts, Ten-Tec, NCG Company, Kantronics, MP Antenna, Heil Sound, ARRL, MFJ, and many more. In the past year over $10,000 in prizes have been awarded! Of course, no purchase is necessary to win a prize. W5KUB is not affiliated with any products or companies and does not sell any products or services.
Dayton Hamvention broadcast schedule (all times are subject to change):
* Wednesday, May 15th: 1300 UTC (8:00 AM CT) drive from Memphis to Dayton, Ohio (10 hours). Yes, this will be a live broadcast!
* Thursday, May 16th: 1300 UTC - 2030 UTC (9:00 AM - 4:30 PM ET), set up at Hara Arena and visit with vendors.
* Friday, May 17th: 1200 UTC - 2100 UTC (8:00 AM ☐ 5:00 PM ET), Dayton Hamvention
* Saturday, May 18th: 1200 UTC - 2100 UTC (8:00 AM ☐ 5:00 PM ET), Dayton Hamvention
* Sunday, May 19th: 1200 UTC ☐ 1600 UTC (8:00 AM ☐ noon ET), Dayton Hamvention
* Sunday, May 19th: 1700 UTC (1:00 PM CT) drive from Dayton to Memphis (10 hours). Yes, this will be a live broadcast!

Join our group on Facebook at <https://www.facebook.com/groups/w5kub/> to keep up with us year-round.
Also, please help spread the word by posting this announcement in Facebook and forwarding this message to your ham radio friends that may not have received this message!

We'll 'see' you at Hamvention!.....
73, Tom Medlin, W5KUB -- <http://w5kub.com>"

VK0H, HEARD ISLAND (DXpedition Reschedule!). Press release from the Heard Island Web page dated May 15th [edited]: "PROJECT RESCHEDULING AND RESTRUCTURING -- We wish to announce that the expedition to Heard Island has been rescheduled for January, 2015. The primary reason for this decision was the cost of using the preferred vessel, the Marion Dufresne to put the team on Heard Island for the required time. In spite of extensive negotiations and rescheduling of the cruise, it became clear that the cost of using this vessel will exceed $1 million, and therefore the total cost for the project would be about $1.5 million, as we noted earlier. In spite of our plan to increase the team size to

50 (which the M-D can accommodate) to partially cover this cost, we reluctantly concluded that sponsorship at this level would be impossible. We have therefore decided to delay the expedition to January, 2015, to allow more time to restructure the project, locate a more suitable vessel, and bring the cost more in line with projected available resources.
One benefit of this rescheduling will be to enable the mountain science team to carry out the exploration of Big Ben on the 50th anniversary of the first ascent (in 1965). The 3000-meter volcano on Mawson Peak is currently erupting, and study of the changes brought by this eruption will be safe and significant during the 2015 season. A major component of the expedition will be to document the effects of the eruption, the state and condition of the flanking glaciers, and the changes in evanescent lagoons on the east slopes of the mountain.
A second benefit of the restructuring is that we will plan for amateur radio operations to be carried out over a longer time, up to 30 or more days. Furthermore, the campsite will be located on the east side of Heard Island, enabling paths to areas of the world that were not accessible in the last operation (in 1997). With the requirement of the longer stay on Heard Island, we will be assembling a new radio team with operators who are highly experienced and dedicated to the challenge of activating Heard Island with the new project requirements.
The third benefit of rescheduling is to have the time to develop sophisticated instrumentation and systems for state-of-the-art real-time communications with the expedition. We will have satellite links to enable real-time reporting of the radio log (using a new version of DXA, which was successfully used on previous DXpeditions (K7C and TX5K). In addition, we plan to implement real-time interactive communications and reporting from the mountaineering team as they explore the volcano, and to enable scientific and educational groups to work interactively with the onsite team.
The budget for the restructured project will likely be significantly less than $500k. We plan for a total team of 12-15 persons, and we will solicit team members with experience, motivation, and multiple skills. Except for the organizing principals, we are starting anew to build the team for this very different mission. We will work to keep the cost to participants below $15k, and will expect the team to work together to find support and make the appropriate preparations. Safety will be paramount.
We will post an update on 15 June 2013, including an updated Project Description (under DOCUMENTS). For more information, please contact Dr. Robert Schmieder, KK6EK Organizer and Expedition leader, Schmieder (a) cordell.org, or Rich Holoch, KY6R, Co-planner rholoch (a) comcast.com. We have posted updates on the expedition website <www.heardisland.org>.

Z8, SOUTH SUDAN. The following is a press release from Martti, OH2BH, dated May 15th [edited]: "As part of the April 2, 2013, visit to South Sudan by a delegation headed by the Foreign Minister of Finland, several supporting elements were discussed. Just three weeks later, following a series of meetings focusing on practical matters in Juba, there was a high-level presentation, with relevant endorsements, made to the South

Sudan government. The presentation was made with a view toward enlisting support on telecommunications matters in general and Amateur Radio's role in society in particular. Ultimately, a Memorandum of Understanding (MoU) was signed specifying several elements of Amateur Radio as a study case for local administrators. These elements include Amateur Radio□s role in society, frequency allocations, regulatory matters and promotion of Amateur Radio as part of an educational agenda. The MoU calls for a workshop to be held for the senior staff of the Ministry of Telecommunications and Postal Services. Members of the Ministry of Higher Education and the Research and Technology agency will also attend the workshop.
In early June, a senior South Sudan telecommunications official will attend an IARU Administrator's Course in Accra, Ghana to observe ITU and IARU. This travel will be made possible thanks to the valuable support of the Yasme Foundation <www.yasme.org>.
As Amateur Radio is only provisionally regulated in South Sudan, the Radio Arcala Fellowship Group of Finland, OH8X, was granted a provisional license □ Z81X □ to facilitate operating events during visits by the project representatives. We expect that Z81X will be activated several times during the course of this project, notably on low bands and in CQWW Contests.
Just today, the initial Z81X activity, with one radio only, was concluded with more than 20.000 QSOs. QSOs were split evenly between the three major population areas of the world - Europe 8693 (43%), North America 5774 (29%) and Asia 5162 (26%). The Finnish duo - Olli, OH0XX and Martti, OH2BH - has now returned to their native Finland. See <www.qrz.com/db/Z81X>.
As the entire project is carried out on a voluntary basis, the group will accept donations to be used solely for offsetting direct project expenses incurred in South Sudan. ClubLog OQRS is now active for QSL requests (bureau or direct) and project support..
We are pleased to acknowledge the support of Mr. Pekka Haavisto, the Finnish Foreign Minister's Special Representative to the Horn of Africa and Sudan. We also acknowledge the supporting efforts of Mr. Amul Behera of Rock City Investments, Juba, Dr Anu Kantele of Helsinki University Central Hospital, Massimo, Z81B (IZ0EGB), Diya, Z81D (YI1DZ) and Ken, Z81Z (K4ZW) for supporting the project and welcoming the latest country of the world to the valued ranks of Amateur Radio.
Z81X QSL manager is OH0XX, QRZ.com."

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30516
SIDC SOLAR BULLETIN 16 May 2013, 1305UT
SIDC FORECAST (valid from 1230UT, 16 May 2013 until 18 May 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Proton event in progress (>10 MeV)
PREDICTIONS FOR 16 May 2013 10CM FLUX: 147 / AP: 010
PREDICTIONS FOR 17 May 2013 10CM FLUX: 149 / AP: 025
PREDICTIONS FOR 18 May 2013 10CM FLUX: 151 / AP: 007
COMMENT:No major flares in past 24h, the largest one was a C1.6 from NOAA AR 1748
peaking at 12:37 UT on May 15. This AR is still expected to produce major
flares. NOAA AR 1745 has potential for M-class flares. The proton flux
remains over the threshold of 1 protons/cm2-s-sr for the past 24h. This
increase is related to the CME and X1.2 solar flare from May 15.
Geomagnetic conditions have ranged from unsettled to active. ACE data shows
an ICME arriving at 08:00 UT on May 15, most likely corresponding to the
CME of May 12. A glancing blow of the CME from May 15 can be expected in
the first half of May 17, increasing geomagnetic conditions up to storm
levels (estimated max K = 6).
TODAY'S ESTIMATED ISN : 139, BASED ON 08 STATIONS.

To all radio amateurs

SB DX ARL ARLD020
ARLD020 DX news

This week's bulletin was made possible with information provided by CS5CRE, F5TRO, NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Tony, RT9T is QRV as 5B4ALB until May 28. Activity is on all HF bands and modes. This includes being an entry in the upcoming CQ WPX CW contest, possibly with a different call sign. QSL direct to home call.

SENEGAL, 6V. Vlad, RK4FF is QRV as 6V7S from Le Calao in Ngaparou until May 30. Activity is on 80 to 10 meters using CW, SSB and RTTY. QSL to home call.

PORTUGAL, CT. Special event station CS25ARVM will be QRV from May 20 to 26 to celebrate the 25th anniversary of ARVM. Activity will be on 80 to 10 meters, as well as 2 meters and 70 cm, using CW and SSB. QSL via CT1VM. In addition, special call sign CR5AT will be QRV on May 18 from the castle Amieira do Tejo. QSL via CS5CRE.

FRANCE, F. A group of operators will be QRV as F6KUF/p from May 18 to 20 from the Ile de Noirmoutier. Activity will be on 80 to 6 meters using CW, SSB and RTTY with three stations. QSL via F6KUF/p.

BOSNIA AND HERZEGOVINA, E7. Special event station E720SRRS is QRV until the end of 2013 in celebration of 20 years of the Savez radio-amatera Republike Srpske. QSL via bureau.

BELARUS, EW. Special event station EV196VTAP is used to commemorate the 70th anniversary of a military regiment. QSL via EW8LL.

GALAPAGOS, HC8. Alex, HD2A and Alberto, HC2AQ are QRV as HD8A from Isla de Santa Cruz, IOTA SA-004, until May 20. Activity is on the HF bands. QSL direct via HD2A.

COLOMBIA, HK. A large group of women operators will be QRV as 5K3YL on May 18 during the Days of YLs contest. Activity will be on 40 and 20 meters using SSB. QSL via EA3DUF.

REPUBLIC OF KOREA, HL. Kang, DS4DRE/5, will be active from Hajo Island, IOTA AS-060, until December. Activity is on 80 to 10 meters using CW and SSB. QSL via home call.

US VIRGIN ISLANDS, KP2. Look for Fred, K9VV to be QRV as NP2X and Bob, WP2XX to be QRV from May 21 to 28 from the Radio Reef DXers Super-Station on St. Croix Island, IOTA NA-106. During the upcoming CQ WPX CW contest, they will be active as KP2M. QSL KP2M direct to AI4U, NP2X direct via K5WW and WP2XX direct.

BONAIRE, PJ4. John, K4BAI will be QRV as PJ4/K4BAI from May 22 to 27. Activity will be on the HF bands. He plans to be active as PJ4A in the upcoming CQ WPX CW contest. QSL both calls via K4BAI.

SLOVENIA, S5. Special event station S545DSW is QRV until May 31 in celebration of the founding of Radio Club Mozirje 45 years ago. Activity is on the HF bands using mainly SSB and digital modes. QSL via S51DSW.

GREECE, SV. A group of operators are QRV as SZ8S from Samos Island, IOTA EU-049, until May 30. Activity is holiday style on the HF bands. QSL direct via G1LAT.

TURKS AND CAICOS ISLANDS, VP5. Dave, W5CW is QRV as VP5/W5CW from Caicos Island, until June 11. Activity is on 160 to 6 meters using CW and SSB. QSL to home call.

FALKLAND ISLANDS, VP8. Andy, M0HLT is QRV as VP8DOH while on work assignment for the coming two years. He is active on the higher bands using SSB in his spare time. QSL via operator's instructions.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations have been approved for DXCC credit: Ghana, 9G5EME, 2013 operation; Cocos Island, TI9CCC, February 15 through February 28, 1984 operation.

THIS WEEKEND ON THE RADIO. The NCCC RTTY Sprint, NCCC Sprint, The Day of YLs, UN DX Contest, EU BPSK63 DX Contest, Aegean RTTY Contest, His Majesty King of Spain CW Contest, Feld Hell Sprint, Baltic Contest and the UA2 QSO Party are all on tap for this weekend. The Run for the Bacon QRP CW Contest is scheduled for May 20. The SKCC CW Sprint and CWops Mini-CWT CW Test are scheduled for May 22. Please see May QST, page 80, and the ARRL and WA7BNM Contest websites for details.

21201. Ohio/Penn DX Special Bulletin #1112.2

Yahoo group: DX-IS (2013)
Date: 2013-05-17 12:00:00 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 21201 Message: 21201

SB DX @ WW < KB8NW $OPDX.1112.2
Ohio/Penn DX Special Bulletin No. 1112.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1112.2
BID: $OPDX.1112.2
Mary 17, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and W2VU for the following DX information.

CQ NEWS (Press Release - 2013 Hall of Fame Inductees). CQ magazine today announced its 2013 Hall of Fame inductees, adding two members each to the CQ DX and Contest Halls of Fame along with eight new members of the CQ Amateur Radio Hall of Fame.

The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The 2013 inductees (listed alphabetically) are:

* Evelyn Garrison, WS7A (SK) - amateur radio industry leader
* Joel Kleinman, N1BKE (SK) - former Managing Editor of QST magazine
* Laurie Margolis, G3UML/GPC3L - Longtime BBC correspondent and contributor to amateur radio magazines
* Michael Owen, VK3KI (SK) - Longtime president of the Wireless Institute of Australia and chairman of IARU Region 3
* Harry Rubinstein (ex-9EEV) (SK) - Inventor of the printed circuit, the slider potentiometer and the combination potentiometer/on-off switch
* Walker Tompkins, K6ATX - Journalist, author and historian, his three dozen books included several well-known ham radio-related novels
* Joe Walsh, WB6ACU - Rock music performer and Rock & Roll Hall of Fame inductee
* William G. (Bill) Welsh, W6DDB (SK) - CQ Novice Editor for 20 years; responsible for helping thousands to get their ham licenses

CQ DX and Contest and DX Halls of Fame

The CQ DX and Contest Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways.

The 2013 inductees to the CQ DX Hall of Fame are:
* Vladimir Bykov, UA4WHX/AC4LN, has visited and operated from over 100 DX entities in the past ten years and operated from all six continents in 2012 alone. Has provided over 700,000 DX contacts for hams around the world (and QSLed them all).
* Robert "Gary" Dixon, K4MQG, is a founding member of the Carolina DX Association and as Founding President of INDEXA, the International DX Association, which has helped support over 200 DXpeditions in the past 30 years.

The 2013 inductees to the CQ Contest Hall of Fame are:
* Dale Green, VE7SV, is a world-class contester who has been hosting teams of new and experienced contesters at his superstation for the past 20 years, and recently helped start a contest group in Chile.
* Charles "Chas" Fulp, K3WW, also a multi-award winning contester and past president of the Frankford Radio Club (FRC), which saysChas "is our role model and sets the standard for other FRC members to strive to achieve."

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled for the Dayton Hamvention.® More detailed descriptions of inductees will appear in the official announcement in the July 2013 issue of CQ magazine.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30517
SIDC SOLAR BULLETIN 17 May 2013, 1305UT
SIDC FORECAST (valid from 1230UT, 17 May 2013 until 19 May 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Proton event in progress (>10 MeV)
PREDICTIONS FOR 17 May 2013 10CM FLUX: 149 / AP: 014
PREDICTIONS FOR 18 May 2013 10CM FLUX: 150 / AP: 007
PREDICTIONS FOR 19 May 2013 10CM FLUX: 152 / AP: 013
COMMENT:Two M-class flares in past 24h, both from NOAA AR 1748. The first one
occurred on May 16 at 21:53 UT, with intensity M1.3. The second flare was
an M3.2 and peaked at 08:57 UT on May 17. This AR has still potential for
producing X class flares. It maintains its beta-gamma-delta magnetic
configuration, even though some fragmentation is seen in the trailing
region and there are some indications that polarities are separating within
the delta spot penumbra. The M3.2 flare of today was related to radio
bursts and a CME. SWAP detected clear dimmings and an EIT wave around NOAA
AR1748. There are no LACO data available yet, but a CME is indeed seen in
STEREO COR2 data, it can be Earth directed. The speed in COR2-B is
calculated to be 1300 km/s, making a possible arrival to the Earth on May
19 around noon. Protons levels (10MeV) are still above threshold, stable
around 3 protons/cm2-s-sr. Geomagnetic conditions have been unsettled to
active, due to long lasting periods of slow solar wind with sustained mild
negative Bz (around -5nT). These are not related to the arrival of the CME
of May 15, which is still not visible in ACE data, and may still arrive
later today and produce storm levels (estimated max K = 6). As a reminder,
this series of CMEs related to AR 1748 had a source region within 30
degrees of the solar limb, which reduces their possibility of arrival to
the Earth to around 30%.
TODAY'S ESTIMATED ISN : 124, BASED ON 10 STATIONS.

To all radio amateurs

SB PROP ARL ARLP020
ARLP020 Propagation de K7RA

This is, after all, the peak of the current solar cycle, or close to it, so no surprise that solar indices are up. But based on past solar cycles, many of us expected more. The latest forecast predicts a peak for this cycle in Fall 2013, but of course that will be determined afterward, and based on a long running average of sunspot numbers. So don't miss this one. Don't wait until a year after the peak, then lament not being on back when. Today may have the best Spring propagation for a long time.

The past week saw average daily sunspot numbers increase by more than 34 points to 156.1. Average daily solar flux was up by nearly three points to 140.1. On Wednesday, May 15 the daily sunspot number was 186, the highest number since January 6-7, when the sunspot numbers were 186 and 196.

Predicted solar flux for the near term is 145 on May 17-18, 140 on May 19, 135 on May 20, 130 on May 21, 125 on May 22, 120 on May 23-24, 160 on May 25, 170 on May 26, 160 on May 27-28, 155 on May 29-30, 150 on May 31, 155 on June 1, 160 on June 2-3, 155 on June 4, 150 on June 5, and 145 on June 6-8.

Predicted planetary A index is 15 on May 17, 8 on May 18-19, 5 on May 20, 8 on May 21, 15 on May 22, 12 on May 23, 8 on May 24, 5 on May 25-27, 15 and 10 on May 28-29, 5 on May 30 through June 8, 8 on June 9, and 5 on June 10 and 12 on June 11.

Http://Spaceweather.com reports this morning (May 17) that a CME may strike Earth today from an X1 flare two days ago, but it is expected to be a glancing blow instead of a direct hit. NOAA predicts a 40% chance of polar geomagnetic storms. This is from sunspot group 1478, which should be pointing directly at Earth in a few days. ZDnet ran a story on this today:

http://www.zdnet.com/active-sunspot-fires-solar-flares-cme-toward-us-7000015460/

Http://space.com ran a mid-week piece on sunspot group 1478, complete with video and cinematic score:

http://www.space.com/21150-huge-solar-flares-busy-sunspot.html

OK1HH predicts quiet to active geomagnetic conditions May 17-18, mostly quiet May 19, quiet on May 20, mostly quiet May 21, active to disturbed May 22, quiet to active May 23-24, mostly quiet May 25-26, quiet May 27, quiet to active May 28, active to disturbed May 29, quiet to unsettled May 30, mostly quiet May 31 and June 1, quiet to unsettled June 2-3, mostly quiet June 4, and quiet on June 5-8.

David Moore sends along a link to a video from Phil Plait's Bad Astronomy blog on http://slate.com. This one shows time-lapse photography of aurora from Northern Michigan:

http://vimeo.com/65504232

This is a pretty high bandwidth HD video, so if you have an average broadband connection, you may want to turn off the audio and walk away from the computer for a while and let the buffer load up on data, then run the video from the beginning.

Phil Plait's commentary on the video is well worth reading, and you can find it on http://slate.com if you select "Health and Science" across the top, then page down to "Time Lapse Video."

There are a couple of space weather pages on Facebook of interest to hams. You will have to sign up for Facebook to read these, but it is free and painless. Check out http://www.facebook.com/232532740131296 and http://www.facebook.com/spacewx.hfradio.

Check out http://www.ipellejero.es/hf/english/index.html, an interesting and useful page found just by fooling around with a popular web search engine. Search about one-fifth down the page for "Solar Flux Index and Sunspots." You'll see an interesting plot correlating proton flux, solar flux and sunspot number.

Today (May 17) at 0915 UTC the http://www.spaceweatherlive.com/en site issued this alert: "There was a huge eruption on the Sun observed with class M3.21." At 0952 UTC their website said "In the past two hours there was a big solar flare with a class of M3.21."

Lee Gordy, W4KUT of Cartersville, Georgia sent this report about what he was up to over the past few days, along with a propagation query about solar flares and HF blackouts: "I participated in a GEMA/FEMA/Homeland Security exercise at Stone Mountain, Georgia this week. I was with Paulding County EMA/ARES. There were a couple dozen EMA, Fire & Rescue, LEO and National Guard MCVs gathered from all over the state for the four day event."

My guess is an MCV must be a Mobile Command or Communications Vehicle, and of course a LEO is a Law Enforcement Officer. I think EMA must be an Emergency Management Agency.

The exercise was Monday through Thursday, May 13-16.

Lee continues, "We were tasked with many activities, including checking-in to the statewide Georgia ARES HF net (80 and 40 meters) every hour, from 0900 through 1700 local, May 14-15, using CW, Voice (LSB), and PSK31.

"ARES played a big part in the exercise.

"The HF conditions were, according to local propagation experts, supposed to be a total HF blackout. But we had no problem on 80 and 40 meters. What happened?

"There was supposed to be a black-out due to CME or some kind of disturbance. Our take? Ol' Sol cannot be tamed! Much less predicted.

"Our station (WX4PCA Paulding County ARES), observed no anomalies on 80 or 40 meters during the entire period from Monday May 13 through Thursday May 16. Go figure."

Thanks, Lee! I believe the blackout predictions were based on worst case scenarios in which solar flares could have a big effect if they were aimed squarely at Earth, but they weren't.

If you check the archives for those days at http://www.spaceweather.com/ (check the upper right, and dial in your date) you will see plenty of coverage regarding solar flares, but all were around the eastern limb of the Sun, none really geoeffective toward Earth. But check the mid-latitude indices (on the left side) at http://www.swpc.noaa.gov/ftpdir/latest/DGD.txt and you don't see a lot of activity. Plus, Georgia is way down south, and not subject to the disturbances common at higher latitudes. For example, here in Seattle I am at 47.7 degrees north latitude, but the entire state of Georgia sits between 30.7 and 35 degrees north latitude.

Jon Jones, N0JK of Lawrence, Kansas wrote: "Every dog has his day. I worked LU9EHF FF95 in Argentina on 50.130 MHz with 59 signals at 2159 UTC May 10. My antenna was a dipole in the attic over the garage, the radio a 100 watt FT-897.

"I was watching our two grand children while the XYL was out on errands. I checked the radio and DXscape from time to time in between entertaining them. At 2145 UTC K0HA EN10 spotted LU9EHF on 50.130. I tuned to .130 not expecting to hear anything, but heard some weak Spanish accented SSB on frequency. It was LU9EHF. He worked a W8 then suddenly got much louder. Very loud, way over S-9. He worked N0LWF EN10wm in Nebraska at 2157 UTC. I waited anxiously for them to finish their QSO. LU9EHF went QRZ, I dropped my call in. Bam! Luis came right back and we exchanged reports. LU9EHF is in FF95, 8,914 km away.

"I recorded parts of LU9EHF's QSOs with K9KU EN61 and WF0N EM28 after I signed with him. Luis was so loud the speaker on the radio was distorting. Larry, N0LL EM09 spotted LU9EHF at 2220 and K0GU DN70 at 2248 UTC. I suspect a fairly high wave angle to the Es link given the strength of LU9EHF's signal on the dipole. Perhaps chordal hop Es to TEP link? It was one of the more remarkable things I have heard on 6 meters.

"Let Hercules himself do what he may, the cat will mew and the dog will have his day." Spoken by Hamlet in William Shakespeare, The Tragedy of Hamlet, Prince of Denmark. Act V, Scene 1, page 13.

See http://www.dxscape.com/ for DXscape, mentioned by N0JK.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for May 9 through 15 were 154, 149, 145, 173, 144, 142, and 186, with a mean of 156.1. 10.7 cm flux was 128.4, 124.8, 136.6, 147.3, 150.3, 147.9, and 145.6, with a mean of 140.1. Estimated planetary A indices were 5, 5, 4, 5, 6, 8, and 9, with a mean of 6. Estimated mid-latitude A indices were 4, 4, 4, 6, 6, 7, and 10, with a mean of 5.9.

CT - Special event station CS25ARVM will be active on 20-26 May to
celebrate the 25th anniversary of the Associacao de Radioamadores
da Vila de Moscavide/Radioamadores do Concelho de Loures. Activity
will be on 10, 15, 20, 40 and 80 metres SSB and CW. QSL via
CT1RVM. [TNX ARVM]
CT9 - DL8LAS, DL9EE and DK9IP will participate in the CQ WW WPX CW
Contest as CR3L (www.cr3l.de) from Madeira Island (AF-014). Look
for them to be active (also on RTTY) as CT9/homecall two days
before the contest. [TNX DK9IP]
DL - Sebastian, DL1AXX will be active as DL1AXX/p from Baltrum Island
(EU-047) on 20-26 May. QSL via home call, direct or bureau. [TNX
rsgbiota.org]
DL - Harald, DJ2II will be active as DJ2II/p from Langeness Island
(EU-042) on 21-29 May. He plans to operate SSB and CW on 80-10
metres. QSL via home call, direct ore bureau, and LoTW. [TNX
rsgbiota.org]
GJ - Seven Belgians (ON4ACP, ON4ANN, ON4CAU, ON4CCV, ON8CW, ON4CKM and
ON6MI) will be active as MJ/ON6NB from Jersey on 24-30 May. They
will operate SSB, CW and PSK on 160-2 metres with an emphasis on
the higher bands. QSL via ON4ANN, direct or bureau. Further
information at http://users.telenet.be/on4ann/MJ/index.html [TNX
NG3K]
HL - Look for DS4DRE/4 to be QRV from Hajo Island (AS-060) until the
end of the year. He operates SSB and CW on 80-10 metres. QSL via
home call, direct or bureau.
I - Special event station II9SUB will be active on 20-26 May for the
50th Convention of the International Community of Submariners to
be held in Catania. QSL via IT9MRM.
OH0 - Look for Hans OH0/PA0VHA, Steve OH0/PA2A, Wim OH0/PA2AM, Martin
OH0/PA2VMA, Wil OH0/PA3ALK and Jack OH0/PA3BAG to be active from
Eckero, Aland Islands (EU-002) from 25 May to 7 June. They will
operate SSB, CW and RTTY on the HF bands, and will also give 2m a
try. [TNX rsgbiota.org]
PJ4 - John K4BAI, Roger N4RR and David NA2AA will participate in the CQ
WW WPX CW Contest from Bonaire (SA-006). They will be signing PJ4A
(SOAB 40m), PJ4R (SOAB 15m) and PJ4G (SOAB 10 or 20m)

respectively. Before the contest they will use PJ4/homecall on all bands. [TNX OPDX Bulletin]
SV - Boyko, LZ1QN and others will be active as SV8/homecalls from Zakynthos Island (EU-052) on 19-27 May. They will participate in the CQ WW WPX CW Contest as SW8LZ (QSL via LZ1QN). [TNX NG3K]
VE - Ron, VA3RVK has been granted the special callsign XL3T to commemorate the 100th Anniversary of the Canadian Arctic Expedition (1913-1916). Look for him to be QRV on all bands and modes between 24 May and 23 June, including an entry in the CQWW WPX CW Contest. QSL via VA3RVK. [TNX VA3RJ]
VK - Special event call VI103WIA will be active on 23-27 May for the Wireless Institute of Australia AGM and National Conference (http://conference.vk6.net) that will be held in Freemantle (Western Australia). [TNX Southgate ARC]
YB - The 22-26 May YE8P operation from the Togian Islands [425DXN 1148] has been cancelled. [TNX JN6RZM]

CQ 2013 HALL OF FAMERS ---> CQ Magazine announced on 17 May the 2013 Hall of Fame inductees. The CQ Amateur Radio Hall of Fame was established in January 2001 to recognize individuals - radio amateurs or not - who significantly affected the course of Amateur Radio, as well as radio amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. This year's inductees are: Evelyn Garrison (WS7A, SK), Joel Kleinman (N1BKE, SK), Laurie Margolis (G3UML/GPC3L), Michael Owen (VK3KI, SK), Harry Rubinstein (ex-9EEV, SK), Walker Tompkins (K6ATX), Joe Walsh (WB6ACU) and William G. (Bill) Welsh (W6DDB, SK).
The CQ Contest Hall of Fame (established in 1986) and the CQ DX Hall of Fame (established in 1967) honour those amateurs who not only excel in personal performance in these major areas of amateur radio, but who also "give back" to the hobby in outstanding ways. This year's inductees in the CQ Contest HoF are Dale Green (VE7SV) and Charles "Chas" Fulp (K3WW). The 2013 inductees to the CQ DX HoF are Vladimir Bykov (UA4WHX/AC4LN) and Robert "Gary" Dixon (K4MQG).

DXCC NEWS ---> Over the years some applicants have had TI9CCC for Cocos Island rejected in their DXCC application mostly due to "Incorrect Date Period". The issue with the dates for this operation have been resolved. If you had this operation rejected, and your confirmation falls between 15-28 February 1984, send an e-mail to bmoore[@]arrl.org to be placed on the list for an update to your record. Also approved for DXCC is 9G5EME (Ghana, 2013 operation). [TNX NC1L]

HEARD ISLAND 2015 ---> The expedition to Heard Island has been rescheduled for January 2015. "The primary reason for this decision was the cost of using the preferred vessel, the Marion Dufresne to put the team on Heard Island for the required time. In spite of extensive negotiations and rescheduling of the cruise, it became clear that the cost of using this vessel will exceed $1 million, and therefore the total cost for the project would be about $1.5 million, as we noted earlier. In spite of our plan to increase the team size to 50 (which the M-D can accommodate) to partially cover this cost, we reluctantly concluded that sponsorship at this level would be impossible. We have therefore decided to delay the expedition to January 2015, to allow more time to restructure the project, locate a more suitable vessel, and bring the cost more in line with projected available resources".
One of the benefits of this rescheduling/restructuring is that "we will plan for amateur radio operations to be carried out over a longer time, up to 30 or more days". A new radio team will be assembled: "the budget for the restructured project will likely be significantly less than $500k. We plan for a total team of 12-15 persons, and we will solicit team members with experience, motivation, and multiple skills". Read the complete announcement on www.heardisland.org.

LOTW SOFTWARE ---> The ARRL will release a new version of Trusted QSL, the open-source development project responsible for developing and maintaining the three Logbook of the World (LoTW) client-side applications: TQSL, TQSLCert and the TrustedQSL library. After six weeks of public beta testing, version 1.14 is ready for official release and will be available for download from the ARRL website beginning Monday, May 20.
Version 1.14 includes these new features:
- Log files can be signed and uploaded over the internet to LoTW in one operation.
- Errors in Station Locations are reported (for example, incorrect CQ and ITU zones).
- QSOs that need not be re-submitted ("duplicates") are brought to the user's attention.
- Error reporting has been improved.
- Installation on Windows has been improved.
- Users are notified when a new version becomes available.
- Documentation has been improved.
Upgrading to version 1.14 is not mandatory, but is encouraged. Users who choose not to upgrade will not be able to access the new features in version 1.14, but they will still be able to upload logs into the LoTW system.

QSL OJ0W ---> All of the oustanding QSOs (August-September 2012) have been confirmed automatically via the bureau. If a direct card is still needed, send it to Pasi, OH3WS. [TNX OH3WS]

WRTC 2014 ---> "We have implemented a new WRTC2014 volunteer and contact management database. We will use this to find people with skills/interests that match our needs": www.wrtc2014.org/wrtc2014-organization/volunteer/ [TNX K5ZD]

XZ1K ---> Simon, HS0ZIB is active as XZ1K [425DXN 1148] on 20 metres PSK-31 from Kawthaung, Myanmar during the weekends. QSOs can be checked and direct cards can be requested at http://www.myradioclub.org/xz1k/. "LOTW is not yet available", he says. "I submitted documents to the ARRL for DXCC approval on 30 April, but although the package is shown as delivered to the ARRL I have had no feedback". Check his qrz.com page for updates.

Z81X ---> "As Amateur Radio is only provisionally regulated in South Sudan, the Radio Arcala Fellowship Group of Finland (OH8X) was granted a provisional license (Z81X) to facilitate operating events during visits by the project representatives. We expect that Z81X will be activated several times during the course of this project, notably on low bands and in CQWW Contests.
The initial Z81X activity, with one radio only, was concluded on 15 May with more than 20,000 QSOs (Europe 43%, North America 29% and Asia 26%). Olli, OH0XX and Martti, OH2BH have now returned home. "As the entire project is carried out on a voluntary basis, the group will accept donations to be used solely for offsetting direct project expenses incurred in South Sudan. Club Log OQRS is now active for QSL requests (bureau or direct) and project support". Read the complete "Project Goodwill South Sudan Interim Report" at http://www.qrz.com/db/Z81X

21206. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-05-18 14:01:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21206

```
:Issued: 2013 May 18 1303 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30518
SIDC SOLAR BULLETIN 18 May 2013, 1305UT
SIDC FORECAST (valid from 1230UT, 18 May 2013 until 20 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Proton event in progress (>10 MeV)
PREDICTIONS FOR 18 May 2013 10CM FLUX: 136 / AP: 014
PREDICTIONS FOR 19 May 2013 10CM FLUX: 135 / AP: 025
PREDICTIONS FOR 20 May 2013 10CM FLUX: 134 / AP: 010
COMMENT:Solar activity has been low, NOAA AR 1748 produced a C6.0 flare with peak
at 03:45 UT. This remains the most active region, although it is decreasing
in complexity, and may lose its delta configuration soon. M-class flares
can be expected, and X-class flares remain possible. Proton levels are
decreasing, but are still slightly over the threshold for 10 MeV. A shock
arrived to the Earth at 00:30 UT, it corresponds to the CME from May 15. It
arrived later than expected, which can happen for glancing blow events. A
short sheath was seen right after the shock. A solar wind speed of 450 km/s
and Bz up to -15 nT caused Kp = 5, between 00:00 UT and 06:00UT, while the
local Dourbes K value went up to 4. The CME from May 17 is expected to
arrive around noon on May 19 and cause up to major geomagnetic storms.
TODAY'S ESTIMATED ISN : 088, BASED ON 08 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30519
SIDC SOLAR BULLETIN 19 May 2013, 1305UT
SIDC FORECAST (valid from 1230UT, 19 May 2013 until 21 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 19 May 2013 10CM FLUX: 132 / AP: 029
PREDICTIONS FOR 20 May 2013 10CM FLUX: 130 / AP: 014
PREDICTIONS FOR 21 May 2013 10CM FLUX: 128 / AP: 007
COMMENT:Only C-class flares occurred in past 24h. The strongest one was a C3.4 from
NOAA AR 1750 with peak at 09:15 UT. NOAA AR 1748 has lost complexity and
has now a beta-delta magnetic configuration, it still can produce M flares
and, less likely, X-class flares. The 10 MeV proton flux has descended
below the threshold of 10 protons/cm2-s-sr, for the first time since May
15. Geomagnetic activity has ranged from unsettled to active in past 24h.
It can reach up to major storm levels when the May 17 CME arrives to the
Earth today.
TODAY'S ESTIMATED ISN : 087, BASED ON 12 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30520
SIDC SOLAR BULLETIN 20 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 20 May 2013 until 22 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 May 2013 10CM FLUX: 135 / AP: 011
PREDICTIONS FOR 21 May 2013 10CM FLUX: 133 / AP: 007
PREDICTIONS FOR 22 May 2013 10CM FLUX: 133 / AP: 007
COMMENT:Solar activity was eruptive with 7 C flares mostly originating from NOAA
1750 (Catania 78) and 1 M1.7 flare from an active region just behind the
east limb peaking on May 20th 05:25 UT. There is insufficient data
available to determine an associated CME, but chances for arrival on Earth
are very low due to its location. Because the active region 1750 on the
West limb can still produce M flares, there is a possibility for a proton
event. A shock corresponding to the CME of May 17th arrived to the Earth at
22:23 UT on May 19 causing active geomagnetic conditions (K Dourbes = 4).
Geomagnetic conditions are currently quiet again and are expected to remain
so for the next 48 hours.
TODAY'S ESTIMATED ISN : 077, BASED ON 08 STATIONS.

SIDC URSIGRAM 30521
SIDC SOLAR BULLETIN 21 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 21 May 2013 until 23 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 May 2013 10CM FLUX: 130 / AP: 007
PREDICTIONS FOR 22 May 2013 10CM FLUX: 132 / AP: 007
PREDICTIONS FOR 23 May 2013 10CM FLUX: 135 / AP: 007
COMMENT:Solar activity was eruptive the last 24 hours with 7 C flares mostly
originating from AR NOAA 1748 (Catania 75) which has become more complex
again since yesterday. AR NOAA 1750 (Catania 78) is decaying, but still
has a possibility to produce M flares and due to its position, also a
proton event. A CME was detected by LASCO C2 on May 20th around 13:00
UT with an angle of around 150 degrees and a speed around 340 km/s. It
should reach Earth on May 24th around 19:00 UT, but should only have minor
impact. It originated from AR 1748 with a C flare around 10:30 UT.
Geomagnetic conditions where quiet to moderate and are expected to remain
so for the next 48 hours.
TODAY'S ESTIMATED ISN : 076, BASED ON 06 STATIONS.

PREDICTIONS FOR 25 May 2013 10CM FLUX: 135 / AP: 031
COMMENT:Solar Activity was active the last 24 hours with several C-class flares and
1 M5 flare peaking around 13:32 UT on May 22d with origin AR NOAA 1745. It
was associated with a proton event where levels were above the 10.0 pfu
treshold for > 10 Mev, > 30 Mev and > 50 MeV. A CME associated with this
M5 flare was detected by LASCO C3 around 15:00 UT, from the available
information, the CME has an angular width of around 120 degrees and a speed
around 1000 km/s. Based on this data the CME will reach Earth on May 25th
around 17:00 UT. A second, slower CME (500 km/s) with angular width around
90 degrees was detected by LASCO C3 at 10:18 UT from the same source region
(NOAA 1745) due to a C flare around 9:45 UT, this CME is not directed
towards Earth and will partially dissipate in the first CME. Geomagnetic
conditions where moderate (K=3) and are expected to remain quiet to
moderate until the arrival of the CME on May 25th around 17:00 UT where K
levels can reach major storm levels. (K = 6)

To all radio amateurs

SB DX ARL ARLD021
ARLD021 DX news

This week's bulletin was made possible with information provided by HA0HW, K1SFA, NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AZERBAIJAN, 4K. Alim, 4K6FO plans to be active in the CQ WW WPX CW contest. QSL via operator's instructions.

GEORGIA, 4L. Vaho, 4L8A will be a Single Op/Single Band on 20 meter entry in the CQ WW WPX CW contest. QSL via operator's instructions.

CYPRUS, 5B. A group of operators will be QRV as P3N as a Multi/Single entry in the CQ WW WPX CW contest. QSL via RW3RN.

MADEIRA ISLANDS, CT3. Operators DL8LAS, DL9EE and DK9IP are QRV as CT9/homecalls. They will be active as CR3L in the CQ WW WPX CW contest. QSL CR3L via DJ6QT and all others to home calls.

CANARY ISLANDS, EA8. Luis, EA8AY will be QRV as EE8X from Tenerife, IOTA AF-004, in the CQ WW WPX CW contest. QSL direct via W2GR.

FRANCE, F. Special event station TM100USA will be QRV from the Montfaucon American Monument on May 25 and 26 as a special tribute to the American troops who served here during the first World War. Activity will be on 40, 20, 15 and 10 meters using CW, SSB and various digital modes. QSL via F6KUP.

JERSEY, GJ. Kazu, M0CFW is QRV as MJ0CFW from St. Brelade until May 27. He will be active as MJ5Z in the CQ WW WPX CW contest. QSL both calls direct to home call.

SVALBARD, JW. Operator DK8FD is QRV as JW/DK8FD until May 27. This includes an entry in the CQ WW WPX CW contest. QSL to home call.

LUXEMBOURG, LX. Look for LX7I to be a Multi/Two entry in the CQ WW WPX CW contest. QSL via LX2A.

ALAND ISLANDS, OH0. Tomi will be QRV as OH0Z from Fasta Aland, IOTA EU-002, in the CQ WW WPX CW contest. QSL via W0MM.

CZECH REPUBLIC, OL. Special event station OL2013DIG is QRV until June 6 during the international DIG-meeting. QSL via OK1AR.

GREENLAND, OX. Henning, OZ1BII is QRV as XP2I from Kangerlussuaq until May 27. Activity is on the HF bands using only CW. This includes an entry in the CQ WW WPX CW contest. QSL to home call.

SABA, ST. EUSTATIUS, PJ5. A group of operators are QRV as PJ6A from Saba, IOTA NA-145, until May 27. This includes an entry in the CQ WW WPX CW contest. QSL via N4NX.

GREECE, SV. Laci, HA0HW is QRV as SW8WW from Thassos Island, IOTA EU-174, until June 5. Activity is on all HF bands and 6 meters using CW, SSB and RTTY. This includes an entry in the CQ WW WPX CW contest as a Single Op/All Band entry. QSL to home call.

TURKEY, TA. Special event station TC1919ATA is QRV in commemoration of the landing of Kemal Atatuerk in Samsun in 1919. QSL via TA6P.

CANADA, VE. Ron, VA3RVK is QRV as XL3T until June 23 to commemorate the Canadian Arctic Expedition that took place from 1913 to 1916. This includes an entry in the CQ WW WPX CW contest. QSL via VE3AT.

AUSTRALIA, VK. Special event station VI103WIA is QRV until May 27 from Freemantle, Western Australia during the Wireless Institute of Australia AGM and National Conference. QSL via bureau.

VANUATU, YJ. Bill, K2PO is QRV as YJ0PO from Efate Island, IOTA OC-035. Activity is on 80 to 10 meters. This includes an entry in the CQ WW WPX CW contest. QSL to home call.

NEW ZEALAND, ZL. Holger, ZL3IO will be QRV from Hawke's Bay on the North Island, IOTA OC-036, as a Single Op/All Band entry in the CQ WW WPX CW contest. QSL direct to home call.

PRINCE EDWARD AND MARION ISLANDS, ZS8. David, ZS8Z has been QRV on 20 meters using SSB around 1340 to 1500z and 10 meters around 1230z. QSL via ZS1HF.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: North Cook Island, E51WL.

THIS WEEKEND ON THE RADIO. The CQ World Wide WPX CW Contest, NCCC RTTY Sprint, NCCC Sprint CW Ladder, Portuguese Navy Day Digital Contest, QRP ARCI Hootowl CW Sprint and the SARL Digital Contest will certainly keep contesters busy this upcoming weekend. The MI QRP Memorial Day CW Sprint is scheduled for May 27 and 28. Please see May QST, page 80, and the ARRL and WA7BNM Contest websites for

details.

SIDC URSIGRAM 30524
SIDC SOLAR BULLETIN 24 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 24 May 2013 until 26 May 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Major magstorm expected (A>=50 or K>=6)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 24 May 2013 10CM FLUX: 135 / AP: 017
PREDICTIONS FOR 25 May 2013 10CM FLUX: 135 / AP: 038
PREDICTIONS FOR 26 May 2013 10CM FLUX: 135 / AP: 011
COMMENT:Solar activity has been eruptive the past 24 hours featuring several
C-class flares mostly originating from AR NOAA 1756 (Catania 82). Active
conditions are expected with M-class flares especially from AR NOAA 1755
(Catania 83) and NOAA 1756 (Catania 82). Proton levels of 30 MeV and 50
Mev have dropped below the 10.0 pfu treshold, but 10 MeV, although going
down, is still above the 10.0 pfu treshold. Geomagnetic conditions where
quiet to moderate. The interplanetary magnetic field Bz component is
currently low, but turbulent which could indicate the arrival of the May
20th CME. A jump in solar wind speed is not expected with this CME. Major
Storm conditions (K >= 6) are expected on May 25th around 17:00 UT due to
the arrival of the CME of May 22.

21214. RE: SV2ASP/A

Yahoo group: DX-IS (2013)
Date: 2013-05-24 14:35:03 UTC
From: Lance Martin
Topic: 21214 Message: 21214

Hi Jeff, ditto ol' chap.

Monk apollo is an enigma for us VK6s.
Many of us still need SV/A for an all time new one (all modes/bands) including me.

Since 2006, I have heard him once 44 LP 20m SSB but couldn't break the EU pile.

I put a spot on the cluster every time he is spotted hoping that he will see it or someone will convey a message to him. I reckon I have been on air 10 times when he has been QRV in the last 7 years and zip. Some guys from the US visited Monk Apollo last year to put an antenna up on the hill, I haven't heard the outcome.

The Dear Monk's Monastery is on the east side of a hill, so I guess we will only hear him LP.

I did once write to Monk Apollo but nothing has been forthcoming.

Keep at 'em.

73, Lance -VK6DU

On May 24, 2013, at 9:18 PM, "Jeff Gaylard" <jeffg@...<mailto:jeffg@...>> wrote:
Hi there

Seen your spot . I was always looking for an email to set a sked up with SV2 but could never find it.
IF you ever know of them coming on line for VK, I would appreciate to know.

Best Regards

Hi Lance,

I worked him this AM on 17M (12:57 UTC.) He was 419 at best with a lot of QSB, and CQing with few takers, listening up 1. That's going to be a tough path for you guys. What would be great would be if a DXpedition team went there and put it on for a week with multiple beams and amps.

However, that isn't likely to happen. As I recall back in the 90s, DJ6SI got in there and operated under his CEPT license. (Monk Apollo must have been on vacation!) I read weekly rants in "The DX Bulletin" (then edited by VP2ML (SK)) where Monk Apollo declared he'd go QRT permanently if the ARRL didn't disallow DJ6SI's operation. The ARRL never did, Monk Apollo wasn't heard for a year or two. Then he got over it and is back on self-regularly. Apparently he has some pretty good gear, including a SteppIR antenna, but he is the only operator and intends to keep it that way.

I don't think he has any email address, but a snail mail letter explaining the situation might result in him listening for Oceania. The problem I've observed is that Mount Athos is just rare enough to generate pretty big NA and EU pileups. Monk Apollo doesn't have a lot of patience and when the pileup gets unruly, as most do, he goes QRT.

He's not too hard for us on the east coast of NA to work, but the West Coast must find it very difficult. As for VK and ZL, I'd say it would be next to impossible unless he can get NA and EU to be quiet and just work Oceania for awhile. I hate to be the bearer of bad news, but I can't see a scenario where you guys would get a shot. He rarely works SSB, and the CW and RTTY Skimmers announce his presence before he finished his first CQ.

Another problem is pirates . . . once or twice a year someone gets on falsely signing SV2ASP/A and works a number of stations. I got sucked in last year or the year before on 12M RTTY by this. Got a reply to my QSL request saying he wasn't QRV that day.

73, Paul VE1DX

I hear him good. Guess I should get on and tell him how loud he is and that it has been a few months since we have worked last. Oh
yea, how are you, Monk Apollo? How's your weather? Still have clean underwear?

Nah maybe not.

That is an understatement. Yes he was spotted today on 17 metres but I did not hear a peep. Then at 1600 UTC he was gone.

At least this was CLOSE to propagation that might work for the West Coast. That in itself is a refreshing change!

He's still on my list of 7 needed all-time! I keep hoping!

If you wont to know why it's so difficult for not so far regions like
Russia and Australia check his location Docheiariou Monastery on google
earth. You'll see that it's south west of the mountain peak so Russia is
completely blocked by the mountain range. Very nice pictures of the
region can be found from lot of people who posted them on google earth.

And yes ... good luck to everybody who's still hunting for this "DXCC" :)

25 May 2013 A.R.I. DX Bulletin
No 1151
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

8Q - Fred, G4ZWI will be active as 8Q7FC from the Maldives (AS-013) from 26 May to 8 June. He will operate holiday style running 5 watts on CW and possibly PSK on 20 and 15 metres. [TNX The Daily DX]
EA - The Asociacion de Radioaficionados Vega Baja (www.arvb.es) and URE Orihuela will be active as EG5SUB from the S-61 Delfin submarine during the Museum Ships Weekend (1-2 June). They plan to operate SSB, CW and digital modes on the HF bands. [TNX ON5JV/EA5HZB]
EI - Andy, G7SQW will be active as EJ/G7SQW from Arranmore Island (EU-121) on 27-29 May. He will be QRV on 40-6 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org]
F - Special station TM100USA will be active on 25-26 May from the Montfaucon American Monument, as a tribute to the American troops who served here one century ago. This will be the first of a series of activations to commemorate the 100th anniversary of World War I in the area of Verdun. QSL via F6KUP (bureau) or F5LPY (direct).
F - Gil, F4FET and Diego, F4HAU have brought forward their TM0BIG operation from La Petite Ile (EU-107) [425DXN 1149] and now plan to be QRV for 24 hours on 3-4 June. On 1-2 June they will operate as F4FET/p and F4HAU/p from several islands (not IOTA) in Northern Brittany: Ile Molene (DIFM MA080), Ile Losquet (MA079), Ile Grande (MA016), Ile du Renard (MA077), Ile Aganton (MA076) and Ile Bolennec (MA078). Complete information on the Diplome des Iles de la France Metropolitaine (Metropolitan France Islands Award) can be found at www.difm.org
F - In June-July 1944 the BBC war correspondents used the tower of the castle at Creully as a radio studio, from where the first reports of the Battle of Normandy were broadcast. Look for special callsign TM5BBC to be aired again from Creully on 5-13 June. QSL via F2UW. [TNX Les Nouvelles DX]
FJ - Father and son team, Jeff FJ/K5WE and Erik FJ/N5WR, will be active from St. Barthelemy (NA-146) on 3-10 June. They will be QRV on 80-6 metres mostly CW, with some RTTY and SSB. QSL via home calls. [TNX K5WE]
GD - The Isle of Man Amateur Radio Society will be active on the HF

bands as GB4JDF on 2 June. The suffix stands for the Joey Dunlop Foundation, a charity set up to cater for injured riders and named after the 26 times IOM Tourist Trophy winner. QSL via 2D0YLX.
I - Members of ARI Sanremo will operate as IQ1SM/p from Lago Campo Golf on 1 June. They plan to operate CW, SSB and RTTY on 40, 20 and 17 metres. QSL via bureau. Information on the Italian Lakes Award can be found at www.dlit.it [TNX I1UWF]
I - The 'Elettra' was a two-masted steam yacht that Guglielmo Marconi used as a floating laboratory for many experiments. Part of her keel stands in the grounds of Villa Griffone, at Pontecchio near Bologna, from where special event station II4BTK will be active during the Museum Ships Weekend (1-2 June). QSL via IQ4FE, direct or bureau. [TNX IZ4MJP]
I - Eighty-five years ago the airship 'Italia' crashed on the ice on its way back from the North Pole, and a small tent dyed red for maximum visibility was the only shelter for the survivors. Commemorating the role of radio (and amateur radio) in rescuing the Red Tent survivors, ARI Arona will operate special callsign II1ITR from 25 May to 25 June. QSL via IQ1LM, direct or bureau. [TNX IZ1ETD]
KL - Jeff, KL2HD will be active as KL7NWR on 20, 17 and 15 metres from Attu Island (NA-064) on 2-5 June (but actual dates depend on ship schedule and weather). This operation commemorates the 70th anniversary of the Battle of Attu during World War II. The island is part of the Alaska Maritime National Wildlife Refuge which celebrates its 100th anniversary of establishment. QSL via KL2HD, direct or bureau, and LoTW. [TNX K6VVA]
LA - Keith, G3TTC will be travelling in his motorhome to visit and operate from quite a number of IOTA groups in Sweden and Norway between early June and late July. His tentative itinerary (subject to change) for the Norwegian part of his trip is as follows:
4-5 July Vardo EU-141
8-9 July Mageroya EU-044
13 July Tromsoya EU-046
15-16 July Hinnoya EU-033
18-20 July Lofoten EU-076
22-23 July Tomma EU-062
27-28 July Tjome EU-061 (IOTA Contest)
Look for him on 14260, 7055 and 7100-7125 kHz. QSL via home call, direct or bureau.
OH - Thomas, SM3DMP and Jan, SM3CER will be active holiday style as OH/SM3DMP and OH/SF3A Bjorkon Island (EU-101) on 16-19 June. They will operate mainly CW on 30, 20 and 17 metres. QSL OH/SM3DMP via home call, QSL OH/SF3A via SM3CER. [TNX rsgbiota.org]
OX - Henning, OZ1BII has had to cancel his 23-27 May XP2I operation [425DXN 1147] "due to illness". It will be rescheduled later in the year. [TNX NG3K]
OX - Bo, OX3LX (http://geronne.dk/index.php/ox3lx/ox3lx-dxped) expects to be active from Tasillaq Island (NA-151) between 29 May and 5 June and again between 20 July and 1 August. He plans to be QRV on

4/6 metres (WWL HP15eo) and the HF bands. [TNX DX World]
OZ - Tom, DL4VM, will be active as OZ/DL4VM from Vendsyssel-Thy (EU-171) on 1-15 June. QSL via home call, direct or bureau. [TNX rsgbiota.org]
PJ4 - Steve, 9M6DXX plans to operate as PJ4V from Bonaire (SA-006) from 4 or 5 June until the 16th. Activity will be holiday style on SSB only using 100 watts to a Spiderbeam. QSL via M0URX, direct or bureau (preferably using the OQRS at www.m0urx.com/oqrs). Logs will be uploaded to LoTW within a few days of the end of the operation at the latest. [TNX 9M6DXX]
SM - SB6A, SM6IQD, SM6MIS, SM6U, SM6XMY and SM6YOF will be active as 7S6W from Vinga Island (EU-043) on 6-9 June. They will have three stations active on 80-10 metres SSB with some CW and RTTY. Logsearch at http://sm6.se/7s6w/. QSL via bureau to SM6MIS, plus LoTW and eQSL. [TNX rsgbiota.org]
SM - Keith, G3TTC will be travelling in his motorhome to visit and operate from quite a number of IOTA groups in Sweden and Norway between early June and late July. His tentative itinerary (subject to change) for the Swedish part of his trip is as follows:
6-7 June Ven EU-137
8-9 June Hasslo EU-138
12-14 June Kattilo EU-177
16-17 June Fogdo EU-084
22-23 June Limon EU-176
24-26 June Alnon EU-087
27-28 June Holmon EU-135
30 June-1 July Seskaro EU-139
Look for him on 14260, 7055 and 7100-7125 kHz. QSL via home call, direct or bureau.
VE - David, VE3VID is back to Igloolik Island (NA-174) until around mid-June. He is active as VY0/VE3VID in his spare time, on 20 metres RTTY with some SSB. QSL via home call, direct or bureau. [TNX DX World]
VE - Special callsign CK3C will be aired between 1 June and 1 July to celebrate the 100th anniversary of the Canadian Arctic Expedition of 1913-1916. QSL via VE3RHE, direct or bureau, and LoTW. [TNX VA3RJ]
VP9 - Yuri, VE3DZ will be active as VP9FOC from Bermuda (NA-005) until 30 May, including participation in the CQ WW WPX CW Contest. The special callsign celebrates the 75th anniversary of the First Class CW Operators' Club. QSL via VE3DZ. [TNX NG3K]
W - The South Jersey DX Association, Old Barney ARC and Tuckerton Wireless ARC will be operating W2WSC/WSC from the last active operating site of coastal marine station WSC (aka The Tuckerton Wireless) in West Creek, NJ on 1 June. Bands planned will be 80, 40, 20, 15 and 10 metres CW and SSB. QSL VIA W2WSC. [TNX N2OO]
W - The Brazos Valley Amateur Radio Club (KK5W) will be active from the radio rooms of USS Cavalla (submarine) and USS Stewart (destroyer escort) during the Museum Ships Weekend (1-2 June). The ships are located at Seawolf Park on Pelican Island (NA-143). QSL

direct to KK5W. [TNX VA3RJ]
W - AD5WB, K0JCC, K0KS, K5WRN, KJ5WRN, KT5MR, N5TCB and W5AOO will participate in the Museum Ships Weekend (1-2 June) as N5E from the tall ship 'Elissa' at the Texas Seaport Museum on Galveston Island (NA-143). They will operate SSB, CW and/or digital modes on 40-40 metres, from 14 to 22 UTC approximately. QSL via AD5WB, direct or bureau. [TNX rsgbiota.org]
ZS - Gert, ZS6AYU will be active holiday style as C91GR from Bilene, Mozambique from 28 May to 1 June. He will operate CW only. QSL via ZS6AYU, direct or bureau. [TNX NG3K]

CQ WW WPX SSB CONTEST ---> The following stations have announced their participation in this year's event (25-26 May):

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

DODENTOCHT FOR CHARITY ---> On 9 August Chris, DL1MGB will participate in the 44th Dodentocht (a long-distance march of 100 kilometers organized annually in Bornem, Belgium) for charity. Details can be found at www.100-km.org [TNX DL1MGB]

DXCC NEWS ---> E51WL (North Cook Islands) has been approved for DXCC credit. The operator's former callsign (ZK1WL) was approved for DXCC previously. If you had E51WL rejected in a recent submission, send an e-mail to bmoore[@]arrl.org for an update to your record. [TNX NC1L]

IOTA NEWS ---> The following operations in the period March to May 2013 have provided acceptable validation and are therefore approved for IOTA credit: TS8TI (AF-083), SU8N (AF-109), XF2E (NA-171), V31HU (NA-180), V31MV (NA-180), V32EE (NA-180), A35UD (OC-049), YB6N (OC-161), DX8DX (OC-174 & OC-225). AF-109 is now confirmed as a valid IOTA group. [TNX G3KMA]

LOTW SOFTWARE ---> It was announced last week that TQSL 1.14 would be available on 20 May. However, three defects were reported - they have been corrected, but "we must test the corrected version before publicly releasing it" at the end of the month. [TNX AA6YQ]

NORTH SLOPE IOTA TOUR ---> Last year Rick, K6VVA planned to operate from IOTA groups NA-172, NA-050 and NA-004, but the expedition was rescheduled "for hopefully better propagation". Now he says that "the prognosis for this Summer from observations of solar trends and my perspective appears that things will likely be similar to last Summer (2012), when he decided

to postpone the operation to July 2013". Mike, K9AJ is only interested in doing NA-172 with him. So Rick is "breaking up the Tour into three separate chunks which may, or may not be done in one lengthy trip vs. separate ones (NA-172, NA-004 & NA-050). At this point, there is a 50-50 possibility that any of these activations will take place until 2014, and a final decision will not be made until mid June to possibly the first week in July". [TNX K6VVA]

MUSEUM SHIPS WEEKEND ---> Sponsored by the Battleship New Jersey Amateur Radio Station (NJ2BB), this year's Museum Ships Weekend will be held from 00.00 UTC on 1 June until 23.59 UTC on the 2nd. Information on the event, including the relevant certificate and the listing of participating ships, can be found at www.nj2bb.org

QSL YB8P: NEW ROUTE ---> The new QSL route for the 15-19 May IOTA expedition to Pulau Peleng in the Banggai Islands Group (OC-208) is via W2FB, direct or bureau. QSO details and donations "For Banggai OC 208" are accepted via PayPal (sbusono[@]gmaildotcom) or cash and will be transferred to the team. [TNX W2FB]

THE MOST TRAVELLED WATCH IN THE WORLD ---> "The watch would visit as many different countries [DXCC Entities, Ed.] as possible, being photographed, and the record of journey will remain in public domain. If you intend to visit one or more DXCCs in the near or distant future and don't mind taking with you our watch, then we would be not only grateful, but happy to make a donation toward your DXCC project". For further information please visit http://clockmaker.com.au/the-most-travelled-watch-in-the-world.html or email Nick, VK2DX (nick[@]clockmaker.com.au)

THE P5 PROJECT ---> Paul, N6PSE and David, AH6HY have received visas to visit the Democratic People's Republic of Korea (North Korea) in June. Plans are to "present and discuss our proposal for a major Dxpedition, involving two teams of twelve members each to operate consecutively over a thirty day operation", and to "visit and evaluate possible venues for the DXpedition". Complete announcement on www.intrepid-dx.com/p5/news.php

---

QSLs received direct or through managers: 3B9/OH1LEG, 3D2NB, 3D2RX, 3W3B, 4J5A, 4U1ITU, 5A1A, 5C5W, 5Z4EE, 6W/HA0NAR, 6W2SC, 7Z7AB, 9H3KK, 9K2KCBB, 9K2RA, 9M4DXX, 9X0ZM, A41MX, A45XR, CS2F, DX8DX (OC-174 and OC-225), EA9/DL2RNS, EA9/DL2RVL, EP3SMH, GB100TMD, H40T, H44G, H44KW, HB0/SP7VC, J35X, J5NAR, J5UAP, J88DR, JG8NQJ/JD1, JX9JKA, KL7AIR, KP2/JS6RRR, L22D (SA-022), P29FR, P29NI (OC-099), P29VCX (OC-103), P29VPB(OC-069), PJ2/DL5AXX, PT0S (SA-014), RI0K/p (AS-092), RW0BG/9 (AS-109), TF3DC, TF3IMD, TF3Y, TO7BC, TR0A/p (AF-089), TZ6BB, V63XG, V85AVE, VP8LIZ, VP8LP, WH7P/KP2, XR0YG, XT2TT, XU7AAJ, XV2DLH, XW0ZJZ, XW4XR, XX9THX, YB8BRI/p (OC-236), YB8HZ/p (OC-236), YB8XM/p (OC-271), YI9AJ, Z81D, Z81Z, ZD8RH, ZP6CW.

21222. Re: SV2ASP/A

Yahoo group: DX-IS (2013)
Date: 2013-05-24 17:18:37 UTC
From: Bob
Topic: 21214 Message: 21222

Lance/Jeff

I have worked Monk Apollo on 2Bands & 4Modes from MA and 20M-RTTY off a LP dipole in Maine. Not too difficult for the NE USA. He is a very good op and prefers acting a LP DX so you have to wait for propagation to pick him up. If he is strong then forget it, EU buries everyone.

Not a brag....I have never heard S2 from your side of the world so it works both ways.

Forget thinking email, clusters, social media, etc. No Way!

I have communicated several times via snail mail with Monk Apollo and have received a lovely card and hand written note each time.

I suggest you put together a group and try the mail again. The other option is to wait until someone visits him (as with the antenna installation) and then communicate through them. As you know it would be almost impossible to arrange a SKED via snail mail since schedules and propagation months away are unknown.

Good luck
Bob

> Since 2006, I have heard him once 44 LP 20m SSB but couldn't break the EU pile.
>
> I put a spot on the cluster every time he is spotted hoping that he will see it or someone will convey a message to him. I reckon I have been on air 10 times when he has been QRV in the last 7 years and zip. Some guys from the US visited Monk Apollo last year to put an antenna up on the hill, I haven't heard the outcome.

SB DX @ WW < KB8NW $OPDX.1113
Ohio/Penn DX Bulletin No. 1113

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1113
BID: $OPDX.1113
May 27, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Relayed this week from Murfreesboro, Tenn.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter/Web Page, K1XN & GoList, NC1L, NJ1Q & W1AW, KH2AR/W4, N200, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K5WE, K6VVA, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, 9M6DXX, ARVM, AT International, DK8JB & The DX News Letter, DK9IP, DL1MGB, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HB9ASZ, HS0ZCW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK1SOW, IK8YFU, NP4G, OZ1BII, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SU1SK, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and YO3JW for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX CW Contest participants.

** SPECIAL NOTE FROM EDITOR (Short Dayton HamVention Wrap-Up By KB8NW):
I has been an interesting couple of weeks due to my health issues, but things seem to be better now since my heart procedure, and I was able to attend Dayton. It is always great to see the many DXers from all over the world. It is the special camaraderie I enjoy, visiting and talking to the DXers/Contesters of the world. The NODXA Hospitality Suite is a great place to share this camaraderie with well-known DXers. Anyway, I did miss the DX Dinner Banquet because of my duties of helping to run the NODXA suite with our hostess Janeen Hire (W8ZET). We did hear, however, that the NH8S Swains Island operation received the "SWODXA (SouthWest Ohio DX Association) DXpedition of the Year for 2012-2013".
The weather was almost perfect for the flea market, but it did not fair too well for my bad knee (with all the walking). This year's DX Forum included talks on:
* DX legend Al Hix, W8AH (SK) - speaker Hal Turley, W8HC
* Interesting talk on propagation, Cycle 24 and a possible second peak - by Carl Luetzelschwab, K9LA

* DXpedition to St. Peter & St. Paul Rocks - by George Wallner, AA7JV
* DXpedition to Yemen (Socotra Island) - by Dave Collingham, K3LP
The 2013 Dayton HamVention in all was a great time and experience.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 18th-May, through Saturday, 25th-May there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JW, JY, K, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PY, PZ, R1FJ, S5, S7, SM, SP, SU, SV, SV/a, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4K, AZERBAIJAN. Alim, 4K6FO, Alim, will be active during the CQWW WPX CW Contest as a Single-Op entry. QSL via his home callsign.

4L, GEORGIA. Operator Vaho, 4L8A, will be active in the CQWW WPX CW Contest (May 25-26th) as a Single-Op/Single-Band (20m) entry. QSL via K1BV or LoTW.

A7, QATAR. Mark, G0MGX, is currently working and spending some of his time in the state of Qatar. After a long wait, he now has the appropriate permissions to operate as A71/G0MGX in accordance with the reciprocal licensing agreement between the Qatar and UK governments. Mark states, "I will be operating casually during evenings and some weekends (Fri and Sat in the Middle East) primarily in RTTY and JT65 modes. So far I have experienced some very big pileups on RTTY so please be patient - I am not an experienced DXpedition operator! The Qatar Amateur Radio Society have made me very welcome and I am very grateful to them for the support and help they have given me." Mark's setup is a FT-450 and Buddypole. He has provided the ARRL with the necessary documents of licensing for all his callsigns and uploads to LoTW regularly. Visit his Blog page for updates and other details at:
http://g0mgx.blogspot.co.uk/2013/02/a7-land-a71a-ah-qatar.html

C8, MOZAMBIQUE (Attention PFX Hunters!). An international team of operators will be active as C82DX during mid-October. Operators mentioned are Doug/N1DG, Tom/N4XP, Jose/CT1EEB, Franz/DJ9ZB, Massimo/I8NHJ, Mike/N6MZ, Dave/WB4JTT, Charles/W6OAT, Chris/ZS6EZ, Tjerk/ZS6P and Christian/ZS6RI. Activity will be on 160-10 meters. More details are forthcoming, and a Web page is currently under construction at: http://c82dx.com

C9, MOZAMBIQUE. Gerard, ZS6AYU, will be active as C91GR from Bilene between May 28th and June 1st. Activity will be holiday style on CW only using a Cushcraft R7000 vertical and 350-400 watts. Operations will between 1600-0500z. QSL via ZS6AYU, direct or by the Bureau.

CQ3/CT9, MADEIRA ISLANDS. Operators Winfried/DK9IP, Andree/DL8LAS and Holger/DL9EE will be active as CQ3L during the CQWW WPX CW Contest (May 25-26th) as a Multi-? entry. QSL via DJ6QT. Look for operators to be active two days before the contest as CT9/homecall. Some activity on RTTY is planned. QSL via Bureau. Visit the CR3L Santana, Madeira Island (AF-014), Web page at: http://www.cq3l.de

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "Over the years some applicants have had TI9CCC for Cocos Island rejected in their DXCC application mostly due to 'Incorrect Date Period'. The issue with the dates for this operation have been resolved. If you had this operation rejected, and your confirmation falls within the dates noted below, send an E-mail to <bmoore@...> to be placed on the list for an update to your record.
TI9CCC ☐ Cocos Island; February 15 through February 28, 1984"

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
9G5EME - Ghana; 2013 operation
E51WL ☐ North Cook Island; PLEASE NOTE: The operator is a native there, and his callsign was previously ZK1WL which was approved for DXCC previously, so this is just a change in callsign. If anyone had this contact rejected in a recent submission send an E-mail to <bmoore@...> for an update to your record.

E2, THAILAND. Charly, HS0ZCW, reports that the members of the Radio Amateur Society of Thailand (RAST) will be active as E2E part time during the CQWW WPX CW Contest (May 25-26th) as a High/Power entry. QSL via HS0AC.

EA6, BALEARIC ISLANDS. Tom, OK2BFN, will be active as EA6/OK2BFN/P from Mallorca Island (EU-004, DIE E-021, MIA MB-004, WLOTA 1902) during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/Low-Power entry. QSL via his home callsign.

EUFF GREEN PARTY 2013 (Field Day Operations). The YOFF team of the SRR (Romanian Society of Radioamateurs) and the ARER (Romanian Association of Environmentalists Radioamateurs) invite all the radio amateurs to join them in the EUFF Green Party 2013. Purpose: To stimulate the ham operators to leave their house and be involved in portable/outdoor operations related to the nature and ecology and to familiarize the world-wide radio amateurs with protected natural areas. Dates: 0600-1759z, June 8th. For complete details, see: http://wff-yo.blogspot.ro/p/blog-page_5.html

FJ, ST. BARTHELEMY. Father and son team, Jeff/K5WE and Erik/N5WR will be active as FJ/homecall from St. Barts (NA-146) beginning June 3rd and ending June 10th. Activity will be on all bands 80-6 meters, mostly CW,

some RTTY and SSB. QSL to their home callsigns.

FS & PJ7, ST. MARTIN AND SINT MAARTEN. Operators YL Kjerstin/AF6KJ and Travis/AF6WU will once again be active as PJ7/homecall from Sint Maarten (NA-105, WLOTA 0711) between July 5-9th. Then both Kjerstin and Travis will move onto St. Martin (NA-105, WLOTA 0383) and be active as FS/homecall between July 10-14th. Activity from both islands will be on multi-bands and multi-modes on HF according to the best available propagation. QSL both callsigns via AF6WU, direct or by the Bureau. Also eQSL, LoTW and Clublog. For direct QSLs, U.S. stations send 1 US stamp, $0.33 does it. DX stations send $1 USD or 1 IRC. Don't send him a standard envelope, the card is large, 4" x 5.25", and it won't fit.

IK, ITALY (Lighthouse Op). Members of the Calabria DX Team will be active from the Punta Stilo Lighthouse (ARLHS ITA-147, CL-010 WAIL) on May 26th. Callsign will be IK8YFU/p and possibly others. For more info, see: http://www.calabriadxteam.it

IOTA NEWS.....
AF-109. Photos and video are now available online for the recent SU8N Nelson's Island and World Lighthouse DXpedition (WLOTA 2694) by the Egyptian Radio Amateurs Society. Visit the ERASD Facebook Page at: https://www.facebook.com/erasdnet/photos_stream
A short video on YouTube can be seen at: http://www.youtube.com/watch?v=l600euAOeOw&feature=youtu.be
QSL Manager is SM5AQD (see QRZ.com).

EU-047. Oliver, DK7TX, will be active as DK7TX/p from Wangerooge Island between June 5-10th. Activity will be holiday style 20-10 meters. QSL via hishome callsign.

EU-114. Members of the Martello Tower Group will once again be active as GP0PKT from Herm Island between October 4-9th. Operators mentioned are Keith/G6NHU/KB3WPE, Tony/G0MBA, Richard/G7HJK, Colin/M1EAK, Kevin/M0GWE, Yan/M0YNK and Chris/2E0DBY. The plans are to have three stations on the air: 2x TS-590 and 1x TS-2000. Activity will probably be on 80/40/20/15/10 meters using SSB and RTTY (same as last time). Herm is one of the smallest Channel Islands, and although it's part of the EU-114 IOTA group, it's not activated very often. QSL via G6NHU, direct or by the Bureau. For updates and details, see: http://martellotowergroup.com/gp0pkt

EU-123. William, GM0OBX, will be active as GM0OBX/P from Inchcolm Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/Unassisted/SSB-Mode/QRP/DXpedition entry. QSL via his home callsign.

NA-029. Operator Ken, K6LA, will once again operate from Prince Edward Island in eastern Canada using the VY2TT superstation (Grid Square FN76vs, CISA PE-001) during the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/Mixed/24H/High-Power entry.

QSL by the Bureau.

NA-064. Jeff, KL2HD, will be active as KL7NWR on Attu Island, Aleutian Islands, Alaska, between June 2-5th. Actual dates depend on ship schedule and weather. This is a relatively rare IOTA that many would like to contact. Look for KL7NWR on 20, 17, and 15 meters as propagation allows. Details on QRZ.com under KL7NWR. Spotting assistance appreciated.

JW, SVALBARD. Svein, LA9JKA (ex-JX9JKA), will be active as JW9JKA from Bear Island (EU-027) between (Approx.) June 16th and December 15th. Activity will be limited to his sparetime, and Svein will be focusing on the bands from 160-4 meters. QSL only direct to his home address (see QRZ.com).

K6VVA/KL7 IOTA TOUR INFO UPDATE. Rick, K6VVA, informed OPDX on May 16th [edited]: "I have received several inquiries as to the status of the K6VVA/KL7 - North Slope IOTA tour, which was QRX'd from 2012 (NA-172 QRX'd again from the NA-242 trip in 2011).
Here is the situation as of today, as I have continued to monitor solar condx and trends. If anyone wonders why, you can read my previous historical comments on the <dx-world.net> website also relating to 70 Degree North Latitude HF operating, the Auroral Oval concerns, and that Mike, K9AJ, and I would have set foot on NA-172 right in the middle of a major solar X-Flare had we gone to NA-172 last Summer. This would NOT have resulted in a successful activation in spite of enormous expenses involved. In less than a month now, on 3 different occasions the K Index has spiked to K=4. The prognosis for this summer from observations of solar trends and my perspective appears that things will likely be similar to last summer (2012). And, that escalated CME and X-Flare activity is more common near and at the peak of any sunspot cycle (if you can call this a peak). Mike, K9AJ, has decided he is only interested in doing NA-172 with me, and NA-050 is pretty much a one-person activation anyway. So I am breaking up the 'Tour' into 3 separate chunks which may, or may not be done in one lengthy trip vs. separate ones (NA-172, NA-004 & NA-050). NA-004 is NOT the 'Drive-On' QTH many have worked in the past. It is a boat journey & Bear Guards venue like NA-172.
At this point, there is a 50-50 possibility that any of these activations will take place until 2014, and a final decision will not be made until mid June to possibly the first week in July. I am not going to make any official date changes at this point. Mainland lodging reservations will remain in place for NA-172 unless it may be determined to QSY that activation plan again to Summer 2014. My personal NA-004 and NA-050 plans will remain fluid, and hope to at least make one or more quick attempts at least to NA-050 this year if solar condx coooperate (or in-between any CME's or X-Flares), because this one requires the least advance logistics beyond several airline leg seats and local lodging. I also have some other business to attend to in NA-050 when I finally get up there.
I have various other IOTA Projects on the back burner, one or more of which may occur without much advance notification, if any. As I am ready to push the send button on this Info Update, the solar K Index has spiked back up to K=5. No Bueno..... FYI & 73... Rick, K 6 V V A * The Locus"

KP4, PUERTO RICO (USI Op). Members of the Puerto Rico Amateur Radio League (PRARL) will be active as KP4ES from Cayo Algodones (US Island PR015) on/around July 27th. QSL KP4ES via NP3O. Visit their FaceBook and Web site for updates at: https://www.facebook.com/PRARLPR http://prarl.org

LX, LUXEMBOURG. A team operators (not provided) will be active as LX7I during the CQWW WPX CW Contest (May 25-26th) as a Multi-2 entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

P3, CYPRUS. Operators Alex/5B8AD, Jack/R2AA, Valery/R2DA, Dimitri/RA3CO, Alexey/RN3TT, Dmitry/RT5K, Tony/RT9T and Max/RV3BA will be active as P3N during the CQWW WPX CW Contest (May 25-26th) as a Multi-Op/Single-Transmitter entry. QSL via RW3RN.

P5, NORTH KOREA (P5 Project). Members of the Intrepid-DX Group (Paul/N6PSE and David/AH6HY) have received visas to visit the Democratic People's Republic of Korea sometime in June. Read the complete press release at: http://www.intrepid-dx.com/p5/news.php

PJ4, BONAIRE. Steve, 9M6DXX, plans to operate as PJ4V from Bonaire (SA-006) starting June 4th or 5th until June 16th. Activity will be "holiday-style" on SSB only using 100 watts to a Spiderbeam. QSL via M0URX, direct or by the Bureau, preferably using OQRS (see www.m0urx.com/oqrs). Logs will be uploaded to LoTW within a few days of the end of the operation at the latest.

3D2XX QSL INFO. Kip, W6SZN, reports: "I have the logs and blank cards for our 1988 3D2XX operation from Rotuma. Cards sent to Eddie, VK4AN, will eventually get to me."

NEW LoTW Software Available: Last week the ARRL Letter and Web page reports: "After much testing, the ARRL will release a new version of Trusted QSL, the open-source development project responsible for developing and maintaining the three Logbook of the World (LoTW) client-side applications: TQSL, TQSLCert and the TrustedQSL library. After six weeks of public beta testing, version 1.14 is ready for official release and will be available for download from the ARRL website beginning Monday, May 20th." For details on improvements, see: http://www.arrl.org/news/arrl-announces-new-version-of-LoTW-software However, on May 21st, the League reported that they found three defects in the software:
☐Incorrect behavior when the user specifies the wrong ITU zone
☐Incorrect behavior when TQSL is invoked via command line without

the ☐I switch present
☐Incorrect behavior when processing an ADIF file containing duplicate QSOs when TQSL is running on MacOS
These defects have been corrected, but they must test the corrected version before publicly releasing it. Expect the public release within the next 10 days (by the end of the month). For more details and the download for the fixed version, go to:
http://www.arrl.org/logbook-of-the-world

QSL CORRECTION. The QSL Manager for the EJ7NET DXpedtion to the Aran Islands (EU-006) has been changed to HB9ASZ (not EI6FR), direct and/or by the Bureau. LoTW will be uploaded once HB9ASZ receives the log.

VK9NT OQRS is available/active now at: http://vk9nt.odxg.org

Z81X OQRS is available/active now at: http://www.qrz.com/db/Z81X

SPECIAL REQUEST FROM DL1MGB: "Hello DXers all over the world! This time I am not announcing a new DXpedition (don't worry, the planning for the next one has already started). This time I want to call your attention to a campaign a colleague of mine (Tobias Höher) and me initiated.
We are going to participate in the Dodentocht <http://www.dodentocht.be/> which takes place on August 9th, 2013, around the city of Bornem in Belgium. The Dodentocht is a 100 km hike which has to be finished by foot in minimum 10 and maximum 24 hours.
100 km or 24 hours can get very long, and we will have definitely our lows. So we decided to find as many supporters as possible, who are willing to donate a pre-determined amount of money for every commenced kilometer. These donations will go 100% to the Kinderkrebshilfe Berchtesgadener Land und Traunstein e.V. (Childern's Cancer Aid), an incorporated society with a lot of voluntary helpers. They are giving advise, help and financial support not only to children having cancer but also to children and teenagers whose parents suffer from cancer or already died as a result of cancer.

What has it to do with DXing? -- At first glance nothing. I will not carry any radio with me giving out ON / Belgium to the deserving. At second glance maybe. Going on a DXpedition is not only taking a plane or boat, going to a remote place, sit there and work pile-ups. The work to around it (carrying equipment, building antennas and stations and even sitting in front of the radio with 45 °C inside the tent) can be physically demanding. So if you don't want to fail, you have to be fit. And my way to stay fit is: Walking.
What can you do? -- You may come to Belgium. We still need some cheer-leaders for the second 50 km :-) But mainly you should support our campaign with your donations. The most interesting way is to make your donation dependent on how far we will go at the Dodentocht.
Just go to http://www.100-km.org/ and learn more about our campaign and register to commit your willingsness to donate.
Thank you very much for your support! .... 73 Chris DL1MGB"

V5, NAMIBIA. Operator Hans/DF2UU and Hardy/DF3GY will be active as V55V from Omaruru, the QTH of Martin, V51W, during the SSB Field Day (September 7-8th) and the Worked All Europe DX SSB Contest (September 14-15th). QSL via DJ8VC, by the Bureau or direct. Activity outside of the contest will be on 160-6 meters using CW and SSB.

V7, MARSHALL ISLANDS. Mike, KJ6MZ (ex-V73/KJ6BBP), will be active as V73MZ from Kwajalein Island (OC-028) starting June for a few months. Look for updates and more details on his QRZ.com page soon. QSL via: Mike Szelazek, P.O. Box 22409, San Diego, CA 92192, USA.

VK0H, HEARD ISLAND (Update). If you missed the special OPDX Bulletin last week, it was announced that the DXpedition to Heard Island has been rescheduled for January, 2015. The primary reason for this decision was the cost of using the preferred vessel, the Marion Dufresne, to put the team on Heard Island for the required time. In spite of extensive negotiations and rescheduling of the cruise, it became clear that the cost of using this vessel will exceed $1 million, and, therefore, the total cost for the project would be about $1.5 million, as they noted earlier. In spite of their plan to increase the team size to 50 (which the M-D can accommodate) to partially cover this cost, they reluctantly concluded that sponsorship at this level would be impossible. They have therefore decided to delay the DXpedition to January 2015, to allow more time to restructure the project, locate a more suitable vessel, and bring the cost more in line with projected available resources.

VP9, BERMUDA. By the time you read this, Yuri, VE3DZ, will be active as VP9FOC until May 30th, to celebrate FOC's 75th anniversary. Activity will include the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band entry. QSL via VE3DZ.

VP9, BERMUDA (Early Announcement). Michael, G7VJR, the author of ClubLog, will be active as VP9/G7VJR from Bermuda (NA-005) between February 19-27th, 2014. QSL via M0OXO.

W2, UNITED STATES (Special Event). The South Jersey DX Association, Old Barney ARC and Tuckerton Wireless ARC will be operating W2WSC/WSC from the last active operating site of coastal marine station WSC (aka The Tuckerton Wireless) in West Creek, NJ, on Saturday, June 1st from 1300 to 2000 or later. Bands planned will be 80, 40, 20, 15, 10 CW and SSB. QSL VIA W2WSC.

XP, GREENLAND (Update/Cancelled). Henning, OU2I/OZ1BII, who was expected to be active as XP2I from Kanger-lussuaq this week and during the contest, had to cancel do to an illness. He'll try again later this year.

YS, EL SALVADOR. Hiro, JA6WFM, will be active as YS1/NP3J during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/Single-Band (possibly 10m)/Low-Power entry. QSL via EA5GL or LoTW. Hiro will be here until January 2014.

ZD8, ASCENSION ISLAND. Oliver, W6NV, will once again be active as ZD8W from Ascension Island (AF-003) between November 19-21st. Activity will include the CQWW DX CW Contest (November 24-25th) with two other operators to make it an international team. Look for activity outside of the contest on the HF bands and 6 meters. QSL via W6NV.

ZP, PARAGUAY. Manu, ZP9MCE, will be active from Hohenau-Itapúa during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL only via EA5ZD.

ZS, SOUTH AFRICA (60m News). The "60m News" reports that the Independent Communications Authority of South Africa (ICASA), South African's national telecommunications regulator, has approved two 5 MHz frequencies for the South African Radio League (SARL) to carry out propagation research. The frequencies allocated are 5250 and 5260 kHz. These are 'center frequencies', the 'USB Dial' frequencies being 1.5 kHz below this (i.e. 5248.5 and 5258.5 kHz). All modes are permitted (USB/CW preferred) with 3 kHz maximum bandwidth. Maximum Power is 100W (400W PEP) measured at the output of the radio. No antenna restrictions. The 5250 kHz channel is intended for propagation experiments (e.g. SARL News Bulletin transmissions) and 5260 kHz for general contacts (this channel being common to a number of countries). The licence is a pilot licence which has been purchased, so the channels are private and licensed to the SARL who allow their members to use the frequencies. Participating stations, who need to be SARL members, must register. For further information and a list of registrants, visit: http://www.amateurradio.org.za/propresearch.htm

---
The following stations are expected to be active in the
CQWW WPX CW Contest (May 25-26th, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2013 CQWW WPX CW Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/wpxc2013.html (By callsign)

SB PROP ARL ARLP021
ARLP021 Propagation de K7RA

Overall, solar activity is still pretty quiet, but one positive sign was on May 16, when the daily sunspot number was 212. I eyeballed the records, and had to keep searching further and further back to find a higher sunspot number.

One year, six months and one week earlier, on November 9, 2011 the sunspot number was nearly that high, at 208. We look clear back seven years, 10 months and 12 days to July 4, 2005, another near miss at 192. To find activity beating the May 16 number we have to go back nearly a decade, to November 1, 2003 when the daily sunspot number was 277. This was way back on the downward slide of cycle 23, nine years, six months and 15 days earlier than our recent high number. Let's hope for many more days like this. That seems likely, as the peak of this solar cycle is predicted for this fall, which begins about four months from now, on Sunday, September 22.

Compared to the previous period (May 9-15) average daily sunspot numbers this week were down over 12 points to 144. Average daily solar flux sank nearly 6 points to 134.2. Geomagnetic activity was higher, with average daily planetary A index up 3.7 points to 9.7, and average daily mid-latitude A index up 4.4 points to 10.3. It should be noted that five of the eight daily geomagnetic readings which make up the A index were not recorded for May 16 at the mid-latitude observatory, so the mid-latitude A index of 12 for that day is an estimate.

The latest prediction from NOAA/USAF has solar flux at 135 on May 24-25, 130 on May 26-27, 135 on May 28-29, and then 130, 115, 105 and 110 on May 30 through June 2, 120 on June 3-5, and 125 on June 6-8, before rising to a short-term peak of 140 on June 12-13. This prediction is a bit far off, but it also shows a minimum flux value of 100 on June 26-27.

Turning to geomagnetic activity, predicted planetary A index is 15, 20, 12 and 8 on May 24-27, 5 on May 28 through June 10, and then 8, 12 and 8 on June 11-13, 5 on June 14-17, and then 15, 12, 8 and 5 on June 18-21. On June 24, a month and about one solar rotation from now, they show planetary A index rising from 5 to 15, perhaps an echo of current geomagnetic activity.

OK1HH predicts active to disturbed geomagnetic conditions May 24, quiet to active May 25, mostly quiet May 26-27, quiet to active May 28, quiet to unsettled May 29, quiet May 30, quiet to unsettled May 31 through June 1, mostly quiet June 2, quiet to unsettled June 3, quiet June 4-8, mostly quiet June 9-10, quiet to active June 11, active to disturbed June 12-13, quiet to unsettled June 14, and mostly quiet June 15-16.

The CQ World Wide WPX Contest, CW weekend begins tonight/tomorrow at 0000 UTC May 25. The geomagnetic activity predicted for this weekend may add some additional challenge to the test, which has a new set of rules. The multiplier used is the number of unique call sign prefixes of stations worked. See details at http://www.cqwpx.com/rules.htm.

The current geomagnetic activity is due to a May 22 M5 class solar flare, which is expected to deliver a glancing blow to our geomagnetic field today, May 24.

Jon Jones, N0JK reports that during a six meter e-layer opening last Sunday evening observed from coast to coast in North America, a rare Australia to North America opening took place. From 2355 UTC on May 19 until 0032 UTC on May 20 on CW VK4MA worked W9FF, NW0W, K9ZM, WZ8D, W9WZJ and K0GU. It appears the longest distance was to WZ8D, about 9,041 miles. N0JK believes the propagation path was via e-layer linked to trans-equatorial propagation.

Last Friday, May 17 Jim Smith, K3RTU took his backpack rig into Ridley Creek State Park in Southeast Pennsylvania (FM29). He wrote: "After some hiking I set up my Buddistick vertical and new KX3 about 1730. I tried 15 meters first, but had no luck and only heard a few stations, so I readjusted the antenna for 17 meters and after a few minutes worked Duncan, EA5ON/M with SSB and got a 54 report. Not too bad for vertical to vertical, but the QRN on his end was troublesome. Duncan told me it was raining there with lots of atmospheric noise and later contacts with Western Europe confirmed the bad weather was pretty wide spread. Then over the next two hours worked Dave VP5/W5CW (my report 59), Mario DJ2OR (55), Carolyn W5/G6WRW near Santa Fe, NM (53), Al VE7WJ (53), Joe DF9ZP (59), KB5AVE (56), and last, Mike IF9ZWA (55) on Favignana Island off the coast of Sicily. What amazed me the most was that I had good propagation both east and west of my location which I don't always find to be the case."

And finally, I just ran across a previously overlooked email from Wayne Mills, N7NG of Jackson Hole, Wyoming sent on January 4, 2013,

reflecting on cycle 19. Wayne said, "I have seen all of the solar peaks since 1956. What I have to say, however, is that I had absolutely no expectation of what cycle 20 might be like. The reason was that when I was a sophomore in high school in 1958, I had NO IDEA what sunspots were.

I started working DX in 1956 with 90 watts and a low 40M dipole. I was on 20M CW ONLY. No worries about other bands, what might be open, what long paths might be open. Just listen and work what I heard.

It was just a few high school friends and me; we had very little contact with local DXers. Eventually, I ran into W6MX (Honor Roll 1955) and W6BAX, a serious DXer and learned a few things.

Soon, I put up a 2 element 20M beam, and then I had to worry about where to point it. Still, it took more than 2 years to work DXCC.

Things will never be the same."

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for May 16 through 22 were 212, 198, 146, 113, 113, 119, and 107, with a mean of 144. 10.7 cm flux was 144.7, 136.4, 132.1, 135.3, 132, 125.3, and 133.4, with a mean of 134.2. Estimated planetary A indices were 14, 9, 21, 12, 7, 7, and 12, with a mean of 9.7. Estimated mid-latitude A indices were 12, 9, 16, 11, 6, 8, and 10, with a mean of 10.3.

Can anyone give me any info as to the whereabouts of RW6HS or contact info. The email address I have for him and that on QRZ.COM
has not worked for months. He is supposed to be my QSL Manager for HK1AR and other calls but no word since last fall.
I need to find another manager if unable to contact.

Thanks and 73

Tony

Just received direct QSLs from him about a month ago for a couple of the calls he manages. Sent at the end of Jan 2013. So he is still QSLing. His web site is still up so I don't know why email would not work to that address.

Bob

Just to let you know, as Im writing this email, Lance is getting ready
to go out to dinner he tells me....
I think he doesn't care what time he gets home, as he is about to be out
on the town CELEBRATING

You see Lance and I just worked monk Apollo on 18 mhz CW... through the
EU pileup (all 5 of them)
via the long path as a few had suggested because of the so called hill
in the way to Australia.

I like Lance, will be celebrating as the cw qso is one of 5 that i still
required, so its 4 to go for me now on cw

FWIW, I value a qso a few years ago i had with Apollo on SSB, his Qsl
card takes a lot of pride in my shack
more so because it reads "tnx for the qso on 3.799 SSB"

Dreams do really come true.! ask anyone who has a P5 cw qsl.

73 Regards David VK3EW

Hey Guys,

I am still pinching myself here and still can't believe it!

So a big thank you to Monk Apollo for coming on air and hanging around so long yesterday. I even saw him spotted today but that darn radar was so strong here it wiped out 17 CW completely.

I did have a few quite ones last night and some big smiles.

13 more to go for me mixed....the DXCC hill is getting harder and slower...

Keep at 'em,

73, Lance - VK6DU

I have worked Monk Apollo on 2Bands & 4Modes from MA and 20M-RTTY off a LP dipole in Maine. Not too difficult for the NE USA. He is a very good op and prefers acting a LP DX so you have to wait for propagation to pick him up. If he is strong then forget it, EU buries everyone.

Not a brag....I have never heard S2 from your side of the world so it works both ways.

Forget thinking email, clusters, social media, etc. No Way!

I have communicated several times via snail mail with Monk Apollo and have received a lovely card and hand written note each time.

I suggest you put together a group and try the mail again. The other option is to wait until someone visits him (as with the antenna installation) and then communicate through them. As you know it would be almost impossible to arrange a SKED via snail mail since schedules and propagation months away are unknown.

Good luck
Bob

Well done Lance. Congratulations!

According to the spots on the east coast (4000 kms away) he's still there today close to 1600 UTC on 17m. However, I think 1600 is his supper time because he disappears for a few hours.

So I'm still trying!

From: iain macdonnell - N6ML
Topic: 21214 Message: 21236

It's got to be a guest op. He does operate some CW, but never for
hours at a time, on consecutive days, like this. Anyone know for sure?

Still no copy here on the left coast :(

73,

~iain / N6ML

21237. RE: [DX-IS] Re: SV2ASP/A

Yahoo group: DX-IS (2013)
Date: 2013-05-27 08:02:55 UTC
From: Lance Martin
Topic: 21214 Message: 21237

Hi Roberto,

The op. I worked was a very accomplished CW operator. I presumed it was Apollo.
Very smooth and signing very regularly.

Mt. Athos has had some guest operators over the years but normally it is advertised (though not always...).

Bernie W3UR always seems to know what is going on, perhaps he can shed some light on the matter?

73, Lance - VK6DU

21238. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-05-27 14:01:02 UTC
From: Paul Dunphy
Topic: 19749 Message: 21238

```
:Issued: 2013 May 27 1309 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30527
SIDC SOLAR BULLETIN 27 May 2013, 1305UT
SIDC FORECAST (valid from 1230UT, 27 May 2013 until 29 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 27 May 2013 10CM FLUX: 120 / AP: 012
PREDICTIONS FOR 28 May 2013 10CM FLUX: 124 / AP: 005
PREDICTIONS FOR 29 May 2013 10CM FLUX: 124 / AP: 011
COMMENT:Solar activity has been low with two minor C-class flares in the last 24
hours and is expected to remain so for the next 48 hours. There is still a
slight chance for a M-class flare. The proton flux is again at low levels
and is expected to remain so for the next 48 hours. The solar wind speed
measured by ACE currently is variable with values between 600 and 750 km/s.
The magnitude of the interplanetary magnetic field is stable at 5 nT.
Current geomagnetic conditions are quiet and expected to remain so for the
next 48 hours.
TODAY'S ESTIMATED ISN : 063, BASED ON 18 STATIONS.

PREDICTIONS FOR 30 May 2013 10CM FLUX: 104 / AP: 008
COMMENT:Active regions NOAA 1755 and 1756 have further decreased in size. Solar
activity was very low during the past 24 hours. There still is a chance for
C-class flare activity. The solar wind speed measured by ACE still reaches
high values, currently being at 700 km/s. The magnitude of the
interplanetary magnetic field is lower than 5 nT. Geomagnetic conditions
are quiet to unsettled and are expected to remain so for the next 48 hours.
>From the end of day 3 on, we expect the influence of a coronal hole
currently approaching the central meridian.
TODAY'S ESTIMATED ISN : 053, BASED ON 15 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30529
SIDC SOLAR BULLETIN 29 May 2013, 1105UT
SIDC FORECAST (valid from 1230UT, 29 May 2013 until 31 May 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 29 May 2013 10CM FLUX: 105 / AP: 001
PREDICTIONS FOR 30 May 2013 10CM FLUX: 105 / AP: 006
PREDICTIONS FOR 31 May 2013 10CM FLUX: 105 / AP: 032
COMMENT:Solar activity was low during the past 24 hours, with only two C1-class
flares. The last one was a two-ribbon flare and occurred at 7h30 UT near
active region Catania 83 (NOAA 1755), but currently no associated CME is
detected. C-class flaring conditions are expected for the next 48 hours.
The solar wind speed decreased during the past 24 hours from 800 to 550
km/s. The interplanetary magnetic field is stable with a magnitude of less
than 5 nT and a positive Bz-component. Geomagnetic conditions are quiet
(local K<3 at Dourbes) and are expected to remain so for the next 24 hours.
At the end of day 2 we expect the arrival of a fast solar wind stream
emanating from a coronal hole in the central of the solar disk, possibly
resulting in geomagnetically active to minor storm levels (K= 4 to 5).
TODAY'S ESTIMATED ISN : 050, BASED ON 06 STATIONS.

21242. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-05-30 14:01:03 UTC
From: Paul Dunphy
Topic: 19749 Message: 21242

```
:Issued: 2013 May 30 1239 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30530
SIDC SOLAR BULLETIN 30 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 30 May 2013 until 01 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 30 May 2013 10CM FLUX: 110 / AP: 002
PREDICTIONS FOR 31 May 2013 10CM FLUX: 110 / AP: 031
PREDICTIONS FOR 01 Jun 2013 10CM FLUX: 110 / AP: 026
COMMENT:Solar activity was low during the past 24 hours. There was only one
C2.8-class flare originating from a new active region NOAA AR 1760, which
just rotated behind the east limb. Catania regions 82 and 83 (resp NOAA AR
1756 and 1755) have a simple magnetic beta configuration and are further
decreasing in size. No Earth directed CMEs are detected. C-class flaring
conditions are expected for the next 48 hours, mainly originating from NOAA
AR 1760. The solar wind further slowed down to a speed of 400 km/s. The
interplanetary magnetic field is stable with a magnitude of less than 5 nT.
Geomagnetic conditions are quiet (local K<3 at Dourbes). This situation is
expected to remain so for the next few hours till the arrival of the fast
flow from the coronal hole in the centre of the solar disk. This might
result in geomagnetically active to minor storm levels (K= 4 to 5).
TODAY'S ESTIMATED ISN : 052, BASED ON 08 STATIONS.

QST de W1AW
DX Bulletin 22 ARLD022
>From ARRL Headquarters
Newington CT May 30, 2013
To all radio amateurs

SB DX ARL ARLD022
ARLD022 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

GHANA, 9G. Hans, PB2T will be QRV as 9G5AA from June 2 to 7. QSL to home call.

BHUTAN, A5. Shin, A52SV has been active on 17 meters around 1400 to 1500z. QSL via JA2PSV.

QATAR, A7. Mark, G0MGX plans to be QRV as A71/G0MGX until the end of 2013. Activity will be mainly during the weekends using RTTY and JT65 on the HF bands. QSL direct to home call.

CAPE VERDE, D4. Harald, DF2WO will be QRV as D44TWO from June 3 to 20. Activity will be holiday style on the HF bands using CW and SSB. QSL via M0OXO.

FEDERAL REPUBLIC OF GERMANY, DA. Oliver, DK7TX will be QRV as DK7TX/p from Wangerooge Island, IOTA EU-047, from June 5 to 10. Activity will be holiday style on 20 to 10 meters. QSL to home call.

SPAIN, EA. Special event station EG5SUB will be QRV on June 1 and 2 for the Museum Ships Weekend. Activity will be on the HF bands using CW, SSB and various digital modes. QSL via operators' instructions.

SAINT BARTHELEMY, FJ. Jeff, K5WE and Erik, N5WR will be QRV as FJ/home calls from June 3 to 10. Activity will be on 80 to 6 meters using mostly CW with some SSB and RTTY as well. QSL to home calls.

FRENCH GUINEA, FY. Christian, F5UII will be QRV from the FY5KE radio club in Kourou from June 5 to 14 while on business there.

Activity will be limited to generally 1000 to 1100z and then after 2100z. He may also be QRV as FY/F5UII/p from Isle Royale, IOTA SA-020. Activity will be on the HF bands. QSL via operator's instructions.

ITALY, I. Special event station II4BTK will be QRV on June 1 and 2 for the Museum Ships Weekend. This station will be near what is left of the Elettra, a two-masted steam yacht that Marconi used as a floating laboratory. QSL via IQ4FE.

ALASKA, KL7. Jeff, KL2HD will be QRV as KL7NWR on Attu Island, IOTA NA-064, in the Aleutian Islands. Activity will be on 20, 17 and 15 meters as propagation permits. QSL via operator's instructions.

LITHUANIA, LY. Sam, LY5W is QRV as LY605W until June 20 in celebration of 605 years of Kaunas. QSL to home call.

MARKET REEF, OJ0. Harry, OJ0VM will be QRV June 2 to 6. He is a member of the Finnish Lighthouse Society and repairs Lighthouses together with his fellow members. QSL to home call.

BONAIRE, PJ4. Steve, 9M6DXX plans to be QRV as PJ4V beginning either June 4 or 5 until June 16. Activity will be holiday style on the HF bands using SSB. QSL via M0URX.

ASIATIC RUSSIA, UA0. Special event station R155C is QRV until June 30 to honor 155 years of the city of Chabarowsk. QSL via RZ0CWA.

MARSHALL ISLANDS, V7. Mike, KJ6MZ will be QRV as V73MZ from Kwajalein Island, IOTA OC-028, beginning in June and active for a few months. QSL via operator's instructions.

BRITISH VIRGIN ISLANDS, VP2V. Kevin, K6TOP is QRV as VP2V/K6TOP until June 6. QSL to home call.

INDONESIA, YB. Adhi, YB3MM will try to be QRV as YB3MM/p from Karangjamuang Island, IOTA OC-237, on June 1 and 2. Activity will be on 15 meters using SSB. QSL via IZ8CCW.

LATVIA, YL. Eddie, ES2TT will be QRV as YL0WANTED from June 5 to 9 during the American Cars Fan Meeting. Activity will be on 40 to 6 meters using CW and SSB. QSL to home call.

THIS WEEKEND ON THE RADIO. IARU Region 1 CW Field Day, RSGB National CW Field Day, 10-10 International Open Season PSK Contest, NCCC RTTY Sprint, NCCC Sprint CW Ladder, DigiFest, Wake-Up. QRP CW Sprint, Maritimes QSO Party, Museum Ships Weekend, SEANET Contest, UKSMG Summer Contest and the Alabama QSO Party are all on tap for this weekend. The RSGB 80-Meter Club Data Championship is scheduled for June 3. The ARS Spartan CW Sprint is scheduled for June 4. Please see May QST, page 80, June QST, page 79 and the ARRL and WA7BNM Contest websites for details.

When Admiral Rickover had a nuclear power prototype in Idaho Falls, lots of us were there and on the air.

I'm not sure many DXers live there. I worked DXCC from there in the 1960s.

Try N7UVH or N7ESU. At least one of them has been known to hang out on
the K3UK LotW sked page.

73,

~iain / N6ML

21248. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-05-31 14:01:02 UTC
From: Paul Dunphy
Topic: 19749 Message: 21248

```
:Issued: 2013 May 31 1250 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30531
SIDC SOLAR BULLETIN 31 May 2013, 1205UT
SIDC FORECAST (valid from 1230UT, 31 May 2013 until 02 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 31 May 2013 10CM FLUX: 102 / AP: 012
PREDICTIONS FOR 01 Jun 2013 10CM FLUX: 104 / AP: 029
PREDICTIONS FOR 02 Jun 2013 10CM FLUX: 104 / AP: 010
COMMENT:Two C-class flares were observed during the past few hours. A C1.4 flare
at 7h57 UT originating from Catania sunspot group 82 (NOAA AR 1756) was a
long duration event. This is associated with a rather small limb CME
propagating to the South West and based on currently available information
it is expected not to be Earth directed. A C1.1 flare at 11h27 UT was
originating from Catania sunspot group 88 (NOAA AR 1761). C-class flaring
activity is expected for the next 48 hours. The current solar wind speed
is at 350 km/s. The interplanetary magnetic field has a magnitude of 5 nT
with a mainly negative Bz-component. Geomagnetic conditions are still quiet
(local K<3 at Dourbes). The geomagnetic index is expected to increase later
today and tomorrow and reach active to minor storm levels (K=4 to 5), due
to the effects of a fast speed stream.
TODAY'S ESTIMATED ISN : 041, BASED ON 20 STATIONS.

01 June 2013 A.R.I. DX Bulletin
No 1152
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

C6 - Drew N2RFA (C6ABB), Gene K2KJI (C6ALC), Ivars KC4PX (C6APX) and
Jay K2TTT (C6ATT) will be active from New Providence (NA-001)
Bahamas on 8-15 June. Their main goal is to participate in the
ARRL VHF QSO Party (8-10 June); outside the contest they will be
QRV on 40-10 metres. QSL via home calls. [TNX The Daily DX]
D4 - Harald, DF2WO will be active holiday style as D44TWO from Sao
Tiago (AF-005), Cape Verde between 3 and 20 June. QSL via M0OXO,
direct or bureau (OQRS at www.m0oxo.com).
DL - Oliver, DK7TX will be active as DK7TX/p from Wangerooge Island
(EU-047) on 5-10 June. He will operate holiday style on 20-10
metres. QSL via home call. [TNX DK7TX]
DL - A team from DARC OV Bad Salzungen will be active as DK0WK from
Mount Geba in the Rhoen Biosphere Reserve (DLFF-027) on 7-9 June
for the Green Party. They plan to run three HF stations on SSB, CW
and PSK, and one VHF/UHF station. [TNX DL3ARK]
ET - Ken, K4ZW will be in Ethiopia on 8-10 June and plans to operate
mainly CW as ET3AA "whenever he can get access to the club
station". QSL for this operation via N2OO. [TNX The Daily DX]
F - Commemorating the 69th anniversary of D-Day, special station
TM6JUN will be active once again from Utah Beach on 1-15 June.
Look for activity on CW, SSB and digital modes. QSL via bureau to
F6KFW. [TNX F8REF]
F - Special callsign TM8YT will be activated on 1-15 June as a tribute
to Andre Fleury (F8YT), who became a SK on 4 February. Andre was
well known in the amateur radio circle because his personal
station was used for the filming of "If All the Guys in the World"
(original title "Si tous les gars du monde") in 1956. QSL via
F5KLJ. [TNX F8REF]
F - Special event station TM5AR will be active on 5-19 June during the
"Armada de Rouen", a large gathering of tall ships and historic
sailing vessels that is held every five years on the banks of the
Seine. QSL for this year's edition via F5IL. [TNX Les Nouvelles DX]
FS - John, K9EL will be active as FS/K9EL from Saint Martin (NA-105) on
11-28 June. He will be QRV on 80-6 metres. QSL via home call,
direct or bureau (OQRS on Club Log),and LoTW. [TNX The Daily DX]
FY - Christian, F5UII (www.f5uii.net) will be active as FY/F5UII from

French Guiana on 5-14 June. He will operate SSB on the HF bands in his spare time. A side trip to Ile Royale (SA-020) is planned during the weekend of 8-9 June. QSL via home call, direct or bureau. [TNX F5UII]
G - 2E0VAI, 2E0ZED, M0DSS, M0VKX, M6ECK and M6HOS will be active on the HF bands as GB1VR from the Holy Island of Lindisfarne (EU-120) on 7-9 June. QSL via eQSL only. [TNX rsgbiota.org]
HL - A team from the Korea Contest Club (DS1EVQ, DS2GOO, DS3GLW, DS4CDA, DS4NYE, HL1CR, HL1OYF, HL1VAU and HL3AMO) will be active as D85C from Ch'ongsan Island (AS-085) on 6-9 June. QSL via DS4NYE, direct only. Logsearch at www.d9k.org/xe/d85c. The operators may also use homecall/4 (QSL via home call). [TNX DS4NYE]
HR - "The Honduran Navy have changed plans slightly", and Dan, HQ3W will continue being active from Cayos Cochinos (NA-160) [425DXN 1149] for a couple of extra days. Bookmark http://hriotas.com/ for further updates.
J6 - Bill, K9HZ will be active again as J68HZ from St. Lucia (NA-108) on 8-22 June. He will operate CW, SSB and RTTY on 160-6 metres. QSL via K9HZ, LoTW and eQSL. [TNX K9HZ]
JD1_mt - Take, JG8NQJ will be active again as JG8NQJ/JD1 from Minami Torishima (OC-073) around mid-June. He will operate CW and some SSB mainly on 10, 12, 15 and 17 metres during his spare time. He typically stays for about 6-8 weeks on the island. QSL via JA8CJY. [TNX DX World]
LA - Ben DO1BEN, Andy DL5AND, Vincent DL6II and Georg DL3YAT will be active as LA5O on all bands from Austvagoy, Lofoten Islands (EU-076) on 8-14 June. QSL via DO1BEN, bureau preferred.
UA - Grigory, RA9ODD will embark on the M/V 'Spirit of Enderby' on a 17-day cruise in the Sea of Okhotsk. Depending on local and weather conditions, plans are to visit the following islands:
8 June Iony Island AS-069
9 June Shantarskiye Islands AS-044
10 June Malminskiye Islands AS-172
12 June Talan Island AS-059
14-15 June Yamskiye Islands AS-170
19 June Atlasova Island AS-025
The ship locator is on www.heritage-expeditions.com. Grigory will be QRV as RA9ODD/0 and/or RZ9OWE/0, possibly around 14260 and 21260 kHz. His operating time will be limited to a few hours only. [TNX UA9OBA]
UR - Nikolay, UX0FF and Alexandr, UR5FAV will be active as EM5F from Ochakovskiy Island (EU-182) from 31 May to 2 June. They will operate on various bands, 6 metres included (WWL KN45tj). QSL via UR5FAV (he welcomes email requests for bureau cards: orionua[@]orion.od.ua) and LoTW.
VE - Klaus, VE7KDU and Frank, VE7DP will try to operate from Barnard Island (NA-181) on 7-9 June ("reaching our destination will depend on local weather and sea conditions", Frank says). They will be QRV on 30-15 metres CW and SSB. A brief activity (less than 24 hours) from one of the qualifying islands in the NA-061 group,

immediately before or after NA-181, is also a possibility. [TNX VE7DP]
YB - Adhi, YB3MM will try to be active as YB3MM/p from Karangjamuang Island (OC-237) on 1-2 June. He will operate SSB only on 15 metres, low power. QSL via IZ8CCW or direct to YB3MM (instructions on qrz.com).

NEW IRC ---> The Universal Postal Union has introduced the newest model of the International Reply Coupon. The "Doha model" IRC will be available for purchase on 1 July. It is valid for exchange until the end of 2017. The current "Nairobi model" remains valid until 31 December 2013.

QSL 5R8Z ---> Buzz, NI5DX is now the QSL manager for Tim, 5R8Z. Eventually he will be able to confirm all past and future contacts with 5R8Z, but please be patient, as the log transfer and card printing process will take several months. [TNX The Daily DX]

QSL XW3DT ---> Alex says that cards can be sent to Alex Sinchukov, P.O. Box 30, Moscow, 121614, Russia. This address "is valid approximately till October this year", he adds.

+ SILENT KEY + Gwen Tilson, VK3DYL passed away on 27 May. Born in 1930 and licensed since 1980, she enjoyed working DX from both ends of the pileups. Along with multi-national groups of YLs she operated from several interesting places, notably as JW0YL (Svalbard 1998), AX9YL (Norfolk 2000), VK9YL (Lord Howe 2002), ZK1XYL (Aitutaki and Rarotonga, South Cooks 2002), VK9XYL (Christmas Island 2003), VK9CYL (Cocos/Keeling 2003), A35YL (Tonga 2005) and YJ0YL (Vanuatu 2005).

QST de W1AW
Propagation Forecast Bulletin 22 ARLP022
>From Tad Cook, K7RA
Seattle, WA May 31, 2013
To all radio amateurs

SB PROP ARL ARLP022
ARLP022 Propagation de K7RA

Average daily sunspot numbers sank nearly 50 points to 94.3 this week, and the average daily solar flux was down over 16 points to 117.8. Geomagnetic indices were quite high, due to a solar wind stream.

The predicted solar flux for the near term is 105 on May 31 through June 1, 110 on June 2-5, then 105, 115, 125 and 130 on June 6-9, 135 on June 10-11, 140 on June 12-13, then 135, 125, 135 and 130 on June 14-17, and 125 on June 18-20.

Predicted planetary A index is 18 on May 31, 15 and 10 on June 1-2, 8 on June 3-4, 5 on June 5-10, then 8, 12, and 8 on June 11-13, and 5 on June 14-17.

OK1HH predicts the geomagnetic field will be quiet to active on May 31, active to disturbed June 1, quiet to active June 2, mostly quiet June 3, quiet to unsettled June 4, quiet June 5-7, mostly quiet June 8-9, quiet June 10, quiet to unsettled June 11, quiet to active June 12-14, mostly quiet June 15-17, quiet June 18, quiet to unsettled June 19-20, active to disturbed June 21, and quiet to active June 22.

The Australian Space Forecast Centre issued an alert at 0524 UTC on May 30 warning of increased geomagnetic activity due to a solar wind stream from a coronal hole. For May 31 they predict mostly unsettled to active conditions with the chance of minor storm periods in the latter half of the UTC day at high latitudes. For June 1 they expect mostly unsettled conditions with a chance of active periods.

Rich Zwirko, K1HTV of Amissville, Virginia wrote on May 29: "Worked my first European of the 2013 6M Es season at 2200Z yesterday, May 28th. Worked F8GGD and heard two other French stations on CW here at my FM18ap Virginia QTH. They were in and out of the noise here for about 45 minutes before the band opened to the southeast. Worked

three stations in Venezuela as well as stations in J6, PJ4 and HI (Dominican Republic, not Hawaii!).

"Did you know that in the past 9 years on 77% of the May 29 dates there was E-Skip between the Eastern USA and Europe, and 66% of the days on May 30th?

"Check out this and other very interesting Es data from Kevin, VE3EN:

"http://www.solarham.net/6m/data.htm

"Lots of 6M ops in the Eastern U.S. will have their beams on Europe today. The Es season has begun."

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for May 23 through 29 were 117, 99, 107, 92, 87, 75, and 83, with a mean of 94.3. 10.7 cm flux was 134.5, 127.3, 121.3, 120, 110.1, 104.8, and 106.9, with a mean of 117.8. Estimated planetary A indices were 7, 20, 32, 18, 13, 8, and 2, with a mean of 14.3. Estimated mid-latitude A indices were 8, 17, 25, 19, 8, 8, and 2, with a mean of 12.4.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30601
SIDC SOLAR BULLETIN 01 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 01 Jun 2013 until 03 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 01 Jun 2013 10CM FLUX: 102 / AP: 053
PREDICTIONS FOR 02 Jun 2013 10CM FLUX: 102 / AP: 015
PREDICTIONS FOR 03 Jun 2013 10CM FLUX: 102 / AP: 003
COMMENT:During the past 24 hours an M1.0 flare erupted from Catania sunspot group
90 (NOAA AR 1760) at 20:00 UT on May 31. This was associated with type II
(speed of 1393 km/s) and type IV radio bursts. No associated strong CMEs
were observed at that time. CACTus detected a partial halo CME on May 31
associated with a broad filament eruption on the north (oriented from NE to
SW). It involves two successive CMEs: one with signatures in LASCO at 11:48
UT and one starting at 17:24 UT. Both CMEs mainly have a North-ward
oriented component and are not oriented to the Earth. C-class flaring
activity is expected and there exits a slight chance for an M-class flare.
Biggest candidates are Catania sunspot groups 88 and 90. A shock was
observed in the solar wind speed on May 31 around 15:30 UT. The speed went
up from around 350 km/s to around 650 km/s and also corresponds to a jump
in the solar wind temperature and density. On June 1, the interplanetary
magnetic field reached a magnitude around 20 nT with Bz component varying
between -20 and +15 nT. This is related to the arrival of a corotating-
interaction region (CIR) related to the coronal hole (CH). The K index has
reached storm levels (K up to 6 measured at Dourbes). We expect the minor
storm conditions to continu for today activity will decrease to unsettled
to active conditions tomorrow.

21253. Splicing wire in a dipole question

Yahoo group: DX-IS (2013)
Date: 2013-06-01 21:58:23 UTC
From: John Geiger (AF5CC)
Topic: 21253 Message: 21253

My dipole had an unfortuate encounter with a neighbor's tree branch on Wednesday evening during a storm, and is now going to require some repair or replacing. One option is to fix it by splicing a few pieces of copper wire together. This is the cheap option. However, could this cause problems later on? I am wondering if the junctions of the wire could corrode and start acting like a diode, throwing out RFI all over the place?

Could this happen, or is splicing copper wire in a dipole usually ok?

73 John AF5CC

John,

I've been doing this for 27 years. Works A-OK. I almost always
use bare wire, not insulated, for dipoles, but both will work.

I used to solder them together at the splice point, but in the past
8-10 years I just twist them together with a pair of pliers. I make a
strong mechanical connection with quite a few twists, but no solder.
Why? Because in years past I found subsequent breaks occurred at or
near the solder joint. My theory is that the heat from soldering made
the copper wire brittle. Since I stopped soldering, I have had zero
breaks anywhere close to the splice.

None of my dipoles, soldered or not, have ever exhibited any diode
like effects.

Hi Paul,

Thanks for the feedback. Glad to hear it will work ok. I took some sandpaper to it to get the oxidation off of it, and overlapped a few inches on each wire to splice them together.

This call was going to be used during the recent FOC 75th anniversary event, but I never heard it or saw any spots for it. It's been aired before (I worked it last century) and it would have been fun to use it again. Anyone know why it wasn't used?

I have spliced MANY times.
Twist the copper in opposite directions and then solder it well. Finally wrap it well with electrical tape.
Mine has stayed up for years.

I can't give you an exact amount of air time, but it was on at
least 3 times during the month of May. I worked it on:

2013-05-02 -- 17M
2013-05-14 -- 15M
2013-05-17 -- 20M

The only other time I worked that call was in 2010 for another
special event.

If it is a bare wire outside, say a 40M dipole for example, why tape the solder joint? To keep water off of the dissimilar metals to reduce the likelihood of corrosion?

I've become convinced the only place to solder them is at the centre conductor. I believe the heat does make at least some copper alloys brittle. I have never had a non-soldered splice break. Even a 160M inverted vee, and that's a lot of weight with ~132 feet of #14 gauge stranded wire on either side. It worked over 200 countries. Has one non-soldered splice on one leg. The end support ropes on either end have become rotten over the years and needed to be replaced, but the wire is still radiating . . . I think. It's so noisy on the low bands this time of year I don't rarely listen below 40M. Here it is 20-30 over static crashes from about April until mid November.

Thanks - all the reports seem to be in about the first half of
May, and the call certainly wasn't around on HF near the end
when I listened around for all the FOC stations. It could
have been used on VHF too, I suppose, and only spotted from
Europe (I exclude EU cluster spots).

I'm glad it was used - it's a cute call, along with ones
like EE5E that you just have to work if you hear them.

SE5E is cute too. It's the contest call of SM5AJV.

I think the reason for your not hearing M0RSE is simply distance and some days in May when condx were less than stellar. Look at where Halifax is . . . I have a completely over-water path to the UK, and it isn't that far in terms of DX from here to there. Texas is at least one hop farther, possibly two, and a lot of it is over land.

I don't know the EU vs NA breakdown of the stations worked, but it was all CW and I doubt if it was used on VHF. Maybe a bit on 6M. G3SWH is the QSL manager and he'd have all the details of when and where it was used.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th-May, through Sunday, 2nd-June there were 233 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, XZ, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Just a reminder that by the time you read this Harry, AA2WN, will be active as 3D2WN from Fiji until June 7th. The main purpose of the trip is scuba diving, but he will be active when he is not diving.

Activity will be mostly on 20 and 17 meters using CW, SSB and possibly some digital modes. He will use an IC706MKII with 100 watts into a dipole. QSL via AA2WN and LoTW.

60 METERS. Bernard, F9IE, is now active as F9IE/CT7 from Algarve (WW Loc. IM67ge), Portugal. He has worked a few UK stations and is running 100 watts to a dipole inverted Vee, apex 6 / 7m . He'll be there for about 2 weeks. Suggested frequencies are: CW - 5405 and 5373 kHz
SSB - 5403.5 and 5371.5 kHz

6V7, SENEGAL. Luc, F5RAV, will once again be active as 6V7T from Le Calao Resort, La Somome, between October 9-17th. He will be operating from Jean-Francois, 6W7RV, QTH. Activity will be on SSB and PSK31, and on 40-10 meters (including 17 and 12m with a dipole only). A side trip to N'gor Island (AF-045) is planned for three days during this period. QSL via only direct to his home callsign. See details on QRZ.com. Also, visit his BLOG page at: http://f5rav.free.fr

9G, GHANA. Hans, PB2T, will be active as 9G5AA from Ghana between June 2-7th. Bands and modes of activity were not provided. PLEASE NOTE: The callsign 9G5AA was reissued to PB2T in 2013 - previous operations were all by members of the Voodoo Contest Group. QSL only via PB2T.

9X, RWANDA. Kiyo, JR1IZM/9X0AM, is once again back in Kigali because of his work. However, his QSL Manager JO1CRA states there may not be any operations due to his work load.

C8, MOZAMBIQUE (Update). An international team of operators will be active as C82DX from Xai Xai (WW Loc KG64) between October 15-22nd. Operators mentioned are Doug/N1DG, Tom/N4XP, Jose/CT1EEB, Franz/DJ9ZB, Max/I8NHJ, Mike/N6MZ, Ray/N9JA, Dave/WB4JTT, Charles/W6OAT, Chris/ZS6EZ (C92Z), Tjerk/ZS6P (C91TJL) and Christian/ZS6RI. Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1826.5, 3523, 5405, 7023, 10103, 14023, 18079, 21023, 24894 and 28023 kHz
SSB - 3790, 5403.5, 7082, 14185, 18140, 21285, 24955 and 28485 kHz
RTTY - 3580, 7035, 10142, 18099, 21080, 24912 and 28080 kHz
6M - 50107/CW and 50107/SSB

No QSL route has been mentioned yet. According to their Web page (which is now functional) on May 29th: "In October a group of experienced DX operators will endeavor to put as many of you into our log on 160 and 80 meters as possible. We will operate on the HF bands during daylight hours, but our purpose is to meet the large demand on the aforementioned bands. Please visit this website as the operation gets closer for further details." The C82DX Web page is now available at: http://c82dx.com

CY0, SABLE ISLAND. Murray, WA4DAN, informs OPDX: ""The CY0P DXpedition team is pleased to announce that Rick, AI5P, has joined the team. Rick has operated from more than 70 DXCC countries and adds a second CW operator to the team. The CY0P DXpedition is scheduled for October 1-11th. Pre-parations are right on schedule. The team has received three new mono-band yagi antennas for the effort. Gary, VE1RGB, ordered all new coaxial cables

and will be testing those this summer".

DXCC NEWS (1984 DXpedition Approved). The ARRL has finally granted DXCC credit for contacts made with the TI9CCC expedition to Cocos Island in 1984./(Source: CQ Magazine Email Received May 31 2013)

FY, GUYANA (Possible IOTA Op). Christian, F5UII, wil be active as FY/F5UII from the radio club station FY5KE in Kourou City between June 5-14th. Activity will be on the HF bands on SSB. He suggests to look for him during the weekday mornings about 1000-1100z and after 2100z. Possibly during the weekend of June 8-9th, Christian will try be active from Royale Islands (SA-020)with a multiband wire antenna which will allow him to be active on 80-10 meters SSB. This activity is not yet certain. For more details and updates, visit: http://www.f5uii.net/en
Christian also has a Twitter account: https://twitter.com/f5uii

H44, SOLOMON ISLANDS (IOTA Op/Update to OPDX.1103/1104/1105). Just a reminder that by the time you read this, operators Ralph/5W0W/H44RK and Maggie/H44MK (the only local YL Ham from Sikiana) will switch their callsigns to H44IOTA for their upcoming IOTA tour which has started on June 1st. Operators Stan/SQ8X, Dom/SQ9KWW and Tom/WL7HP will join them. Current activity is on Liapari (OC-149). The tentative dates for each island is as follows, but may vary due to the nature of the tour. Here is their announced schedule:
June 1-4th - Liapari Island (OC-149) "now on!!"
June 6-8th - Russell Islands (OC-168)
June 10-13th - Florida Islands (OC-158)
June 17-24th - Stewart Island (OC-285) **
July 1-7th - Nendo Island (OC-100)
July 9-12th - Vanikolo/Utupua (OC-163)
July 14-16th - Reef Islands (OC-065)

** Of special interest to IOTA chasers is Stewart Island (OC-285) having NEVER been activated.

Activity will be on 80-10 meters using CW and SSB. See OPDX.1104 for frequencies. All QSL requests are via QSL Manager Rex Turvin, NR6M. For updates it is suggested to watch: http://www.qrz.com/db/H40RK
The group now has a Web, Twitter and FaceBook page at:
http://www.h44iota.com
https://twitter.com/h44iota
https://www.facebook.com/pages/H44-IOTA-DXpedition/136003426577924

HK0/S, SAN ANDRES ISLAND. Members of the "DX Friends" will activate San Andres Island (NA-033) sometime at the end of October. Operators mentioned are Alberto/EA1SA, Toni/EA5RM (Team Leader), Roberto/EA2RY, Manolo/EA7AJR, Jose/EA7KW, Fabrizio/IN3ZNR, Alain/F6ENO, Tony/F8ATS, Bernard/F9IE and Valery/RG8K. Activity will be on 160-6 meters using CW, SSB and RTTY, with at least 4 stations on at the same time on different bands and modes. Suggested frequencies are:
CW - 1824, 3524, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 1845, 3780, 7065/7160, 14195, 18145, 21295, 24945 and 28494 kHz

RTTY - 7035, 10140, 14080, 18100, 21080, 24921 and 28080 kHz
6m - 50105/CW and 50115/SSB

As of press time, no callsign has been announced. QSL via EA5RM direct (see Web page). You can use the OQRS (see Web page) for direct and Bureau cards. More details should be forthcoming. Visit their Web page at: http://www.dxfriends.com/SanAndres2013

IOTA NEWS.....
AS-008. Take, JI3DST, will be active as JI3DST/1 from Shikine Shima (WLOTA 2267, JCG-3210) between July 26-29th. Activity will include an entry in the RSGB IOTA Contest (July 27-28th. Take might also use the callsign JI3DST/JI1 during his stay on the island. QSL via his home callsign by the Bureau (preferred). For more details and updates, visit his Blog page at: http://blog.goo.ne.jp/ji3dst

AS-085. (Update) Members from the Korea Contest Club will be active as D85C from Chongsan Island (WLOTA 1602, HLFF-015) between June 6-9th. Operators mentioned are Jeon/DS1EVQ, Han/DS2GOO, Park/DS3GLW, Rew/DS4NYE, Yang/DS4CDA, Kang/HL1CR, Rocky/HL1VAU and a few others. Look for some operators to possibly sign homecall/4 for private objects (QSL via their home callsign). QSL D85C via DS4NYE, by the Bureau or direct. No eQSL. They will update log daily to ClubLog. For more information and possible updates, visit: http://www.d9k.org/xe/d85c

AS-146. Ma, BA4MY, will be active as B4/BA4MY from Jiming Dao Island (WLOTA 2489) in the Chengshan Jiao area, Weihai Prefecture, Shandong Province, China, between July 21-29th. Activity will be on all HF bands and modes, but will also include an entry in the RSGB IOTA Contest (July 27-28th) using the callsign BY4IB. QSL both callsigns via BA4EG, direct or by the Bureau. Also, QSL via LoTW or eQSL.

EU-043. Operators Pierre/SB6A, Rolf/SM6IQD, Sten/SM6MIS, Rick/SM6U, Tomas/SM6XMY and Janne/SM6YOF will be active as 7S6W from Vinga Island (WLOTA 1517, SMFF-3495, SWA-163) between June 6-9th. They plan to have 3 stations on the air, and they will focus on the higher bands. PLEASE NOTE: All QSL backlogs from last year's operation has been taken care of this spring. QSL via SM6MIS, by the Bureau is preferred. Log will be uploaded to LoTW and eQSL. For information and updates, visit: http://sm6.se/7s6w

EU-051. Operators Stefano/IK6JRI, Fred/IK7JWX, Vincenzo/IZ8LFI, Leopoldo/I8LWL and Davide/IT9DFI will be active as IE9/IK6JRI from Ustica Island (WW. Loc. JM68OQ) between July 24-29th. Activity will include the RSGB IOTA Contest (July 27-28th), but before and after the contest look for operations on 30/17/12 meters digital modes and 6 meter SSB. QSL via IK6JRI, direct or by the Bureau.

EU-066. Victor, UA1OEY, will be active as UA1OEY/p from the Solovetsky Islands between June 3-13th. Activity will be on the HF bands using CW, SSB, PSK and RTTY. QSL via his home callsign.

EU-076. German operators Georg/DL3YAT, Andy/DL5AND, Vincent/DL6II and Ben/DO1BEN will use the Norwegian Ringsjoen Contest Club (RCC) callsign LA5O from Austvågøy Island (part of Lofoten Island Group and located in front of north Norwegian coast) between June 8-14th. Activity will be on all HF bands and possibly 60 meters. QSL via DO1BEN, by the Bureau (preferred) or direct. QSL also via LoTW, HRDLog, Clublog and eQSL. For more details see: http://www.do1ben.de/index.php?page=LA5O

EU-128. Jan-Henrik, DG8HJ, will be active as homecall/p from Fehmarn Island (DID O-001, WLOTA 0637) between July 6-21st. Activity will be on the HF bands, propagation allowing. QSL via his home callsign, direct or by the Bureau

EU-171. Tom, DL4VM, will be active as OZ/DL4VM from Vendsyssel-Thy/ Nordjylland Island (DIA NJ-001) between now and June 15th. Activity will be holiday style on the HF bands. QSL via his home callsign, by the Bureau or direct.

NA-144. Bodo, DF8DX, will be active as KT3Q/6 from Anacapa Island (USI CA-002S, WLOTA 1300, WWFF KFF-014, Ventura County, CA) between July 19-21st. Activity will be on the HF bands, CW only, using 100 watts into a vertical antenna. QSL via DF8DX, by the Bureau or direct.

NA-181. Operators Klaus/VE7KDU and Frank/VE7DP will try to activate the Estevan Islands as homecall/7 between June 7-9th. The operation will take place from a sheltered cove on Barnard Island; it is located about 80 miles west/south-west of the nearest accessible town. Reaching their destination will depend on local weather and sea conditions. They will be active on 30-15 meters using CW and SSB. A brief activity (less than 24 hours) from one of the qualifying islands in the NA-061 group, immediately before or after NA-181 is also a possibility.

OC-109. Operators John/YB5NOF and Anton/YB5QZ plan to activate Natuna Selatan between October 18-21st (tentative dates). Callsign is to be announced later. More details are forthcoming.

OC-122. Operators John/YB5NOF and Anton/YB5QZ plan to activate Tambelan Island between November 15-18th (tentative dates). Callsign is to be announced later. More details are forthcoming.

SA-047. Members of the CMDXGroup will be active as PR5C Mel Island between October 26-30th. Operators mentioned are Alex/PP5ALE, Martins/PU5UAI, Evan/PU5SVE, Anadre/PY5EW, Fabio/PY5FAB, Jose/PY5JAP, Arthur/PY5VC, Joe/PY5XH and Junior PY5ZW. Activity will be on 160/80/40/20/15/10/6 meters using CW and SSB. They

will have four radios (1x FT2000 and 3x FT897D) with three
700w amps. QSL direct to PU5SVE. All QSOs will be confirmed
via LoTW and eQSL. For more details and updates, visit:
http://www.pr5c.qsl.br

ISWL CALLSIGNS (For June). The following ISWL club callsigns will be
used throughout the month of June 2013:

GX4BJC/A - Operated from Great Missenden, in Buckinghamshire, by John,
G8XTJ (ISWL Vice President). (WAB Square SP80 - England,
IOTA EU-005 and WLOTA LH-1841)

MX1SWL/A - Operated /A from Hartford, in Cambridgeshire, by Tom, G3RPV.
(/A WAB Square TL27 - England, IOTA EU-005 and WLOTA LH-1841)

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual
operator. The I.S.W.L. is a member of the European PSK Club. All QSL
info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>.
NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see
<www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for
their awards.

J6, ST. LUCIA. Bill, K9HZ, will once again be active as J68HZ from his
villa at Labrelotte Bay, Castries, St. Lucia (NA-108, WLOTA L-1336)
between June 8-22nd. Activity will be on 160-6 meters using CW, SSB and
RTTY. There will be a special emphasis on 160 and 80 meters on all modes.
His equipment will consist of an Elecraft K3, a 3 element beam for 20-6
meters and wire antennas for 160-30 meters. QSL via his home callsign.
He does use the LoTW and eQSL. ADDED NOTE: Bill is working towards his
WAS on several modes and bands, so he prefers cards.

KH8, AMERICAN SAMOA (Update to OPDX.1110). John Plenderleith, 9M6XRO,
will be joining operators Aki/ZL1GO (JE4EKO), Masahiro/JH3PRR, Kip/W6SZN
and Jacky/ZL3CW (F2CW/WE3B) to be active using the special event callsign
N8A from the Turtle and Shark Lodge, Village of Vaitogi, on the southeast
coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385) between November

12-27th. Activity will be on the HF bands, 160-10 meters, with a signif-
icant effort on 160 meters. See OPDX.1110 for more details. QSL via ZL3CW.
The N8A Web page is now available online at: http://www.n8a.eu

LX, LUXEMBOURG. Marc, ON7SS/OO9O, will be active as LX/OO9O from Dillingen
between June 17-20th June. Activity will be focused on 30 meters CW and
PSK. QSL via the Bureau, eQSL and LoTW.

PJ4, BONAIRE. Armin, DL1DI, will be active as PJ4D from Bonaire (SA-006,
WLOTA LH-1279) between June 22nd and July 10th. He will be there on
holiday. Look for more details to be forthcoming.

PS2013, BRAZIL (Special Event). Look for special event station PS2013CCB
to be active between June 15-30th. Activity will be on 40-10 meters using
CW, SSB and the Digital modes. Operations are to celebrate the FIFA
Confederations Cup Brasil event. QSL via PS7AB, only via the Bureau,
LoTW, EQSL or Bureau E-mail request <ps7ab@yahoo.com>. SWL request are
welcome. Please, "=> NOT <=" direct QSL.

QSL EM68J via LoTW. Direct QSLs via K2PF or OQRS ClubLog, and Bureau QSL via UU2JQ. This was a special event station to commemorate the 68th anniversary of the victory in the great Patriotic War.

NEW LoTW Software Available (Update): As of May 30th, TQSL 1.14.1 is now ready to download. For more details and the download for the fixed version, go to: http://www.arrl.org/logbook-of-the-world

The GoList reports: "Buzz, NI5DX, is now the QSL Manager for Tim, 5R8Z. Tim is a missionary in Madagascar and has very limited internet service. He has been uploading his log to LoTW when internet service allowed but had not been sending printed cards because of the cost involved and postal difficulties from Madagascar. Tim will return to South Carolina for 6 months beginning in June. During that time he will try to get his paper log transferred into a computer log program. This will take some time as it is not at the top of his priority list while home. Buzz and Tim will also design a card that will be printed by UX5UO."

The GoList reports: "Buzz, NI5DX, is now the QSL Manager for Iwan, YE1NZ. Iwan, whose home call is W7NZ, will be working in Indonesia for Marriott for at least 2 years. He will forward his past logs to Buzz immediately. Iwan has some QSL cards he is presently using. If the cost to ship a supply to Texas is not too expensive, he will send some to Buzz. If that costs too much, the two will design a new card that will have to be printed. It will take about 6 weeks before Buzz has cards in hand to reply to requests."

QSL RECEIVED VIA LoTW: 5B75FOC, 5W1SA, 9M2TO, AX7CW, FS/G3SXW, GS4FOC, HK3C, HK3W, JA2FJP, JA7BME, KH6LC, OF3I, OX3LX, P29NO, PJ7MF, RA0FF, RA6HJA, RA/KE5JA, RA/WX8C, T8CW, VK6DXI, VP2MRV, Z81X and ZM4M

QSLS RECEIVED VIA MAIL: 3D2GC, 6V7S, A3EAQ, CW90A, D4C, EP3SMH, FR4NT, H44G, H44MY, H70ORO, JX9JKA, LU5FC, PT0S, T2GM, T2YL and V63MY

QSLS RECEIVED VIA THE BUREAU: 6W/DL2RMC and HR5/NQ5W

TN5, REPUBLIC OF CONGO. Once again in close cooperation between the DAGOE Foundation, Mercy Ships and 4 Dutch radio amateurs, planning is being done for a DXpedition to Republic of Congo. The Team will stay in Pointe Noire between September 28th and October 11th. This is the group's fourth such operation/project. For their previous projects in Liberia (5L2MS), Benin (TY1MS) and Sierra Leone (9L5MS) the team was very honored and proud to be rewarded in 2013 for their achievements with the Yasme Excellence Award 2012. The team will use the callsign TN5MS for this coming activity. Operators mentioned are: Arie/PA3A (CW/SSB), Ad/PA8AD (CW/SSB), Arie/PA3AN (SSB/RTTY) and Marian/PD1AEG. Activity will probably be on 160-10 meters using CW, SSB and RTTY. The equipment consists of 3 transceivers and linears. The antennas are verticals for 160-30m and beams for 20-10m. For 160m and 80m extra receiving antennas will be used to improve station reception capability. If conditions allow it and permission is received, they will try to activate 6m. They take special care to listen for remote locations and small stations. The goal of the team is to work as many different stations as possible in the different modes. All donations and surplus from the QSL will be transferred to the Mercy Ships Charity Project. QSL via PA3AWW, by the Bureau or direct (see info on the Web page). Also, QSLs can be requested with a donation via the OQSL request service on the Web page. LoTW will be uploaded 6 months after the DX-pedition when logs are checked. The team is not using eQSL for answering QSL. For more details and updates, visit their Web page at:
http://www.tn5ms.nl/index.php

TU5, IVORY COAST. Dim, F5SWB, will be active as TU5DF from Port-Bouët, Abidjan, starting at the end of June through sometime in October. Activity will be on HF bands, mostly on CW but also on SSB and PSK31 sometimes. QSL via F5SWB. Please include 2 USDs and a SAE to cover mail costs for direct QSL coming from outside of Europe. Please include 1 USD and a SAE to cover mail costs for direct QSLs inside Europe.

UP44, KAZAKHSTAN. Members of the Traveling Radio Amateurs Group are planning to travel to the mountains of Zailiysky Alatau between June 7-8th. The expedition to the "Mountains of Kazakhstan" is the first in Kazakhstan activation mountains «Class E» (peaks altitude from 4000m and more) pursuant to the" Kazakhstan Mountain Award" program. The callsign UP44WFF will be used by operators Arthur/UN6QC, Sergey/ UN6GAO, Victor/UN7GIT and possible other operators. Activity will be on 40-10 meters using CW, SSB and the Digital modes. QSL via LoTW, eQSL, by the Bureau or direct (see QRZ.com). The goal of the expedition is to activate the following references:
WMA/UNM-043 - Amangeldy peak, altitude 4010? above sea level (NEW ONE)
WFF/UNFF-005 - Ile-Alatau national Park
WRA/UNR-048 - river Malaya Almatinka
KDA: Q-12 - Karasai district
WW Loc. - MN83MC
For more details, check out the following Web links:
http://un-dx-news.ucoz.com
http://qrz.com/db/UP44WFF

VP2V, BRITISH VIRGIN ISLANDS. By the time you read this Kevin, K6TOP, will once again be active as VP2V/K6TOP from Tortola, British Virgin Islands (NA-023), until June 6th. Activity will be limited (family vacation) using an ICOM 706 MKII with 100 watts into a 40m vertical, 20/15/10 multiband dipole. Operations will be CW almost exclusively. Operating hours are typically 0100-0300z and 1000-1200z due to family commitments. QSLs via LoTW preferred, log will be uploaded upon return. Kevin states, "When the pileups get difficult, I listen to the edges, so please spread your calls out."

YN, NICARAGUA. "DX-World.net" is reporting that a Spanish team from the Aitana DX Group (ADXG) will be active from the YN2N Shack in Nicaragua between October 1-16th. Operators mentioned are Francisco/EA7FTR, Gen/ EA5HPX, Fernando/EA5FX, Javi/EA5KM, Jose/EA1ACP and Carlos/EA1DVY. Activity will be on all bands using CW, SSB and RTTY. Pilot station is Ismael/EA1AZ. Callsign will be announced soon. The team has a Web site which will be running shortly. QSL via EB7DX.

ZP99, PARAGUAY (Special Event). Members of the Radio Club Paraguay Filial Itapua (ZP9EE) will be using the callsign ZP99E for the first time from the local ruins of the Jesuit Missions of La Santísima Trinidad de Paraná and Jesús de Tavarangue between June 12th and July 21st. Operators mentioned are Manu/ZP9MCE, Antero/ZP9CN, Francisco/ZP9GB and Derlis/ZP9DK. Activity will be on 40/30/20/15/10 meters using CW and SSB, with some PSK31. QSL via EA5ZD. Log will be available on QRZ.com and ClubLog.

OK, I do see lots of spots on DX Summit - mostly from EU but quite a few from the US. And yes, conditions were poor toward the end of May - I did work GB75FOC, GS4FOC, GS75FOC and some other EU FOC calls, so I probably just wasn't around when M0RSE was. I have a card from a much earlier activation, so I'm happy.

We do have days in TX where EAs are booming but few or no no Gs make it. In general it's a good location for DXing even though the East Coast gobbles up Europe and the West Coast gobbles the Pacific and Far East - there are always crumbs left for us.

Not so,

I heard and worked M0RSE @21:39 on May 5th. As I recall they were booming into SA and had no pile-up at all. I think its just being there on the right time and place.

I was surprised that there were no spots on the various clusters
like K5DX - those show spots way back. Nothing for M0RSE, although
there is one for M0RES on 18088, May 4 that's probably a typo...

W8JI has an interesting page on splicing wire at:
http://www.w8ji.com/splicing_antenna_wire.htm

I often use the method he describes at the bottom of the page
which does not involve soldering. In the past I found that
splices would break when soldered so I don't solder.

It's my understanding that M0RSE and all the G*75FOC calls are already uploaded to LoTW, or will be very soon. The manager is Phil, G3SWH, and he is a strong advocate of LoTW. I *think* all of the special G*75FOC and M0RSE calls I worked were confirmed within a day or two on LoTW.

Paper cards are available as per the directions on their respective QRZ.COM entries.

Thanks Iain (and John),

I have emailed WJ9B and will do for these other two.

I have been fairly regularly on K3UK, usually around 1200z+ and 2300z (2300z+ weekends).
I am happy to provide CQ Zone 29 (80 to 6m including WARC bands) in fact I would be happy to work anyone on 6m!
I do CW/SSB/PSK/RTTY/JT65 (I have SSTV but a bit rusty on that mode).

I have now successfully made a DX QSO on 80m JT65 3576Khz so would like to try this to NA your sunrise.

21275. One more dipole-balun question

Yahoo group: DX-IS (2013)
Date: 2013-06-03 04:07:02 UTC
From: John Geiger (AF5CC)
Topic: 21275 Message: 21275

I had previously said that I had a G5RV type dipole that I made myself. After repairing it today following a run in with a tree branch last Wednesday, I realize that it isn't quite that. It is more of an "off center fed dipole". It isn't the classic "Windom off center fed" where one leg is twice as long as the onther. On my antenna one leg is approximately 50 feet long, and the other leg is around 60 to 65 feet. It is fed with 300 ohm radio shack twin lead-about a 25 foot run, which goes to a 4:1 voltage balun, and then to 75ohm RG-11 coax to the shack.

Given this new revelation, that it is a off center fed dipole, what is now the best balun for the twin lead to coax junction? I am assuming that it isn't quite a balanced antenna, since the legs aren't equal, so how crucial does a balanced to unbalanced (coax feedline) transformer become? My main interest is trying to keep the RF off of the coax shield, although I haven't had any real problems with RFI in the shack.

73 John AF5CC

21276. RE: [DX-IS] Splicing wire in a dipole question

Yahoo group: DX-IS (2013)
Date: 2013-06-03 05:16:54 UTC
From: Lance Martin
Topic: 21253 Message: 21276

Hi John,

My inverted V has a number of splices in it due to the fact that I used to have it cut for 12 and 17m before I got the SteppIR.

I have often wondered if the joins were making it lossy or even creating a potential for QRM (any sharp edges...)
I have very thin coated wire (enamel) and at the joins I bared and twisted and then soldered and they have lasted 3 years so far, though I don't have trees to content with on my urban block. (block = lot = property = land space).

My inverted V is a home brew 80/40/30 now and I have jumpers with egg insulators on either leg. I use gold plated banana clips that take the weather quite well.

I did see a recent ad. by moonraker on a 80 - 30m OCFD but haven't been able to locate it on the web. Can anyone recommend a commercial wire antenna (dipole/Inv V) that will do 80/4-/30m?

73, Lance - VK6DU

Subject: [DX-IS] Splicing wire in a dipole question

My dipole had an unfortuate encounter with a neighbor's tree branch on Wednesday evening during a storm, and is now going to require some repair or replacing. One option is to fix it by splicing a few pieces of copper wire together. This is the cheap option. However, could this cause problems later on? I am wondering if the junctions of the wire could corrode and start acting like a diode, throwing out RFI all over the place?

Could this happen, or is splicing copper wire in a dipole usually ok?

PREDICTIONS FOR 05 Jun 2013 10CM FLUX: 118 / AP: 006
COMMENT:Six sunspot groups were reported by Catania today. Only two C-class flares
were reported during last 24 hours, and the stronger one was C9.5 flare,
peaking at 07:25 UT on June 03. This long duration flare originated from
the fast emerging Catania sunspot group 92 (NOAA AR 1762) which has at the
moment beta-gama configuration of its photosperic magnetic field, and we
expect that it will produce more C-class and also possibly M-class flares.
The interplanetary magnetic field magnitude is of about 4 nT during last 36
hours. Earth is still inside the fast flow from the coronal hole currently
close to the west solar limb. The solar wind speed is about 700 km/s. The
geomagnetic conditions are quiet and expect to remain so in the following
hours.

PREDICTIONS FOR 06 Jun 2013 10CM FLUX: 108 / AP: 006
COMMENT:The flaring activity is rather low with only one C-class flare reported
during last 24 hours. The fast developing Catania sunspot group 92 (NOAA
AR 1762) became even more complex and has currently beta-gama-delta
configuration of its photospehric magnetic field. We expect some C-class
and M-class flaring activity, in particular, from this active region. The
interplanetary magnetic field magnitude is about 4 nT. Earth is still
inside the fast flow, with the solar wind gradually slowing down and
currently amounting about 580 km/s. The low-latitude coronal hole in the
northern hemisphere has completely passed across the central meridian
today. The arrival of the fast solar wind at the Earth, although not very
probable, is expected on late June 6. The geomagnetic conditions are
unsettled to quiet (Dourbes reports K=3 or less), and expect to remain so
in the following hours.

21280. VR on LOTW

Yahoo group: DX-IS (2013)
Date: 2013-06-05 04:52:34 UTC
From: Lance Martin
Topic: 21280 Message: 21280

Hi Guys,

Just going through LOTW and the huge pile of countries I need on digital.
So I am looking for easy ones...and guess what?
Of the umpteen dozen VR2 QSOs not one VR2 confirmation.

So, anyone know a VR2 that does digital and LOTW?

73, Lance - VK6DU (still looking for Idaho LOTW CW).

The only one I have in my log is VR2YYW, and that QSO was in 2009. I
have lots of VR2PX confirmations, but none on digital.

COMMENT:The flaring activity during last 24 hours was of the B-class level, except
M1.3 flare which peaked at 08:57 UT this morning. The flare originated from
the Catania sunspot group 92 (NOAA AR 1762) which still has beta-gama
configuration of its photosperic magnetic field and has therefore potential
for a C-class and M-class flaring. The flare was associated with a partial
halo CME first seen in the SOHO/LASCO C2 field of view at 09:12 UT (this is
also the first image after the data gap), and propagating with the
projected speed of about 300 km/s. From the currently available data it
seems that the bulk of the CME mass was southward oriented. We do not
expect this CME to arrive at the Earth, however the arrival of the CME
associated shock wave is still possible. The interplanetary magnetic
field magnitude is about 4 nT. The solar wind speed is currently about 500
km/s and is still slowly decreasing. The equatorial coronal hole passed the
central meridian today, however not much impact is expected from this small
coronal hole. The geomagnetic conditions are unsettled to quiet (Dourbes
reports K=3 or less), and expect to remain so in the following hours.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30606
SIDC SOLAR BULLETIN 06 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 06 Jun 2013 until 08 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 06 Jun 2013 10CM FLUX: 112 / AP: 016
PREDICTIONS FOR 07 Jun 2013 10CM FLUX: 110 / AP: 006
PREDICTIONS FOR 08 Jun 2013 10CM FLUX: 108 / AP: 015
COMMENT:Six sunspot groups were reported by Catania today and non of them was
particularly active, consequently no C-class flares were reported. Catania
sunspot group 92 (NOAA AR 1762) still has beta-gamma-delta configuration of
its photospheric magnetic field. We expect C-class flares and possibly
M-class flares, particularly from this active region. Eruptions and
flaring activity from this active region could be also accompanied with the
particle event, due to the current close-to-the-west-limb position of the
active region. The magnitude of the interplanetary magnetic field started
to elevate at about 02:00 UT this morning and it is currently about 10 nT.
The Bz component of the interplanetary magnetic field is about -5 nT. The
solar wind speed was also slightly increased and it is currently about 500
km/s. These are indications of the arrival of the fast flow from the low-
latitude coronal hole at the northern hemisphere. Due to the arrival of the
fast flow the geomagnetic conditions are active (Dourbes reports K=4). The
current geomagnetic active conditions are expected to continue today and to
decrease tomorrow to quiet or unsettled. The arrival of the fast flow from
the small equatorial coronal hole is expected on June 08.
TODAY'S ESTIMATED ISN : 051, BASED ON 17 STATIONS.

QST de W1AW
DX Bulletin 23 ARLD023
>From ARRL Headquarters
Newington CT June 6, 2013
To all radio amateurs

SB DX ARL ARLD023
ARLD023 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

BAHAMAS, C6. Operators N2RFA, K2KJI, KC4PX and K2TTT will be QRV as C6ABB, C6ALC, C6APX and C6ATT, respectively, from New Providence Island, IOTA NA-001, from June 8 to 15. Activity will be on 80 to 10 meters using SSB, RTTY, SSTV, PSK31 and JT65. This includes activity in the ARRL June VHF contest. QSL direct to home calls.

CUBA, CO. A group of operators will be QRV as T46A from Cayo Santa Maria Island, IOTA NA-204, from June 13 to 17. Activity will be on the HF bands using CW, SSB and RTTY, possibly with more than one station. QSL direct via EA5GL.

CANARY ISLANDS, EA8. Look for EH8FSJ to be QRV from Lomo Jurgon bei Arucas on Gran Canaria from June 10 to 24. Activity will be on the HF bands. QSL via EA8RKL.

ETHIOPIA, ET. Ken, K4ZW will be QRV from club station ET3AA from June 8 to 10 using mainly CW on the HF bands. QSL via N2OO.

HUNGARY, HA. Special event station HG7DANUBE is QRV during the month of June to celebrate Danube Day, which occurs on June 29. Activity is on the HF bands. QSL via HA7VY.

REPUBLIC OF KOREA, HL. Special event station DT60US is QRV during 2013 to celebrate the 60-year long partnership between South Korea and the USA. QSL via WX8C.

ST. LUCIA, J6. Bill, K9HZ will be QRV as J68HZ from June 8 to 22. Activity will be on 160 to 6 meters using CW, SSB and RTTY. QSL to home call.

MARIANA ISLANDS, KH0. Tony, JA6CNL will be QRV as KH0N from Saipan, IOTA OC-086, from June 13 to 17. Activity will be on the HF bands. This includes an entry in the upcoming All Asian DX CW contest. QSL to home call.

BULGARIA, LZ. Members of the Radio Club Blagovestnik are QRV as LZ1534GWS to honor the Saint and martyr Georgi Sofiiski. QSL via LZ1KCP.

AUSTRIA, OE. Special event station OE200TH is QRV until June 14 to celebrate the 200th birthday of noted designer and engineer Theophil Hansen. QSL via OE3PVC.

CZECH REPUBLIC, OK. Special event station OL140FIRE is QRV until June 14 to celebrate the 140th jubilee of the local fire brigade in Horni Marsov and the nationwide meeting of firefighters in Litomerice. QSL via operators' instructions.

GREECE, SV. A group of operators will be QRV as SV68FF from Agios Mamas lagoon on June 8 and 9. Activity will be on 80 through 10 meters SSB. QSL via SV2GWY.

UKRAINE, UR. A group of operators are QRV as EM5F from Ochakovskiy Island, IOTA EU-182, until June 9. Activity is on the HF bands and 6 meters. QSL via UR5FAV.

INDONESIA, YB. Operators YB3EDD, YB3VPP, YB3GZS and YB3BOA are QRV as YE3I from Gili Ketapang, IOTA OC-237, until June 9. Activity is on the HF bands. QSL direct via YB3EDD.

GIBRALTAR, ZB. Ernest, ZB2FK is QRV as ZB54FK until June 27 to commemorate The Union of European Football Associations acceptance of Gibraltar as its 54th member. QSL direct to home call.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Lakshadweep Islands, VU7KV, May 2013 operation. If you had this contact rejected in a recent submission, send an email to bmoore@... to be placed on the list for an update to your record.

THIS WEEKEND ON THE RADIO. The ARRL June VHF Contest, NCCC RTTY Sprint, NCCC Sprint CW Ladder, HA3NS Sprint Memorial CW Contest, DRCG Long Distance RTTY Contest, VK Shires Contest, Asia-Pacific SSB Sprint, SKCC Weekend CW Sprintathon, Portugal Day Contest, GACW WWSA CW DX Contest and the REF DDFM 6-Meter Contest are all scheduled for this weekend. The NAQCC Straight Key/Bug CW Sprint, CWops Mini-CWT CW Test and RSGB 80-Meter Club CW Championship are all scheduled for June 12. Please see June QST, page 79 and the ARRL and WA7BNM Contest websites for details.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30607
SIDC SOLAR BULLETIN 07 Jun 2013, 1306UT
SIDC FORECAST (valid from 1230UT, 07 Jun 2013 until 09 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 07 Jun 2013 10CM FLUX: 110 / AP: 029
PREDICTIONS FOR 08 Jun 2013 10CM FLUX: 110 / AP: 014
PREDICTIONS FOR 09 Jun 2013 10CM FLUX: 108 / AP: 012
COMMENT:Solar activity is low with only three C-class flares reported during last
36 hours. The strongest flare reported is currently ongoing C1.5 flare
peaking at 11:51 UT. We expect C-class flares and possibly but not probably
also M-class flares, in particular from the fast growing Catania sunspot
group 96 (NOAA AR 1765). The increase of the interplanetary magnetic field
magnitude (up to 12 nT), and its southward Bz component (up to -10 nT)
starting at about 14:20 UT on June 06, is associated with the arrival of
the magnetic cloud. The solar source of the magnetic cloud is still not
clear, and two possibilities arise; the flareless eruption on June 2 at
about 17:30 UT (at N10W25 as seen from the Earth), and a faint eruption
associated with the C9.5 flare on June 03. The arrival of the magnetic
cloud resulted in active geomagnetic condition which are still in progress
(Durbes reports up to K=5 and NOAA Kp=6). The arrival of the fast flow
from the small equatorial coronal hole is expected on June 08. A CME-
driven shock wave associated with the M1.3 flare on June 05, might be
expected on June 09 producing at most unsettled geomagnetic conditions. We
expect active geomagnetic conditions during following 24 hours.

SB PROP @ ARL $ARLP023
ARLP023 Propagation de K7RA

ZCZC AP23
QST de W1AW
Propagation Forecast Bulletin 23 ARLP023
>From Tad Cook, K7RA
Seattle, WA June 7, 2013
To all radio amateurs

SB PROP ARL ARLP023
ARLP023 Propagation de K7RA

Solar activity seems to dip back into the doldrums again, with the average sunspot number for the past week (72) lower than any reporting week since Propagation Forecast Bulletin ARLP013, which was for the week of March 21-27. You can go through the recent bulletins at http://www.arrl.org/w1aw-bulletins-archive-propagation and note that two weeks ago we had twice that number, when the average daily sunspot number was 144. From last week, the average dropped more than 12 points from 94.3. Average daily solar flux was down more than 10 points to 107.6.

But tracking the 3-month moving average of daily sunspot numbers, (which is based on calendar months) the three months ending May 31 had a much higher average than the 3 months ending April 30, and in fact more than any trailing three month average since the one ending on January 2012.

At the end of 2011 we saw a rally in solar activity, and with the weak activity in all of 2012 some are suggesting another double-peaked solar cycle. The three month periods centered on July through December 2011 had average sunspot numbers of 63, 79.6, 98.6, 118.8, 118.6 and 110. The first few months of 2012 were weaker, with the 3-month averages centered on January through March at 83.3, 73.7 and 71.2. But now the numbers are trending up. The 3-month averages centered on January through April 2013 were 73.6, 80.7, 85.2 and 106.4.

If you are unfamiliar with moving averages, using our method for the 3-month period centered on March, 2013, we added up all the daily sunspot numbers from February 1 through April 30. The sum was 7,581. We divided by the 89 days in those three months, and got approximately 85.2. For the period centered on April, we added all sunspot numbers from March 1 through May 31, and the sum was 9,792. As there were 92 days in this period, the average rounds off to

106.4.

On June 3 NASA updated their forecast for the peak of the current solar cycle, available at http://solarscience.msfc.nasa.gov/predict.shtml. This differs from a month earlier, when on May 1 they predicted a cycle maximum in Fall 2013 with a smoothed international sunspot number of 66. Now they predict a peak at 67 in Summer 2013. Summer officially begins at the Solstice, two weeks from today, on June 21 at 0504 UTC, which by the way is the Friday before Field Day weekend.

The active geomagnetic days over the past week were June 1-2, when the planetary A index was 49 and 19, the mid-latitude index was 41 and 16, and the high latitude college A index (measured near Fairbanks, Alaska) was 58 and 44. These numbers reflect the concentration of geomagnetic activity toward the poles. The source was an interplanetary shock wave of uncertain origin.

Again as this bulletin is written early Friday morning on the West Coast, we are in a geomagnetic storm, the result of the Earth passing through south-pointing magnetism in the solar wind. There is a possibility on June 8 of getting buffeted again, this time the result of a CME, and possibly two.

The planetary A index was 17 on June 6, with increasing K-index values from 2 to 3 to 4. Now early on June 7 we see planetary K-index of 5 and 6, which is the equivalent to an A index reading of 64. Now after 1200 UTC it dropped to 56.

The Australian Space Forecast center issued a geomagnetic disturbance warning at 0217 UTC on June 7. It reads, "A CME from a disappearing solar filament has arrived earlier than anticipated and is accompanied by a strongly southward pointing magnetic field. This is producing Minor Storm levels of activity in polar regions and may produce Active conditions at mid latitudes over the next 1-2 days." They predict a minor geomagnetic storm today, June 7, and unsettled to active conditions through the weekend, June 8-9.

The latest prediction from USAF/NOAA is for solar flux at 110 on June 7, 105 on June 8-9, 100 on June 10, 95 on June 11-12, 100 and 105 on June 13-14, 120 on June 15-16, 125 on June 17-19, then with flux values bottoming out at 105 on June 24-28, and rising to 125 on July 2 and again on July 14-16.

Predicted planetary A index is 18 on June 7-8, then 10 and 8 on June 9-10, 5 on June 11-20, then 25, 18, 10 and 8 on June 21-24, 5 on June 25-27, then 30, 20, 12, 8, 5, 8, 12, 10 and 5 on June 28 through July 6.

Petr Kolman, OK1MGW predicted a quiet geomagnetic field for June 7 (the prediction was sent around 1900 UTC on June 6), mostly quiet June 8-9, quiet June 10, quiet to unsettled June 11, quiet to active

June 12-14, mostly quiet June 15-17, quiet June 18, quiet to unsettled June 19-20, active to disturbed June 21, quiet to active June 22-23, quiet to unsettled June 24, mostly quiet June 25-26, quiet to active June 27, and active to disturbed June 28-29. You can see quite a difference from the NOAA/USAF prediction in the previous paragraph, but the NOAA forecasters have the advantage of revising their forecast every 24 hours, while OK1HH and OK1MGW only do it once per week.

Bert Cook, K6CSL of Riverbank, California, which is northeast of Modesto in the San Joaquin Valley, wrote to comment about the ARRL Propagation Charts. He finds them useful, but said the monthly charts are never available until well into the new month. I checked and learned these are prepared by the lab at ARRL headquarters, but the delay is due to some technical issues that may not be resolved right away.

As these are prepared using the VOACAP prediction engine, I suggested an alternative that should suit his needs if he would rather not set up the VOACAP program himself. Several months back we mentioned the subscription service at http://www.k6tu.net. There is a free 30-day trial, and if you should choose to continue, the subscription cost is reasonable. This has the advantage of customization for the user's exact location, plus you can make predictions for future months as well.

You can also customize your account for antennas and power levels, and when you run the program it emails you a set of URLs for the bands you have chosen as well as the region, either North America or world wide. Rather than look at these online, I found it much better to download the PDF files, then page through the 24 hourly pages for each band. You get a set of beautifully rendered maps with colors corresponding to coverage areas and signal levels. When you can quickly flip through these after downloading, you watch the projection of the signal levels for different areas progress across the map, hour-by-hour.

Another alternative is to use the free W6ELprop software for Windows computers. Check the K9LA tutorial at http://www.arrl.org/files/file/Technology/propagation/W6elprop.pdf, and you can download the software at http://www.qsl.net/w6elprop/. W6ELprop is free, but K6TU tells me he is about to add some great new features to his service.

Larry Nelson, K5IJB of El Paso, Texas reports: "Several 6-meter CW beacon stations were very helpful last Sunday (June 2) when listening for band openings. From about mid-morning up to noon, these beacons were S9 as the band opened to the West and mid-West from El Paso: N0LL/B, N7DGI/B, WB0RMO/B, W5GPM/B and N0SAP/B. I made several CW and SSB contacts using the Icom 703 (10 watts) to a homebrew vertical dipole at 25 feet."

Lou DiChiaro, WB2IJT reported, "As a Navy civilian physicist, I don't get to spend much time on the air during the work week. However, I do occasionally get on the air over the weekends. This past Saturday (June 1) was an extraordinary day for Es on 6 meters. I'm running 100 watts out from an IC-7000 to a large loop antenna running around the inside perimeter of my attic (to avoid the wrath of the subdivision esthetics enforcers). From Grid Square FM29 (Delaware) I worked in quick succession a number of Florida stations, some in Georgia, Arkansas, and Missouri. One of the Georgia stations measured S9+20 dB on the S meter (he was running a KW into a 5 element Yagi - it helps!).

"It was a band opening to remember. And I'll bet you're getting lots of reports like mine. Hopefully, we'll get lots more openings like this from Old Sol before he runs out of hydrogen and starts burning helium in his core."

And finally, Jeff Hartley, N8II reports from West Virginia: "From 0245-0400Z Friday May 31 I caught the best conditions towards EU on 15M I can ever remember so late in the evening, in 42 years on the air. Since the solar flux was around 120, my guess would be there was a sporadic-E link to the opening on the North American end, but the stations worked were in daylight ranging from around sunrise to mid morning. Prefixes worked in order from 0242-0306Z on 15 CW were DJ2, UT7, UA3, UT9, RA1, RA4LW (S9+5dB, then +20 dB at 0330Z!), UK8OWW, SP7. Then, I tried some CQs on 12M with no answer and scanned 10M towards EU where there were no signals to the NE including beacons, but several W6 beacons were loud via double hop Es. I went back to 15 CW at 0328Z and worked RU4, YO4, LA6, RZ6, UB6, UR4, UX7, RD3, UA6, and LZ2 thru 0352Z.

"I made a quick check of 15 SSB and found Ed, 4Z4UR who was S9. He mentioned he uses WWV near Fort Collins on 20 MHz often as a propagation indicator for NA, a smart idea. He says he can frequently hear WWV around 0300-0400Z at this time of year indicating a band opening which I would guess rarely extends as far east as my QTH in FM19cj. I checked 15 the next night around the same time and there was no opening to anywhere.

"On June 1 from 0125-0149Z, I did catch UN5C and UN5J with good signals on 17M CW as well as FO8WBB, ZL1BD, and a VP2V on 12M. 10M was dead including beacons. During the day I worked the Alabama QSO party in which even 10M was open to Alabama on Es from 19Z thru about 0020Z, though it was not utilized by most Alabama stations. All of the stations I asked to QSY to 10M up from 15 or 20M were successfully logged mostly with very strong signals. 15 was fairly active on CW and 20 was in great shape with strong signals all day until about 0120Z. 40M was barely usable at first, but was open from here pretty well from 2045Z onward. The high bands were the best ever to Alabama in the ALQP from here. In the late afternoon, I also worked AF3X/M on 20 roaming around the NYC boroughs with S9 signals only about 250 miles away.

"I operated part time in the WPX CW contest May 25-26 on 20M. Conditions were disturbed at the beginning, then quite so Saturday 1200Z thru at least 0300Z Sunday. There were some very loud southern and central EU at the start thru around 0115Z when the band gradually closed. A few Russians and Asians were found, but were almost gone by 0215Z whereas normally I have run pile ups from western Asiatic and European Russians from 0200-0400Z on 20 CW. Sunday 0100-0200Z was pretty much rock bottom, but I managed somehow to work all continents except EU during that time. RC9O who would normally peak around 20 degrees peaked around 310 degrees on a very skewed path and was only about S4. SA was loud and I worked KH7 and ZL3. Sunday at 1400Z, 20 seemed back to near normal as it did at 2345Z, but I only had time to operate mainly in the 14Z hour when many northern EU stations not possible to work before due to conditions were logged."

Thanks, Jeff!

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for May 30 through June 5 were 71, 58, 60, 76, 99, 59, and 81, with a mean of 72. 10.7 cm flux was 104.1, 101.8, 105.8, 110.9, 111.8, 109.9, and 108.8, with a mean of 107.6. Estimated planetary A indices were 3, 9, 49, 19, 10, 10, and 6, with a mean of 15.1. Estimated mid-latitude A indices were 2, 7, 41, 16, 9, 10, and 9, with a mean of 13.4.

08 June 2013 A.R.I. DX Bulletin
No 1153
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5R - Flavio, IW2NEF will be active as 5R8NE from Nosy-Be (AF-057) on 16-30 July. He will operate holiday style on 40-10 metres SSB, IOTA Contest included. QSL via IK2DUW. [TNX IZ2DPX]
9A - Sergio, IZ3NXC will be active as 9A8NXC from Rab Island (EU-136) on 8-10 June. QSL via IK3GES.
A2 - Roger, ZS6RJ will be active as A25RJ from Botswana on 15-19 June. He will operate CW and RTTY on 80-10 metres. QSL via ZS6RJ and LoTW. [TNX The Daily DX]
A5 - Once again Yuki, JH1NBN will be active as A52W from Bhutan on 9-19 June. This is a business trip, and he will be QRV in his spare time with 100 watts and a wire antenna, mostly on SSB. QSL via home call (direct). [TNX The Daily DX]
EI - Michael EI3KG, Sean EI4GK, Adam EI5JQ, Robert EI6KD, Oleg EI7KD, Dave EI9FBB, Arek EI9KC, Jacek M0PLX, Waldi SP7IDX, Mietek SP9NWN and Christopher SQ7NNM will be active as EJ0PL from Inishmore, Aran Islands (EU-006) on 23-29 July, IOTA Contest included. They plan to be QRV with three stations on 80-6 metres CW, SSB and digital modes. QSL via EI5JQ, direct or bureau. [TNX SP7IDX
F - Once again (for the 62nd year) the Association des Radioamateurs de la Sarthe will operate a special event station for the 24 Hours of Le Mans. Look for TM24H on 10-23 June, with activity on SSB, CW and digital modes. QSL via F6KFI. [TNX F8REF]
F - Amateur Radio Club F6KAP will be active as TM350FDR from La Rochelle on 15-16 June. The suffix stands for Filles Du Roy (King's Daughters), and refers to the young French women who immigrated to New France as part of a program sponsored by Louis XIV to boost Canada's population. The first group of 36 women left France 350 years ago. [TNX F8REF]
H4 - Greg, VK1AI is once again active as H44PA from Honiara, Guadalcanal Island (OC-047) until 30 June. He likes CW and digital modes, with some occasional SSB. QSL via home call, direct or bureau. [TNX DX World]
H4 - The H44IOTA activity from the Russel Islands (OC-168), which was planned to start on 6 June, has been delayed. Heavy seas are delaying the team's voyage, and on 7 June they said to expect to reach their destination "in two days". This delay is likely to

affect also their plans for OC-158, originally scheduled for 10-13 June. QSL via NR6M.
I - Alex IK8YFU, Domenico IW8RAO and Salvatore IZ8CZR will be active as II8LH from the lighthouse at Capo Vaticano (WAIL CL-005 and ARLHS ITA-047) on 8 June. QSL via HB9FHZ (bureau) or IK8YFU (direct), plus LoTW and eQSL. [TNX DX Coffee]
I - Weather permitting, IT9BWD, IT9BWW, IT9CVO and IT9HBS will be active from Isola dei Porri (EU-166) on 15 June. [TNX IT9HBS]
I - Celebrating the 20th anniversary of the Project DX Team, special callsign IB2PDT will be active from 21 June to 7 July and again from 20 September to 6 October. QSL via bureau to IQ2LZ. [TNX IK2XDF]
I - I8LWL, IK6JRI, IK7JWX, IT9DFI and IZ8LFI will be active from Ustica Island (EU-051) on 24-29 July, including an entry in the IOTA Contest as IE9/IK6JRI. Outside the contest they will concentrate on 30, 17, 12 and 6 metres (WWL JM68oq), and digital modes. QSL via home call, direct or bureau. [TNX IK7JWX]
JA - Ted, JF1CCH will operate mainly CW as JF1CCH/1 from Hachijo Island (AS-043) on 14-17 June. QSL via home call. [TNX DX World]
JA - Taka, JA8COE will be active as JA8COE/8 from Yagishiri Island (AS-147) on 20-24 June (weather permitting) and again on 25-29 July for the IOTA Contest. QSL via home call, direct or bureau.
JW - Svein, LA9JKA will be active as JW9JKA from Bear Island (EU-027), Svalbard for six months (from mid-June to mid-December). QSL via home call (direct). [TNX NG3K]
KG4 - Look for KG4RX (QSL via K4RX), KG4TO (QSL via AC4TO) and KG4AS (QSL via N4SIA) to be active from Guantanamo Bay on 22-29 June. They will operate CW on 6 metres and on the HF bands. QSL via home calls. [TNX NG3K]
KH0 - Tony, JA6CNL will be active as KH0N from Saipan (OC-086) on 13-17 June. He will operate on the HF bands and will participate in the All Asian DX CW Contest. QSL via JA6CNL. Complete contest rules are on www.jarl.or.jp/English/4_Library/A-4-3_Contests/2013AA_rule.htm. [TNX ARRL DX Bulletin]
LY - Heiko DG1BHA, Fred DH5FS, Olli DH8BQA, Oliver DL1EJA and Uwe DL3BQA will be active as LY44WFF from Klaipeda and the Nemunas Delta Regional Park on 12-18 June. They will put a special emphasis on 6 (look for them around 50183 kHz SSB and CW) and 2 metres, but will also be QRV on the HF bands "around the usual WFF frequencies". QSL via DH8BQA.
PY - Special event call PS2013CCB will be in use on 15-30 June during the 9th FIFA Confederations Cup football (soccer) tournament. Look for activity on 40-10 metres SSB, CW and digital modes. QSL via PS7AB (bureau only), LOTW and eQSL. Email requests for bureau cards can be sent to ps7ab[@]yahoo.com. [TNX PS7AB]
SM - Lars, SM6CUK will be active as SA6G/7 from Ven Island (EU-137) on 10-17 June. QSL via home call, direct or bureau. [TNX rsgbiota.org]
SP - Back in 1338 the town of Blonie received city rights under the Magdeburg Law. To commemorate that event, special station SN675B is active until 30 June. QSL via bureau to SP5KOG. [TNX SP5CGN]

T33 - Announced QRV dates for the T33A DXpedition to Banaba Island (OC-018) [425DXN 1143] are 5-18 November. The large multi-national team (AA4FL, AD6E, DJ5IW, DK1II, DL5EBE, DL6KVA, HA0NAR, K3VN, KD6XH, N1EMC, N6HC, N6HD, N9NS, VK3FY, W2IJ, W6KK, WA1F, WA1S and WA6FGV) will have six stations at two sites operating CW, SSB and RTTY on 160-10 metres. QSL via W2IJ (OQRS on Clublog). Bookmark www.t33a.com for further information and updates.
TN - Arie PA3A, Ad PA8AD, Angelina PA8AN and Marian PD1AEG will be active as TN5MS from Pointe Noire, Republic of the Congo from 28 September to 11 October. They plan to operate on 160-10 metres CW, SSB and RTTY, using three stations with amplifers and several beam and vertical antennas. The team will provide support and raise funds for a Mercy Ships Charity Project. QSL via PA3AWW, direct or bureau. The log will be uploaded to LoTW 6 months after the operation. An OQRS for direct cards will be available on the expedition's website. Further information on the project can be found at www.tn5ms.nl
TU - Dim, F5SWB will be active as TU5DF from Cote d'Ivoire from late June until the end of October. He will operate mainly CW, with some SSB and PSK31 on 40-6 metres. QSL via home call, direct only. Logsearch on Clublog.
UA - Look for Victor, UA1OEJ/p to be active from the Solovetskiy Islands (EU-066) until 13 June. He operates CW, SSB, PSK and RTTY on the HF bands. QSL via home call, direct or bureau. [TNX UA1OIW]
UA - R290PM is active throughout June to celebrate the 290th anniversary of the city of Perm (European Russia, CQ Zone 17). On 12 June a number of special stations with callsigns in the R290FA-R290FZ series will be QRV from all of the seven city districts. QSL via operators' instructions. Details on the relevant award can be found on http://qrz-e.ru/forum/38-1611-1 [TNX 5B4AHJ]
UN - Members of the Kazakhstan Traveling Radio Amateurs Group (http://un-dx-news.ucoz.com) will be active as UP44WFF from Peak Amangeldy in the Zailiysky mountain range on 7-8 June. They will operate CW, SSB and digital modes on 40-10 metres. QSL via UN6QC, direct and bureau, and LoTW.
UR - Look for EM5F to be active from Ochakovskiy Island (EU-182) on 7-9 June. QSL via UR5FAV (email address for bureau cards: orionua[@]orion.od.ua) and LoTW.
V3 - Jim, W8ERI will be active as V31ZF from Ambergris Caye (NA-073) on 12-19 June. He will operate holiday style on 80-10 metres SSB. QSL via home call. [TNX The Daily DX]
VP2V - Dave, W9DR will be active on 6 metres as VP2V/W9DR from Anegada, British Virgin Islands (FK78tr) on 14-28 June. He will operate SSB on 50115 kHz SSB and CW on 50115,6 kHz (where he will also be running a beacon). QSL via home call. [TNX NG3K]
W - Look for Nathan, N4YDU to be active as from Ocracoke Island (NA-067) on 25-28 July. He will operate SSB and CW on 80-10 metres, and will participate in the IOTA Contest as W4O. QSL via N4YDU (direct only). [TNX NG3K]

YB - A team of operators will be active as YE0EDAM from Damar Besar Island (formerly known as Edam), one of the Seribu Islands (OC-177), on 27-30 June. QSL direct to YB0JZS. Further information can be found at http://ye0edam.blogspot.com
ZP - Radio Club Paraguay Filial Itapua (ZP9EE) will operate special station ZP99E from the Jesuit Missions of La Santisima Trinidad de Parana and Jesus de Tavarangue (UNESCO World Heritage Sites) between 12 June and 21 July. Look for activity on 40, 30, 20, 15 and 10 metres SSB, CW and some PSK31. QSL via EA5ZD.

DXCC NEWS ---> VU7KV (Lakshadweep Islands, May 2013) has been approved for DXCC credit. [TNX NC1L]

GALILEO SPECIAL EVENT ---> Detailed information on the European Space Agency's Amateur Radio 2013 Galileo Special Event, running through 2013 to "celebrate the achievements of the Galileo satellite navigation project", can be found at https://sites.google.com/site/hamradiogalileo/home. The second activity period will be on 14-23 June, with expected operations by PI9ESA and II0ESA. QSLling instructions can be found on the website. [TNX I0WTD]

NA-181 POSTPONED ---> Klaus, VE7KDU and Frank, VE7DP were expeted to be QRV from Barnard Island (NA-181) on 7-9 June Howeve, "the latest weather forecast for northern B.C. coastal areas is indicating several days of gale-force winds", so the activation has been postponed "until a later date". [TNX VE7DP]

OC-285 ---> Nando, IT9YRE (H44S) and Mike, K9AJ (H44AJ) were active from Sikaiana Atoll (OC-285, new one for IOTA) on 4-6 June and made 5945 QSOs. QSL via home calls. A log search will be available at http://www.it9yre.it/h44/

RA9ODD/0 ---> UA9OBA reports that owing to plenty of heavy ice in the Sea of Okhotsk, the M/V 'Spirit of Enderby' is delayed and her course is changing. The stop at Iony Island (AS-069) [425DXN 1152] is postponed until 10 June. The ship locator is on www.heritage-expeditions.com

QSL 4U1ITU, 4U1UN & 4U1WRC ---> Get your missing QSLs for QSOs with 4U1ITU, 4U1UN and 4U1WRC (2012) at the Swiss DX Foundation's booth at Hamradio 2013 (Friedrichshafen) on 28-30 June. Additionally you can also get QSL cards for 3B9SP, 3B9FR (only for QSOs made on October 2012 and later), HB9SOLAR and HB9SPACE. Bring your QSO data with you and observe the working hours of the QSL manager (to be available at the booth). [TNX HB9BOU]

QSL HH2/HB9AMO ---> Tim, M0URX has recently taken over as QSL manager for Pierre's activities from Haiti as HH2/HB9AMO ("it has become clear that some QSL cards were not sent out from previous QSL management").A new QSL card has been designed and will soon be printed. QSL via M0URX, OQRS preferred (http://m0urx.com/oqrs/).

QSL TX5K ---> "The TX5K QSLs for the March Clipperton Island DXpedition should start to flow out sometime around the end of June", Bob Schenck, N2OO reports. "Please save your inquiries until after you hear that we are current on the processing". Read the complete release on http://ky6r.com/

WORLD CASTLES WEEKEND ---> Organized by the World Castles Activity Group, it will be held on 15-16 June. Several stations are expected to operate from fortresses and castles around Europe. Information on the event can be found at www.wcagroup.org. [TNX RN1CW]

+ SILENT KEY + Veteran storm researcher Tim Samaras (WJ0G) lost his life when a violent tornado hit the Oklahoma City metro area on 31 May. He "brought to the field a unique portfolio of expertise in engineering, science, writing and videography", the US National Oceanic and Atmospheric Administration commented in a statement issued on 3 June. A collection of his "Stunning Tornado Videos" can be found the National Geographic's website (www.nationalgeographic.com)

QSLs received direct or through managers: 3D2GC, 3D2MM, 4X4FR, 5B75FOC, 5H1DX (AF-063), 5H3MB, 5U9AMO, 5X8C, 6V7S, 6W2SC, 7X5KBS, 9J2GR, 9K2/SP4R, 9K2HN, 9M4SLL, 9N7SZ, 9U4U, A35UD, A3EAQ, A71AE, A92IO, BA4DW, CE2AWW, CV5D, CW3D, CW90A, CX9AU, D4C, DL6UNF, DX8DX (OC-174 & OC-225), EA6SX, EI9O, EP3SMH, FK8GX, FR4NT, H40T, H44G, H44KW, H44MY, H70ORO, J49C, J52HF, J5UAP, J69MV, JD1BMH, JS6RRR (AS-079), JX9JKA, LU5FC, LX1HD, LY23A, OF3I, OK2BTS, OL2HQ, OY1OF, P29NI (OC-099) ,P29VCX (OC-103), P29VPB(OC-069), PJ4M, PJ4NX, PT0S, SV0XCC/9, T2GM, T2YL, T6LG, TG9NX, V51AS, V51WH, V63MY, V63T, V73TS, VK9CZ, VP8LP, XR0Y, XW0ZJZ, XW8XZ, YB8XM/p (OC-271), YB9YKI (OC-147), YL3BF, YO3YX, YW5YL, Z60K, Z61DX, Z81Z, ZG2FK, ZK3T, ZL7A, ZS2AL.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30608
SIDC SOLAR BULLETIN 08 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 08 Jun 2013 until 10 Jun 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 08 Jun 2013 10CM FLUX: 109 / AP: 013
PREDICTIONS FOR 09 Jun 2013 10CM FLUX: 108 / AP: 011
PREDICTIONS FOR 10 Jun 2013 10CM FLUX: 106 / AP: 008
COMMENT:Solar activity is low, with only three C-class flares and one M-class flare
detected in last 24 hours. The M5.9 flare peaking at 22:49 UT on June 07
originated from the Catania sunspot group 96 (NOAA AR 1765) situated at
that moment at the west solar limb, and was associated with a CME. From the
currently available data it seems that the bulk of the CME mass was
directed mostly southward of the Sun-Earth line and it is therefore not
probable that the CME will arrive at the Earth. Fast growing Catania
sunspot group 96 (NOAA AR 1765) which currently has beta-gamma
configurations of its photospheric magnetic field, has a significant
potential to produce a C-class flares, and possibly also M-class flares.
The interplanetary magnetic field magnitude is about 4 nT, and the solar
wind speed is currently 450 km/s. The arrival of the fast flow from the
small equatorial coronal hole is expected today without significant
geomagnetic impact. A CME-driven shock wave associated with the M1.3 flare
on June 05, might be expected on June 09 producing at most unsettled
geomagnetic conditions. We expect quiet to unsettled geomagnetic conditions
during following 48 hours.
TODAY'S ESTIMATED ISN : 017, BASED ON 16 STATIONS.

PREDICTIONS FOR 11 Jun 2013 10CM FLUX: 097 / AP: 008
COMMENT:There is only one sunspot group currently on the solar disk, Catania
sunspot group 96 (NOAA AR 1765). Although this active region has beta-gamma
configuration of its photospheric magnetic field it is not particularly
active. However, we still expect C-class flares and possibly also M-class
flare from this active region in the following hours. The interplanetary
magnetic field magnitude is about 4 nT, and the solar wind speed is
currently 420 km/s. CME-driven shock wave associated with the M1.3 flare on
June 05, might be expected today, producing at most unsettled geomagnetic
conditions. We expect quiet to unsettled geomagnetic conditions during
following hours.

June 10, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, N2OO, W2GB, NG3K & ADXO, W3UR & The Daily DX, WK3N, N4AA & QRZ DX, N4JF, WF4W, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, CU3AA, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, E21EIC, EA5GL, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK2XDE, IZ2DPX, Mediterraneo DX Club, OK1RK, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PD5MVH, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, VE7DP and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd-June, through Sunday, 9th-June there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4X, 5B, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A4, A5, A6, A7, A9, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5R, MADAGASCAR. Flavio, IW2NEF, will be active as 5R8NE from Nosy-Be Island (AF-057) between July 16-30th. Activity will be on 40-10 meters using SSB, and a FT-857 into a fishing rod antenna at 10 meters. He also plans to be in the RSGB IOTA Contest (July 27-28th). QSL via IK2DUW.

A2, BOTSWANA. Roger, ZS6RJ, will once again be on a one man DXpedition for 4-5 days in Botswana (WW.Loc KG47AC) as A25RJ starting June 15th. Activity will be from Tuli Block, Eastern Botswana, focusing on 80-10 meters, CW and Roger states, "Look forward to working you in the pile-ups!" QSL via LoTW or direct using the QRZ.com address. There is no bureau service for Botswana.

A5, BHUTAN. Yuki, JH1NBN, will be active as A52W between June 9-19th. Activity will be limited to his spare time because he is there once again on a business trip. Yuki will operate SSB with 100 watts into wire antennas. QSL via JH1NBN direct. For more details, check: http://www.1nbn.net/index.htm

AFFA AVAILABLE (Another WWFF Award). Joao, CU3AA, AFFA Award Manager, is pleased to announce the "Azores Flora Fauna Award" (AFFA). All effort were made to make AFFA recognized as another WWFF award, as well as all its protected areas, since the aim is the same. Unfortunately, such recognition wasn't done as it was expected. However, hoping that soon their efforts might be recognized. They have the recognition and support of the regional authorities. You can access their Web site at: http://www.azoresflorafauna.wix.com/azoresflorafauna
They suggest, "If you wish, leave your thoughts, comments or suggestions."

C8, MOZAMBIQUE (Update/Press Release #2). Tom/N4XP and Don/N1DG, the C82DX DXpedition Co-leaders, posted the following press release (#2) on June 4th on the DXpedition's Web page [edited]: "Planning and preparations are continuing for our October 2013 Mozambique DXpedition. Our license has been issued and is in hand with the callsign C82DX. We are happy to announce this will be the first use of the C82 prefix. We will be active starting October 15th, for eight days with operations ongoing through October 22nd. We are also pleased to announce Ray Novak, N9JA has joined our team.
ZS6P and ZS6RI will travel to our operating site the first week of June for scouting, planning and preparation purposes. Our location in Xai Xai is located directly on the ocean in the southern part of Mozambique. Low Band operations remain the primary objective, and we have secured both Titanex and Battle Creek Special verticals. We have also obtained the sponsorship of Array Solutions with one of their new shared apex loop array RX systems. They join ICOM (our main equipment supplier with IC7600s) and SteppIR (CrankIRs) as our major donors to our DXpedition.
During the day we will operate all HF bands including 6 meters. Our website is now live, <www.c82dx.com>, where you can learn more about our plans."

C9, MOZAMBIQUE. Antonio, EA4GBA, will be active as C91GBA from Matola starting June 27th through December 15th. Activity will be on all HF bands using SSB and a Yaesu FT-857 with 100 watts into a dipole. QSL via EA4GBA direct (w/SAE and 2 USDs). QSL cards will be answered once he arrives back in Spain early 2014.

CANADIAN ARCTIC IOTAS TO BE ACTIVATED! Mike, VE2XB, currently active from the Canadian High Arctic IOTA Dorset Island (NA-156) as VY0BRR

(he states, VY0BRR -- It's FREEZING), is planning to activate other very rare IOTAs within the Region of Nunavut. His QTH is Cape Dorset, an Inuit hamlet located on Dorset Island near Foxe Peninsula at the southern tip of Baffin Island in the Qikiqtaaluk Region of Nunavut, Canada. The Inuktitut name of the village means "high mountains." Mike provides interesting details and history of Cape Dorset and Dorset Island on his Web and QRZ.com pages at:
http://www.qrz.com/db/VY0BRR
http://vy0brr.jimdo.com
Mike is looking to travel to other places in Nunavut, and will activate some very rare IOTAs including: Coral Harbour, Southampton Island (NA-007), Sanikiluaq, Belcher Islands (NA-196), Igloolik (NA-174), Cambridge Bay, Victoria Island (NA-006) and Qikiqtarjuaq, Broughton Island (NA-130). He also adds, "Maybe I will travel to some rare IOTAs in the Northwest Territories or NWT to the West...and maybe to Yukon too. (Vy1)." Activity from these location has not been provided, but in the past Mike was active on 80-10 meters, depending on band conditions, using CW and SSB. QSL via VE2XB with SASE and Canadian stamps or 2 IRCS or 2 USD. See QRZ.com for details and address.

CE0Y, EASTER ISLAND. Jose, CE3YHO, has announced that he is traveling to Easter Island by the end of June in order to live there with his wife (islander) and two sons that actually are living on the Island. Once living there, Jose will install a Ham Radio station on HF, VHF and UHF, and expects to begin operations as CE0YHO at the end of July or August.

DXCC NEWS (NODXA Member's Achievement). Congratulations to NODXA member Scotty, WK3N, for exceeding the 3000 confirmed mark in the ARRL DXCC Challenge. He is the Northern Ohio DX Association's second member to exceed the 3k level with his last submission giving him 3003 confirmed. NODXA's first member to reach 3k was Don, K8MFO. Don has an astounding Challenge total of 3144. The ARRL DXCC Challenge presently has 73 members from 19 countries with 3k or more confirmed QSOs. They are to be commended for an achievement that takes a lifetime.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
VU7KV ☐ Lakshadweep Islands (DXCC Entity Code ☐ 142); May 2013 operation

Note: If anyone had this contact rejected in a recent submission send an E-mail to <bmoore@...g> to be placed on the list for an update to your record.

EF8, CANARY ISLANDS. Luis, EA8AY, will be active as EF8X from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-band entry. QSL via W2GR. Visit his Web site at: http://www.ea8ay.com/ef8x

FS, ST. MARTIN. Just a reminder that John, K9EL, will once again activate FS/K9EL from St. Martin (NA-105, DIFO FS-001, WLOTA 0383, WW Loc. FK88) between June 11-28th. Activity will be on 80-6 meters. Daily uploads to ClubLog and LoTW are planned. John has a new QTH this year and should

have a better signal to the USA on 6 meters. QSL via his home callsign.

H44, SOLOMON ISLANDS. Gregory, VK1AI, has once again returned to Honiara on June 3rd, and is active as H44PA until June 30th. Activity will probably be on 20/17/15 meters CW mainly. QSL via VK1AI, direct or by the Bureau. ADDED NOTE: Gregory states, "Cards for my 2012 operation are ready for dispatch to the Bureau. Anyone wanting a card direct is welcome to do so."

H44, SOLOMON ISLANDS (IOTA Op/Update to OPDX.1103/1104/1105). By the time you read this, operators Ralph/5W0W/H44RK, Maggie/H44MK (the only local YL Ham from Sikiana), Stan/SQ8X, Dom/SQ9KWW and Tom/WL7HP will be active as H44IOTA from Florida Islands (OC-158) as part of their IOTA tour until June 13th. Their next stop is from the very rare Stewart Island (OC-285) between June 17-24th. ADD NOTE (From their Web Page): "The H44IOTA Team informs that plans to activate IOTA OC-285 between June 4-7th, 2013 by H44S and H44AJ are not associated with 'H44IOTA DXpedition' nor 'The Pacific C3 Project'. The H44IOTA Team continues their plans as scheduled. We□re really looking forward to make contacts with IOTA chasers from all islands as planned." Remember, activities will be on 80-10 meters using CW and SSB. See OPDX.1104 for frequencies. All QSL requests are via QSL Manager Rex Turvin, NR6M. For updates it is suggested to watch:
http://www.qrz.com/db/H40RK
The group now has a Web, Twitter and FaceBook page at:
http://www.h44iota.com
https://twitter.com/h44iota
https://www.facebook.com/pages/H44-IOTA-DXpedition/136003426577924

IB2, ITLAY (Special Event). Members of the ARI Lomazzo "Project DX Team" are celebrating the 20th anniversary of the foundation. Look for all its members to use the special callsign IB2PDT between June 21st and July 7th, and between September 20th and October 6th. The event's main goal is to celebrate the anniversary, but also to remember and give a tribute to all the founders. All the QSOs will be sincerely appreciated, and also SWL reports. The QSL is sure via the Bureau to IQ2LZ.

II8, ITALY (Late Announcement, LH Op!). Alex, IK8YFU, and other Calabria DX Team members were expected to be active as II8LH on June 8th, from the Capo Vaticano lighthouse (WAIL CL-005, ARLHS ITA-047), located in Ricadi (VV)Vibo Valentia Province, Calabria region, Italy. QSL via the Bureau to HB9FHZ (USKA Bureau). QSL via IK8YFU direct. E-QSL Authenticity is guaranteed. Also LoTW. For more info, see: http://www.calabriadxteam.it

IOTA NEWS.....
AF-019. Emilio, IZ1GAR, will be active as IH9R from Pantelleria Island (IIA TP-001, WLOTA 0041) during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band entry. Pantelleria counts as Multiplier Zone 33 Africa Italy for the CQWW DX rule (islands are located over the African continent platform). QSL via IZ1GAR, direct or by the Bureau.

AS-043. Ted, JF1CCH, will be active as JF1CCH/1 from Hachijo Island between June 14-17th. Activity will be on the usual IOTA frequencies operating mainly CW. QSL via his home callsign.

AS-147. The "425 DX News" reports that Taka, JA8COE, will be active as JA8COE/8 from Yagishiri Island on June 20-24th (weather permitting) and again on July 25-29th, for the RSGB IOTA Contest (July 27-28th). QSL via his home callsign, direct or by the Bureau.

EU-038. Marcel, PD5MVH, will once again be active as PD5MVH/P from Vlieland Island between August 31st and September 14th. Activity will be on 40/20/10 meters SSB. QSL via his home callsign, direct or by the Bureau. NO LoTW or eQSL.

EU-093. Manel, EA3EGB, will be active as EA3EGB/5 from Benidorm Island (DIE E-007, WW Loc. JM08) and lighthouse (FEA E-0172, WLH EA-003, WLOL SPA-165, WLOTA 3329, Admiralty E 0172) on June 16th. Activity will be on 40-6 meters using SSB and RTTY. Benidorm Island is located in the Province of Alicante. QSL via his home callsign, direct or by the Bureau.

EU-129. Operators Hardy/DL3KWF, Bert/DK3BK, Gun/DF2TG and Roland/DL9GMN will be active as DM3X/P from Görmitz Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/Low-Power entry. QSL via the Bureau.

EU-137. Lars, SM6CUK, will be active as SA6G/7 from Ven Island (WLOTA 0780) between June 10-17th. Activity will be holiday style on the HF bands. QSL via SM6CUK, by the Bureau or direct.

EU-177. Olaf, G0CKV, will be active as SM5CKV/P from Harstena Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/ CW-Mode entry. QSL via G0CKV.

NA-058. Tad, WF4W, informs OPDX that a group of 10-12 operators will activate Sapelo Island (USA738 and USA1014) as K4S in the Georgia State IOTA Group between September 12-14th. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. QSL via LoTW, eQSL and direct (w/SASE or IRC) only. Information good on QRZ.com.

NA-067. Nathan, N4YDU, will be active from Ocracoke Island between July 25-28th. Activity will be on 80-10 meters using CW and SSB. Operations will also include the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/Low-Power/Assisted entry using the callsign W4O. QSL via N4YDU direct only.

NA-143. Bodo, DF8DX, will be active as KT3Q/5 from Galveston Island between July 27-29th. Activity will include the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/12-Hour/Low-Power/DXpedition entry. QSL via DF8DX, direct, by the Bureau or LoTW. ADDED NOTE: Before the contest, look for Bodo to be

active between July 19-20th as KT3Q/6 from Anacapa Island
(NA-144), and between July 26-27th as KT3Q/5 in the Texas
State West IOTA Group (NA-092).

NA-181. Operators Klaus/VE7KDU and Frank/VE7DP, who were expected to
activate the Estevan Islands (Barnard Island) as homecall/7
between June 7-9th, had to postpone their operation due to
bad weather and a high K index.

NA-204. (Update) The Cuban T46A group will activate the special callsign
T46C from Santa Maria Island between June 13-17th. The operators
mentioned are Ore/CO6LC, Jose/CO6EC, Yordany/CO6YAC, Amaurys/
CO6WYR, CL6RLD and Luis/CO6LP. They will try to maintain 2-3
stations [one CW, one SSB and one RTTY] on the air transmitting
on 160-10 meters, including 30/17/12 meters, using CW, SSB and
RTTY, into yagis, beverages and verticals. For the 80m and 160m
bands, they will only have one band on at a time and mainly CW
because of their antenna. QSL via EA5GL.

OC-177. Operators Joy/YB0NSI, Jeffrey/YC0LOU and possibly one other
will be active from Damar Island (Edam Island) and the Vast
Licht lighthouse (WLOTA 2749) between June 27-30th. Activity
will be on 80/40/15/10 meters (and possibly 30/17/12m) using
CW, SSB and the Digital modes. QSL via YB0JZS. More details
are expected to be forthcoming. For more details and updates,
watch: http://ye0edam.blogspot.com

OC-285. (Late Info) Operators Nando/IT9YRE and Mike/K9AJ were active
this past week (June 4-6th) from Sikaiana Atoll as H44S and
H44AJ, respectively. They had to QRT early because of bad
weather, but they made some 5945 QSOs. For more details, see:
http://www.it9yre.it/h44

JD1, MINAMI TORISHIMA. Take, JG8NQJ, will once again be active as JG8NQJ/JD1
from Marcus Island in the Minami Torishima (OC-073, JCG 10007) group for
the next few days in the month of June. He is there to work on the island's
weather station. Activity will be mainly on 17/15/12/10 meters CW. QSL via
his home callsign, by the Bureau or direct to JA8CJY: Susumu 'Sin' Sanada,
5-17, 5-4, Shin-Ei, Toyohira, Sapporo 004, Japan. Online log is available
at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

KH6, HAWAII. Alex, F4GHS, will be active as KH6/F4GHS from the Hawaiian
Islands (OC-019) between August 3-23rd. Activity will be holiday style
on 80-10 meters using SSB and an Icom IC-706MKIIG into G5RV antenna.
While there, Alex will be activating the various islands in the Hawaii
Islands IOTA Group: Oahu (August 3-7th), Kauai (August 7-12th), Maui
(August 12-18th) and the Island of Hawaii [Big Island] (August 18-23rd).
QSL via F0GAZ direct.

DIS - Disturbed	Major Storm K=5	50-99
VRY DIS - Very Disturbed	Severe Storm K=6-9	100-400

MJ, JERSEY. Operators Jo/PA9JO, Alex/PA1AW and Ron/PA3EWP will be active as MJ/homecall from the Jersey Amateur Radio Society at the old German signal station at La Moye on Jersey (EU-013, WW. Loc. IN89ve) between June 20-24th. Activity will be on 160-10 meters using all modes. QSL via LoTW or direct (all callsigns) to Alex, PA1AW. A OQRS will be available on their Web page at: http://www.cqfriends.com/mj2013

MU0, GUERNSEY (Contest/Satellite Op). Operators Peter/2E0SQL, Louis/2U0FER, Jimmy/M0MJH, Iain/M0PCB, Daniel/M0TCB and Steve/M0SPF will be active as MU0THJ from Guernsey Island (IOTA EU-114) during the RSGB IOTA Contest (July 27-28th) as a Multi-Op entry. QSL via 2E0SQL. ADDED NOTE: Look for Peter, 2E0SQL, to be active as 2U0SQL/P between July 25-30th. He plans to be active on the satellites. QSL via his home callsign, direct, by the Bureau or LoTW.

OG0, ALAND ISLAND. "The Daily DX" reports that operators Pertti/OH2BEE/OG2W and Raimo/OH2BCI will be active from the OH0Z station <www.oh0z.net> on Aland Islands (EU-002) between June 14-17th. While using Pertti's, OG0W, callsign, look for activity on 160-10 meters (no WARC-79 Bands) using CW only. Their activity will also include the All Asia DX CW Contest. QSL via OH2BEE direct. Also QSL via LoTW or eQSL.

OL140, CZECH REPUBLIC (Special Event). A group of Czech operators are now active as OL140FIRE from the Fire Brigade in Horni Marsov until June 15th. Activity is to celebrate the 140th anniversary of Fire Brigade in Horni Marsov and the meeting of volunteer Fire Brigades "Hasicske Slavnosti 2013" (which was cancelled due to ongoing floods - see QRZ.com for pictures) in Litomerice. They would like all licensed hams which are members of a professional and volunteer Fire brigades, active or retired, all around the world to call them. Every QSO with OL140FIRE will be confirmed with "thematic" QSL card. QSL via OK5AM, by the Bureau or direct. An award is available, see QRZ.com for details.

OX, GREENLAND (Update). An international group of YLs will once again activate amateur radio from Kangerlussuaq between August 16-20th. Their callsign will be OX5YL. Operators mentioned are Unni/LA6RHA, Mio/JR3MVF, Chae/HL1KDW, Kay/WA0WOF and Solveig/SM6KAT. QSL via PY5YL, direct or by the Bureau. The last YL expedition was in 2010 and was very successful. For more information, visit their Web site at:

http://home.online.no/~la6rha/greenland2013.htm

P4, ARUBA. John, W2GD, will be active as P40W from Santa Cruz, Aruba (SA-036, WLOTA 0033), during the CQWW DX CW Contest (November 23-24th). Operating class is to be determined. QSL via LoTW or N2MM (QRZ.com). Look for some 30/17/12 meters and 160 meters operations before the contest as time permits. PLEASE NOTE: 60m operation is NOT authorized on Aruba. Log will be posted to LoTW within two weeks. ALSO, John plans to end responding to P40W QSL card requests by the end of 2013. Confirmations for P40W only via LoTW thereafter.

P5, NORTH KOREA (P5 PROJECT). Paul, N6PSE, was reported to be on his way to Beijing on June 5th, then on to Pyongyang, North Korea, to begin the negotiations for a DPRK DXpedition. David, AH6HY, is expected to join the efforts later sometime this week. Updates can be seen on the following socail medias: https://twitter.com/N6PSE
http://www.intrepid-dx.com/p5
https://www.facebook.com/pages/The-Intrepid-DX-Group/180857615282553

PJ4, BONAIRE (Update). Armin, DL1DI, will be active as PJ4D from Bonaire (SA-006, WLOTA LH-1279) between June 22nd and July 10th. He will be there on holiday. Activity will be on 80-10 meters SSB using a Spiderbeam and FD4 from Fritzel with 100 watts. QSL via DL1DI, direct or by the Bureau. Sorry no eQSL or LoTW.

TX5K QSL STATUS (Press Release), QSL Manager Bob, N2OO, reports: "The TX5K QSLs for the March Clipperton Island DXpedition should start to flow out sometime around the end of June. Although it has only been about 2 ½ months since the DXpedition ended, there has been some 'interest' in the status of the QSL process. We are a little behind due to a com-bination of reasons beginning with delays getting the design started due to the XE1L situation, and normal post-DXpedition craziness. Then there were some simple unfortunate timing issues with each of us involved in the process. However, I am happy to report that the card design is almost done, and once proofed will be sent to our printer (WZ8P) who

is ready to go. Once printed, the cards will be divided between the two primary QSL Managers and processed by 'teams' at both locations. OQRS requests by Dean, N7XG (in Oregon), and direct mail requests by N2OO (in New Jersey). Since Club Log and our new processing software automatically matches log data, Dean's job is to simply print, peel and stick labels, add address labels and stuff envelopes. His team has already prepped for the process. Bob, N2OO's, team consists of 4 experienced 'processors' who must manually process each mailed request. We have already 'pre-processed' about ½ of the mail received and continue to work on it daily. So, we appreciate your patience while we gear up for the big QSL push on both coasts! We just wanted everyone to know that we are 'actively' working on the TX5K QSLs. Please save your 'inquiries' until after you hear that we are 'current' on the processing. THANKS! See ya' in the Pileups!.... Bob Schenck, N2OO"

QSL RECEIVED VIA LoTW: 5B4AJC, 5B75FOC, 5H1DX, 5Z4/DL1QW, 5T0SP, 8P6SH, AC2BF/KH2, AO6FOC, D4C, DJ5MW, FG4NO, GH3IT, GT4FOC, HC6EP, IS0FOC, J75KG, JH1GBZ, JK3HLP, KH6FOC, PJ2T, PJ4/NA2AA, PJ7MF, PY2KC, R75FOC, R9FM, SG8X, SQ6ODD, TM6FOC, VA7DX, YJ0PO, ZM1A and ZS6X

SCANDINAVIAN AND IOTA TOUR. Przemy "Mek", SP7VC, announced that he and YL Kasia, SQ7OYL, would be travelling by car around Scandinavia between July 26th and August 27th. Their trip passes through the following countries: Poland (SP), Lithuania (LY), Lativa (YL), Estonia (ES), Finland (OH), Norway (LA), Sweden (SM), Denmark (OZ), Germany (DL) and back to Poland (SP). See route on QRZ.com. During the trip they are planning to activate about 12-16 IOTA islands and several locators on HF bands, 50, 70, 144 MHz and microwaves. They are going to drive about 9500 km in 30 days. Here are the approximate dates of their activities from various islands and locators:

DATE	CALL	POSITION/IOTA	LOCATOR
July	26-27th	LY/SP7VC	LY- Hamfest KO25GC
July	28-29-30th	YL/SP7VC & ES/SP7VC	Trip LY & ES KO19, KO18 & KO29
July	30-31st	OH/SP7VC	Orslandet Is. EU-097 KO19WX
August	1st	OH/SP7VC	City Salo KP10NJ
August	2nd	OH/SP7VC	Anntoora Is. EU-173 KP01RQ

August 3rd OH/SP7VC Borsskarret Is. EU-101 KP03QE
August 4th OH/SP7VC Hailuoto Is. EU-184 KP25MB
August 5-6th OH/SP7VC Trip to Vardo Island KP26, KP27, KP38,
KP39, KP49 & KQ40
August 6-7th LA/SP7VC Vardo Is. EU-141 KQ50NJ
August 8-10th LA/SP7VC Mageroya Is. EU-044 KQ21VC
August 11-15th LA/SP7VC Loppa Is. EU-044 KQ00QI
August 16th LA/SP7VC Senja Is. EU-046 JP89XF
August 17-18th LA/SP7VC Loffoten Is. EU-076 JP67LC, JP68, JP78
& JP79
August 19th LA/SP7VC Hitra & Froya Is. EU-036 JP43LO
August 20-21st LA/SP7VC Vigra Is. EU-056 JP32BM
August 22nd LA/SP7VC Gurskoy Is. EU-079 JP22VG
August 23rd LA/SP7VC Stord Is. EU-055 JP29QX
August 24th SM/SP7VC Tjotn-Hono Is. EU-043 JO57TQ
August 25th OZ/SP7VC Sjaelland Is. EU-029 JO55PX
August 26th OZ/SP7VC Fyn Is. EU-172 JO55
August 27th DL/SP7VC Trip Hamburg-Lodz

For QSL info, see QRZ.com for SP7VC (PayPal, Mail, LoTW & Bureau).

T33, BANABA ISLAND (Update). The international team of operators who attempted to activate Banaba Island (OC-018) last year has rescheduled their activation of Banaba between November 5-18th. Operators mentioned are Jay/AA4FL, Alan/AD6E, Gerhard/DJ5IW, Franz/DK1II, Dominik/DL5EBE, Axel/DL6KVA, László/HA0NAR, Al/K3VN, Cliff/KD6XH, David/N1EMC (Co-leader), Arnold/N6HC, David/N6HD, Mike/N9NS, Jay/W2IJ (Co-leader), Charlies/W6KK, Ann/WA1S, Robert/WA1F, and Ron/WA6FGV and Chris/VK3FY. Activity will be on 160-10 meters using CW, SSB and RTTY. They will have six stations on the air at two different sites. A OQRS by ClubLog will be available and will be the preferred method to use for your QSL confirmation. Logs will be posted to Logbook Of The World (LoTW) approximately 6 months after the conclusion of the DXpedition. Direct QSLs are via W2IJ. QSLs will also be available direct by the Bureau. For more details, visit the T33A Web page at: http://www.t33a.com/index.htm

VK9C, CHRISTMAS ISLAND. By the time you read this, WIA Director Fred, VK3DAC, will be QRT (as June 4th) as VK9DAC from Christmas Island. However, Fred will again return to the island on June 28th for a DX holiday. Activity will be 80-10 meters SSB (including the WARC bands) using an IC706 with 100 watts into an ATU with a dipole wire antenna and a squid pole vertical. He also will have a VHF and UHF 2 element yagi with him. QSL to: Yarra Valley Amateur Radio Group, 248 Johnston Street, Abbotsford, Victoria, 3067, Australia. An E-QSL is available for confirmed contacts via <vk9dac@...>.

VP2V, BRITISH VIRGIN ISLANDS (6m Op). Just a reminder that Dave, W9DR, will be active as VP2V/W9DR from the north shore of the Island of Anegada (NA-023) in the British Virgin Islands (FK78TR) between June 14-28th. Activity will be on 50.115 MHz (SSB) and 50.115.6 MHz (CW). He will also be running a beacon on 50.115.6 when the band is not open. Please submit

confirmation request (QSL) to W9DR home address (QRZ.com).

XW, LAOS. Champ, E21EIC (ex-XW1IC), will be working in Laos between June 15th and September 14th. He informs OPDX that he will be active as XW0YJY and will also be in the All Asian DX CW Contest (June 15-16th) as a Single-Op/All-Band/Low-Power entry. Outside of the contest, Champ's activity will be on 160-2 meters. He mentions also that during this period he will be working between Vientiane, Laos, and Bangkok, Thailand. QSL via E21EIC and LoTW. Visit it his FaceBook and Web page at:
https://www.facebook.com/SomChamp
http://www.e21eic.net/index.php

ZD7, ST. HELENA ISLAND. Bob, VP8LP, is now active as ZD7LP from St. Helena Island (AF-022) until June 14th. Activity this past week was on 17/15/10 meters SSB. QSL only direct to VP8LP.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, N2OO, W2GB, NG3K & ADXO, W3UR & The Daily DX, WK3N, N4AA & QRZ DX, N4JF, WF4W, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, CU3AA, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, E21EIC, EA5GL, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK2XDE, IZ2DPX, Mediterraneo DX Club, OK1RK, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PD5MVH, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, VE7DP and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd-June, through Sunday, 9th-June there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4X, 5B, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A4, A5, A6, A7, A9, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5R, MADAGASCAR. Flavio, IW2NEF, will be active as 5R8NE from Nosy-Be Island (AF-057) between July 16-30th. Activity will be on 40-10 meters using SSB, and a FT-857 into a fishing rod antenna at 10 meters. He also plans to be in the RSGB IOTA Contest (July 27-28th). QSL via IK2DUW.

A2, BOTSWANA. Roger, ZS6RJ, will once again be on a one man DXpedition for 4-5 days in Botswana (WW.Loc KG47AC) as A25RJ starting June 15th. Activity will be from Tuli Block, Eastern Botswana, focusing on 80-10 meters, CW and Roger states, "Look forward to working you in the pile-ups!" QSL via LoTW or direct using the QRZ.com address. There is no bureau service for Botswana.

A5, BHUTAN. Yuki, JH1NBN, will be active as A52W between June 9-19th. Activity will be limited to his spare time because he is there once again on a business trip. Yuki will operate SSB with 100 watts into wire antennas. QSL via JH1NBN direct. For more details, check: http://www.1nbn.net/index.htm

AFFA AVAILABLE (Another WWFF Award). Joao, CU3AA, AFFA Award Manager, is pleased to announce the "Azores Flora Fauna Award" (AFFA). All effort were made to make AFFA recognized as another WWFF award, as well as all its protected areas, since the aim is the same. Unfortunately, such recognition wasn't done as it was expected. However, hoping that soon their efforts might be recognized. They have the recognition and support of the regional authorities. You can access their Web site at: http://www.azoresflorafauna.wix.com/azoresflorafauna
They suggest, "If you wish, leave your thoughts, comments or suggestions."

C8, MOZAMBIQUE (Update/Press Release #2). Tom/N4XP and Don/N1DG, the C82DX DXpedition Co-leaders, posted the following press release (#2) on June 4th on the DXpedition's Web page [edited]: "Planning and preparations are continuing for our October 2013 Mozambique DXpedition. Our license has been issued and is in hand with the callsign C82DX. We are happy to announce this will be the first use of the C82 prefix. We will be active starting October 15th, for eight days with operations ongoing through October 22nd. We are also pleased to announce Ray Novak, N9JA has joined our team.
ZS6P and ZS6RI will travel to our operating site the first week of June for scouting, planning and preparation purposes. Our location in Xai Xai is located directly on the ocean in the southern part of Mozambique. Low Band operations remain the primary objective, and we have secured both Titanex and Battle Creek Special verticals. We have also obtained the sponsorship of Array Solutions with one of their new shared apex loop array RX systems. They join ICOM (our main equipment supplier with IC7600s) and SteppIR (CrankIRs) as our major donors to our DXpedition.
During the day we will operate all HF bands including 6 meters. Our website is now live, <www.c82dx.com>, where you can learn more about our plans."

C9, MOZAMBIQUE. Antonio, EA4GBA, will be active as C91GBA from Matola starting June 27th through December 15th. Activity will be on all HF bands using SSB and a Yaesu FT-857 with 100 watts into a dipole. QSL via EA4GBA direct (w/SAE and 2 USDs). QSL cards will be answered once he arrives back in Spain early 2014.

CANADIAN ARCTIC IOTAS TO BE ACTIVATED! Mike, VE2XB, currently active from the Canadian High Arctic IOTA Dorset Island (NA-156) as VY0BRR

(he states, VY0BRR -- It's FREEZING), is planning to activate other very rare IOTAs within the Region of Nunavut. His QTH is Cape Dorset, an Inuit hamlet located on Dorset Island near Foxe Peninsula at the southern tip of Baffin Island in the Qikiqtaaluk Region of Nunavut, Canada. The Inuktitut name of the village means "high mountains." Mike provides interesting details and history of Cape Dorset and Dorset Island on his Web and QRZ.com pages at:
http://www.qrz.com/db/VY0BRR
http://vy0brr.jimdo.com
Mike is looking to travel to other places in Nunavut, and will activate some very rare IOTAs including: Coral Harbour, Southampton Island (NA-007), Sanikiluaq, Belcher Islands (NA-196), Igloolik (NA-174), Cambridge Bay, Victoria Island (NA-006) and Qikiqtarjuaq, Broughton Island (NA-130). He also adds, "Maybe I will travel to some rare IOTAs in the Northwest Territories or NWT to the West...and maybe to Yukon too. (Vy1)." Activity from these location has not been provided, but in the past Mike was active on 80-10 meters, depending on band conditions, using CW and SSB. QSL via VE2XB with SASE and Canadian stamps or 2 IRCS or 2 USD. See QRZ.com for details and address.

CE0Y, EASTER ISLAND. Jose, CE3YHO, has announced that he is traveling to Easter Island by the end of June in order to live there with his wife (islander) and two sons that actually are living on the Island. Once living there, Jose will install a Ham Radio station on HF, VHF and UHF, and expects to begin operations as CE0YHO at the end of July or August.

DXCC NEWS (NODXA Member's Achievement). Congratulations to NODXA member Scotty, WK3N, for exceeding the 3000 confirmed mark in the ARRL DXCC Challenge. He is the Northern Ohio DX Association's second member to exceed the 3k level with his last submission giving him 3003 confirmed. NODXA's first member to reach 3k was Don, K8MFO. Don has an astounding Challenge total of 3144. The ARRL DXCC Challenge presently has 73 members from 19 countries with 3k or more confirmed QSOs. They are to be commended for an achievement that takes a lifetime.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
VU7KV ☐ Lakshadweep Islands (DXCC Entity Code ☐ 142); May 2013 operation

Note: If anyone had this contact rejected in a recent submission send an E-mail to <bmoore@...g> to be placed on the list for an update to your record.

EF8, CANARY ISLANDS. Luis, EA8AY, will be active as EF8X from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-band entry. QSL via W2GR. Visit his Web site at: http://www.ea8ay.com/ef8x

FS, ST. MARTIN. Just a reminder that John, K9EL, will once again activate FS/K9EL from St. Martin (NA-105, DIFO FS-001, WLOTA 0383, WW Loc. FK88) between June 11-28th. Activity will be on 80-6 meters. Daily uploads to ClubLog and LoTW are planned. John has a new QTH this year and should

have a better signal to the USA on 6 meters. QSL via his home callsign.

H44, SOLOMON ISLANDS. Gregory, VK1AI, has once again returned to Honiara on June 3rd, and is active as H44PA until June 30th. Activity will probably be on 20/17/15 meters CW mainly. QSL via VK1AI, direct or by the Bureau. ADDED NOTE: Gregory states, "Cards for my 2012 operation are ready for dispatch to the Bureau. Anyone wanting a card direct is welcome to do so."

H44, SOLOMON ISLANDS (IOTA Op/Update to OPDX.1103/1104/1105). By the time you read this, operators Ralph/5W0W/H44RK, Maggie/H44MK (the only local YL Ham from Sikiana), Stan/SQ8X, Dom/SQ9KWW and Tom/WL7HP will be active as H44IOTA from Florida Islands (OC-158) as part of their IOTA tour until June 13th. Their next stop is from the very rare Stewart Island (OC-285) between June 17-24th. ADD NOTE (From their Web Page): "The H44IOTA Team informs that plans to activate IOTA OC-285 between June 4-7th, 2013 by H44S and H44AJ are not associated with 'H44IOTA DXpedition' nor 'The Pacific C3 Project'. The H44IOTA Team continues their plans as scheduled. We□re really looking forward to make contacts with IOTA chasers from all islands as planned." Remember, activities will be on 80-10 meters using CW and SSB. See OPDX.1104 for frequencies. All QSL requests are via QSL Manager Rex Turvin, NR6M. For updates it is suggested to watch:
http://www.qrz.com/db/H40RK
The group now has a Web, Twitter and FaceBook page at:
http://www.h44iota.com
https://twitter.com/h44iota
https://www.facebook.com/pages/H44-IOTA-DXpedition/136003426577924

IB2, ITLAY (Special Event). Members of the ARI Lomazzo "Project DX Team" are celebrating the 20th anniversary of the foundation. Look for all its members to use the special callsign IB2PDT between June 21st and July 7th, and between September 20th and October 6th. The event's main goal is to celebrate the anniversary, but also to remember and give a tribute to all the founders. All the QSOs will be sincerely appreciated, and also SWL reports. The QSL is sure via the Bureau to IQ2LZ.

II8, ITALY (Late Announcement, LH Op!). Alex, IK8YFU, and other Calabria DX Team members were expected to be active as II8LH on June 8th, from the Capo Vaticano lighthouse (WAIL CL-005, ARLHS ITA-047), located in Ricadi (VV)Vibo Valentia Province, Calabria region, Italy. QSL via the Bureau to HB9FHZ (USKA Bureau). QSL via IK8YFU direct. E-QSL Authenticity is guaranteed. Also LoTW. For more info, see: http://www.calabriadxteam.it

IOTA NEWS.....
AF-019. Emilio, IZ1GAR, will be active as IH9R from Pantelleria Island (IIA TP-001, WLOTA 0041) during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band entry. Pantelleria counts as Multiplier Zone 33 Africa Italy for the CQWW DX rule (islands are located over the African continent platform). QSL via IZ1GAR, direct or by the Bureau.

AS-043. Ted, JF1CCH, will be active as JF1CCH/1 from Hachijo Island between June 14-17th. Activity will be on the usual IOTA frequencies operating mainly CW. QSL via his home callsign.

AS-147. The "425 DX News" reports that Taka, JA8COE, will be active as JA8COE/8 from Yagishiri Island on June 20-24th (weather permitting) and again on July 25-29th, for the RSGB IOTA Contest (July 27-28th). QSL via his home callsign, direct or by the Bureau.

EU-038. Marcel, PD5MVH, will once again be active as PD5MVH/P from Vlieland Island between August 31st and September 14th. Activity will be on 40/20/10 meters SSB. QSL via his home callsign, direct or by the Bureau. NO LoTW or eQSL.

EU-093. Manel, EA3EGB, will be active as EA3EGB/5 from Benidorm Island (DIE E-007, WW Loc. JM08) and lighthouse (FEA E-0172, WLH EA-003, WLOL SPA-165, WLOTA 3329, Admiralty E 0172) on June 16th. Activity will be on 40-6 meters using SSB and RTTY. Benidorm Island is located in the Province of Alicante. QSL via his home callsign, direct or by the Bureau.

EU-129. Operators Hardy/DL3KWF, Bert/DK3BK, Gun/DF2TG and Roland/DL9GMN will be active as DM3X/P from Görmitz Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/Low-Power entry. QSL via the Bureau.

EU-137. Lars, SM6CUK, will be active as SA6G/7 from Ven Island (WLOTA 0780) between June 10-17th. Activity will be holiday style on the HF bands. QSL via SM6CUK, by the Bureau or direct.

EU-177. Olaf, G0CKV, will be active as SM5CKV/P from Harstena Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/ CW-Mode entry. QSL via G0CKV.

NA-058. Tad, WF4W, informs OPDX that a group of 10-12 operators will activate Sapelo Island (USA738 and USA1014) as K4S in the Georgia State IOTA Group between September 12-14th. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. QSL via LoTW, eQSL and direct (w/SASE or IRC) only. Information good on QRZ.com.

NA-067. Nathan, N4YDU, will be active from Ocracoke Island between July 25-28th. Activity will be on 80-10 meters using CW and SSB. Operations will also include the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/Low-Power/Assisted entry using the callsign W4O. QSL via N4YDU direct only.

NA-143. Bodo, DF8DX, will be active as KT3Q/5 from Galveston Island between July 27-29th. Activity will include the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/12-Hour/Low-Power/DXpedition entry. QSL via DF8DX, direct, by the Bureau or LoTW. ADDED NOTE: Before the contest, look for Bodo to be

active between July 19-20th as KT3Q/6 from Anacapa Island
(NA-144), and between July 26-27th as KT3Q/5 in the Texas
State West IOTA Group (NA-092).

NA-181. Operators Klaus/VE7KDU and Frank/VE7DP, who were expected to
activate the Estevan Islands (Barnard Island) as homecall/7
between June 7-9th, had to postpone their operation due to
bad weather and a high K index.

NA-204. (Update) The Cuban T46A group will activate the special callsign
T46C from Santa Maria Island between June 13-17th. The operators
mentioned are Ore/CO6LC, Jose/CO6EC, Yordany/CO6YAC, Amaurys/
CO6WYR, CL6RLD and Luis/CO6LP. They will try to maintain 2-3
stations [one CW, one SSB and one RTTY] on the air transmitting
on 160-10 meters, including 30/17/12 meters, using CW, SSB and
RTTY, into yagis, beverages and verticals. For the 80m and 160m
bands, they will only have one band on at a time and mainly CW
because of their antenna. QSL via EA5GL.

OC-177. Operators Joy/YB0NSI, Jeffrey/YC0LOU and possibly one other
will be active from Damar Island (Edam Island) and the Vast
Licht lighthouse (WLOTA 2749) between June 27-30th. Activity
will be on 80/40/15/10 meters (and possibly 30/17/12m) using
CW, SSB and the Digital modes. QSL via YB0JZS. More details
are expected to be forthcoming. For more details and updates,
watch: http://ye0edam.blogspot.com

OC-285. (Late Info) Operators Nando/IT9YRE and Mike/K9AJ were active
this past week (June 4-6th) from Sikaiana Atoll as H44S and
H44AJ, respectively. They had to QRT early because of bad
weather, but they made some 5945 QSOs. For more details, see:
http://www.it9yre.it/h44

JD1, MINAMI TORISHIMA. Take, JG8NQJ, will once again be active as JG8NQJ/JD1
from Marcus Island in the Minami Torishima (OC-073, JCG 10007) group for
the next few days in the month of June. He is there to work on the island's
weather station. Activity will be mainly on 17/15/12/10 meters CW. QSL via
his home callsign, by the Bureau or direct to JA8CJY: Susumu 'Sin' Sanada,
5-17, 5-4, Shin-Ei, Toyohira, Sapporo 004, Japan. Online log is available
at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

KH6, HAWAII. Alex, F4GHS, will be active as KH6/F4GHS from the Hawaiian
Islands (OC-019) between August 3-23rd. Activity will be holiday style
on 80-10 meters using SSB and an Icom IC-706MKIIG into G5RV antenna.
While there, Alex will be activating the various islands in the Hawaii
Islands IOTA Group: Oahu (August 3-7th), Kauai (August 7-12th), Maui
(August 12-18th) and the Island of Hawaii [Big Island] (August 18-23rd).
QSL via F0GAZ direct.

MJ, JERSEY. Operators Jo/PA9JO, Alex/PA1AW and Ron/PA3EWP will be active as MJ/homecall from the Jersey Amateur Radio Society at the old German signal station at La Moye on Jersey (EU-013, WW. Loc. IN89ve) between June 20-24th. Activity will be on 160-10 meters using all modes. QSL via LoTW or direct (all callsigns) to Alex, PA1AW. A OQRS will be available on their Web page at: http://www.cqfriends.com/mj2013

MU0, GUERNSEY (Contest/Satellite Op). Operators Peter/2E0SQL, Louis/2U0FER, Jimmy/M0MJH, Iain/M0PCB, Daniel/M0TCB and Steve/M0SPF will be active as MU0THJ from Guernsey Island (IOTA EU-114) during the RSGB IOTA Contest (July 27-28th) as a Multi-Op entry. QSL via 2E0SQL. ADDED NOTE: Look for Peter, 2E0SQL, to be active as 2U0SQL/P between July 25-30th. He plans to be active on the satellites. QSL via his home callsign, direct, by the Bureau or LoTW.

OG0, ALAND ISLAND. "The Daily DX" reports that operators Pertti/OH2BEE/OG2W and Raimo/OH2BCI will be active from the OH0Z station <www.oh0z.net> on Aland Islands (EU-002) between June 14-17th. While using Pertti's, OG0W, callsign, look for activity on 160-10 meters (no WARC-79 Bands) using CW only. Their activity will also include the All Asia DX CW Contest. QSL via OH2BEE direct. Also QSL via LoTW or eQSL.

OL140, CZECH REPUBLIC (Special Event). A group of Czech operators are now active as OL140FIRE from the Fire Brigade in Horni Marsov until June 15th. Activity is to celebrate the 140th anniversary of Fire Brigade in Horni Marsov and the meeting of volunteer Fire Brigades "Hasicske Slavnosti 2013" (which was cancelled due to ongoing floods - see QRZ.com for pictures) in Litomerice. They would like all licensed hams which are members of a professional and volunteer Fire brigades, active or retired, all around the world to call them. Every QSO with OL140FIRE will be confirmed with "thematic" QSL card. QSL via OK5AM, by the Bureau or direct. An award is available, see QRZ.com for details.

OX, GREENLAND (Update). An international group of YLs will once again activate amateur radio from Kangerlussuaq between August 16-20th. Their callsign will be OX5YL. Operators mentioned are Unni/LA6RHA, Mio/JR3MVF, Chae/HL1KDW, Kay/WA0WOF and Solveig/SM6KAT. QSL via PY5YL, direct or by the Bureau. The last YL expedition was in 2010 and was very successful. For more information, visit their Web site at:

http://home.online.no/~la6rha/greenland2013.htm

P4, ARUBA. John, W2GD, will be active as P40W from Santa Cruz, Aruba (SA-036, WLOTA 0033), during the CQWW DX CW Contest (November 23-24th). Operating class is to be determined. QSL via LoTW or N2MM (QRZ.com). Look for some 30/17/12 meters and 160 meters operations before the contest as time permits. PLEASE NOTE: 60m operation is NOT authorized on Aruba. Log will be posted to LoTW within two weeks. ALSO, John plans to end responding to P40W QSL card requests by the end of 2013. Confirmations for P40W only via LoTW thereafter.

P5, NORTH KOREA (P5 PROJECT). Paul, N6PSE, was reported to be on his way to Beijing on June 5th, then on to Pyongyang, North Korea, to begin the negotiations for a DPRK DXpedition. David, AH6HY, is expected to join the efforts later sometime this week. Updates can be seen on the following socail medias: https://twitter.com/N6PSE
http://www.intrepid-dx.com/p5
https://www.facebook.com/pages/The-Intrepid-DX-Group/180857615282553

PJ4, BONAIRE (Update). Armin, DL1DI, will be active as PJ4D from Bonaire (SA-006, WLOTA LH-1279) between June 22nd and July 10th. He will be there on holiday. Activity will be on 80-10 meters SSB using a Spiderbeam and FD4 from Fritzel with 100 watts. QSL via DL1DI, direct or by the Bureau. Sorry no eQSL or LoTW.

TX5K QSL STATUS (Press Release), QSL Manager Bob, N2OO, reports: "The TX5K QSLs for the March Clipperton Island DXpedition should start to flow out sometime around the end of June. Although it has only been about 2 ½ months since the DXpedition ended, there has been some 'interest' in the status of the QSL process. We are a little behind due to a com-bination of reasons beginning with delays getting the design started due to the XE1L situation, and normal post-DXpedition craziness. Then there were some simple unfortunate timing issues with each of us involved in the process. However, I am happy to report that the card design is almost done, and once proofed will be sent to our printer (WZ8P) who

is ready to go. Once printed, the cards will be divided between the two primary QSL Managers and processed by 'teams' at both locations. OQRS requests by Dean, N7XG (in Oregon), and direct mail requests by N2OO (in New Jersey). Since Club Log and our new processing software automatically matches log data, Dean's job is to simply print, peel and stick labels, add address labels and stuff envelopes. His team has already prepped for the process. Bob, N2OO's, team consists of 4 experienced 'processors' who must manually process each mailed request. We have already 'pre-processed' about ½ of the mail received and continue to work on it daily. So, we appreciate your patience while we gear up for the big QSL push on both coasts! We just wanted everyone to know that we are 'actively' working on the TX5K QSLs. Please save your 'inquiries' until after you hear that we are 'current' on the processing. THANKS! See ya' in the Pileups!.... Bob Schenck, N2OO"

SCANDINAVIAN AND IOTA TOUR. Przemy "Mek", SP7VC, announced that he and YL Kasia, SQ7OYL, would be travelling by car around Scandinavia between July 26th and August 27th. Their trip passes through the following countries: Poland (SP), Lithuania (LY), Lativa (YL), Estonia (ES), Finland (OH), Norway (LA), Sweden (SM), Denmark (OZ), Germany (DL) and back to Poland (SP). See route on QRZ.com. During the trip they are planning to activate about 12-16 IOTA islands and several locators on HF bands, 50, 70, 144 MHz and microwaves. They are going to drive about 9500 km in 30 days. Here are the approximate dates of their activities from various islands and locators:

DATE	CALL	POSITION/IOTA	LOCATOR
July 26-27th	LY/SP7VC	LY- Hamfest	KO25GC
July 28-29-30th	YL/SP7VC & ES/SP7VC	Trip LY & ES	KO19, KO18 & KO29
July 30-31st	OH/SP7VC	Orslandet Is. EU-097	KO19WX
August 1st	OH/SP7VC	City Salo	KP10NJ
August 2nd	OH/SP7VC	Anntoora Is. EU-173	KP01RQ

August 3rd OH/SP7VC Borsskarret Is. EU-101 KP03QE
August 4th OH/SP7VC Hailuoto Is. EU-184 KP25MB
August 5-6th OH/SP7VC Trip to Vardo Island KP26, KP27, KP38,
KP39, KP49 & KQ40
August 6-7th LA/SP7VC Vardo Is. EU-141 KQ50NJ
August 8-10th LA/SP7VC Mageroya Is. EU-044 KQ21VC
August 11-15th LA/SP7VC Loppa Is. EU-044 KQ00QI
August 16th LA/SP7VC Senja Is. EU-046 JP89XF

August 23rd LA/SP7VC Stord Is. EU-055 JP29QX
August 24th SM/SP7VC Tjotn-Hono Is. EU-043 JO57TQ
August 25th OZ/SP7VC Sjaelland Is. EU-029 JO55PX
August 26th OZ/SP7VC Fyn Is. EU-172 JO55
August 27th DL/SP7VC Trip Hamburg-Lodz

For QSL info, see QRZ.com for SP7VC (PayPal, Mail, LoTW & Bureau).

T33, BANABA ISLAND (Update). The international team of operators who attempted to activate Banaba Island (OC-018) last year has rescheduled their activation of Banaba between November 5-18th. Operators mentioned are Jay/AA4FL, Alan/AD6E, Gerhard/DJ5IW, Franz/DK1II, Dominik/DL5EBE, Axel/DL6KVA, László/HA0NAR, Al/K3VN, Cliff/KD6XH, David/N1EMC (Co-leader), Arnold/N6HC, David/N6HD, Mike/N9NS, Jay/W2IJ (Co-leader), Charlies/W6KK, Ann/WA1S, Robert/WA1F, and Ron/WA6FGV and Chris/VK3FY. Activity will be on 160-10 meters using CW, SSB and RTTY. They will have six stations on the air at two different sites. A OQRS by ClubLog will be available and will be the preferred method to use for your QSL confirmation. Logs will be posted to Logbook Of The World (LoTW) approximately 6 months after the conclusion of the DXpedition. Direct QSLs are via W2IJ. QSLs will also be available direct by the Bureau. For more details, visit the T33A Web page at: http://www.t33a.com/index.htm

VK9C, CHRISTMAS ISLAND. By the time you read this, WIA Director Fred, VK3DAC, will be QRT (as June 4th) as VK9DAC from Christmas Island. However, Fred will again return to the island on June 28th for a DX holiday. Activity will be 80-10 meters SSB (including the WARC bands) using an IC706 with 100 watts into an ATU with a dipole wire antenna and a squid pole vertical. He also will have a VHF and UHF 2 element yagi with him. QSL to: Yarra Valley Amateur Radio Group, 248 Johnston Street, Abbotsford, Victoria, 3067, Australia. An E-QSL is available for confirmed contacts via <vk9dac@...>.

VP2V, BRITISH VIRGIN ISLANDS (6m Op). Just a reminder that Dave, W9DR, will be active as VP2V/W9DR from the north shore of the Island of Anegada (NA-023) in the British Virgin Islands (FK78TR) between June 14-28th. Activity will be on 50.115 MHz (SSB) and 50.115.6 MHz (CW). He will also be running a beacon on 50.115.6 when the band is not open. Please submit

confirmation request (QSL) to W9DR home address (QRZ.com).

XW, LAOS. Champ, E21EIC (ex-XW1IC), will be working in Laos between June 15th and September 14th. He informs OPDX that he will be active as XW0YJY and will also be in the All Asian DX CW Contest (June 15-16th) as a Single-Op/All-Band/Low-Power entry. Outside of the contest, Champ's activity will be on 160-2 meters. He mentions also that during this period he will be working between Vientiane, Laos, and Bangkok, Thailand. QSL via E21EIC and LoTW. Visit it his FaceBook and Web page at:
https://www.facebook.com/SomChamp
http://www.e21eic.net/index.php

ZD7, ST. HELENA ISLAND. Bob, VP8LP, is now active as ZD7LP from St. Helena Island (AF-022) until June 14th. Activity this past week was on 17/15/10 meters SSB. QSL only direct to VP8LP.

21294. Re: [DX-IS] Splicing wire in a dipole question

Yahoo group: DX-IS (2013)
Date: 2013-06-10 02:45:19 UTC
From: dale cole
Topic: 21253 Message: 21294

I agree with Paul. Infact during November SS used to tack on a piece on my radials (rooftop) to go from ssb from cw. I kept them around for year after year use, and worked fine.

Dale K8TS

Subject: Re: [DX-IS] Splicing wire in a dipole question

Hi Paul,

Thanks for the feedback. Glad to hear it will work ok. I took some sandpaper to it to get the oxidation off of it, and overlapped a few inches on each wire to splice them together.

73 John AF5CC

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30610
SIDC SOLAR BULLETIN 10 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 10 Jun 2013 until 12 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 Jun 2013 10CM FLUX: 093 / AP: 011
PREDICTIONS FOR 11 Jun 2013 10CM FLUX: 090 / AP: 007
PREDICTIONS FOR 12 Jun 2013 10CM FLUX: 088 / AP: 007
COMMENT:Solar activity has been very low in the past 24 hours, with only a B4.1
flare in NOAA AR 1765 at 1018 UT (peak time), on June 9. This region is now
classified as beta, but is still capable of producing C flares, which
justifies the eruptive conditions foreseen for the next 48 hours.
Geomagnetic conditions are currently unsettled to active at local and
planetary levels. ACE observations show relatively strong variations of the
Bz component of the interplanetary magnetic field, down to -10 nT early on
June 10, but currently attenuating. A very small step in the solar wind
speed around 0200 UT, associated with the beginning of this unsettled
period, hints at the arrival of a very attenuated shock, possibly the
eastern edge of the CME associated with the M flare of June 7. We expect
mostly quiet conditions for the next 48 hours.
TODAY'S ESTIMATED ISN : 020, BASED ON 11 STATIONS.

21297. JT65 on 80m anyone?

Yahoo group: DX-IS (2013)
Date: 2013-06-11 05:53:25 UTC
From: Lance Martin
Topic: 21297 Message: 21297

Hi Guys,

I have a very very modest setup on 80m, an inverted V @ 12m.

I have had some success to ZS and EU around my Sunrise.
I would like to drum up some interest and am offering Zone 29 on 80m!
I have worked into NA on CW, so I reckon given the right time (before NA SR) JT65 would work too.

If you are interested, I am a regular on the K3UK page
http://www.obriensweb.com/sked/index.php?board=lotw
and can QRV from 1130z (earlier if sked made).

73, Lance - VK6DU

21298. RE: [DX-IS] JT65 on 80m anyone?

Lance,

I would love to work you on 80 as Z29 is one I need there but with S9 plus a lot of static crashes, 80 at this time of year is
pretty difficult. We will have to wait until fall when things calm down a bit.

73,

Tim Herrick, KQ8M

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30611
SIDC SOLAR BULLETIN 11 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 11 Jun 2013 until 13 Jun 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 11 Jun 2013 10CM FLUX: 089 / AP: 007
PREDICTIONS FOR 12 Jun 2013 10CM FLUX: 085 / AP: 007
PREDICTIONS FOR 13 Jun 2013 10CM FLUX: 082 / AP: 007
COMMENT:Solar activity was moderate during the past 24 hours, with one noticeable
event, a C1.9 flare, occurring in NOAA AR 1765, on June 10, at 14:24 UT
peak time. It was accompanied by a small EUV coronal wave and a metric type
II burst. Despite a data gap in coronagraphic data from STEREO and SOHO,
around the time of the event, there is a hint around 1554 UT (STEREO COR2
A) of a small narrow CME possibly associated with this flare, but it seems
to quickly vanish. NOAA AR 1765 decreased both in terms of sunspot number
and area, and maintains a simple beta magnetic configuration. Being the
only region on the disk, we expect therefore quiet conditions for flares,
with a small chance of a C class event from this region. Geomagnetic
activity is expected to be low for the next 48 hours. Current
interplanetary conditions, as measured by ACE are quiet.
TODAY'S ESTIMATED ISN : 010, BASED ON 11 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30612
SIDC SOLAR BULLETIN 12 Jun 2013, 1106UT
SIDC FORECAST (valid from 1230UT, 12 Jun 2013 until 14 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 12 Jun 2013 10CM FLUX: 090 / AP: 007
PREDICTIONS FOR 13 Jun 2013 10CM FLUX: 093 / AP: 007
PREDICTIONS FOR 14 Jun 2013 10CM FLUX: 095 / AP: 007
COMMENT:Current solar conditions are extremely quiet, with a low B-level background
for the GOES SXR flux. There are currently two active regions on the Sun:
NOAA AR 1765, close to the west limb, and a new region which emerged on
June 11, close to the central meridian (Catania Region 98). There is a
small chance of a C flare from AR 1765, but one should monitor the
evolution of Cat. 98, as it is already complex enough to produce C flares.
Current interplanetary conditions are quiet and the geomagnetic activity is
low. We expect quiet geomagnetic conditions to persist for the next 48
hours.

PREDICTIONS FOR 15 Jun 2013 10CM FLUX: 100 / AP: 007
COMMENT:Flaring activity was low for the past 24 hours, the strongest event being a
B9.3 flare occurring in NOAA AR 1768 on June 13, 1006 UT peak time. A
partial halo CME was observed on the same day around 0400 UT on LASCO, but
observations indicate a backside event. Finally, a polar crown filament, in
the southern hemisphere partially erupted on June 13, around 1200UT;
coronagraphic observations of the event are not yet available. We foresee
eruptive conditions for the next 48 hours, with a risk of a C flare from
NOAA AR 1768. We currently have very quiet geomagnetic conditions. It is
expected that this situation will prevail in the next 48 hours.

DX Bulletin 24 ARLD024
>From ARRL Headquarters
Newington CT June 13, 2013
To all radio amateurs

SB DX ARL ARLD024
ARLD024 DX news

This week's bulletin was made possible with information provided by E20YLM, NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

BOTSWANA, A2. Roger, ZS6RJ, will be QRV as A25RJ from Tuli Block beginning June 15 and be here for 4 or 5 days. Activity will be on 80 to 10 meters using CW and RTTY. QSL direct to home call.

BHUTAN, A5. Yuki, JH1NBN is QRV as A52W until June 19. Activity is mainly on 40, 20, 17 and 15 meters using SSB. QSL direct to home call.

CHILE, CE. Members of the Chilean Pacific DX Group are QRV as XR80PDI during June to commemorate the 80th anniversary of the Chilean Investigation Police. Activity is on all bands using SSB, RTTY and PSK31. QSL via XQ7UP.

ST. MARTIN, FS. John, K9EL is QRV as FS/K9EL until June 28. Activity is on 80 to 6 meters. QSL to home call.

SOLOMON ISLANDS, H4. A group of operators will be QRV as H44IOTA from Stewart Island, IOTA OC-285, from June 17 to 24. Activity will be on 80 to 10 meters using CW and SSB. QSL via NR6M.

HONDURAS, HR. Look for a group of operators to be QRV as HQ8S from Swan Island, IOTA NA-035, from June 16 to 25. Activity will be on the HF bands using CW, SSB and RTTY. QSL direct via KD4POJ.

THAILAND, HS. Members of the Radio Amateur Association of Khon Kaen are QRV as HS4AK until June 17 in celebration of the association's 22nd anniversary. Activity is on 40 to 10 meters using CW, SSB, RTTY and PSK. This includes being a Multi/Single entry in the All Asian DX CW contest. QSL via E20YLM.

MINAMI TORISHIMA, JD1. Take, JG8NQJ is QRV as JD1NQJ/JD1 from Marcus Island, IOTA OC-073, while on work assignment at the local weather station. Activity is in his spare time on 17 to 10 meters using mainly CW with some SSB. QSL direct via JA8CJY.

SVALBARD, JW. Svein, LA9JKA may be QRV as JW9JKA from Bear Island, IOTA EU-027, from June 16 until mid December. Activity will be in his spare time on the HF and VHF bands. QSL direct to home call.

MARIANA ISLANDS, KH0. Tony, JA6CNL will be QRV as KH0N from Saipan, IOTA OC-086, during the All Asian DX CW contest. QSL to home call.

ALAND ISLANDS, OH0. Pete, OH2BEE and Raimo, OH2BCI are QRV as OG0W until June 17. Activity is on 160 to 10 meters using only CW. This includes being active in the All Asian DX CW contest. QSL via OH2BEE.

BELGIUM, ON. Ivo, ON7IVO will be QRV from the castle Zandvliet during the World Castles Weekend. QSL to home call.

BRAZIL, PY. Special event station PS2013CCB will be QRV from June 15 to 30 during Brazil's hosting of this year's FIFA Confederations Cup. Activity will be on 40 to 10 meters using CW, SSB and various digital modes. QSL via PS7AB.

POLAND, SP. Special event station SN675B is QRV until June 30 in commemoration of the town of Blonie gaining city rights under the Magdeburg Law back in 1338. QSL via SP5KOG.

EGYPT, SU. Vlad, UA4WHX is now QRV as SU9VB. Of late he has been active on 17 meters. QSL to home call.

TURKEY, TA. Kadri, TA1D will be QRV in the IARU Region 1 50 MHz contest from grid locator KM39bp. QSL to home call.

CORSICA, TK. Ale, IW5ELA will be QRV as TK/IW5ELA from June 15 to 19. Activity will be holiday style on the HF bands, QSL via bureau.

BRITISH VIRGIN ISLANDS, VP2V. Dave, W9DR is QRV as VP2V/W9DR from the north shore of Anegada Island, IOTA NA-023, until June 28. Activity is on 6 meters using CW and SSB. QSL to home call.

LAOS, XW. Champ, E21EIC will be QRV as XW0YJY from June 15 to September 14 while on work assignment. Activity will be on 160 to 2 meters. This includes being a Single Op/All Band/Low Power entry in the All Asian DX CW contest. QSL to home call.

THIS WEEKEND ON THE RADIO. Kid's Day SSB Contest, NCCC RTTY Sprint, NCCC Sprint CW Ladder, All Asian DX CW Contest, IARU Region 1 50 MHz Contest, SMIRK Contest, Ukrainian DX Classic RTTY Contest, AGCW VHF/UHF Contest, QRP ARCI QRP Shootout, Stew Perry Topband CW Challenge, World Castles Weekend, West Virginia QSO Party, Feld Hell Sprint and the WAB 50 MHz Phone are all scheduled for this upcoming

weekend. The Run for the Bacon QRP CW Contest and NAQCC-EU Monthly CW Sprint are scheduled for June 17. Please see June QST, page 79 and the ARRL and WA7BNM Contest websites for details.

PREDICTIONS FOR 16 Jun 2013 10CM FLUX: 113 / AP: 007
COMMENT:Solar activity was moderate in the past 24 hours, with only a C1.2 flare
occurring in NOAA AR 1769, on June 14, 00:31 UT peak time. It was
accompanied by a narrow, non-geoffective CME. Additional C flares are
possible from this region. AR 1768 grew in size and complexity and is
likely to produce C flares as well in the next 48 hours, with even a small
risk for an isolated M class event. Therefore, we expect eruptive
conditions for the next 48 hours. Geomagnetic conditions are currently very
quiet, and we expect this situation to persist for the next 48 hours.

From: r_brothers
Topic: 21304 Message: 21304

15 June 2013 A.R.I. DX Bulletin
No 1154
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4O - Alex, UA3RF and Nick, RK3RB will be active holiday style as 4O/UA3RF and 4O/RK3RB from Montenegro between 21 July and 2 August. They will operate CW, SSB, PSK and RTTY on 40-10 metres. On 26-28 July they will be QRV as 4O/UA3RF/p and 4O/RK3RB/p from Sveti Nikola Island (EU-163), and will participate in the IOTA Contest. QSL via home calls, direct or bureau. [TNX UA3RF]
5B - Stavros, 5B4AFM and Philip, 5B4ZN will be active as 5B4AFM/p and 5B4ZN/p from Agios Georgios Island (AS-120) from around 16 UTC on 22 June until around 6 UTC on the 23rd. They will operate mainly CW on 40, 30 and 20 metres, with a focus on North America. QSL via home calls, direct or bureau. [TNX 5B4AFM]
CT7 - Special event station CR6RI will be active for the 104th Rotary International Convention to be held in Lisbon on 23-26 June. It will be operated by the Rotarians of Amateur Radio (www.ifroar.org) on 14293, 14287 and possibly 21293 kHz between 8 and 17 UTC. QSL via CT1REP.
EA - Manel, EA3EGB will be active as EA3EGB/EA5 from Benidorm Island (EU-093) on 16 June. He will operate SSB and RTTY on 40-6 metres. QSL via home call, direct or bureau. [TNX OPDX Bulletin]
EI - The North Cork Radio Group will be active as EI75GP on 21-23 June to commemorate the 75th anniversary of the Cork Grand Prix. QSL via EI3GAB, bureau only.
GJ - Look for Jo MJ/PA9JO, Alex MJ/PA1AW and Ronald MJ/PA3EWP to be active from Jersey (EU-013) on 20-24 June. They will operate on all bands and modes from the Jersey Amateur Radio Society's club station. For all callsigns, QSL via PA1AW and LoTW. They have a webpage on www.cqfriends.com (search for mj2013). [TNX DX World]
H4 - After many trials and tribulations, the H44IOTA team was able to reach Pavuvu, Russell Islands (OC-168) on 12 June. They expected to depart the island on 14 June and sail to Honiara. There they will do some repairs to the boat and meet WL7HP (CW operator) before heading for the next island. A fresh timetable will be posted on their website (http://h44iota.com/). [TNX JN6RZM]
HL - Kei, HL2UVH and other 13 operators will be active as 6M6M between 22 June and 31 July. They will be QRV on 6 metres only, with four high power stations. They will operate from the Korean mainland,

with a possible trip to IOTA group AS-060 on 27-30 June. QSL via HL2UVH. [TNX HL2UVH]
HR - Dan HR2DMR (http://hriotas.com/) hopes to arrive to the Swan Islands (NA-035) on 15 June. He will be QRV as HQ8S for four days [425DXN 1149], but activity might continue until 25 June, depending on the Honduran Navy schedule. QSL via KD4POI.
HS - Founded in 1992, the Radio Amateur Association of Khon Kaen, HS4AK will be back on the air until 17 June. Look for activity on 40-10 metres CW, SSB, RTTY and PSK, with an effort in the All Asian DX CW Contest. QSL via E20YLM. [TNX ARRL DX Bulletin]
KL - Rick, K6VVA will be active as K6VVA/KL7 from Sarichef Island (NA-152) on 25-27 June ("if a major solar X-Flare occurs on the day I am to leave", he says, "the trip could be cancelled (postponed) at the last minute"). He will operate mainly CW on 40, 30, 20 and 17 metres with 200 watts and vertical antennas. QSL via N6AWD, direct or bureau. Further information can be found on http://www.k6vva.com/iota/na152/
LA - LA1MNA, LA5ZN, LA6IOA and LA9RY will be active as LA7H from Utsira Island (EU-055) on 14-16 June. They will be QRV on the HF bands (and possibly 6m) mainly SSB. QSL via bureau or direct. [TNX rsgbiota.org]
OY - G3ZAY, M0GXM, M0ZXA, M1BXF and MD0IGD from the Cambridge University Wireless Society will be QRV as OY/home call from the Faroe Islands (EU-018) on 17-23 June. They will operate mainly SSB with some CW on 40-6 metres (and possibly 4m). QSL OY/G3ZAY, OY/M0GXM and OY/MD0IGD via their home calls (bureau or direct). QSL OY/M0ZXA and OY/M1BXF via G3ZAY. If possible please request bureau cards by email to the qrz.com email addresses rather than by sending a card. [TNX G3ZAY]
OZ - Enrico, DO6EBB will be active holiday style as OZ/DO6EBB from Fano Island (EU-125) from 22 June to 7 July. He will operate on all bands SSB and some digital modes. QSL via home call. [TNX rsgbiota.org]
PJ2 - Wim, ON6DX (ex ON4CIT) will be active as PJ2/ON6DX from Curacao (SA-099) from 28 June to 7 July. He will operate CW, SSB and RTTY on 20-6 metres, with a focus on 6m and on working Asian stations on 10, 12 and 15m. QSL via ON6DX (OQRS for direct and bureau cards on ClubLog), plus LoTW and e QSL. Further information at www.dxpedition.be
PJ4 - Armin, DL1DI will be active as PJ4D from Bonaire (SA-006) from 22 June to 10 July. He will be QRV on 80-10 metres SSB. QSL via home call, direct or bureau.
SM - Bodo, DF8DX plans to be active as SM0/DF8DX from Vaxholm Island (EU-084) on 17-19 June. QSL via home call, direct or bureau. [TNX DX Newsletter]
SM - Bernd, DL8AAV will be active as SD1B/6 from Orust Island (EU-043) on 17-29 June. QSL via home call, direct or bureau. [TNX rsgbiota.org]
SV9 - Gianni, SV2FPU will be active holiday style as SV9/SV2FPU from Gavdos Island (EU-187, WWL KM24bu) on 19-30 June. He will operate

CW (3503, 7003, 10103, 14003, 18073, 21003, 24893, 28003 and 50093 kHz), SSB (3795, 7115, 14260, 18160, 21260, 24960, 28460 and 50160 kHz) and RTTY (3590, 7050, 10145, 14080, 18105, 21080, 24925, 28125 and 50250). QSL via home call and LoTW. [TNX SV2FPU]
TK - Alex, IW5ELA will be active holiday style as TK/IW5ELA from Corsica (EU-014) on 15-19 June. He will operate mainly CW on the HF bands. QSL via home call (bureau preferred). [TNX DX Coffee]
UA - Alexei RN1ON, Yuri UA1OC and Oleg UA1PBA/ZS1ANF will be active as RK1OZM/p from Zhizhginskiy Island (EU-153) and lighthouse until 16 June. They operate CW and SSB on 40-10 metres. QSL via RN1ON. [TNX RN1ON]
UA - Valentina V. Tereshkova is the first woman to have flown in space. Special station R1963VT will be active on 16-23 June to commemorate the 50th anniversary of her historic three-day flight on Vostok 6. QSL RK3MWA.
VE - Mike, VY0BRR (VE2XB) is on Dorset Island (NA-156), and has plans to travel in the future "to other places in Nunavut" and to "activate some very rare IOTAs including NA-007, NA-196, NA-174, NA-006 and NA-130". See http://vy0brr.jimdo.com/ for further information [TNX DX World]
VQ9 - Once again Jim, VQ9JC (ND9M) will use a special prefix from Diego Garcia (AF-006), and will be active as VQ93JC from 22 June to 7 July before returning to the US. Look for him to be QRV in the 1200-1600 UTC time frame. He is still operating Field Day style from a recreational park with 100 watts to single band dipoles. QSL via ND9M. [TNX The Daily DX]
W - Look for AJ4T, KI4GGJ, KJ4AVG, KV4T and W4CCF to be active from Dauphin Island (NA-213) on 19-24 June. QSL via their individual home calls. [TNX rsgbiota.org]

425 DX NEWS MAGAZINE ---> The May 2013 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

EU-152 ---> Christian EA3NT, Ramon EA3OR, Raul EA5KA and Vincent F4BKV from the Invoker Team (www.invokerteam.com) made 2959 QSOs as EG3INT/7 from San Juan de Los Terreros (EU-152) on 8-9 June. They had to close down some 24 hours earlier than planned because of unfavourable wind and sea conditions. QSL via EA5KA. Logsearch and OQRS for direct an bureau cards are up and running on Clublog.

INTERNATIONAL POSTING SERVICE ---> The International Posting Bureau is a non profit service to assist World DXpedition Teams send their QSL mailings at discounted postal costs, so that the team can divert finances to where they are most needed at the DXpedition. For further information please

visit www.m0urx.com/internationalpostingbureau.html

QSL LU8XW ---> Radio Club Ushuaia has decided to handle its own QSLing, and WD9EWK (http://qsl.wd9ewk.net/) is no longer the QSL manager for LU8XW and its other call signs: LT5X (since 2009, including the 2013 expedition to Isla Redonda, SA-049), L25X (2010 only), AY7X (2007-2008) and AY8XW (2002 only). QSLs for these calls can be sent to LU8XW (Radio Club Ushuaia, P.O. Box 58, V9410WAB, Ushuaia, Argentina).

QSL VIA US3IZ ---> A large number of /p stations with callsigns in the EM23IA-EM23IZ, EN23IA-EN23IZ and EO23IA-EO23IZ series Participated in the Ukrainian Radio Sport Team Championship On 1 June. QSL for all of them via US3IZ.

TROMELIN 2014 ---> The Radio Club de Provins (F6KOP) and the Lyon DX Gang (F6KDF) are joining forces "in an effort to put Tromelin back on the air in 2014". As of today "all of the necessary documents have not been signed", but their "relationships with TAAF are very constructive" and the project "is well underway". [TNX F5NQL]

YE3I ---> Pictures and logsearch for the recent activity from Gili Ketapang (OC-237) can be found on www.mdxc.org/ye3i

Hi Dale

YES!!! I have and at&t custom service (or non service) I dumped at&t
everything,
Internet, house phone and cell. I got so tired of waiting on someone
to talk too.
When I found a new service and called at& to have all service
disconnected, they asked
for a security that I did not know and they said they could not
disconnect without it and
I would have to go a an at&t store and show my ID so I did. And it
started before the
upgrade.

SIDC SOLAR BULLETIN 15 Jun 2013, 1106UT
SIDC FORECAST (valid from 1230UT, 15 Jun 2013 until 17 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 15 Jun 2013 10CM FLUX: 115 / AP: 008
PREDICTIONS FOR 16 Jun 2013 10CM FLUX: 117 / AP: 007
PREDICTIONS FOR 17 Jun 2013 10CM FLUX: 120 / AP: 007
COMMENT:Solar activity was moderate during the last 24 hours. A C1 flare took place
in NOAA AR 1771, close to the East limb on June 15, peaking at 0400 UT. It
was a long duration event linked to a CME as witness by SDO/AIA
observations (there is a data gap in LASCO observations). There is no risk
of geomagnetic consequences. We expect at most isolated C flares from the
following ARs: AR 1768, AR 1769, and to a lesser extent AR 1772, 1770 and
1771. We expect essentially quiet geomagnetic conditions for the next 48
hours.

Thanks for the report Steve. Out of the 38 spam messages I recieved in the past ~24 hours none have come from DX-IS, thankfully. However, I am getting a lot from other groups I belong to. (even on the same thread) DX-IS is not of concern now. I must find why I am getting it from other groups. Thanks to all the DX-IS members for all their replys both on and off the board.

21312. ClubLog E-Mails

Yahoo group: DX-IS (2013)
Date: 2013-06-16 02:39:42 UTC
From: Ron Notarius W3WN
Topic: 21312 Message: 21312

Anyone have a good email address for the support staff from ClubLog?

I've suddenly been receiving emails from someone allegedly from them, demanding that I start uploading logs. However, my attempts to reach them at the usual email addresses are being rejected (and that includes the ones shown in the email).

I get very suspicious when I suddenly & unexpectedly start getting emails from any organization that I've had minor involvement with, especially when they include demands that I take certain actions. That's one red flag; a second goes up when email replies, or email forwards, start getting blocked or rejected as unavailable.

So, either I'm hearing from some very rude people - or there's a phishing attempt by persons unknown going on. Either way. without a good email address, I spinning my wheels.

Thanks!

I'll give that a try Iain.

I do think it's poor form, if these emails are legit, to bounce replies and then force someone to use a web address that may or may not actually go anywhere.

I've had enough professional experience with some of the spammers to know that that method is often used as a convenient way to meet the technical letter of legislation, without actually attempting to do anything to meet the spirit of it. But I'll try.

Thank you Iain. I was able to create a ticket.

There is a certain irony... assuming this was email was actually sent from ClubLog, the help site has a ReCAPTCHA system in place to block spam... but from a blocked email address, with no legitimate address for comments.

I throw away a good dozen or so a week like that at work, often from people trying to sell me interesting "personal" pharmaceuticals, or get rich quick schemes, to say nothing of those telling me about people who have recently died somewhere in Africa, and boy, did they leave a ton of money in the bank...

21319. ARLP024 Propagation de K7RA

Yahoo group: DX-IS (2013)
Date: 2013-06-14 16:10:03 UTC
From: jjreisert@...
Topic: 4822 Message: 21319

SB PROP @ ARL $ARLP024
ARLP024 Propagation de K7RA

ZCZC AP24
QST de W1AW
Propagation Forecast Bulletin 24 ARLP024
>From Tad Cook, K7RA
Seattle, WA June 14, 2013
To all radio amateurs

SB PROP ARL ARLP024
ARLP024 Propagation de K7RA

Average daily sunspot numbers declined over 32 points this week to 39.6. Average daily solar flux was down more than 8 points to 99.2. Tuesday's solar flux at 89.5 was the lowest since June 22-25 of last year, when values ranged from 84 to 88.6. Likewise, Tuesday's sunspot number of 14 was also the lowest since June 25, 2012 when the sunspot number was also 14. Since then both numbers have been recovering, with Wednesday and Thursday's sunspot numbers at 27 and 45, and solar flux at 93.3 and 98.9.

The latest prediction has solar flux at 105 on June 14-17, 100 on June 18-19, 105 and 110 on June 20-21, 115 on June 22-24, 110 on June 25, 105 on June 26-28, and 110 on June 29 through July 4. Solar flux is expected to reach a minimum of 95 around July 7-8 and another peak at 115 on July 18-21. Note that ARRL Field Day is June 22-23, right when solar flux is expected to be highest.

The predicted planetary A index is 5 on June 14-16, 8 on June 17-18, 5 on June 19-20, then 25, 18, 10 and 8 on June 21-24, 5 on June 25-27, then 30, 20, 10 and 8 on June 28 through July 1, 5 on July 2-4, 10 on July 5-6, 8 on July 7, and 5 on July 8 through mid-month.

A geomagnetic forecast comes to us this week from Petr Kolman, OK1MGW, who sees quiet to unsettled conditions June 14, mostly quiet June 15-18, quiet to unsettled June 19-20, quiet to active June 21-23, quiet to unsettled June 24, quiet June 25-26, quiet to active June 27, active to disturbed June 28-29, quiet to unsettled June 30 through July 2, quiet to active July 3-4, mostly quiet July 5-6.

Word has come that the link to the W6ELprop installation file at http://www.qsl.net/w6elprop/ is broken. Until it is restored you can find it at ftp://150.214.111.198/pub/ham/propag/W6ELPropInst270.EXE.

Unfamiliar with FTP? FTP is File Transfer Protocol, and you can paste that link into your web browser URL window, hit Enter, and a

download dialog should appear. W6ELprop works only on Windows computers, and with it you can predict propagation from your station to anywhere else, on any frequency between 3-30 MHz. If you have any trouble installing, try right-clicking the file and running as administrator.

The latest NASA prediction for Cycle 24 moves the sunspot peak back to Summer 2013, but NOAA predicts the peak for the end of this year. Check pages 16 and 17 at http://www.swpc.noaa.gov/weekly/pdf/prf1970.pdf and note the highest smoothed sunspot and solar flux numbers are predicted in November and December 2013. These are smoothed international sunspot numbers, with a scale quite a bit lower than the Boulder numbers reported here.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for June 6 through 12 were 71, 76, 27, 41, 21, 14, and 27, with a mean of 39.6. 10.7 cm flux was 109, 109.8, 103.2, 96, 93.3, 89.5, and 93.3, with a mean of 99.2. Estimated planetary A indices were 17, 32, 10, 9, 13, 6, and 5, with a mean of 13.1. Estimated mid-latitude A indices were 16, 26, 9, 8, 12, 6, and 5, with a mean of 11.7.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th-June, through Sunday, 16th-June there were 222 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5W, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T31, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4O, MONTENEGRO (Also IOTA Op!). Operators Alex/UA3RF and Nikolay/RK3RB will be active as 4O/UA3RF and 4O/RK3RB from Montenegro between July 21st August 2nd. Activity will be on 40-10 meters using CW, SSB, PSK and RTTY. They also plan to be active as 4O/UA3RF/P and 4O/RK3RB/P from Sveti Nikola

Island (EU-163) between July 26-28th. Look for them to be an entry in the RSGB IOTA Contest (July 27-28th). QSL via their home callsigns.

5Z, KENYA. The "DX-World.net" reports that Bruno, VE2FTT, is active as 5Z4/VE2FTT from a hotel room in Nairobi until June 19th. It was also mentioned that he plans to be active from time to time throughout the year when on business trips to Kenya. Bruno operates mostly SSB and uses an FT-897 with 100 watts into a screwdriver antenna. QSL via his home callsign.

C9, MOZAMBIQUE. Gerard, ZS6AYU, will once again be active as C91GR from Bilene between 1600z, July 19th and 0400z, July 23rd. Activity will be holiday style on CW only using a Cushcraft R7000 vertical and 200-400 watts. QSL via ZS6AYU, direct or by the Bureau.

DXPEDITIONS TOUR (Update). Yuki, JH1NBN, is currently on a business trip to Bhutan (Thimphu, central area and eastern area) until June 19th. His activity will be limited, but will sign A52W and states [edited], "I will establish and operate small station with wire and 100w output in several cities/villages in Bhutan - mainly SSB on 40/20/17/15 meters (I will check on 3.8m through 50m) during local night time. Yuki will continue to travel to various places through September, and plans to visit the following locations (specific dates were provided):
* Micronesia - Callsigns V63AQ and V6T. He may visit [operate 1 hour] from some small islands between Pohnpei and Woleai. The islands mentioned are: Pohnpei (OC-010), Kosrae(OC-059), Chuuk (OC-011) and Woleai (OC-132).
* Mongolia - He is not sure if he will operate; maybe a club operation.
* Bangladesh - He may not operate due to not enough time. August was mentioned.
* Japan - He will be at the "TOKYO HAM FAIR" (booth of foreign radio league/club), August 24-25th.
* Thailand - He will not operate, but will meet with local people. September was mentioned.
* Nauru - Callsign C21BN; he will be in Nauru for about 2 weeks; operation during local night time. September was mentioned.

Yuki apologizes for the delay in QSLing and is replying at a very slow rate. He suggests to "Please do not re-send QSL request twice". He will add a log search to his Web page when he has time at: http://1nbn.net

FS & PJ7, ST. MARTIN AND SINT MAARTEN ISLANDS. By the time you read this, Mark, N1AFG, will be active as PJ7/N1AFG from Sint Maarten (NA-105, WLOTA 0711) [Dutch Side] until June 21st. Activity will be limited depending on the weather and other vacation activities, etc. Mark suggests, "Look for me near the top of the 20 and 15 meter Phone bands." There is also a French side of the island, St. Martin (NA-105, WLOTA 0383), and if Mark gets an opportunity as he did last year, he will operate from one of the beaches on the French side using the callsign FS/N1AFG. PLEASE NOTE: Mark states, "The best way to get a QSL card is to send me one via direct mail. Return postage is appreciated, but it is not absolutely necessary. If you

have sent a QSL card to me from one of my past trips to the Caribbean and have not received one, please E-mail me, and I will rectify the situation." QSL via his QRZ.com address.

FT/T, TROMELIN (Press Release). Seb, F5UFX, Team Leader of the "Tromelin 2014", announced the following in a press release dated June 13th [edited]: "After many successful DXpetitions in the past, the Radio Club de Provins (F6KOP) team and the Lyon DX Gang (F6KDF) are joining together in an effort to put Tromelin back on the air in 2014. In the last months we have exchanged many documents, E-mails with the authorities and we have also met them in their office. Today, we are working all together in a very efficient way, and, even if all papers are not finalized yet, we are very confident for our project. We hope to give you some good news as soon as possible..... Best 73s, de Seb, F5UFX."

HI, DOMINICAN REPUBLIC. Juergen, DL4SDW, will be active as DL4SDW/HI3 from the Dominican Republic (NA-096, WLOTA 2974) between June 17th and July 26th. Activity will be limited to his spare time on the HF bands, using mainly CW, but some SSB and Digital modes. QSL via his home callsign, by the Bureau is preferred.

HK0/S, SAN ANDRES ISLAND (Update to OPDX.1114). Members of the "DX Friends" will activate San Andres Island (NA-033) between November 1-10th. The current list of operators mentioned are Alberto/EA1SA, Toni/EA5RM (Team Leader), Roberto/EA2RY, Manolo/EA7AJR, Jose/EA7KW, Fabrizio/IN3ZNR, Alain/F6ENO, Tony/F8ATS, Faber/HK6F, Bernard/F9IE, Roberto/HK3CW and Valery/RG8K. As of press time, no callsign has been announced. QSL via EA5RM direct (see Web page). You can use the OQRS (see Web page) for direct and Bureau cards. More details should be forthcoming. Visit their Web page at: http://www.dxfriends.com/SanAndres2013

HS, THAILAND. Look for HS4AK, the club station of the Radio Amateur Association of Khon Kaen [R.A.K.K], to be active until June 17th. A team of operators will be operating and activating this callsign to celebrate the 22th anniversary until June 17th. Activity will be on 40-10 meters using CW, SSB, RTTY and PSK. HS4AK participated in this past weekend's 2013 All Asian DX CW Contest as M/S category. QSL via E20YLM.

II8, ITALY (LH Op!). Alex, IK8YFU, and other Calabria DX Team members will be active as II8LH on June 22nd, from the Capo Suvero Lighthouse (WAIL CL-003, ARLHS ITA-045). QSL via the Bureau to HB9FHZ (USKA Bureau). QSL via IK8YFU direct. E-QSL Authenticity is guaranteed. Also LoTW. For more info, see: http://www.calabriadxteam.it

IOTA NEWS.....
AS-006. Kazuhiko, VR2KF, will be on during the RSGB IOTA Contest (July 27-28th) from his home QTH on Ma Wan Island. This is a good time to work him because he is leaving Ma Wan early 2014. He is the only station on Ma Wan. Kazuhiko's plan is only to be active on 20-10 meters. QSL only direct to QRZ.com address.

AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS,Hisashi/7N1GMK,
Takeo/7L4PVR and Kazuhiko/7N4VPS will be active as homecall/1
from Hachijo Island in the JA1 South Izu Group, between October
18-21st. Activity will be on 160-6 meters using CW, SSB and
RTTY. QSL via their home callsigns, direct or by the Bureau.

AS-120. Operators Stavros/5B4AFM and Philip/5B4ZN will be active as
homecall/p from Agios Georgios Island between 1600z, June
22nd and 0600z, June 23rd. Activity will be on 40/30/20 meters
using mostly CW and with a focus on North America. QSL via
their home callsigns, by the Bureau or direct.

EU-043. Bernd, DL8AAV, will once again be active as SD1B/6 from Orust
Island between June 17-29th. Activity will be holiday style
on, or near the usual island and IOTA frequencies. QSL via
DL8AAV, direct or by the Bureau.

EU-073. Members of the Taranto ARMI section and the 599 DX Team will
once again be active as IJ7T from San Pietro Isle (IIA TA-002)
between July 26-28th. Activity will be on the HF bands, 6 and
2 meters using CW, SSB and the Digital modes. They will par-
ticipate in the RSGB IOTA Contest (July 27-28th). QSL via
IK7WDS, direct or by the Bureau. QSL cards can also be requested
via the OQRS on ClubLog. For more information and updates,
visit: http://www.qrz.com/db/IJ7T
http://www.armi.ta.it

EU-101. Operators Thomas/SM3DMP and Jan/SM3CER will be active as
OH/SM3DMP and OH/SF3A, respectively, from Bjorkon Island
(WW Loc. KP02) between June 16-19th. Activity will be on
30/20/17 meters, mainly CW (split 1-3 up). QSL OH/SM3DMP
via his home callsign, and QSL OH/SF3A via SM3CER, by the
Bureau or direct.

EU-123. Operators Doug/GM0ELP and Simon/M0GBK to be active as MM3T
from the Isle of Bute (IOSA CL02, SCOTIA CS19, WLOTA 1883)
during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/
All-Band/Low-Power/Mixed/DXpedition entry. QSL via eQSL only.

EU-141. Hans, LA2MOA, will be active from Vardo Island in the Finnmark
County East Group during the RSGB IOTA Contest (July 27-28th)
as a Single-Op/CW-Mode/Island-DXpedition entry. QSL via his
home callsign, direct, by the Bureau, eQSL or LoTW.

NA-035. By the time you read this, Dan, HM2DMR, should be active as
HQ8S from the Honduran Island of SWAN. Activity could last
until June 25th, depending on the Honduran Navy schedule.
It is suggested to "Keep an eye on the clusters". Look for
CW to start then followed by SSB. There will be no InterNet
on the island, so please help Dan relay any info he may have.
Activity will be on 160-10 meters. For more details and
updates, watch: http://hriotas.com
ADDED NOTE: Next is NA-223 Vivorillos (callsign HQ8D);

July 16-20th.

NA-213. Operators Allan/KV4T, Steve/KI4GGJ, John/AJ4T, Gaston/W4CCF
and Nicholas/KJ4AVG will once again be active as homecall/p
from Dauphin Island (USI AL002S, Mobile County, AL) between
June 19-24th. Activity will be on the HF bands using CW and
SSB. QSL via the operator's home callsign.

OC-129. Tim, KC5DCT, will be active as DU6/KC5DCT from Lakawon Island
on June 22nd. Activity will be QRP on the HF bands with a
Elecraft KX3 using CW and SSB [until batteries go dead].
QSL via his home callsign.

JW, SVALBARD. Karl, LA8DW, will once again be active as JW8DW from the
JW5E club station in Longyearbyen, Spitsbergen Island (EU-026), between
September 25th and October 3rd. Activity will probably be on 80-10 meters
using CW and SSB. Not sure about RTTY and PSK31. QSL via his home callsign,
direct, by the Bureau or via LoTW. Visit the JW8DW Web page at:
http://la8dw.com/Svalbard%202011/home.html
Also, visit the JW5E Web page and interesting Webcam at:
http://www.jw5e.com
http://longyearbyen.livecam360.com/flash/main.php

K8CX'S 2013 DAYTON HAMVENTION PHOTO GALLERY. Tom's, K8CX, 2013 Dayton
Photo Gallery is now up at: http://hamgallery.com/dayton2013/
This is Tom's 17th consecutive year for the gallery, and it contains 353
photos taken at Crowne Plaza at various events and hospitality suites.
You may submit your own Dayton photos to be included in this gallery.
Please read the guidelines listed on the top of the gallery page. There
is also an interesting Dayton Hamvention history link on top of this page.
ADDED NOTE: There is also a recap of this year's HamVention at:
http://hamgallery.com/gallery/D/hamvention2013.htm
If anyone has a forum review or interesting story, please submit it to
K8CX <k8cx@...> to be included on this page.

KH8, AMERICAN SAMOA (Update to OPDX.1110/1114; Callsign Added; Samoa Op Added). The N8A operators announced that they have also reserved the callsign W8A. Operators John/9M6XRO, Aki/ZL1GO (JE4EKO), Masahiro/JH3PRR, Kip/W6SZN and Jacky/ZL3CW (F2CW/WE3B) are to be active using the special event callsign N8A from the Turtle and Shark Lodge, Village of Vaitogi, on the southeast coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385) between November 12-22nd (not through the 27th). QSL via ZL3CW. The call-sign N8A will be used during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. QSL route was not mentioned. Four of the five operators plan to be active as 5W8A from Samoa after their activities on American Samoa between November 27th and December 2nd. Operators mentioned are 9M6XRO, W6SZN, ZL1GO and ZL3CW. QSL route also was not mentioned. For more details and updates, watch the N8A Web page at: http://www.n8a.eu
Also, watch their FaceBook page at:
https://www.facebook.com/N8a2013AmericanDXpedition

KL7, ALASKA (Rare IOTA). Rick, K6VVA, announced this past week that he has been planning to activate the rare IOTA Sarichef Island (NA-152) for years, and now it looks like it will take place between June 25-27th. He will sign K6VVA/KL7. Activity will be on 40/30/20/17 meters primarily CW, but with some SSB. QSL via N6AWD, direct or by the Bureau. For more details, especially a special messages to CW operators, visit:
http://www.k6vva.com/iota/na152
For updates, watch his Twitter page at: http://www.twitter.com/k6vva

OY, FAROE ISLANDS. Members of the Cambridge University Wireless Society will be active as OY/homecall from the Faroe Islands (EU-018) between June 17-23rd. Operators mentioned are Martin/G3ZAY, Michael/M0GXM, Will/M0ZXA, Gavin/M1BXF and Greg/MD0IGD. Activity will be on 40-6 meters using mostly SSB. It is suggested to listen for operator's QSL instruc-tions.

CO2HQ & H44RK (OC-149) QSL STATUS. Rex, NR6M, reports on June 15th:
"QSL cards for CO2HQ and H44RK (OC-149) were received Friday 6/14/2013. All requests received were mailed out 6/15/2013."

LOG & PICTURES POSTED. The group of Indonesian operators, who activated YE3I from Gili Ketapang, have now posted their log and pictures at:
http://www.mdxc.org/ye3i

TS8TI QSL STATUS. Fred, IK7JWX, the QSL Manager for Italy, reports that during the next week they should be get the QSLs from LZ3HI.

He also states that whomever made a contact with TS8TI can send all their QSO data via E-mail to Antonello, IK2DUW, the QSL Manager for the rest of the world, at <ik2duw@...>, and he will respond to all whose and also the QSLs already received via directly, by the Bureau and MDXC. The log is available online at the following Web sites: LoTW, <http://www.mdxc.org/ts8ti/log-on-line>, <http://www.ik2duw.it> and <http://www.enzolog.org>.

QSL RECEIVED VIA LoTW: 4A1TD, 9A7A, A35JP, F8VOE, FJ/N5WR, JH4UTP, KH2L, KH6ZM, PY1PDF, RM5P, SX5KL, T88AT, US4IQ, VU7KV and XE1GRR

QSLS RECEIVED VIA MAIL: 3B9DX, 5U9AMO, 9N7SZ, C98RF, FH/DL7BC, JX9JKA, PJ4/SP6AXW, PJ4/SP9FIH, PJ4/SQ9CNN, SX5KL, VK9/OH1VR VK9CZ and XX9TYT

QSLS RECEIVED VIA THE BUREAU: 4W6A, 5B75FOC, 9M4SLL, 9M6XRO, 9M8Z, CY9M, ES95A...Z, ZC4VJ and ZL/GD3OOK

SV9, CRETE. Luc, ON6DSL, will once again be active as SV9/ON6DSL/P from the Island of CRETE (EU-015) between August 12- 21st. Activity will be holiday style, a SOTA portable, on 40-15 meters and SSB only operations He will use a FT817ND w/5w QRP into a homemade multiband dipole. QSL via his home callsign, direct or by the UBA Bureau (preferred).

V3, BELIZE. Jimmy, W6JKV, will once again be active as V31IV from San Pedro (WW Loc. EK67), Belize, between June 20th and July 1st. Activity will be on 80-6 meters. He will probably focus on 6 meters CW. QSL via his home callsign.

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX) and Masayuki/JA7ZF (V63ZF) will once again be active from Pohnpei Island (OC-010) between November 22-30th. Activity will be on all HF bands and modes. QSL via their home callsigns.

VQ9/VQ93, CHAGOS (Reminder/Update). Just a reminder that Jim, ND9M/VQ9JC, will once again be active with a special prefix, this time as VQ93JC from Diego Garcia between June 22nd and July 7th. He usually activates an unique/special prefix each year (last year it was VQ92JC). Jim informs OPDX on his current operating conditions: "The rig (FT-857D) that I use normally for working from the island crapped out on me about half way through the VQ975FOC operation. I thought I was done for until I remembered that I'd rescued an Icom IC-760 from the ham shack when the Navy shut it down. The IC-760 had been donated by a former VQ9 years ago and did not belong to the Navy, so I snagged it. But there was no way I was going to lug that thing back and forth to the island every day just for a little operating, so I set up on the ship and operated from the Lagoon. I was still using dipoles, but now they were 110 feet above the waterline (and 40,000 tons of metal!) instead of just 30 feet above the ground. Better still, the IC-760 and dipoles kept me on the air for the duration of the celebration. Overall, I made 3400 contacts as VQ975FOC. The first 1200 QSOs were from the island; the other 2200 on the ship. Of course, the QSOs made from the ship will not count for DXCC, and my QSL will be marked accordingly, but the spirit of this particular special callsign was to

get the FOC callsign 'out there' to give extra points toward the FOC75 award which does not require contacts to be made with land-based stations. When my FT-857D died, my XYL Cori (KK4CGA) shipped out my back up rig, a Yaesu FT-897D, it didn't arrive until after the special callsign expired, but it's here now, and I'm active from the island again. I'm still getting my radio teeth kicked in since I'm running barefoot into a low dipole, but VQ9 is back on the air! I'll continue operating from the ship and may put up a 6M dipole to use with my FT-857D for a beacon. I'll be here until about July 10th, which would bring me back in mid November."
Just a reminder, when Jim states he is still operating, it is Field Day style from a recreational park using 100 watts to a dipole at a height of 10 meters because the VQ9 club station has been shut down. Jim reports that he has to set up the station each time and then break it down each day which further limits his operating time typically to 1230-1615z on most days. Sometimes he is on Fridays starting as early as 0830Z. QSL via ND9M.

YN, NICARAGUA. Members from the Spanish Aitana DX Group (ADXG) will be active from Octavio, YN2N, radio shack in Nicaragua between October 1-16th. Callsign will be announced soon. Operators mentioned are Javi/ EA5KM (CW), Fer/EA5FX (CW), Eugen/EA5HPX (CW), Fran/EA7FTR (SSB/RTTY), Jose/EA1ACP (SSB/RTTY) and Carlos/EA1DVY (SSB/RTTY). Pilot station named is Ismael/EA1AZ. Activity will be on 160-6 meters. Suggested frequencies are:
CW - 1821, 3521, 7021, 10121, 14021, 18081, 21021, 24901 and 28021 kHz
SSB - 1840, 3795, 7185, 14250, 18145, 21295, 24965 and 28495 kHz
RTTY - 3580, 7035, 10145, 14080, 18105, 21080, 24925 and 28080 kHz
6m - 50101/CW and 50145/SSB

QSL via EB7DX, direct or by the Bureau. An OQRS will be available for direct and Bureau QSLs. All QSOs will be confirmed via LoTW. For more details and updates, visit: http://nicaragua2013.com

YW0, AVES ISLAND. It was announced that the 4M5DX Group is planning a DXpedition to Aves Island (NA-020) sometime between November 1st, 2013, and February 28th, 2014. Callsign mentioned is YW0A. It is suggested to watch the following media Web pages at:
DXpedition's Web page - http://www.avesisland.info (under construction)
4M5DX Group's Facebook page - https://www.facebook.com/4M5DX
4M5DX Group's Twitter page - https://twitter.com/4m5dxgroup

ZB54, GIBRALTAR (Special Event). Ernest, ZB2FK, is now active as ZB54FK until June 27th. Activity is because the Union of European Football Associations (UEFA) has accepted Gibraltar as its 54th member. QSL via ZB2FK, direct only.

PREDICTIONS FOR 20 Jun 2013 10CM FLUX: 130 / AP: 006
COMMENT:The background X-ray radiation level has increased to just below =
the
C-level. Catania 6 (NOAA AR 1773) has grown a little. It has the potenti=
al
to flare in the C-level. The knot of Catania sunspot groups 2, 3, 5, 7
(NOAA AR 1772, 1770, 1774 and 1775 respectively) and 8 has a large
potential to flare in the C-level. There is a chance for M-flaring
activity, below 50% however. A large coronal hole is visible on the east
side of the central meridian in the northern hemisphere. The lower bounda=
ry
extends to about 25=B0N. The fast solar wind emanating from this hole can
possibly reach the earth in 3-4 days.

PREDICTIONS FOR 21 Jun 2013 10CM FLUX: 135 / AP: 014
COMMENT:A new sunspot group, Catania 9 (NOAA AR 1776) emerged at 15N near the
central meridian. It is active in the C-level. An C8.4 flare was
monitored on June 19, 9:54UT peak time. The source region is however still
behind the east limb. SDO/AIA 193 offers a nice view on the source region.
On June 18, we see stretched loops high in the corona that break open, the
eruption is followed by post flare loops that seem to be captivated in a
bulb structure. CACTus reported 2 coronal mass ejections from that region.
We keep an eye on it. The geomagnetic conditions are quiet: the solar
wind speed is around 300 km/s and the total magnetic field around 5nT.
Active conditions are possible from June 21 if the fast solar wind from the
northern coronal hole reaches the Earth.
TODAY'S ESTIMATED ISN : 082, BASED ON 21 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30620
SIDC SOLAR BULLETIN 20 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 20 Jun 2013 until 22 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Jun 2013 10CM FLUX: 120 / AP: 007
PREDICTIONS FOR 21 Jun 2013 10CM FLUX: 120 / AP: 014
PREDICTIONS FOR 22 Jun 2013 10CM FLUX: 120 / AP: 021
COMMENT:The past 24 hours were mostly quiet, with 2 moderate C-class flares. The
first one, a C1.1 event, took place in NOAA AR 1776, on June 19, 1709 UT
(peak time), and was associated with dimmings. A faint CME is associated
with this event and is first observed by LASCO C2 around 18:48 UT. It is
going essentially southward, at slow project speed (~300 km/s). We do not
expect much geomagnetic effect, and if any not before early June 24. The
second one (C1.9) occurred in Catania region 10 (S15E89), on June 20, 0920
UT (peak time). Geomagnetic activity is expected to be active by the end
of June 21 - beginning of June 22, as a coronal hole becomes geoeffective.
Current conditions are quiet. ACE observations show some minor excursions
of the Bz component of the interplanetary magnetic field down to -5nT,
associated with a small shock-like structure observed late on June 19.
TODAY'S ESTIMATED ISN : 085, BASED ON 12 STATIONS.

To all radio amateurs

SB DX ARL ARLD025
ARLD025 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Operators Stavros, 5B4AFM and Philip, 5B4ZN will be QRV as home calls/p from Agios Georgios Island, IOTA AS-120, on June 22 and 23. Activity will be on 40, 30 and 20 meters using mostly CW. QSL to home calls.

BAHRAIN, A9. Dave, A92IO has been QRV on 17 meters around 0400z. He is active until December 2013. QSL to home call.

PORTUGAL, CT. Members of the Cascais Radio Club will be QRV as CQ75SMA during Field Day on June 22. Activity will be on the HF bands, including VHF, UHF, Satellite and digital modes. QSL via operators' instructions.

PHILIPPINES, DU. Tim, KC5DCT will be QRV as DU6/KC5DCT from Lakawon Island, IOTA OC-129, on June 22. Activity will be on the HF bands using CW and SSB with QRP power. QSL to home call.

IRELAND, EI. Members of the North Cork Radio Group are QRV as EI75GP until June 23 to commemorate the 75th anniversary of the Cork Grand Prix. QSL via bureau.

IRAN, EP. Mohsen, EP3SMH has been active on 15 meters using CW and RTTY at various times. QSL to home call.

DOMINICAN REPUBLIC, HI. Juergen, DL4SDW is QRV as DL4SDW/HI3 until July 26. Activity is in his spare time on the HF bands using mainly CW with some SSB and digital modes. QSL to home call.

ITALY, I. Members of the Calabria DX Team will be QRV as II8LH from the Capo Suvero Lighthouse, ARLHS ITA-045, on June 22. QSL via

operators' instructions.

ALASKA, KL. Rick, K6VVA will be QRV as K6VVA/KL7 from Sarichef Island, IOTA NA-152, from June 25 to 27. Activity will be on 40, 30, 20 and 17 meters using primarily CW with some SSB. QSL via N6AWD.

FAROE ISLANDS, OY. Operators G3ZAY, M0GXM, M0ZXA, M1BXF and MD0IGD are QRV as OY/home calls until June 23. Activity is on 40 to 6 meters using mainly SSB with some CW. QSL OY/M0ZXA and OY/M1BXF via G3ZAY and all others to home calls.

SWEDEN, SM. Bernd, DL8AAV is QRV as SD1B/6 from Orust Island, IOTA EU-043, until June 29. Activity is holiday style on or near the usual island and IOTA frequencies. QSL to home call.

CRETE, SV9. Gianni, SV2FPU is QRV as SV9/SV2FPU from Gaydox Island until June 30. Activity is on 80 to 6 meters using CW, SSB and RTTY. QSL direct to home call.

SOMALIA, T5. Roger, LA4GHA is QRV as 6O0LA and has been active on 12 meters around 1130z. QSL to home call.

CAMEROON, TJ. Nicolas, TJ3SN has been active on 6 meters around 2000z. QSL via IZ1BZV.

EUROPEAN RUSSIA, UA. Special event station R1963VT is QRV from the Vostok 6 spacecraft until June 23 in commemoration of Valentina V. Tereshkova, the first woman in space. QSL via RK3MWA.

BELIZE, V3. Jimmy, W6JKV is QRV as V31IV from San Pedro until July 1. Activity is on 80 to 6 meters using CW. QSL to home call.

CHAGOS ISLAND, VQ9. Jim, ND9M will be QRV as VQ93JC from Diego Garcia from June 22 to July 7. He will be active most days from 1230 to 1615z. QSL to home call.

HONG KONG, VR. Kazuhiko, JH1OGX is QRV as VR2KF from Ma Wan Island, IOTA AS-006, until 2014. Activity is on 20 to 10 meters. QSL via operator's instructions.

LAOS, XW. Alex, RK3DT is QRV as XW3DT until June 23. Activity is on 17 and 15 meters using CW and SSB. QSL via operator's instructions.

THIS WEEKEND ON THE RADIO. ARRL Field Day, NCCC RTTY Sprint, NCCC Sprint, His Majesty King of Spain SSB Contest, Ukrainian DX DIGI Contest and the Marconi Memorial HF CW Contest are all on tap for this upcoming weekend. The SKCC CW Sprint and CWops Mini-CWT CW Test are scheduled for June 26. Please see June QST, page 79 and the ARRL and WA7BNM Contest websites for details.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30621
SIDC SOLAR BULLETIN 21 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 21 Jun 2013 until 23 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 Jun 2013 10CM FLUX: 132 / AP: 024
PREDICTIONS FOR 22 Jun 2013 10CM FLUX: 135 / AP: 012
PREDICTIONS FOR 23 Jun 2013 10CM FLUX: 135 / AP: 007
COMMENT:Active conditions were observed during the last 24 hours, with an M2.9
flare occurring in NOAA AR 1777, to the east of the trailing sunspot, on
June 21, 0314 UT (peak time). A CME was associated with this event, but due
to the position of the source region, we do not expect any geomagnetic
consequences. This region was the source of a C8.4 flare on June 19, and
very likely the source of a wide CME observed on June 18, when it was well
behind the east limb. This region is likely to produce extra flares in the
coming days, at least of C-class and possibly again an isolated M flare.
More information on the magnetic type will be available as it further
rotates on the disk. There is a total of 7 active regions on the disk, and
in addition to AR 1777, C flares are likely from NOAA AR 1776, AR 1775, and
to a lesser extent AR 1772. We expect therefore eruptive conditions for the
next 48 hours. Geomagnetic activity reached unsettled to active conditions
late on June 20, and early on June 21, in response to the arrival of a high
speed solar wind stream linked to a coronal hole in geoffective position.
We expect this situation to persist over the next 24 hours, and then come
back to quiet to unsettled conditions on June 22.

SB PROP @ ARL $ARLP025
ARLP025 Propagation de K7RA

ZCZC AP25
QST de W1AW
Propagation Forecast Bulletin 25 ARLP025
>From Tad Cook, K7RA
Seattle, WA June 21, 2013
To all radio amateurs

SB PROP ARL ARLP025
ARLP025 Propagation de K7RA

Here we are at the Summer Solstice for the Northern Hemisphere, which was at 0504 UTC today, June 21. If you are west of the Central time zone, to you it was last evening. Today is the longest day of the year, but the length of your day varies considerably depending on your latitude. In San Diego, the sunrise is at 5:48 AM, and it sets 14 hours later at 7:53 PM. In Seattle the Sunrises today at 5:21 AM and sets at 9:01 PM, 15 hours and 40 minutes later. But in Fairbanks, Alaska, the Sun rises today at 3:39 AM and doesn't set until tomorrow at 12:06 AM, 20 hours and 27 minutes later!

Right now many of us are interested in what HF radio conditions should be for this weekend during ARRL Field Day. Until June 3, the prediction for June 21-23 was for quiet geomagnetic conditions, with a planetary A index of 5 for all three days. Then on June 3 it changed, and the predicted planetary A index for those days was 25, 18 and 10, quite a difference. On June 15 the forecast changed to 10, 18 and 10, then on June 19 it became 18, 12 and 8, and finally yesterday it changed to 25, 15 and 10, closer to what it was on June 3.

Remember, we want those numbers to be low.

You can check http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html for daily updates after 2100 UTC, and at http://www.swpc.noaa.gov/ftpdir/latest/DGD.txt it is updated every three hours with new K indices.

As of Thursday afternoon, the predicted solar flux is 130 on June 21, 135 on June 22-24, 130 on June 25, 125 on June 26-27, 120 on June 28, 115 on June 29-30, hitting a minimum of 100 on July 5-7 and rising to a peak of 130 on July 19-21.

The predicted planetary A index is 25, 15 and 10 on June 21-23, 5 on June 24-27, then 30, 20, 10 and 8 on June 28 through July 1, then 5

on July 2-4, 10 on July 5-6, then 5 on July 7-13, and 8 on July 15-16.

Over the past week average daily sunspot numbers rose from 39.6 to 97, and average daily solar flux was up from 99.2 points to 115.3.

Petr Kolman, OK1MGW predicts quiet to active geomagnetic conditions June 21-23, quiet to unsettled June 24, quiet June 25-26, quiet to active June 27, active to disturbed June 28-29, quiet to unsettled June 30 through July 2, quiet to active July 3-4, and mostly quiet July 5-6.

Pavel Costa, CO7WT sent this observation: "In past winters I have noticed that when a cold front is passing over Cuba, the front of the wave some times acts as a very good reflector for VHF signals, precisely the 2 meter band that is commonly used here in Cuba for FM signals.

"As Cuba is a kind of thin and long island, the propagation behaves differently depending on the angle of the incoming cold front. Sometimes when the front comes perpendicular to the island, the propagation is good for signals bouncing off the front of the wave. Other times when the wave comes parallel to the island the propagation is improved island wide.

"This phenomenon is not always seen with all cold fronts, and its duration is from 1 to 4 hours for ranges about 100 to 500 Km, I have noticed.

"Last winter I remember a cold front that made possible communications from hand held radios on 2 meter simplex with rubber duck antennas from two locations around 100 km apart with about 5 watts. That was around last December, maybe E-skip helped that time, but I think the cold front was responsible for that."

K1KT, Ken Tata of Warwick, Rhode Island noted on June 18 an intense 2 meter opening in Europe, and said a MUF map showed a spot over the Adriatic with MUF of 280 MHz.

Jeff Hartley, N8II of West Virginia mentioned on June 16, "The bands have sounded pretty good despite the low solar flux, except for 12 and 10 meters. 15 meters is often open in our evening into Europe. 17 meters is open most days to Europe and Western Asia around 0200-0300Z, and I worked about 10 European and Asian stations on 15 meters via Es into F2 (beacon from VE1 heard on 10M) on Friday at 0230-0315Z. 15 meters was fantastic over long stretches in the All Asia contest, JAs were loud Sunday for over 2 hours 1330-1530Z. This is a fairly rare opening for us."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for June 13 through 19 were 45, 73, 101, 104, 110, 120, and 126, with a mean of 97. 10.7 cm flux was 98.9, 109.1, 111, 115.9, 123.8, 125, and 123.4, with a mean of 115.3. Estimated planetary A indices were 4, 4, 5, 3, 4, 5, and 5, with a mean of 4.3. Estimated mid-latitude A indices were 6, 5, 4, 3, 5, 7, and 4, with a mean of 4.9.

22 June 2013 A.R.I. DX Bulletin
No 1155
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9A - Istvan, HA0KA will be active holiday style as 9A/HA0KA from Pag Island (EU-170) from 26 July to 2 August. He will operate SSB on the HF bands and will take part in the IOTA Contest. He also plans to visit and be QRV from the four nature reserves on the island (9AFF-023, 9AFF-073, 9AFF-074 and 9AFF-075), as well as from the Plitvice Lakes National Park (9AFF-006) on 3-4 August. QSL via home call, direct or bureau. Information on the Croatian Flora Fauna Award can be found at http://web.hamradio.hr/9aff/ [TNX HA0HW]
C9 - Antonio EA4GBA will operate SSB as C91BGA from Mozambique starting on 27 June through December. QSL direct to home call. [TNX The Daily DX]
CE0X - "I am in the process of obtaining a Chilean licence for San Felix as I am feeling certain that I will be on a team to install equipment for the Navy on the island", Michael, WU2D says. He expects to be on the island around 7-15 July. He will be QRV in his spare time "with minimal antennas and only an ICOM-7000 at my disposal. I will be able to do SSB and some CW likely on 15, 17, and 20m". [TNX NG3K and The Daily DX]
CT7 - CT1BOP, CT1DIZ, CT1EEQ, CT1EGW, CT1EKD, CT1END, CT1IUA and CT4NH will participate in the IOTA Contest as CS5DX from Bugio Island (EU-040). QSL via bureau or direct to the qrz.com address. Before the contest, possibly starting on 25 July, they will be active as homecall/p (QSL via home call). This expedition commemorates the 20th anniversary of the first activation of Bugio Island, and a special award will be issued for making at least three QSOs with CS5DX during the contest. [TNX CT1END]
CY0 - Rick, AI5P will be joining Gary, VE1RGB and Murray, WA4DAN for the 1-11 October CY0P DXpedition to Sable Island (NA-063) [425DXN 1143]. They will operate CW, SSB and RTTY on 160-10 metres. Bookmark www.cy0dxpedition.com for updates.
F - Vincent, F4BKV will be active as F4BKV/p from four IOTA groups in four days: EU-148 (21 June), EU-058 (22 June), EU-070 (23 June), EU-095 (24 June). He will operate SSB starting around 6 UTC until 18 UTC each day, mainly on 20 and 15 metres and possibly 17 metres. QSL via home call, preferably through the OQRS on his

website (www.f4bkv.net). [TNX F4BKV]
FH - Silvano I2YSB, Vinicio IK2CIO, Angelo IK2CKR, Marcello IK2DIA, Stefano IK2HKT, Gino IK2RZP, Alberto IZ2XAF and Mac JA3USA will be active on 160-6 metres as TO2TT from Mayotte (AF-027) on 3-17 October [425DXN 1143]. QSL via I2YSB (direct) or IK2CIO (bureau) and LoTW. Further information, including real-time logsearch, QSLling details and OQRS for direct cards, can be found at www.i2ysb.com/idt. The pilot stations will be IK7JWY and (for 6m) IK0FTA; there will be a dedicated forum on www.hamradioweb.org. [TNX IK7JWY]
H4 - "As you are all aware the H44IOTA DXpedition has suffered significant delays due to weather conditions and boat maintenance", Penny Goldfinch posted on the expedition's website on 19 June, and "such delays have taken their toll on the team". Dom SQ9KWW, Tom WL7HP and Maggie H44MK are unable to continue the journey, and "consequently we will now have to omit the activation of OC-285". Ralph (H44RK) and Penny will leave Honiara on 21 June and anticipate being active from Roderick Bay in the Florida Islands (OC-158) on the 23rd. Ralph will be the only operator, but he plans to be QRV "several hours a day, determined by propagation". The duration and timing of this and all other activations will be dictated by weather conditions. Bookmark http://h44iota.com/ for updates.
HK0_sa - A multi-national team from DX Friends (EA1SA, EA2RY, EA5RM, EA7AJR, EA7KW, F6ENO, F8ATS, F9IE, HK3CW, HK6F, IN3ZNR and RG8K) will be active from San Andres Island (NA-033) 1-10 November. Callsign TBA. They will operate CW, SSB and RTTY on 160-6 metres with at least four stations at the same time on different bands and modes. QSL via EA5RM. Bookmark www.dxfriends.com/SanAndres2013/ for further information and updates, including (in due course) logsearch and OQRS. [TNX EA5RM]
HR - Dan HR2DMR (http://hriotas.com/) left the Swan Islands (HQ8S, NA-035) on 18 June and went to Vivorillos (HQ8D, NA-223) for a couple of days. His movements are dependant on the Honduran Navy, whose "needs come first". However, the Navy will bring him back to NA-223 in July for the full planned operation (16-20 July). Dan is expected to return to Swan Island, "but not sure as to how long he will be there. Hopefully he will get a little more operating time before he has to return to main land Honduras". QSL via KD4POI.
I - Members of the 599DX Team and ARMI Taranto will be active as IJ7T from San Pietro Island (EU-073) on 26-28 July, including an entry in the IOTA Contest. They will operate SSB, CW and digital modes on the HF bands, 6 and 2 metres. QSL via IK7WDS (OQRS for direct and bureau cards on Club Log). [TNX IZ7AUH]
J7 - Rick KK4GV will be active again as J79GV from Dominica (NA-101) from 29 June to 6 July. He will operate SSB holiday style. QSL via home call and LoTW. [TNX NG3K]
JA - Mitsuo JA1UNS, Suehiro JI1PLF, Takeo 7L4PVR, Hisashi 7N1GMK and Kazuhiko 7N4VPS will be active as homecall/1 from Hachijo Island (AS-043) on 18-21 October. They will operate CW, SSB and RTTY on

160-6 metres. QSL via home call, direct or bureau. [TNX JI1PLF]
KG4 - The 22-29 June operation from Guantanamo Bay [425DXN 1153] has
been delayed. Terry KG4RX (QSL via K4RX) and Ken KG4TO (QSL via
AC4TO) now expect to be active from 29 June through 9 July. They
will operate on 6 metres and the HF bands. Logsearch will be
available on Club Log with regular updates. [TNX NG3K]
KH6 - Alex, F4GHS will be active holiday style as KH6/F4GHS from Hawaii
(OC-019) on 3-23 August. He will be QRV on 80-10 metres SSB from
Oahu (3-7 August), Kauai (7-12 August), Maui (12-18 August) and
Hawai'i (18-23 August). QSL via F0GAZ. [TNX F4GHS]
LX - Rene ON6OM, Eddy ON6ZV, Martin ON7EG and Michel ON4MW will be
active as LX/OO6P from Luxemburg from 30 June to 5 July. They will
operate SSB and digital modes on the HF bands. QSL via ON6ZV,
direct or bureau. Further information can be found at
www.qsl.net/on6om/lx-oo6p
PJ7 - Marco, KC9FFV will be active as PJ7FF from Sint Maarten (NA-105)
on 6-13 July. He will operate holiday style on 40-10 metres SSB.
QSL via KC9FFV (direct only), LoTW and eQSL. [TNX KC9FFV]
S2 - The Mediterraneo DX Club is organizing a DXpedition to take place
from Bangladesh on 19-29 November. A team of 20-22 operators from
9 countries will be active on all bands and modes with several
stations. The team aims at establishing "a real cooperation with
the local hams to assist them in any needs and improve their
knowledge and skill in the Amateur Radio world". Further
information will be available in due course. A dedicated website
is under construction at www.mdxc.org/bangladesh2013 [TNX MDXC]
SV - Gabi, HA1YA will be active as SW8EA from Thassos Island (EU-174)
on 5-21 July. He will operate CW and SSB on the HF bands, 6m, 4m,
2m and 70cm. QSL via home call. [TNX HA0HW]
TG - The Club de Radioaficionados de Guatemala (TG0AA) will conduct a
DXpedition "to the heart of the Mayan world" and be active as
TG1B, TG2C and TG3D from the archaeological site of Tikal on 22-23
June. Look for activity on 40 and 20 metres SSB. Information on
the relevant award can be found on http://www.qrz.com/db/TG0AA.
[TNX TG9ANF]
UA - Victor, RU0ZM will be working as a meteorologist at Kamenskoe, in
a rare Russian District (RDA KT-13), until November. He will be
QRV as RU0ZM/0 on the HF bands in his spare time. QSL via UA0ZC.
[TNX W7ZWA]
UA - Victor R1NU, Gennady R3BY and Maxim RU5D will be active as either
R20RRC/1 (special callsign celebrating the 20th anniversary of the
Russian Robinson Club) and R1NU/p, R3BY/1 and RU5D/1 from Sidorov
Island (EU-147) on 23-29 June. They will operate CW, SSB and PSK
on 40-10 metres. QSL R20RRC/1 via RZ3EC. [TNX RD3BN]
VR - Kazu, VR2KF will participate in the IOTA Contest from his home QTH
on the island of Ma Wan (AS-006). He plans to be QRV on 20, 15 and
10 metres. He might leave the island in early 2014. [TNX NG3K]
W - A group of 10-12 operators from the Kennehoochee Amateur Radio
Club (W4BTI) will be active as K4S from Sapelo Island (NA-058) on
12-14 September. They plan to be QRV on all bands and modes. QSL

direct to W4BTI (P.O. Box 1245, Marietta GA 30060, USA), LoTW and eQSL. [TNX WF4W]
YB - YB0D is the callsign to be used for the 27-30 June activity from Damar Besar Island (OC-177) [425DXN 1153]. QSL direct to YB0JZS.
YV0 - The 4M5DX Group is organizing a DXpedition to take place from Aves Island (NA-020) sometime between 1 November 2013 and 28 February 2014. Eleven operators from Venezuela, Argentina, Finland and Spain will be active as YW0A on 160-6 metres all modes. QSL via EB7DX (OQRS for direct and bureau cards on Club Log) and LoTW. Bookmark www.avesisland.info for further information and updates.

DAYTON PHOTO GALLERY ---> The Dayton Hamvention 2013 Photo Gallery (353 pictures) can be found at http://hamgallery.com/dayton2013/. This is the 17th year for the Dayton Photo Galleries. [TNX K8CX]

H44AJ & H44S ---> Logsearch and OQRS for the recent activity from Sikaiana (OC-285) by Mike, K9AJ (H44AJ) and Nando, IT9YRE is now up and running at http://www.it9yre.it/h44/

OPERATOR WANTED ---> The T33A team (Banaba Island 2013: see 425DXN 1153) has one opening for another operator. If interested in participatin in the DXpediton (www.t33a.com), please email t33-op[@]t33a.com for details. [TNX AA4FL]

QSL VIA OM3JW ---> Steve, OM3JW will have logs and cards for Z81D, 3W1M and XV9DX at Hamradio 2013 (Friedrichshafen). Should you need any of them, please visit the Slovak Republic's booth (nr 567, Halle A1) on 28 and 29 June till 2 PM. [TNX OM3JW]

+ SILENT KEYS - Wilse Morgan (WX7P, ex KL7CQ) passed away on 13 June. First licensed back in 1952 as WN6PVF, in 1984 - along with KL7HFQ and KL7KL - he conducted the first amateur radio license exam session under the Volunteer Examiner programme. He was inducted into the CQ Amateur Radio Hall of Fame in 2009.
Domenico Marino, IT9TAI passed away unexpectedly on 17 June from a heart attack. Born 1932 and licensed since 1950, he was a DXCC chaser with a penchant for CW, a 2m pioneer, an antenna designer and a co-founder and past president of ARI Palermo.

QSLs received direct or through managers: 3B8CF, 3B9DX, 3D2MJ, 3XY1D, 5U9AMO, 5W0M, 6V7S, 7X7QB, 9H5BZ, 9H5DX, 9K2OD, 9M4SLL, 9N7SZ, 9Y4LDK, A35JP, A35NW, A3EAQ, A61Q, A61R, A62A, A71CT, BY1WXD/0, C31KC, C6AJR, C91RF, C98RF, CE2/CX1EK, CM8AKY, CN8QN, CP6XE, CT3E, CX9AU, D2EB, D4C,

21331. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-06-22 14:01:02 UTC
From: Paul Dunphy
Topic: 19749 Message: 21331

```
:Issued: 2013 Jun 22 1210 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30622
SIDC SOLAR BULLETIN 22 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 22 Jun 2013 until 24 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 22 Jun 2013 10CM FLUX: 140 / AP: 019
PREDICTIONS FOR 23 Jun 2013 10CM FLUX: 145 / AP: 005
PREDICTIONS FOR 24 Jun 2013 10CM FLUX: 145 / AP: 003
COMMENT:The background X-ray radiation is near the top of the B-level. NOAA AR 1777
has a probability of more than 50% to flare in the C-level. M-flares are
still possible. Solar wind speed is around 600 km/s. The density and the
magnetic field decreased. This behaviour of the solar wind parameters is a
typical coronal hole signature: a co-rotating interaction region with
relatively high density and compressed magnetic field is followed by the
actual fast solar wind emanating from the coronal hole itself. This is a
typical lower density plasma. Geomagnetic conditions returned to
quiet/unsettled conditions.
TODAY'S ESTIMATED ISN : 083, BASED ON 09 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30623
SIDC SOLAR BULLETIN 23 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 23 Jun 2013 until 25 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 23 Jun 2013 10CM FLUX: 130 / AP: 028
PREDICTIONS FOR 24 Jun 2013 10CM FLUX: 125 / AP: 019
PREDICTIONS FOR 25 Jun 2013 10CM FLUX: 125 / AP: 004
COMMENT:Flaring activity has been calm with 1 C-flare on June 22. C-flaring
activity is possible for the coming day. A new active region, 1778 rotated
over the east limb. It is located in the southern hemisphere. The solar
wind speed is still relatively high with 600 km/s. The total magnetic field
imbedded in the solar wind increased slightly to around 8 nT this morning
at 4UT. The z-component was negative - between 0 and -5nT from yesterday
June 22 afternoon until June 23, 4UT. From that moment, it fluctuated
between negative and positive values. These negative values induced active
conditions today, June 23. These solar wind conditions are probably linked
with the coronal hole in the northern hemisphere. A wide coronal mass
ejection was detected by CACTus on June 22, 14:12UT. The CME had an angular
width of 160 degrees. No solar event on the solar disk facing the Earth
could be linked to this eruption. It was seen as a halo CME by STEREO A. We
conclude that the CME is back-sided.
TODAY'S ESTIMATED ISN : 086, BASED ON 05 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30624
SIDC SOLAR BULLETIN 24 Jun 2013, 1306UT
SIDC FORECAST (valid from 1230UT, 24 Jun 2013 until 26 Jun 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 24 Jun 2013 10CM FLUX: 128 / AP: 017
PREDICTIONS FOR 25 Jun 2013 10CM FLUX: 128 / AP: 019
PREDICTIONS FOR 26 Jun 2013 10CM FLUX: 128 / AP: 010
COMMENT:Solar activity has been active during the past 24 hours, featuring an M2.9
flare and two C flares, both from NOAA AR 11778. The M2.9 flare peaked at
20:56 UT on June 23, and the second C flare, peaking at 11:32 UT on June
24, was a C9.9 flare. More C flares are expected within the next 48 hours,
with a high chance for an M flare from AR 11778. The 10 MeV protons were
above the 10 pfu threshold from 20h UT on June 23 till 9h UT on June 24,
and are slowly declining again. A large flare could however push the proton
flux back above this threshold, which is why we issue a proton warning
condition. The solar wind is still in a coronal hole high speed stream
regime, with solar wind speeds gradually decreasing from around 600 km/s to
approximately 550 km/s.The IMF ranged between 2 and 8 nT. Solar wind speeds
are expected to remain high, but continue their gradual decrease on June
24, 25 and 26. Geomagnetic activity was at quiet to active levels (K
Dourbes between 2 and 4; NOAA Kp between 1 and 2) during the past 24 hours.
Quiet to active conditions (K Dourbes < 5) are expected for June 24 to 26.
TODAY'S ESTIMATED ISN : 075, BASED ON 14 STATIONS.

PREDICTIONS FOR 25 Jun 2013 10CM FLUX: 114 / AP: 010
PREDICTIONS FOR 26 Jun 2013 10CM FLUX: 112 / AP: 011
PREDICTIONS FOR 27 Jun 2013 10CM FLUX: 110 / AP: 011
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring a C2.0
and a C3.0 flare, both from NOAA AR 11775. More C flares are probable
within the next 48 hours, with a slight chance for an M flare. A filament
eruption took place near 30N 15-45E on June 24, around 23h UT. This
material is not expected to travel to Earth. The solar wind is still in a
coronal hole high speed stream regime, with solar wind speeds ranging
between about 500 km/s and 570 km/s, while the IMF decreased from 6 to 4
nT. Solar wind speeds are expected to remain high, but continue their
gradual decrease on June 25 and 26. Geomagnetic activity was at quiet to
active levels (K Dourbes between 1 and 4; NOAA Kp between 2 and 4) during
the past 24 hours. Quiet conditions (K Dourbes < 4) are expected for June
25 to 27.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30626
SIDC SOLAR BULLETIN 26 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 26 Jun 2013 until 28 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 26 Jun 2013 10CM FLUX: 104 / AP: 007
PREDICTIONS FOR 27 Jun 2013 10CM FLUX: 104 / AP: 007
PREDICTIONS FOR 28 Jun 2013 10CM FLUX: 104 / AP: 007
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring two
low C flares from NOAA AR 11775 and 11776. More C flares are possible
within the next 48 hours, with a slight chance for an M flare. The
influence of the coronal hole high speed stream on the solar wind is
gradually weakening. During the past 24 hours, solar wind speeds have
decreased from about 520 to 440 km/s, while the IMF went further down from
4 to 2 nT. The solar wind speed is expected to continue its descent until
June 28, when we will likely see the effects of another coronal hole high
speed stream. Geomagnetic activity was at quiet levels (K Dourbes between 1
and 3; NOAA Kp between 1 and 2) during the past 24 hours. Quiet conditions
(K Dourbes < 4) are expected for June 26 till the first half of June 28. On
the second half of June 28, active periods (K Dourbes=4) are possible as a
consequence of the expected arrival at Earth of a new coronal hole high
spead stream.

PREDICTIONS FOR 29 Jun 2013 10CM FLUX: 107 / AP: 008
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring two
low C flares from NOAA AR 11774 and 11778. More C flares are possible
within the next 48 hours, with a slight chance for an M flare. During the
past 24 hours, the solar wind speed has decreased from about about 440 to
370 km/s, while the IMF varied between 1.5 and 4 nT. Geomagnetic activity
was at quiet levels (K Dourbes between 1 and 3; NOAA Kp = 1) during the
past 24 hours. Quiet conditions (K Dourbes < 4) are expected for June 27.
On June 28, active levels (K Dourbes=4) with minor storm periods (K Dourbes
= 5) are possible as a consequence of the expected arrival at Earth of a
new coronal hole high speed stream. The coronal hole high speed stream's
geomagnetic effects will likely decrease on June 29, when quiet to active
levels (K Dourbes < 5) are expected.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30628
SIDC SOLAR BULLETIN 28 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 28 Jun 2013 until 30 Jun 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 28 Jun 2013 10CM FLUX: 098 / AP: 026
PREDICTIONS FOR 29 Jun 2013 10CM FLUX: 098 / AP: 019
PREDICTIONS FOR 30 Jun 2013 10CM FLUX: 098 / AP: 007
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring three
C flares, from NOAA AR 11777 and 11778. The brightest flare was a C7.3
flare released by NOAA AR 11778 with peak time at 03:37 UT on June 28. More
C flares are possible within the next 48 hours, with a chance for an M
flare. NOAA AR 11777 released two CMEs (observed by LASCO C2 at 20:37 on
June 27 and 02:00 on June 28). The first CME is not expected to be geo-
effective, while there is a slight chance for a glancing blow from the
second CME on July 1st. ACE detected a shock in the solar wind at 13:53 UT
on June 27, probably due to some unidentified CME. The solar wind speed
jumped from about 380 km/s to around 460 km/s, and has currently decreased
again to 365 km/s. The IMF jumped from 3 to 8 nT, has subsequently further
risen to 12 nT near 2h UT on June 28, and has since been gradually
decreasing, with current values around 9 nT. Geomagnetic activity was at
quiet to active levels (K Dourbes between 1 and 4) during the past 24
hours. Quiet to active conditions (K Dourbes < 4) are expected for June 28,
with a chance for a minor geomagnetic storm (K Dourbes = 5). On June 29,
quiet to active levels (K Dourbes = 4) with minor storm periods are
possible as a consequence of the expected arrival at Earth of a new coronal
hole high speed stream. Quiet geomagnetic levels (K Dourbes < 4) are likely
on June 30.

Direttore Responsabile I2VGW

9A - Croatia is set to become the 28th member state of the European Union on 1 July. To celebrate the accession, the Radio Club Grada Zaboka has been active as 9A28EU for about three months and will continue until the end of the year. Also, Croatian amateurs can apply for "28" to be added to their ordinary prefixes, and use these special prefixed callsigns (9A280AAA-9A289ZZZ) between 1 July and 31 December: for instance, 9A2AA will become 9A282AA. [TNX 9A2AA]
CE0X - Mike, WU2D has received his reciprocal licenses for Chilean mainland (CE1/WU2D) and San Felix (CE0X/WU2D). He expects to go to the island on 8 July and to be working there for five days. If he gets permission from the Navy, he will be QRV in his spare time most likely on 15, 17, 20 and 40 metres SSB and some CW. [TNX The Daily DX]
CP - Antonio, EA5RM will be working on a non-governmental organization's project in Bolivia on 3-19 July. He will be busy installing solar-powered HF equipment for medical and emergency use at communities on the Maniqui River and in the Amazon jungle. The project is being developed by Radioaficionados Sin Fronteras (www.rsf-rwf.org) and Solidaridad Medica Espana (www.solidaridadmedicacanaria.com). He plans to be QRV as CP1XRM in his limited spare time with a 100-watt solar-powered station and a vertical antenna. [TNX EA5RM]
DL - Jan-Henrik, DG8HJ will be active from Fehmarn Island (EU-128) on 6-21 July. QSL via home call, direct or bureau. [TNX rsgbiota.org]
DU - According to the information posted by JN6RZM on his blog, Sadao JA1PBV might be active as either DU9/JA1PBV or DU9/WK1S from the Sarangani Islands (OC-175) during the weekend. On 28 June he was in the city of General Santos (southern Mindanao Island).
E5_sc - Andy, E51AND will be on the air from Mangaia (OC-159), South Cook Islands on 15-19 July. This is not a DXpedition, as he is going with his wife who will be working with teachers in the schools. He plans to operate SSB and QRS CW (< 10 wpm) runnin 100 watts to a 14m vertical antenna with radials and mounted near the lagoon. His wife Kat, E51KC might operate a bit on 20 metres SSB. [TNX E51AND]
FO - Vadym, UT6UD will be active as FO/UT6UD from Hiva Oa, Marquesas (OC-027) on 7-13 July and from Rurutu (OC-050), Austral Islands on

14-22 July. He will operate CW, SSB and RTTY on 30-10 metres. QSL via home call, direct (see qrz.com for his PayPal account) or bureau.
FP - Once again Eric, KV1J will be active as FP/KV1J from Miquelon Island (NA-032) on 6-16 July. Plans are to operate mainly SSB and RTTY with some CW and PSK31 on 160-10 metres ("generally on the highest frequency band open"), plus 6m if there are "indications of openings". He will also take part in the IARU HF World Championship (13-14 July). QSL via home call, direct or bureau, LoTW and eQSL. Further information can be found at http://www.kv1j.com/fp/July13.html
G - Subject to prior authorisation, amateur radio operators in the United Kingdom may use special prefixes from 23 UTC on 4 July to 23 UTC on the 31st to celebrate the 100th anniversary of the Radio Society of Great Britain (RSGB). The second letter in the existing call sign (D, I, J, M, U, W, etc, plus E for Intermediate licences) may be replaced by the letter "V"; where no second letter exists, the letter "V" may be added. For instance, GD0XXX (Isle of Man), GI0XXX (Northern Ireland), GJ0XXX (Jersey), GM0XXX (Scotland), GU0XXX (Guernsey), GW0XXX (Wales) and G0XXX (England) may all be amended to GV0XXX. Alan, 5B4AHJ is constructing a page "to help clarify which special calls are QRV from which DXCC entity": go to http://clublog.freshdesk.com/support/solutions and search for "UK Special Event Callsigns".
HH - Tom, KC0W plans to be active as HH5/KC0W "from the extreme northern tip of Haiti on 6-25 July. He will operate CW only on 160-6 metres using vertical antennas placed directly over salt water. QSL via KC0W, direct only. [TNX NG3K]
I - ARI La Spezia will participate in the IOTA Contest as IP1T from Tino Island (EU-083). QSL via IZ5JLF. [TNX IZ5JLF]
JA - Take, JI3DST will be active on 40-6 metres SSB and CW as JI3DST/JI1 from Shikine Island (AS-008) on 26-29 July. During the IOTA Contest he expects to be signing JI3DST/1. QSL via home call, bureau preferred. [TNX JI3DST]
OJ0 - ON4CCP, ON4LEM, ON5JT, ON6QO and ON8VP will be active as OJ0V from Market Reef (EU-053) on 1-6 July. They will operate SSB, CW and digital modes on the HF bands. QSL via ON4CCP. [TNX ARRL DX Bulletin]
PJ5 - Frank, K3TRM (www.k3trm.com) is active as PJ5/K3TRM from St. Eustatius (NA-145) until 6 July. He operates SSB, CW and RTTY on the HF bands and with a special focus on 6 metres. QSL via home call (OQRS for direct and bureau cards on Club Log) and LoTW.
PJ7 - Kjerstin, AF6KJ and Travis, AF6WU will be active as PJ7/AF6KJ and PJ7/AF6WU from Sint Maarten on 5-9 July, and as FS/AF6KJ and FS/AF6WU from Saint Martin on 10-14 July. QSL all calls via AF6WU. [TNX The Daily DX]
S2 - The website for the 19-29 November DXpedition to Bangladesh [425DXN 1155] is now up and running at www.mdxc.org/bangladesh2013/ A large multi-national team of operators from the Mediterraneo DX Club will be active on 160-6m with six stations. Callsign TBA. QSL

via IK2VUC, direct or bureau, and LoTW. Further information, including logsearch and OQRS in due course, can be found on the website.
SM - Eric, SM1TDE from Gotland Island (EU-020) will operate CW only as SJ1SOP for the Sea Of Peace Award (information at www.mydarc.de/dl0sop/) on 1-31 July. He will also participate in the IOTA Contest as SA1A. QSL via SM1TDE, bureau preferred. [TNX SM1TDE]
SM - Anders, SM5EFX will be QRV holiday style as SF2X/p from Ledskar Island (EU-135) on 5-31 July. He will concentrate his activity during the IOTA Contest. QSL via home call, direct or bureau. [TNX rsgbiota.org]
UA - According to the schedule published on http://robinsons.ru, planned IOTA expeditions under the Russian Robinson Club's 20th anniversary special callsign include R20RRC/1 from Morzhovets Island (EU-119) on 24-26 July and R20RRC/8 from Zhuravlinyy Island (AS-109) on 9-14 August. QSL via RZ3EC.
VE - Peter, VE3JPP will use the special callsign CF3X from 4 July until 3 August to commemorate the 70th anniversary of Operation Husky during World War II. QSL via home call. [TNX VA3RJ]
W - The following stations will be active during the "Original 13 Colonies Special Event", which will be held on from 13 UTC on 1 July through 4 UTC on the 7th: K2A (New York), K2B (Virginia), K2C (Rhode Island), K2D (Connecticut), K2E (Delaware), K2F (Maryland), K2G (Georgia), K2H (Massachusetts), K2I (New Jersey), K2J (North Carolina), K2K (New Hampshire), K2L (South Carolina) and K2M (Pennsylvania). Further information on the event and the relevant certificate can be found at www.13colonies.info
W - Lou, W0FK will be active as W0FK/4 from Longboat Key (NA-034) on 3-7 July. He hopes to be QRV on 6 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org]
YB - A team of 25 operators will be active as YB9Y from Pulau Brassi (OC-276, new one for IOTA) on 15-21 October. They will operate CW, SSB and digital modes on 160-6 metres. QSL via YB1GJS, direct and bureau. The website for the expedition is up and running at http://yb9y.com/

CARIBBEAN ---> Phil, G3SWH will be active as 8P9PW from Barbados until 1 July, and as 6Y5/G3SWH from Jamaica on 2-9 July. This is a business trip, and he operates (CW only on 80-10 metres) during his leisure time. QSL via G3SWH, OQRS preferred (www.g3swh.org.uk). He will upload his logs to LoTW as soon as possible after he returns home. [TNX G3SWH]

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

H44IOTA ---> "Some issues have arisen about the current H44IOTA operations that need to be addressed before decisions can be taken about acceptance for IOTA. As this may take a little time to resolve, it may make sense to hold off sending your QSLs for the time being". [TNX www.rsgbiota.org]

IOTA NEWS ---> The following operations in the period May-June 2013 have provided acceptable validation and are therefore approved for IOTA credit: HQ3W (NA-160), YB8P (OC-208), YB8RW/P (OC-236), H44AJ (OC-285) and H44S (OC-285). OC-285 (Stewart Islands/Sikaiana Atoll) is now confirmed as a valid IOTA group. [TNX G3KMA]

K9W ---> The Wake Atoll Commemorative team's operation is progressing nicely. Most of the equipment has been received and is being pre-tested prior to shipment to the staging areas in California and Hawaii. The two week "on air" dates are anticipated to start the last week of September or first week of October. However, this is entirely dependent on the military flight schedule into and out of Wake Atoll and this has yet to be determined. Visit www.wake2013.org for updates and information on how to contribute to this expensive project. [TNX W8GEX]

YB0D ---> The website for the current DXpedition to Damar Besar Island (OC-177) [425DXN 1155] is up and running at www.damarbesardxpedition.com with detailed information and logsearch. Activity is expected to end at 3 UTC on 1 July. QSL via YB0JZS (direct only and postmarked not later than 31 December 2013) and LoTW (after six months). [TNX YF1AR]

QST de W1AW
Propagation Forecast Bulletin 26 ARLP026
>From Tad Cook, K7RA
Seattle, WA June 28, 2013
To all radio amateurs

SB PROP ARL ARLP026
ARLP026 Propagation de K7RA

Conditions were good for Field Day weekend last week. Only unsettled geomagnetic conditions (even quiet at times) affected us, no big flares or geomagnetic storms, and sunspot numbers also cooperated by peaking at 135 and 137 on Friday and Saturday. Geomagnetic instability was caused by a brisk solar wind, which was over by June 24.

At K7RA I used the ARRL Field Day Locator map at http://www.arrl.org/field-day-locator to contact a few club groups earlier in the week to see if they could use another CW operator. I've found in years past that with so many newer licensees who were not required to learn Morse code, that CW ops can be in demand at some sites. Not only are CW operators wanted at many Field Day locations, but the newer licensees are fascinated to see Morse code in action. I really don't think that some of us old-timers who worry about some imagined demise of CW have much to worry about.

At the last minute I changed my mind and decided to drag some gear accumulated over the past decade but never put on the air, and operate Class 1C, mobile single operator. Everything was last minute, including the antenna installation and power connections, with the radio sitting between the dashboard and the windshield.

The antenna was a very heavy kilowatt-rated screwdriver type antenna, about 20 pounds excluding any mounting hardware or a whip, although I swore it weighed twice as much. The plan was to mount it on a very heavy duty magnetic mount on the roof, perhaps with guying (this is not recommended by the manufacturer), but during assembly I discovered this would not work, as the mounting was not compatible with the antenna. So instead, during a fit of hacker improvisation, I leaned the heavy screwdriver assembly out the right-rear passenger window, (resting on the seat), and rolled up the window as far as I could to hold it in place. I cut the coax with PL-259 off the

magmount, stripped back the other end, and attached the center wire to the base of the antenna.

The next surprise was that although I had a 7 foot whip, I lacked the adaptor that would screw into the top of the antenna assembly. So what to do? Just stick it in the hole, let it roll around, and pray. I now had an antenna (of sorts) leaning out the right rear of my old car, about 35 degrees above horizontal, at best.

To hook the DC cable from the radio to the car battery, I needed to go through the firewall below the dashboard. Despite finding diagrams and advice specific to my 13-year-old car model online, I could not get the cable through. So I grabbed one of those portable starter batteries (fully charged), put it on the front passenger seat, and duct-taped the massive car battery connection clips (which are like jumper cables) to the DC cable from the radio, and another 12 VDC pair to the antenna tuning motor. In addition, to keep the battery charged, I tied in a very flimsy looking 12 VDC lighter plug in parallel with the whole mess, and plugged it into the dashboard lighter socket. This connector with wire was still in the bubble pack in my junk box after 20 years or more.

To finish it all off, I ran a couple of long counterpoise wires from the base of the antenna, out the rear doors and along the ground, attaching them to the coax shield broken out at the base of the antenna. I ran a heavy wire from the ground lug on the radio to a metal screw beneath the dashboard that seemed good for ground, at least at DC.

The whole thing worked, at least on 80 and 20 meters. 15 meters was marginal, and 40 meters I could not tune at all. Starting late Saturday evening, operating both SSB and CW, I lasted until about 1730 UTC Sunday morning. Most of the operation was from a local Seattle cemetery, on a nearby hilltop overlooking Lake Washington, east of the University of Washington. Very quiet, with power lines far away at the perimeter.

Back to solar activity, from the previous week, average daily sunspot numbers were up nearly 13 points to 109.7, and average daily solar flux rose nearly 7 points to 122. Geomagnetic activity was greater than the previous week, with average daily planetary A index rising from 4.3 to 12, and average mid-latitude A index rising from 4.9 to 11.9.

Ideally we would like to see the solar flux and sunspot numbers as high as possible, and the A index low, at least for 40 through 10 meters. On 160 meters we would like to see sunspot numbers low as well. I hear lots of complaints about this weird, weak solar cycle, but the 160 meter operators have absolutely no problem with the low activity.

Yesterday on Thursday, June 27 the solar flux dipped below 100 to 99.5, which is below the average for the previous seven days (122). Nothing significant about 100, it is just one of those nice round numbers, like when your odometer reaches 100,000 miles, or the atmospheric carbon dioxide reaches 400 ppm at Mauna Loa.

The 99.5 flux number is directly from the observatory in Penticton, British Columbia, but the NOAA site shows it at a nice round value of 100 (see http://www.swpc.noaa.gov/ftpdir/latest/DSD.txt). This is because NOAA has always reported this value in whole numbers, similar to the way the press reported recently that atmospheric carbon dioxide reached 400 ppm. The actual average value for the month of May was 399.77 ppm, but for all practical purposes you could say that it is 400 ppm, just as solar flux was 100. Any differences are very small.

The most recent prediction (Thursday, June 27, 2013 by forecasters Carr and Lash) from NOAA/USAF has 10.7 cm solar flux at 100 and 105 on June 28-29, 110 on June 30 through July 2, 105 and 100 on July 3-4, 100 on July 5-7, 115 and 120 on July 8-9, 125 on July 10-13, and 120 on July 14-16. Flux values then reach another peak of 130 on July 21.

>From the same forecast, planetary A index (which was 8 on Thursday, below the average of 12 for the previous seven days) is 17 and 9 on June 28 and 29, 5 on June 30 and July 1, then 7, 10 and 7 on July 2-4, 10 on July 5 and 6, 5 on July 7-16, 10 on July 17, 15 on July 18-20, then 18, 10 and 8 on July 21-23, and 15 on July 24 and 25. It looks like some unsettled geomagnetic conditions are in the forecast for July.

You can check for daily updates on this forecast out to 45 days ahead at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html. A new daily forecast generally appears some time after 2100 UTC daily.

Just received before release on early Friday morning, spaceweather.com reports earth-directed solar flares from sunspot groups 1777 and 1778. The two flares were C-class, and the CME could deliver a glancing blow to our Earth.

F.K. Janda, OK1HH believes that the geomagnetic field will be active to disturbed on June 28, quiet to unsettled June 29 through July 1, quiet on July 2, quiet to active July 3, active to disturbed July 4, mostly quiet July 5 and 6, quiet to unsettled July 7, mostly quiet July 8 and 9, quiet July 10-15, mostly quiet July 16 and 17, quiet to active July 18, mostly quiet July 19, active to disturbed July 20, and quiet to active July 21 and 22.

NOAA has a projection for the rest of the solar cycle, updated monthly, showing predicted smoothed sunspot numbers resolved to one-tenth, instead of whole numbers. The smoothing is a 13-month moving average, centered on any month of interest. Sunspot numbers are always whole numbers, so the resolution to one-tenth is an

artifact of the averaging or smoothing process.

For any current month, the number represents an average of the previous 6 months plus the current month plus the predicted values for each of the next 6 months. The first and last months in the calculation are factored in at 0.5.

Before the last day of June 2013, the smoothed sunspot number for February 2013 represents 10 months of known values and 3 months of predicted values, June through August 2013. These are based on the reported numbers from the Sunspot Index Data Center in Belgium. These numbers are always lower then the Boulder sunspot numbers, which are recorded at the bottom of each bulletin and in our own 3-month moving average, reported here monthly.

The predicted average sunspot numbers for March, 2013 through July 2014 are 67.5, 70.1, 72.7, 75.7, 78.6, 81.6, 84.7, 86.3, 86.9, 86.7, 86.4, 85.6, 84.7, 83.7, 82.6, 81.4 and 80.2. Note that the peak is centered on November 2013, or perhaps October 2013 through January 2014 to broaden the scope and hedge our bets. A similar prediction for monthly smoothed solar flux tracks this very closely, also peaking in November 2013. Let's see how this looks after the beginning of the new month.

Jeff Hartley, N8II of Shepherdstown, West Virginia is in grid square FM19cj, about three miles southwest and across the Potomac River from the Antietam National Battlefield, which is actually in Maryland.

On June 26 Jeff wrote: "This summer on HF at least below 12 meters has been one of the most interesting and exciting periods I can remember, despite the lackluster solar activity. Many nights 17 meters is open until midnight local time to southeast and northern Europe and, 15 is often open to Asia and Europe around 0200-0400 UTC.

After years of disappointment, the All Asia DX contest June 15-16 had above average conditions on 15 meters for most of the weekend. Just on 15 meters, I worked just short of 200 Asian stations with 106 prefixes in a part-time effort.

Saturday morning around 1200 UTC was a losing battle against the European stations into all parts of Asia. Saturday afternoon I returned after a long break at 2045 UTC to find very loud JA's who stayed loud until 2230 UTC, then gradually faded down until not many were audible by 0130 UTC. Sunday around 1200 UTC only JO3JIS had a good signal here from Japan; he was the most consistently loud JA here. A few signals from Central Asia were loud, such as UN/UP's.

Around 1350 UTC I returned to loud signals from all of Asia including Japan, which is fairly rare for this QTH, but had occurred several times the week before. Activity between Europe calling CQ

and Asians extended from 21.0 to 21.07 MHz! I don't think JA ever faded out completely all afternoon, but signals weakened about 1545 UTC. Our toughest area, Southeast Asia around 1500 UTC was quite loud, working three 9V1's with 9V1YC over S9! XW0YJY was heard, but I could not break thru the European pile-up. All total, I worked 58 Japanese prefixes and 19 from Asiatic Russia where activity was somewhat less than expected.

Almost every night, there is a good 20 meter opening to western Asia and Europe/Russia/Ukraine and Scandinavia from 0200-0400 UTC. Some of the DX worked late in the evening here include on June 11 FK8DD/M, ES5, ER3, UY5, OM3, then on 15 meters RA3TO/P and IZ7. On June 13, RV9CPB/9 on 17. June 14 featured ES3, EU7, and SM0 on 17 meter phone followed by on 15 meters, SM6, YL2, R4, RX4, RV9, RM5, HA8, UA6, UA4, UR4, R8, RZ6, UT9, UR0, and UA3T ending at 0312 UTC.

The sporadic E season on 6 meters has been disappointing. I missed European openings on June 13. On the June 19, W6XK in CM97 and N6JK in CM98 were logged on 6 meter CW around 0230 UTC. Finally, on June 23 and 24 we had a good opening to South America and Mexico, all multi-hop Es. At 2102 UTC, I worked PV8ADI with a S7 signal, the first ever Brazilian for me on Es; he stayed in for an amazing 2 hours plus longer! Then, 9Y4VU was found on SSB at 2107. YV1 was also heard along with VP2V. CO2WF was logged at 2304. Between 2331 UTC and 0039 UTC, five XEs over a wide area were worked mostly in XE2, good for some new grids. On June 24, PV8 was heard again with FM5WD being logged at 2224 UTC."

Thanks, Jeff! He mentions years of disappointment regarding working Asia, but here where I am on the West Coast, this is not a problem. This is just like Europe being easy to work from the East Coast.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for June 20 through 26 were 128, 135, 137, 118, 82, 91, and 77, with a mean of 109.7. 10.7 cm flux was 126.3, 133.2, 130, 128.2, 120.6, 109.2, and 106.5, with a mean of 122. Estimated planetary A indices were 11, 17, 14, 15, 15, 8, and 4, with a mean of 12. Estimated mid-latitude A indices were 12, 17, 13, 16, 14, 9,

and 2, with a mean of 11.9.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30629
SIDC SOLAR BULLETIN 29 Jun 2013, 1206UT
SIDC FORECAST (valid from 1230UT, 29 Jun 2013 until 01 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 29 Jun 2013 10CM FLUX: 103 / AP: 037
PREDICTIONS FOR 30 Jun 2013 10CM FLUX: 103 / AP: 030
PREDICTIONS FOR 01 Jul 2013 10CM FLUX: 106 / AP: 007
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring one
C1.6 flare from NOAA 11778, peaking at 17:05 UT on June 28. More C flares
are possible within the next 48 hours, with a slight chance for an M flare.
Over the past 24 hours, the solar wind speed showed a generally decreasing
trend from about 400 km/s to 350 km/s, until about 3h UT on June 29 when
this trend reversed, with current solar wind speeds around 400 km/s. The
IMF fluctuated around 12 nT throughout the period. K Dourbes has been at
minor storm levels (K Dourbes = 5) between 17h and 19h UT on June 28, and
again from 4h UT on June 29 till 8h UT on June 29. K Dourbes levels have
been active (K Dourbes = 4) since then. NOAA Kp has reached higher levels:
Kp = 5 between 21h UT on June 28 and 0h UT on June 29, Kp = 6 between 0h
and 3h UT, Kp = 7 between 3h and 6h UT, and Kp = 5 between 6h and 9h UT.
This geomagnetic activity is due to an extended Bz excursion of around -10
nT from 18h UT on June 28 till now. Minor storm levels (K Dourbes = 5) are
possible on June 29. On June 30, quiet to active geomagnetic levels (K
Dourbes < 5) are expected due to an expected coronal hole high speed
stream, with a possible minor storm around the end of June 30 or early on
July 1st, due to a glancing blow from the CME of 02:00 UT on June 28.

QST de W1AW
DX Bulletin 26 ARLD026
>From ARRL Headquarters
Newington CT June 27, 2013
To all radio amateurs

SB DX ARL ARLD026
ARLD026 DX news

This week's bulletin was made possible with information provided by KC9FFV, NC1L, ON4LEM, XQ7UP, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

RODRIGUES ISLAND, 3B9. Robert, 3B9FR has been QRV on 20 meters using CW around 0230 to 0330z. QSL via HB9SLO.

SENEGAL, 6V. Vlad, RK4FF will be QRV as 6V7S from Ngaparou from July 1 to 16. Activity will be on 80, 40, 20, 15 and 10 meters using CW, SSB and RTTY. QSL to home call.

GHANA, 9G. Hans, PB2T will be QRV as 9G5AA from July 2 to 7. Activity will be on the HF bands using all modes in his spare time. QSL to home call.

BAHRAIN, A9. Dave, EI3IO is QRV as A92IO until mid December. Activity is on 80 to 2 meters, including two channels on 60 meters. QSL to home call.

MOZAMBIQUE, C9. Antonio, EA4GBA is QRV as C91GBA from Matola until December 15. Activity is on the HF bands using SS. QSL direct to home call.

CHILE, CE. A group of operators will be QRV as VR77RG during the month of July to commemorate the 77th anniversary of the Radio Club Rancagua. Activity will be on all bands using SSB and PSK. QSL via CE4RG. In addition, a group of operators will be QRV as XR3PN during the month of July to commemorate the birth of Chilean poet and diplomat Pablo Neruda. Activity will be on all bands using SSB, RTTY and PSK. QSL via CE3OEV.

JAPAN, JA. Special event station 8N5CLEAN will be QRV from Shikoku, IOTA AS-076, from July 1 to October 31 during the Clean Reception

Environment Month. QSL via bureau.

MINAMI TORISHIMA, JD1. Take, JG8NQJ is QRV as JG8NQJ/JD1 from Marcus Island, IOTA OC-073, until August 15. QSL via JA8CJY.

SVALBARD, JW. Winfried, DL2GW will be QRV as JW/DL2GW from Spitzbergen Island, IOTA EU-026, from June 28 to July 1. Activity will be on 160 to 6 meters using all modes. QSL to home call.

BULGARIA, LZ. Members of the Radio Club Blagovestnik will be QRV as LZ1722SN during the month of July to honor the memory of St. Nicodemus. QSL via LZ1KCP.

MARKET REEF, OJ0. Operators ON5JT, ON6QO, ON4CCP, ON4LEM and ON8VP will be QRV as OJ0V from July 1 to 6. Activity will be on the HF bands using CW, SSB, RTTY and possibly PSK. QSL via operators' instructions.

CURACAO, PJ2. Wim, ON6DX will be QRV as PJ2/ON6DX from June 28 to July 7. Activity will be holiday style on 40 to 6 meters using CW, SSB and RTTY. QSL to home call.

SABA, ST. EUSTATIUS, PJ5. Frank, K3TRM is QRV as PJ5/K3TRM from St. Eustatius, IOTA NA-145, until July 6. Activity is on the HF bands and 6 meters using CW, SSB and RTTY. QSL to home call.

SINT MAARTEN, PJ7. Marco, KC9FFV will be QRV as PJ7FF from July 6 to 13. Activity will be holiday style on 40 to 10 meters using only SSB. QSL this operation via EA5GL.

GREECE, SV. Gabi, HA1YA will be QRV as SW8EA from Thassos Island, IOTA EU-174, from July 5 to 21. Activity will be holiday style on the HF bands, including 6, 4 and 2 meters and 70 cm using CW and SSB. QSL to home call.

IVORY COAST, TU. Dim, F5SWB is QRV as TU5DF from Abidjan until October. Activity is on 40 to 10 meters, including 6 meters, using mainly CW with some SSB and PSK31. QSL to home call.

CHRISTMAS ISLAND, VK9X. Fred, VK3DAC is QRV as VK9DAC. Activity is holiday style on 80 to 10 meters using SSB. QSL via operator's instructions.

INDONESIA, YB. Joy, YB0NSI and Jeffry, YC0LOU are QRV as YB0D from Damar Besar, Seribu Islands, IOTA OC-177, until July 1. Activity is on 160 to 10 meters using CW, SSB and various digital modes. QSL direct via YB0JZS.

THIS WEEKEND ON THE RADIO. The NCCC RTTY Sprint, Feld Hell Sprint, WAB 144 MHz Low Power Phone, RAC Canada Day Contest and the 10-10 International Spirit of 76 QSO Party are all on tap for this weekend. RSGB 80-Meter Club CW Championship is scheduled for July 1. The ARS Spartan CW Sprint is scheduled for July 2. Please see

June QST, page 79, July QST, page 80 and the ARRL and WA7BNM Contest websites for details.

PREDICTIONS FOR 02 Jul 2013 10CM FLUX: 107 / AP: 007
COMMENT:Solar activity has been eruptive during the past 24 hours, featuring two
low C flares from NOAA 11778 and NOAA 11781. More C flares are possible
within the next 48 hours, with a slight chance for an M flare, especially
from NOAA AR 11778, 11780 and 11781. Solar wind density increased around
5:00 UT on June 29, while wind speed and temperature began to rise, marking
the arrival of the expected coronal hole high speed stream. Meanwhile,
solar wind speed has increased from about 360 km/s to 500 km/s. In the past
24 hours, geomagnetic activity has been at quiet to active levels (K
Dourbes between 1 and 4; NOAA Kp between 2 and 4). A rise to minor storm
levels is possible on June 30 and the first half of July 1st, due to an
expected glancing blow from the CME of 02:00 UT on June 28. Quiet to active
levels are likely in the second half of July 1st, and a return to quiet
levels is expected on July 2nd.

July 1, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, WU2D, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, N6PSE, K8GI, K8YSE, NE8Z/HC1MD, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, EA5RM, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWX, LZ1BJ, Mediterraneo DX Club, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PG5M, RSGB IOTA Web Site, Sixitalia Weekly, SM1TDE, UN6QC, UT2AB, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd/June, through Sunday, 30th/June there were 221 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8 VE, VK, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

13 COLONIES (Special Event). Just a reminder that the annual "13 Colonies Special Event" will take place between 1300z, July 1st and 0400z July 6th. There will be at least two stations from each on the 13 colonies

on the air, as well as Super contest stations, multi-operator Club stations and OM and XYL teams. The U.S. original 13 colonies are CT-DE-GA-MA-MD-NC-NH-NJ-NY-PA-RI-SC-VA. Special events stations mentioned are: K2A (NY), K2B (VA), K2C (RI), K2D (CT), K2E (DE), K2F (MD), K2G (GA), K2H (MA), K2I (NJ), K2J (NC), K2K (NH), K2L (SC), K2M (PA) and WM3PEN. The theme for 2013 will be "Banners of the Revolution". The certificate is printed on heavy card stock. Stations working one state, or as many as all 13, will be eligible for the certificate. A "Clean Sweep" indicator will be affixed for those lucky enough to "Q" all 13. A special endorsement will be attached for stations contacting their sister operation, WM3PEN, in Philadelphia, PA. All HF bands will be in play except the WARC bands and 60 meters. 2 meters and 6 meter simplex are encouraged. All modes of operation should be represented - SSB, CW, RTTY, Digital, and the Satellites. The mode of operation is up to the individual colony state station. For more details on the stations, suggested frequencies, QSL info and on how to obtain the special certificate, see: http://www.13colonies.info

3D2 & 3D2/R, FIJI AND ROTUMA ISLANDS. Operators Stan/LZ1GC and Rocky/3D2DD will be active from Fiji and Rotuma between September 20th and October 15th. Their schedule is as follows:
September 20-26th - Callsigns 3D2GC (Stan) and 3D2CC (Rocky); from the "Club Fiji Resort", Nadi, Fiji Republic, Viti Levu Island (OC-016, WW. Loc. RH82QF). Activity will be on 160-6 meters using CW and SSB, with the following equipment: Kenwood TS-480 SAT + linear amplifier ACOM 1010/ACOM 1000. The antennas: EXP. GP 40-10m, 80/160 meters INV-L and GP.
September 27th-October 11th - Callsigns 3D2GC/P and 3D2DD/P; from Rotuma Island (OC-060). Activity will be on all HF bands.
Stan CW/SSB and Rocky only on SSB.
October 12-15th - Callsigns 3D2GC and 3D2CC again from Fiji Republic.
On October 16th, Stan, LZ1GC, will go back to Bulgaria.

QSL 3D2GC and 3D2GC/P via LZ1GC, direct or by the Bureau (see details on QRZ.com or the Web page below). QSL 3D2DD and 3D2DD/P via info on QRZ.com. For more details and updates, see: http://3d2gc.com

4X19, ISRAEL (Special Event). members of the Israel Amateur Radio Club (IARC) will activate 4X19MG in honor of the 19th Maccabiah Games between July 18-30th. The Maccabiah is an international Jewish athletic event, held in Israel every four years. QSL via 4Z1TL.

5B, CYPRUS. Tony, RT9T, will once again be active as 5B4ALB from Pachyammos (AS-004, MIA MCI-002, WLOTA 0051) between July 6-16th. Activity will be on all bands and modes. QSL via RT9T direct only. JUST REMINDER! Tony will also participate in the IARU HF Championships (July 13-14) as a member of the P3N team.

6Y, JAMAICA. By the time you read this, Phil, G3SWH, should be finishing up his business trip on Barbados, as well as his activity as 8P9PW. His lst day is July 1st. Activity was CW only during his leisure time. See <www.g3swh.org.uk/8p9pw.html> for more details. Phil will leave Barbados and travel to Jamaica on July 2nd, and hopes to be active as 6Y5/G3SWH between July 2-9th. Activity will be limited to his leisure time and will also be CW only. For more details and updates, see: http://www.g3swh.org.uk/6y5-g3swh.html

9X, RWANDA. Operators Allan/G3XAQ, Nick/G3RWF and possibly others will be active as 9X0XA and 9X0NH, respectively, during the CQWW DX CW Contest (November 23-24th). They plan at least two Single-Band entries, possibly more depending on how many operators they have. QSL both callsigns via G3SWH.

CE0X, SAN FELIX (Update/Callsign Change). Mike, WU2D, informed OPDX this past week: "They mistakenly assigned me Robinson Crusoe (Juan Fernandez) Island callsign. I was lucky and turned it around fast with the help of the Radio Club de Chile and now have the correct callsign CE0X/WU2D." Remember to look for him around July 8th.

E5, SOUTH COOK ISLANDS (Update/Correct QSL Info). Back in March we reported that Andy, AB7FS/E51AND, and his XYL Kathy were moving to Rarotonga (OC-013) into a house in the part of Arorangi Beach called Inave (see OPDX.1104 for more details). "DX-World.net" reports this past week that Andy, E51AND, will be visiting Mangaia Island (OC-159) with his wife Kathy, E51KC, who will be working in the local school during the day. Between July 15-19th, Andy hopes to operate during his spare time using 43 ft vertical with about 40 ground radials, on SSB and CW. QSL direct to: P.O. Box 518, Avarua, Rarotonga, Cook Islands. Take a look at Andy's, E51AND, QRZ.com page for some great pictures.

EO15, UKRAINE. Members of the Ukrainian Radioamateur QRP Club are celebrating their 15th anniversary and will be active using the special callsign EO15QRP between July 12th and August 12th. QSL via UT2AB, by the Bureau or direct.

FT5ZM 2014 DXPEDITION. Ralph, K0IR, posted on June 21st the following article "Why Does This DXpedition Cost So Much?" on the FT5ZM Amsterdam Island DXpedition Web page at: http://www.amsterdamdx.org/why-does-this-dxpedition-cost-so-much

HD082, ECUADOR (Special Event). Members of the Quito Radio Club (HC1QRC) will be operating as HD082QRC (HD Zero Eighty Two QRC) to celebrate its 82nd anniversary between July 13-23rd. Activity will be on 160-2 meters using CW, SSB and RTTY. QSL via HC1JQ (direct).

H44, SOLOMON ISLANDS (Update/Change/IOTA Op). It seems things are really changing for the H44IOTA operation. The RSGB IOTA Web page reports: "Some issues have arisen about the current H44IOTA operations that need to be addressed before decisions can be taken about acceptance for IOTA. As this may take a little time to resolve, it may make sense to hold off sending your QSLs for the time being..... G3KMA, 25 Jun 2013"

Also, "The Daily DX" reports that QSL Manager of H44IOTA operation,
Rex, NR6M, "asks that for the time being, until a decision is taken,
no further QSLs for the OC-149, OC-168, OC-047 and OC-158 operations
be sent to him.☐
On QRZ.com, it states, "All calls after June 20, 2013, will be made
by Ralph, H44RK, only. Team members SQ8X, SQ9KWW, H44MK, and WL7HP have
stepped back from the project for various reasons. Please respect their
privacy for the duration of the Project. Any inquiries go to Ralph at
<ralph.honiara@gmail.com>.
Paul, VK2HV, reported on June 29th, "Ralph as H44IOTA/MM today on 15m
said he will be sailing for Temotu H40 in about 3 weeks with a stop off
on OC-158 for a few days (maybe)."
The H44IOTA operation "was" to continue this week with activity from
Nendo Island (OC-100)[July 1-7th], Vanikolo/Utupua (OC-163) [July 9-12th]
and Reef Islands (OC-065) [July 14-16th], but who knows..... Stay tuned!

IOTA NEWS.............
AS-109. Members of the Russian Robinson Club (RRC) continue to activate
various islands and lighthouses to celebrate the RRC's 20th
anniversary until September 30th. Look for the RT9K team to
be active as R20RRC/8 from Zhuravlinyi Island (RR-026-43)
between August 9-14th. Activity will be on 40-10 meters using
CW, SSB and PSK. QSL R20RRC/1 via RZ3EC. For more details and
updates, watch: http://robinsons.ru

AS-146. Ma, BA4MY, will be active as BA4MY/4 from Jiming Island between
July 21-29th. Activity will be on the HF bands, and he will be
an entry in the RSGB IOTA Contest (July 27-28th). QSL via BA4EG,
direct, by the Bureau, LoTW or eQSL.

EU-016. Kurt, OM8AA, will be active as 9A/OM8AA from Solta Island
(ACIA IC-656, CIA-51, IOCA CI-126, MIA MC-389) during the
RSGB IOTA Contest (July 27-28th) as a Single-Op/Expedition/
Low-Power entry. QSL via OM8AA.

EU-034. Operators Andres/ES1AN, Harald/ES1LS, Arvo/ES1QV, Toivo/ES2DJ,
Juri/ES2EZ, Nigul/ES2NX and Toivo/ES2RR will be active as ES0U
from Saaremaa Island during the RSGB IOTA Contest (July 27-28th)
as a Multi-Op/Multi-Band/Low-Power entry. QSL via ES2DJ, by the
Bureau.

EU-040. Members of the Portuguese DX Group (GPDX) will be active as
CS5DX (ex-CS1GDX) from Bugio Island during the RSGB IOTA Contest
(July 27-28th). Activity will hopefully start on July 25th.
Operators mentioned are Jose/CT1DIZ, Joao/CT1BOP, Luis/CT1EEQ,
Arlindo/CT1EGW, Pedro/CT1EKD, Pedro/CT1ELP, Jose/CT1END,
Miguel/CT1IUA and Luis/CT4NH. Look for the operators to be
active as homecall/P before the contest. QSL CS5DX via the
Bureau or direct (see QRZ.com). For more details and updates,
visit: http://gpdx.blogspot.com

EU-081. Operators Gil/F4FET, Juan/F5IRC, Vincent/F4BKV, Antoine/F5RAB, Marc/F8DRA and Diego/F4HAU will be active as TM0SM from Large Island [St. Marcouf Archipelago] (DIFM MA001, ARLHS FRA055, DPLF PB052, WLOTA 0060 and DFCF 50013) between August 9-11th and August 23-25th. Activity will be on 40-6 meters using CW and SSB. They will focus on working stations outside Europe [see details on QRZ.com]. There will be 5 stations, with 4 on the air with 200-500w using verticals or Yagi antennas. QSL via F5CWU. For more details and updates, watch: http://tm0sm.webs.com

EU-083. Members of the ARI La Spezia, will once again be active as IP1T from Isola del Tino (IFF IFF-218, IIA SP-002, MIA MI-114, ITA ITA-058, WLOTA 0645) during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/1-Stn/Low-Power entry. Activity will be on 80-10 meters using low power, with antennas: Windom (80-10m) and a vertical 1/4 wave on 40 meters. QSL via IZ5JLF, direct or by the Bureau (preferred).

EU-119. Members of the Russian Robinson Club (RRC) continue to activate various islands and lighthouses to celebrate the RRC's 20th anniversary until September 30th. Look for a group of operators to be active as R20RRC/1 from Morzhovec Island (RR-02-08) between July 24-26th. Operators mentioned are R7AA, RN1ON, UA3EDQ and UA6YW. Activity will be on 40-10 meters using CW, SSB and PSK. QSL R20RRC/1 via RZ3EC. For more details and updates, watch: http://robinsons.ru

EU-144. Members of the A.R.I. Cosenza Radio Club will once again be active as ID8/IQ8CS from Dino Island (IIA CS-002, WW Loc. JM79vu) during the RSGB IOTA Contest (JULY 27-28th) as a Multi-Op entry. Before the contest activity will be on 30/17/12 meters, as well as 6 and 2 meters, using CW and SSB. QSL via IQ8CS, direct or by the Bureau.

EU-146. UBA/WRC members Alfons/ON4AWT and Louis/PA0LCE will be active as PF10C from Schouwen Duiveland Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op entry. QSL via ON4ON.

EU-174. Laci, HA0NAR, will once again be active as SW8LR from Thassos Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode entry. QSL via his home callsign.

NA-034. Lou, W0FK, will once again be active as W0FK/4 from Longboat Key (USI FL-053S, WW Loc. EL87, Sarasota County, Fl) between July 3-7th. Activity will be holiday style on or near the usual island and IOTA frequencies on the HF bands. QSL via his home callsign, direct or by the Bureau.

NA-046. Howard, K1VSJ, will once again be active from Martha's Vineyard during the RSGB IOTA Contest (July 27-28th) as a Single-Op/Mixed-Mode/Unassited/24HRS entry. QSL via his home callsign, direct or by the Bureau.

NA-128. Jean-Pierre, VA2SG, will once again be active from Ile-aux-Coudres (CISA QC-009) during the RSGB IOTA Contest (July 27-28th). Activity will be on 40/20 meters (maybe 80m) QRP. QSL via VA2SG. For more updates, watch: http://va2sg.wordpress.com

OC-130. Maarten, PA3GZU, will once again be active as DU9/PA3GZU from Mindanao Island (WLOTA 2803) between July 13th and August 9th. Activity will be holiday style on 40/20/15/10 meters using SSB and PSK31. QSL via PA3GZU, the Bureau preferred.

OC-139. Members from the Adelaide Hills Amateur Radio Society (AHARS), will be travelling to Kangaroo Island between August 16-20th. They will be active as VK5CWL (Cape Willoughby Lighthouse - ILLW AU-0095) over the International Lighthouse/Lightship Weekend (ILLW) weekend. Activity will be on 160-6 meters using CW, SSB and PSK. QSL via VK5PAS, direct, by the Bureau or LoTW or eQSL. For more information, check QRZ.com or the VK5CWL Web site at: http://vk5cwl.weebly.com

OC-176. Sadao, JA1PBV, who was active this past weekend as DU9/JA1PBV from Sarangani Island (OC-175), will now be active as DU8/JA1PBV (or possibly DU8/WK1S) from Tawi Tawi (OC-174) this coming weekend (July 6-7th). Activity will mainly be 20/15 meters CW. QSL via JA1PBV.

OC-276. (NEW ONE!) Members of the "ORDA PAPUA DXPEDITION TEAM" will activate for the first time Mapia Island as YB9Y possibly between October 15-21st. Operators mentioned are Yanuarius/ YB9YZ, Triadi/YB0KVN, Faisal/YB1PR, Pri/YB0ECT, Gjellani/YB1GJS, Wisnu/YB0AZ, Ronny/YB9WR, Jozardy/YD1JZ, Kasmuri/YD1MRI, Danu/ YD1GCL, Terry/YC1KAF, Rizal/YD1ORZ, Suryadi/YB0JS, Yoyon/ YB1CCF, Heri/YB1KAR, Terry/YC1KAF, Ria/YC0KVM, Susana/YD1LUX, Randi/YC0RAN, Syafruddin/YB9SB, Laily/YB0TSU, Edy/YD1XUH, Achmad/YC1CDV, Ujang/YC0LLY and Sadao/WK1S/JA1PBV. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via YB1GJS, direct or by the Bureau. For more details and updates, see: http://yb9y.com

ISWL CALLSIGNS (For July). The following ISWL club callsigns will be used throughout the month of July 2013:

GX4BJC/A - Operated from Great Missenden, in Buckinghamshire, by John, G8XTJ (ISWL Vice President). (WAB Square SP80 - England, IOTA EU-005 and WLOTA LH-1841)

MX1SWL/A - Operated from Walton on the Naze, in Essex, by Herbie, G6XOU (ISWL Council Member + Council Member). (WAB Square SP80 - England, IOTA EU-005 and WLOTA LH-1841).

Herbie will also operate as MX1SWL/P throughout the month. If required, he will give his current WAB Square during the QSO.

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

KH9, WAKE ISLAND (Press Release). Joe, W8GEX, sent out the following press release on June 25th [edited]: "Press Release #4 - Wake Atoll Commemorative DXpedition -- The Wake Atoll Commemorative team's operation is progressing nicely.
Most of the equipment needed for this operation has been received and is being pre-tested prior to shipment to the staging areas. As mentioned in the previous release, the equipment will be pre-staged in California and Hawaii prior to transport to Wake. Staging, pre-testing, packing are essential to assure equipment arriving on-time and safely on Wake.
The two week 'on air' dates are anticipated to start the last week of September or first week of October. This is entirely dependent on the military flight schedule into and out of Wake Atoll and this has yet to be determined. As soon as this is established, we will issue another press release and post it on our website.
Several good options are being considered for our two operating sites which will be announced soon.
Please note! There are a few other DXpeditions which will be on air during the Wake Operation. Our band plan, established in early March and documented on our website <http://wake2013.org/pages/bandplan.html>, will be used during our operation. To avoid the dreaded 'Not in the Log', please be sure which DXpedition you are working! Our operators will announce the K9W often to help identify your contact.
The Team wants to thank the DX Community, including generous worldwide Foundations and Clubs, equipment manufacturers and outlets for their out-standing support of the Wake Commemorative efforts. These DXpeditions are extremely expensive and could not be accomplished without the support of the entire DX Community. Visit the <www.wake2013.org> website to view our Sponsors and make your personal donation. And don't forget to sign our Guestbook! Please check our website often for updates.

73, K9W Wake Atoll Management Team"

OY, FAROE ISLAND. Ulf, DL3UB, will be active as OY/DL3UB from the Faroe Islands between July 29th and August 9th. Activity will be holiday style, preferably on CW and the 30/17/12 meter bands. QSL via this home callsign, direct or by the Bureau.

P5, NORTH KOREA (Press Release-Update from the P5 Project Leadership Team): [edited] "P5 Project Team members Paul Ewing/N6PSE and David Flack/AH6HY have just returned from their extensive travels throughout the DPRK. Total distance covered was from Panmunjom at the DMZ in the South to Sonbong in the North, bordering China and Russia. Paul and David are among the first Western travelers to be allowed to enter the DPRK from Namyang and later exiting from Wonjong back into China.
The purpose of the visit was to meet with DPRK Government Representatives in Pyongyang and to survey and assess various potential Dxpedition venues throughout the country. Particular attention was paid to terrain and the availability of reliable power.
We are making further refinements to our proposals for a major Dxpedition. We will continue to communicate with the Ministry of Foreign Affairs and the Ministry of Posts and Telecommunications to further refine our proposals. Our goals are to provide a much needed P5 contact to the entire amateur radio community world-wide.
We also enjoyed visits to several schools, and we enjoyed the conversations that we had with the school children. We also were able to visit various factories throughout the country. Plans for a 2nd visit to the DPRK are already underway.
We are very pleased at this time to announce our partnership with the Chinese Amateur Radio Community and their involvement in the P5 Project. We have invited Fan Bin/BA1RB to join the P5 Project Leadership Team and to represent the Chinese Radio Amateur Community in our project.
Thank you,
The P5 Project Leadership Team - N6PSE AH6HY YT1AD K3LP WD5COV BA1RB"

Updates can be seen on the following social medias:

PA1813, THE NETHERLANDS (Special Event). ISWL Member, Fred, PA0FAW, will be running the special event station PA1813A between July 15th and August 13th. Many know about the liberation of Arnhem in 1945, also well-known because of the movie "A Bridge too Far". However, Arnhem was liberated before that from the French in 1813. Operations will be from JO21WX, JO21XX, JO22VA (WFF-PA-005) and JO32AA. Activity for the most part will be on CW, with some SSB and the Digital modes depending on the available time and possibilities. QSL via PA0FAW, direct, by the Bureau or eQSL (No LoTW). SWL reports are welcome.

PACIFIC DXPEDITION TOUR. Gerben, PG5M, informs OPDX that he will be active from two DXCC entities in the Pacific between September 6-19th.

The schedule is as follows:
September 6-7th - Callsign T8GM; Palau Island (OC-009)
September 8-15th - Callsign V6G; Yap Island (OC-012), Fed. States of Micronesia
September 15-19th - Callsign T8GM; Palau Island (OC-009)

This is a solo DXpedition and CW only. Station will be Elecraft K3 and ECO R7+ vertical for 40-10 meters. QSL via his home callsign, by the Bureau or direct. Important: Don't use IRCs as they can't be exchanged at his post office. For updates, watch his Web page and Twitter account at:
http://www.dx.to
http://twitter.com/@PG5M

PY0F, FERNANDO DE NORONHA. Leo, PP1CZ, will once again be active as PY0F/PP1CZ from Fernando de Noronha (SA-003). Activity will be before, during and after the RSGB IOTA Contest (July 27-28th) as a Single-Op/ All-Band/Mixed-Mode entry. Operations will be mostly CW. Outside the contest, look for him on 160-6 meters using CW, SSB and the Digital modes. His equipment is an IC-7000 and/or possibly a Yaesu FL-2100Z into a G5RV and A4S antenna. QSL via his home callsign, direct, LoTW or by the Bureau (very slow).

TS8TI QSL/eQSL UPDATE. Fred/IK7JWX and Antonello/IK2DUW report that as of June 29th, all QSOs with TS8TI have been confirmed with TS8TI which were received on eQSL, via direct, via by the Bureau or via MDXC. Those who wish to QSL via the Bureau, can now send them all their QSO data via E-mail and it will be answered.

VK9NT QSL STATUS. Allan, VK2CA, reports: "Just received the VK9NT cards from the printer. Now the processing begins. OQRS Direct first, then the Direct. Then OQRS Bureau, then Bureau."

QSL RECEIVED VIA LoTW: 4A1TD, C6ATT, HB9BIN, TR8CA, XV4Y and YV5OIE

QSLS RECEIVED VIA MAIL: 3B8CF, 3B8MM, 4A2I, 5M2TT, 5V7TT, CD6713, HA8RM, JH7PKU, JM7OLW, L22D, PT0S, PY2COY, SU8N, SV2ASP/A, TK0INT, TK1INT, TK2INT, VK9CZ, YB8P, ZK3N and ZL7LC

QSLS RECEIVED VIA THE BUREAU: 5V7C, J28JA, FK8CP, FM5CD, FM/F6ARC, FM/F6AUS, FO/F6CTL/A/M, FT5GA, FT5XP/MM, PJ4C, S79UFT, TJ3FC, TJ9PF, TK5AE, TK5EP, TK5IH, TK5MH, TK/F8DZY, TO4IPA and TO5A

S2, BANGLADESH (Project 2013 by MDXC - Press Release #2). The Mediterraneo DX Club (MDXC) announced on Wednesday, June 26th [edited]: The team for the new adventure is 90% complete, and we are happy to present our Web site <www.mdxc.org/bangladesh2013> is NOW ONLINE. We will be active on 160-6 meters with 6 stations on 24 hours (2 SSB, 2 CW and 2 RTTY). We also present the official logo at:
http://www.mdxc.org/bangladesh2013/wp-content/uploads/2013/06/19-29.png
Please consider supporting us ... 73's Bangladesh 2013 TEAM."
Operators mentioned are Ant/IZ8CCW (Team Leader), Gabriele/I2VGW (Co-Leader), Marco/IZ2GNQ (Low Band Antennas Wizard), Manjur/S21AM (Co-Ordinator Bangladesh Chapter), Adhi/YB3MM, Eric/ON7RN, Michel/F5EOT (HF Antennas Magician), Stefano/IZ5GST, Aminul/S21D, Rabby/S21RC, Henri/F1HRE, Heye/DJ9RR, Fabrizio/IZ2KXC, Norbert/DJ7JC, Pino/I8YGZ, Marco/HB9OCR, Dario/IT9ZZO (Doctor), Ovidiu/YO9XC, Feri/YO5OED, Fabio/IK2LTR, Karl/OE3JAG, Fabio/IK4QJF and Mario/IK4MTK. Pilot stations are Rino/IK7JTF (EU), Don/N1DG (USA), Andre/V51B (AF) and Sergio/IK0FTA (6m). QSL Manager is Giuliano, IK2VUC; direct, by the Bureau or use the OQRS. LoTW files will be uploaded by the end of May 2014.

SA1/SJ1, SWEDEN (Special callsign/IOTA Op). Eric, SM1TDE, will operate as SJ1SOP for the "Sea Of Peace" (SOP) award between July 1-31st. Details about the SOP award: http://www.amateurfunk-mvp.de/inhalte/sopdiple.htm
Activity will be CW only on 160-6 meters. During the RSGB IOTA Contest (July 27-28th), Eric will be a Single-Op/All-Band/High-Power/Island/Permanent/24H entry and signing as SA1A from Gotland Island (SM1), IOTA EU-020. QSL via SM1TDE, preferably by the Bureau. Visit Eric's Blog page at: http://www.sm1tde.bloggspace.se

TN, REP. OF THE CONGO (TN2MS DXpediton - Offical Press Release) [edited]:
"DXpedition to the Republic of the Congo (Congo Brazzaville) TN2MS,
28 September ☐ 11 October 2013.

In September Arie/PA3A and Ad/PA8AD, and their XYLs Marian/PD1AEG and Angelina/PA8AN, will leave for Congo Brazzavile, Africa, to operate a DXpedition and at the same time carry out a support project for the Health organization Mercy Ships.
The DXpedition team will arrive in Pointe-Noire a week early on 22nd September. There they will carry out a support project on board the hospital ship 'M.V. Africa Mercy'. Starting 28th September the team will go ashore and will start the DXpedition. The Republic of the Congo as DXCC entity will be on the air on all MF/HF bands for almost 2 weeks on RTTY, SSB and CW and on 6m if license and propagation permit. The team will make a serious effort to work as many different stations as possible on

different bands and modes, and pay special attention to the smaller stations. Departure date is set for October 11th.
Another important goal for this DXpedition is to bring the good work of Mercy Ships to the attention of the worldwide amateur radio community so that health care projects in poor countries will get more worldwide support. Special thing is that sponsoring (donations, extra QSL green stamps, etc.) will be donated to the Mercy Ships projects in Congo. This is the 4th Xpedition in cooperation with Mercy Ships after Liberia 2007 (5L2MS), Benin 2009 (TY1MS) and Sierra Leone 2011 (9L5MS). For this the DXpedition team was awarded the prestigious Yasme Foundation Excellence Award 2012 for their sustained support of Mercy Ships through amateur radio.
Mercy Ships programs promote health and well-being by serving the urgent surgical needs of the forgotten poor, and empowering developing communities. For this Mercy Ships uses a seagoing hospital ship, the Africa Mercy. On this hospital ship and on bases ashore more than 400 volunteers use their skills to make a difference. The Africa Mercy holds 6 operation rooms and laboratories and patient rooms for 78 patients. 7000 operations can be performed per year and teams can go ashore to carry out different projects. Starting August 2013 the Africa Mercy will be operating in the African country Republic of the Congo.
For further information about this DXpedition, its objectives and sponsoring, see the following URLs:
TN2MS website: www.TN2MS.nl
Information about the Mercy Ships organization: www.mercyships.org
You can also follow the DXpedition team on Twitter: @DXpedition
73, Arie PA3A - Republic of the Congo DXpedition Team"

UP44, KAZAKHSTAN (Special Event/WFF Op). Members of the "Traveling Radio Amateurs Group☐ (UP44WFF), Mountains Committee of Kazakhstan and Almaty Radio Amateur League will be active as UP4WWF between July 5-7th. Their activity coincides with "Capital Day" [the anniversary of their capital city "Astana" which became capital in 1998] and the birthday of their President Nursultan Nazarbayev of Kazakhstan, on July 6th. Operations will be on 40-10 meters using CW and SSB. Operators Art/UN6QC, Sergey/ UN6GAO, Viktor/UN7GIT, Andrey/UN8GU and Mike/UN8GC will activate the following mountain areas:
July 5th (0400-1800z) ☐ Reference Number WMA/UNM-045; Peak Schkolnik; altitude 3590m.
July 6th (0000-1800z) ☐ Reference Number WMA/UNM-042; Peak Abay; altitude 4010m.
July 7th,(0000-0800z) ☐ Reference WMA/UNM-040; Talgar Pass; altitude 3160m.
All references are in the territory of "Ile-Alatau National Park" (WFF/UNFF-005). QSL via LoTW, by the Bureau, direct and <http://eqsl.kz/>.
More information and QSL info is available at:
(ENG) http://un-dx-news.ucoz.com
http://qrz.com/db/UP44WFF
(RUS) http://www.qrz.kz

V7, MARSHALL ISLANDS (Update). Mike, KJ6MZ (ex-V73/KJ6BBP), is now active as V73MZ from Kwajalein Island (OC-028) for the next few months. He mentions on his QRZ.com page that he is "working six days a week, so only will be getting on the air on Sundays (Kwajalein day)." He will try to check into the ANZA DX Net (at 0515z on 14.183 MHz) on Sundays. This is a directed net! The net control will ask for check-ins, then you have to wait for net control to give you your turn. Mike state, "Please note that I do not schedule QSO via E-mail. Also I do not have any QSO cards made yet, so it will be a while for them to be made as I am here for a while." Look for updates and more details on his QRZ.com page soon. QSL via: Mike Szelazek, P.O. Box 22409, San Diego, CA 92192, USA.

XW, LAOS. Larry, AG6OU, will be active as XW6OU from Laos starting July 1st. It is not known how long he will be there. Activity will be on 20 meters. QSL via direct (see QRZ.com) or E21EIC.

Z6, KOSOVO. Boyan, LZ1BJ, informs OPDX that he just received his Z6/LZ1BJ license and it is valid until June 24th, 2014. He is Pristina and will be active during his spare time on the HF bands using CW, SSB and the Digital modes.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30701
SIDC SOLAR BULLETIN 01 Jul 2013, 1207UT
SIDC FORECAST (valid from 1230UT, 01 Jul 2013 until 03 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 01 Jul 2013 10CM FLUX: 102 / AP: 021
PREDICTIONS FOR 02 Jul 2013 10CM FLUX: 102 / AP: 007
PREDICTIONS FOR 03 Jul 2013 10CM FLUX: 098 / AP: 007
COMMENT:Solar activity has been rather low in the past 24 hours, with C flares
observed in NOAA ARs 1778 and 1780. The strongest event, a C2.7, took place
in NOAA AR 1780, on June 30, 1517 UT (peak time). C flares are still
possible from this region in the next 48 hours, and we therefore expect
eruptive conditions over that period. A faint wide CME is observed on June
30, around 0400UT, but it seems to be a backside event. We expect unsettled
to active conditions in the next 24 hours, due to the possible arrival of
the CME of June 28, and then quiet conditions for the rest of the period.
Current geomagnetic activity is quiet.
TODAY'S ESTIMATED ISN : 044, BASED ON 10 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30702
SIDC SOLAR BULLETIN 02 Jul 2013, 1107UT
SIDC FORECAST (valid from 1230UT, 02 Jul 2013 until 04 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 02 Jul 2013 10CM FLUX: 115 / AP: 007
PREDICTIONS FOR 03 Jul 2013 10CM FLUX: 119 / AP: 007
PREDICTIONS FOR 04 Jul 2013 10CM FLUX: 121 / AP: 007
COMMENT:Solar activity has been low in the past 24 hours with a few C flares
observed. The strongest event was a C1.8 flare, taking place in NOAA AR
1785, on July 1st, 1516UT (peak time). We expect C flares in the 48 hours
to occur essentially in AR 1785, raising the flaring forecast level to
eruptive. A wide filament eruption occurred on the east limb, around 1930
UT, on July 1st. It was accompanied by a CME spotted by LASCO and COR
coronagraphs, but with long data gaps. With the current available
information, it is difficult to assess the true extent of the event and if
it poses any risk. Based solely on its location, the risk for geomagnetic
effects appears to be low. A second filament eruption took place on July
2nd, around 0000UT, near the central meridian. Due the data gap in
coronagraph data, it is not known currently if a halo CME is associated
with this event. We expect mostly quiet geomagnetic conditions for the next
48 hours. Current conditions in the interplanetary medium as measured by
ACE are also very quiet.
TODAY'S ESTIMATED ISN : 076, BASED ON 15 STATIONS.

SIDC SOLAR BULLETIN 03 Jul 2013, 1107UT
SIDC FORECAST (valid from 1230UT, 03 Jul 2013 until 05 Jul 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 03 Jul 2013 10CM FLUX: 114 / AP: 001
PREDICTIONS FOR 04 Jul 2013 10CM FLUX: 114 / AP: 001
PREDICTIONS FOR 05 Jul 2013 10CM FLUX: 114 / AP: 007
COMMENT:NOAA AR 1785, near the east limb, produced an M-flare this morning
associated with type II and type III bursts. LASCO data are not in yet to
confirm if there was also a CME but in any case the event will not be geo-
effective. Quiet geomagnetic activity is expected in the coming days. A
coronal hole in the northern hemisphere might speed up the solar wind, and
hence geomagnetic activity, towards the end of the week.
TODAY'S ESTIMATED ISN : 076, BASED ON 08 STATIONS.

QST de W1AW
DX Bulletin 27 ARLD027
>From ARRL Headquarters
Newington CT July 3, 2013
To all radio amateurs

SB DX ARL ARLD027
ARLD027 DX news

This week's bulletin was made possible with information provided by QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SRI LANKA, 4S7. John, NZ9Z is active as 4S7NZG until July 7. Listen for him around 1200-1800z, typically from 1200-1400z on 15 meters and 1700-1800z on 20 meters. QSL via NZ9Z.

ISRAEL, 4X. Members of the Israel Amateur Radio Club (IARC) will activate 4X19MG in honor of the 19th Maccabiah Games from July 18 to 30. QSL via 4Z1TL.

CYPRUS, 5B. Tony, RT9T will be QRV as 5B4ALB from July 6 to 16. Activity will be on all bands and modes. QSL via RT9T direct only. Tony will also participate in the IARU HF Championships as a member of the P3N team.

RWANDA, 9X. Operators Allan, G3XAQ, Nick, G3RWF and possibly others will be active as 9X0XA and 9X0NH, respectively, during the CQWW DX CW Contest. QSL both call signs via G3SWH.

UKRAINE, UR. Members of the Ukrainian Radioamateur QRP Club are celebrating their 15th anniversary and will activate special call sign EO15QRP from July 12 to August 12. QSL via UT2AB, via the Bureau or direct.

FERNANDO DE NORONHA, PY0F. Leo, PP1CZ will be QRV from July 25 to 30. He will be active as PY0F/PP1CZ and taking part in the RSGB IOTA Contest. Before and after the contest Leo will be on the newer bands, mostly CW and RTTY with some SSB.

ECUADOR, HD. Members of the Quito Radio Club (HC1QRC) will be operating as HD082QRC from July 13 to 23 to celebrate its 82nd

anniversary. Activity will be on 160 to 2 meters using CW, SSB and RTTY. QSL via HC1JQ direct.

CHINA, BA. Ma, BA4MY will be active as BA4MY/4 from Jiming Island from July 21 to 29. Activity will be on the HF bands. He will also be an entry in the RSGB IOTA Contest. QSL via BA4EG direct, by the Bureau, LoTW or eQSL.

FAROE ISLANDS, OY. Ulf, DL3UB will be QRV as OY/DL3UB from July 29 to August 9. Activity will be holiday style, primarily using CW on 30, 17 and 12 meters. QSL via this home call sign, direct or via the Bureau.

CHILE, CE. A group of operators will be QRV as XR77RG during the month of July to commemorate the 77th anniversary of the Radio Club Rancagua. Activity will be on all bands using SSB and PSK. QSL via CE4RG. In addition, a group of operators will be QRV as XR3PN during the month of July to commemorate the birth of Chilean poet and diplomat Pablo Neruda. Activity will be on all bands using SSB, RTTY and PSK. QSL via CE3OEV.

SWEDEN, SJ. Eric, SM1TDE will operate as SJ1SOP for the "Sea Of Peace" (SOP) award until July 31. Activity will be CW only on 160 to 6 meters. During the RSGB IOTA Contest, Eric will be signing SA1A from Gotland Island (SM1), IOTA EU-020. QSL via SM1TDE, preferably by the Bureau.

KAZAKHSTAN, UP. Members of the "Traveling Radio Amateurs Group" (UP44WFF), Mountains Committee of Kazakhstan and Almaty Radio Amateur League will be active as UP4WWF between July 5 and 7. Operations will be on 40 to 10 meters using CW and SSB.

MARSHALL ISLANDS, V7. Mike, KJ6MZ (ex-V73/KJ6BBP) is active as V73MZ from Kwajalein Island (OC-028) for the next few months. QSL via Mike Szelazek, P.O. Box 22409, San Diego, CA 92192, USA.

LAOS, XW. Larry, AG6OU is active as XW6OU. It is not known how long he will be there. Activity is on 20 meters. QSL direct (see QRZ.com) or via E21EIC.

ST PIERRE AND MIQUELON, FP. Eric, FP/KV1J will be QRV from July 6 to 16, using mostly SSB and RTTY with some CW and PSK31, on 160 to 10 meters. QSL direct or via bureau to his home call, LoTW or eQSL.

HAITI, HH. Tom, HH5/KC0W will be active from the northern tip of Haiti from July 6 to 25, using CW only, on 160 to 6 meters. QSL direct only via KC0W.

ACTIVITY NOT SCHEDULED. The operation from Ghana mentioned in bulletin ARLD026 will not take place. There is no operation scheduled at this time.

THIS WEEKEND ON THE RADIO. The 070 Club Firecracker PSK31 Sprint, Venezuelan Independence Day Contest, DL DX RTTY Contest, DARC 10 Meter Digital Corona and QRP ARCI Summer Homebrew are all on tap for this weekend. The Michigan QRP July 4th Sprint is on July 4. The ARS Spartan Sprint and OK1WC Memorial Contest are on July 9. The CWops Monthly Mini-CWT Test is on July 10. Please see page 80 in the July 2013 issue of QST and the ARRL and WA7BNM Contest web sites for details.

#-----------------------------------------------------------------#
SIDC URSIGRAM 30704
SIDC SOLAR BULLETIN 04 Jul 2013, 1107UT
SIDC FORECAST (valid from 1230UT, 04 Jul 2013 until 06 Jul 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 04 Jul 2013 10CM FLUX: 125 / AP: 001
PREDICTIONS FOR 05 Jul 2013 10CM FLUX: 125 / AP: 006
PREDICTIONS FOR 06 Jul 2013 10CM FLUX: 125 / AP: 007
COMMENT:NOAA AR 1785 has increased significantly in size and number of spots. It
has produced non-stop small scale flaring in the core of the active region.
For these reasons, we expect up till M-class flaring in the next 48hr. We
expect quiet geomagnetic conditions in the next 24 hours. The CME of July 1
is expected to miss the Earth and the coronal hole in the northern
hemisphere is not expected to be geoeffective.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2 - Stan, LZ1GC will be active as 3D2GC from Viti Levu (OC-016), Fiji on 20-26 September and again on 12-15 October. On 27 September-11 October look for Stan, 3D2GC/p (CW and SSB) and Rocky, 3D2DD/p (SSB) to be active from Rotuma (OC-060). QSL 3D2GC and 3D2GC/p via LZ1GC, direct or bureau; QSL 3D2DD/p direct to 3D2DD. Further information, QSLling instructions and logsearch (after the expedition) can be found at http://3d2gc.com/.
9A - ON2AV, ON4CEZ and ON7JA will be active as 9A/OO7T/p from Brac Island (EU-016) from 24 July to 2 August. QSL via bureau. [TNX rsgbiota.org]
BY - A team of nine operators (BA4WL, BA8IK, BD4WN, BD4WO, BD4WS, BH4RJP, BH4RQU, BH4RWX and BH4RZI) will be active as BA4WL/5 from Liuheng Island (AS-137) on 27-28 July, including a few hours before and after the IOTA Contest. QSL via BD4WO (direct). [TNX BD4WM]
CT8 - CU3EJ, CU8AS, DL2HYH, HB9AHL and HB9CRV (CT3FN) will be active as CR2F from the lighthouse on the Formigas Islets (EU-003), Azores on 30-31 July (dates may vary depending on weather conditions). QSL via HB9CRV (direct or bureau) and LoTW. Further Information at www.to-mk.com/ct3fn/
CT9 - Ricardo CT3KN, Nicola CR9ABE, Jenny CR9ABG and Xavier CS9ABC will be active as CQ9D from the Desertas Islands (AF-046) on 26-29 July, IOTA Contest included. They will run low power into vertical antennas and be QRV on 40-10 metres CW and SSB. QSL via CT3KN (direct) and LoTW.
DL - Francois, ON4LO will be active as DL/ON4LO/p from Fehmarn Island (EU-128) on 14-25 July. He will be QRV on 80-6 metres SSB. QSL via home call, direct or bureau. [TNX ON4LO]
DU - Once again Maarten, PA3GZU will be active holiday style as DU9/PA3GZU from Mindanao Island (OC-130) from 13 July to 9 August. QSL via home call, bureau preferred. [TNX rsgbiota.org]
EI - Olivier, ON4EI will be active again as EI8GQB from Fethard, Ireland (EU-115) on 7-31 July using an hybrid wind-solar power system from his caravan. He will participate in the IARU HF World Championship (13-14 July), the CQ WW VHF Contest (20-21 July, on 6 metres) and the IOTA Contest (27-28 July) as EI1A. QSL for both

callsigns via PA3249, direct or bureau. A Live Information Banner
will be available at http://www.qrz.com/db/EI8GQB [TNX ON4EI]
ET - Ken, K4ZW will be back in Addis Ababa, Ethiopia on 12-19 July and
again on the 23rd (for half a day only). He will be active from
the ET3AA HQ station (EARS) during the IARU HF World Championship,
outside the contest he will operate mainly CW and will help the
students "set up for RTTY". QSL via N2OO. [TNX The Daily DX]
F - Gil, F4FET will be active on 20 metres SSB as F4FET/p from
Tombelaine Island (EU-156) on 6 July, from 9 to 13 UTC. On Sunday
7 July (again from 9 to 13 UTC) he will be joined by Diego,
F4HAU/p and they will operate two stations on 15, 17 and 20 metres
SSB, with "some minutes on 40m SSB if needed". They are not
allowed to overnight on the island. QSL for both callsigns via
F4FET. [TNX F4FET]
F - Vincent F4BKV, Gil F4FET, Juan F5IRC and Antoine F5RAB will be
active as TM0SM from St Marcouf (EU-081) on 9-11 August. A second
activity will take place on 23-25 August (operators F4FET, F5IRC,
F5RAB, Diego F4HAU and Marc F8DRA). They plan to be QRV on 40-6
metres SSB and CW with four stations and a focus on working
stations outside Europe. QSL via F5CWU (OQRS on Club Log). Further
information can be found at http://tm0sm.webs.com/
G - The RSGB HQ team will participate in the IARU HF World
Championship (13-14 July) as GR2HQ from different DXCC Entities
within the UK. All GR2HQ QSOs will be uploaded to LoTW a few weeks
after the contest, with the correct DXCC entity shown. These DXCC
entities (G, GJ, GM or GW) will also be clearly shown on the paper
QSL card you receive, along with the IOTA reference (if different
from EU-005). QSL via M0OXO (OQRS at www.m0oxo.com). Information
on the awards for working GR2HQ can be found at www.gr2hq.com.
GM - Ken, G0ORH and David, G3KLH will be active as MM3I from the isle
of Arran (EU-123) on 22-30 July. They will participate in the IOTA
Contest and concentrate on 30, 17 and 12 metres outside the
contest. They also plan some activity on 5 MHz. QSL via G0ORH.
[TNX rsgbiota.org]
H4 - Ralph, H44RK will be active as H44IND to celebrate the 35th
anniversary of the independence of the Solomon Islands. He plans
to be QRV from Nggela Sule, Florida Islands (OC-158) starting on 7
July "for several days". QSL via NR6M. [TNX The Daily DX]
HA - Geza, HA8DD and Zsolt HA8FY will be active as HA8DD/p and HA8FY/p
from six National Parks and Biosphere Reserve Areas on 8-11 July:
Kesznyeteni HAFF-025 (8 July), Zempleni HAFF-047 and Bukki
HAFF-002 (9 July), Borsodi Mezoseg HAFF-014 and Hevesi Fuves
Pusztak HAFF-020 (10 July), Hortobagyi HAFF-006 and Kozep-tiszai
HAFF-027 (11 July). They plan to be QRV with two stations on the
HF bands CW and SSB. QSL via home calls, direct or bureau.
Information on the Hungarian Flora Fauna Award can be found at
http://wff.pannondxc.hu/ [TNX HA0HW]
HC - Special callsign HD082QRC (HD Zero Eight Two QRC) will be
activated on 13-23 July to celebrate the 82nd anniversary of the
Quito Radio Club (HC1QRC). Expect activity on all bands CW, SSB

and RTTY. QSL via HC1JQ (direct). [TNX NE8Z]
I - Representing the Associazione Radioamatori Italiani (ARI), the following stations will participate in the IARU HF World Championship: IO1HQ (20 SSB, 40 CW and 80 CW), IO4HQ (40 SSB, 80 SSB, 160 CW and SSB), IO5HQ (20 CW), IO8HQ (15 SSB), IO9HQ (10 CW and SSB, 15 CW).
I - Noel, ON4APU will participate in the IOTA Contest as IA5/OO4O from Isola d'Elba (EU-028). QSL via the Belgian QSL bureau and LoTW. [TNX ON4APU]
I - A team from ARI Cosenza will participate in the IOTA Contest as ID8/IQ8CS from Dino Island (EU-144). Before the contest they will be QRV on 30, 17, 12, 6 and 2 metres CW and SSB. QSL via IQ8CS, direct or bureau. [TNX IZ8EQF]
KL - The logsearch for Rick's recent activity from Sarichef Island (NA-152) can be found at www.k6vva.com/iota/logsearch/index.php. As for his North Slope IOTA Tour [425DXN 1151], the propagation forecast does not look promising at all: both NA-172 and NA-004 "will unfortunately NOT happen this year", and the new plan for 2014 will involve "a lot of costly logistical matters to be rescheduled".
However, Mike is till making an attempt at operating from Barter Island (NA-050) on 8-10 July. He plans to leave on 6 July, "but be advised there could be 'fog' delays reaching NA-050". Look for K6VVA/KL7 to operate mainly CW on 40, 30, 20 and 17 metres. QSL via N6AWD, direct or bureau. Check http://www.k6vva.com/iota/na050/ for further information and http://www.twitter.com/k6vva for updates. [TNX K6VVA]
KL - David, K0DCH expects to be active from Mitkof Island (NA-041) on 12-16 July. QSL via home call (direct). [TNX rsgbiota.org]
OX - Look for N2IEN, W2RE and WW2DX to be active as OX/N2IEN, OX/W2RE and OX/WW2DX (or under an OX callsign that might be issued to them) from near Narsarsuaq, Greenland (WWL GP70dx, IOTA NA-018) on 11-15 July. They will operate SSB and CW on 40-6 metres, and will participate in the IARU HF Championship. QSL via home calls and LoTW. [TNX NG3K]
PA - Fred, PA0FAW will be running special event station PA1813A from 15 July to 13 August to commemorate the liberation of the city of Arnhem back in 1813 during the Napoleonic Wars. He will operate mainly CW, with some SSB and digital modes. QSL via PA0FAW, direct or bureau. [TNX VA3RJ]
PY - PP5BZ, PP5MCB, PP5ZB, PU5AGM, PU5ATX, PU5DCB and PY3OZ will be active as PQ5M on 40-10 metres CW, SSB and RTTY from Sao Francisco do Sul (SA-027) on 26-28 July, with an emphasis in the IOTA Contest. QSL via PP5BZ. [TNX The Daily DX]
PY0F - Leo, PP1CZ will be active as PY0F/PP1CZ from Fernando de Noronha (SA-003) on 25-30 July, including participation in the IOTA Contest (mainly CW). Outside the contest he will concentrate on 30, 17 and 12 metres (mainly CW and RTTY with some SSB). He will also give 160m a try. QSL via home call, direct or bureau, and LoTW. [TNX PP1CZ]

SM - Kjell, SM4DDS will be active as 7S5A from Boko Island (EU-177) on 15-21 July. He will be QRV on 80-10 metres CW and SSB. He may also operate as 7S5A/p for the Swedish Flora Fauna Award (SMFF-0316) while on the island. QSL via home call, direct or bureau, and LoTW. [TNX SM4DDS]
SP - Special event station SN150PS will be active on all bands and modes between 8 July to 30 September to commemorate the 150th anniversary of the Powstanie Styczniowe, the January Uprising of 1863 against th Russian Empire. QSL via bureau to SP5KOG. [TNX SP5CGN]
SV - Pista, HA8UT and his family (wife Erzsi HA8TU, daughters Liza HA8TT and Andi HG8SS, son-in-law Dezso HA8SS) will be active as SW2UT from Neo Pori on 16-26 July. Look for holiday style activity on 80-6 metres CW, with some SSB and RTTY. QSL via HA8UT, direct or bureau. [TNX HA0HW]
SV - Nick, SV1CEI will be active holiday style as SV8/SV1CEI from Kea Island (EU-067) for about two weeks starting on 6 July. He will operate mainly CW on the HF bands and possibly on 6 metres. QSL via home call. [TNX DX Coffee]
TN - Arie PA3A, Ad PA8AD, Angelina PA8AN and Marian PD1AEG will be active as TN2MS (callsign changed from TN5MS)from Pointe Noire, Republic of the Congo from 28 September to 11 October [425DXN 1153]. They plan to operate on 160-10 metres (plus 6 metres, if they are authorized) CW, SSB and RTTY, using three stations with amplifers and several beam and vertical antennas. The team will provide support and raise funds for a Mercy Ships Charity Project. This is the 4th DXpedition in cooperation with Mercy Ships (www.mercyships.org) after Liberia 2007 (5L2MS), Benin 2009 (TY1MS) and Sierra Leone 2011 (9L5MS). QSL via PA3AWW, direct (OQRS in the expedition's website) or bureau, plus LoTW after six months. Further information on the project can be found at www.tn2ms.nl [TNX PA3A]
UA - According to the updated schedule on http://robinsons.ru, planned expeditions under the Russian Robinson Club's 20th anniversary special callsign now include:
5-6 July R20RRC/3 Lesin Island (not IOTA)
7 July R20RRC/3 Kiriki Island (not IOTA)
8-12 July R20RRC/0 Sakhalin Island (AS-018)
24-26 July R20RRC/1 Morzhovets Island (EU-119)
27-28 July R20RRC/1 Glov Island (EU-162)
9-14 August R20RRC/8 Zhuravlinyy Island (AS-109)
R20RRC/1 from EU-162 will participate in the IOTA Contest. QSL via RZ3EC.
UA - Vladimir, UA0LCZ will be active as RI0NZ from Popov Island (AS-066) on 22-29 July. He will operate CW on 80-10 metres (+/- 3507, 7007, 10107, 14017, 18077, 21017, 24897 and 28017 kHz), and will participate in the IOTA Contest. QSL via UA0LCZ, direct or bureau. [TNX UA0LCZ]
UR - The club station of the Ukrainian State Centre of Radio Frequencies will be active as EM0ITU on 8-13 July during the ITU

Workshop on spectrum monitoring. QSL via UT3UZ. [TNX UT3UZ]
UR - Special callsign EO15QRP will be used from 12 July to 12 August by the Ukrainian Radioamateur QRP Club to celebrate its 15th anniversary. QSL via UT2AB, direct or bureau. [TNX UT2AB]
VE - Klaus, VE7KDU and Frank, VE7DP will make another attempt at operating from the Estevan Islands (NA-181) some time between 11 and 15 July. The operation will take place from Barnard Island, which is located about 130 Km west/south-west of the nearest accessible town . "Reaching our destination will depend on local weather and sea conditions", Frank says. The plan is for a minimum 48-hour operation, with activity on 30-15 metres CW and SSB. QSL via home calls, direct or bureau. A brief activity (less than 24 hours) from one of the qualifying islands in the NA-061 group, immediately before or after NA-181 is also a possibility. [TNX VE7DP]
VK - Craig, VK5CE will be active as VK5CE/p (http://oc261.blogspot.com) from Flinders Island (OC-261) on 15-21 August. This IOTA group was activated only once back in 2003. Craig will be able to be QRV on 10-80 metres, with a focus on 15, 20 and 40 metres SSB. He will be running 400 watts into a vertical set up right on the beach at the high tide mark. QSL via home call. All donations will be used to fund the October expedition to Red Island (see below).
VK - Eight operators from the Adelaide Hills Amateur Radio Society (namely VK5AJQ, VK5AKH, VK5ATW, VK5BUG, VK5FJOE, VK5KC, VK5NRG and VK5PAS) will be active as VK5CWL from the lighthouse at Cape Willoughby on Kangaroo Island (OC-139) on 16-19 August. They will operate SSB, CW and PSK on 10, 15, 20, 40 and 80 metres. QSL via VK5PAS, direct or bureau, plus LoTW and eQSL. Further information can be found at http://vk5cwl.weebly.com [TNX VK5PAS]
VK - Craig, VK5C E will be active as VK5CE/4 from Red Island (OC-255) (http://oc255.blogspot.com.au/) on 16-21 October. This IOTA group was activated only once back in 2002. The island is uninhabited; Craig will have to take two flights (4400 km) to reach Bamaga, where he will have "a local 4WD and fishing boat operator act as my DXpedition support person. He will pick me up from the Bamaga air strip, take me to the island, help me set up the tent and antenna and every couple of days he'll visit the island with fuel and water and just to make sure I'm safe". The cost of the DXpedition will be high, "and so the support of sponsors is really appreciated".
W - Scott, NE1RD will be active as NE1RD/1 from Lovells Island (NA-148) starting at 16 UTC on 7 July for 24 hours. QSL via home call, direct or bureau, LoTW and eQSL. Logsearch on Club Log. [TNX The Daily DX]
YB - Budi, YF1AR will be active as YF1AR/3 from Sembilangan Lighthouse on Madura Island (OC-237) on 25-29 July, including an entry in the IOTA Contest. Further information at http://www.yf1ar.com/. Logserach on Club Log and QSL via N2OO. [TNX YF1AR]
YB - Adhi, YB3MM will be active as YB3MM/7 from Derawan Island (OC-166) on 26-28 July, IOTA Contest included. Logsearch on Club Log. See qrz.com for QSLling options. [TNX YB3MM]

ZF - Harry, AA2WN will be active holiday style as ZF2WN from the Cayman Islands (NA-016) on 13-20 July. He will operate mostly on 17 and 20 metres CW, SSB and possibly some digital modes. QSL via AA2WN and LoTW. [TNX The Daily DX]

PACIFIC TOUR ---> Gerben, PG5M (http://www.dx.to/) will be active as T8GM from Koror (OC-009), Palau on 6-7 and 15-19 September, and as V6G from Yap (OC-012), Micronesia on 8-15 September. He will operate CW only on 40-10 metres. QSL via home call, direct (do not use IRCs, as he cannot redeem them at his post office) or bureau. [TNX PG5M]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The June 2013 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

AGB AWARD PROGRAMME ---> Detailed information on the wide range of awards (colourful certificates and throphies) sponsored by the Activity Group of Belarus can be found at http://ev5agb.com/award/awards_e.htm [TNX EU1EU]

KOSOVO ---> Boyan, LZ1BJ is currently active as Z6/LZ1BJ from Pristina (Kosovo) until 24 June 2014. He is QRV in his spare time on the HF bands usign CW, SSB and digital modes. QSL via the LZ bureau. [TNX LZ1BJ]

LAGUNARIA DX GROUP ---> The intention of the newly born group "is not to support other DXpeditions rather than to carry out its own ones. Besides having fun and going on DXpeditions as the main goals, the Lagunaria DX Group also supports international understanding, shares technical ideas with others and makes use of high and bullet-proof technical standards. The group members (DJ5IW, DJ7EO, DJ9RR, DL1MGB, DL3DXX, DL5CW, DL5LYM, DL6FBL, DL8OH, DL8WPX and SP5XVY) are not only all known from a lot of DXpeditions in the past, but also passionated contesters of the Bavarian Contest Club (BCC)". Please have a look at http://lagunaria-dx-group.org/ to learn more about the group, its history and their DXpeditions. [TNX DL1MGB]

P5 PROJECT ---> P5 Project Team members Paul Ewing (N6PSE) and David Flack (AH6HY) have returned from their extensive travels throughout the DPRK. The purpose of the visit was to meet with Government Representatives in Pyongyang and to survey and assess various potential DXpedition venues throughout the country. "We will continue to communicate with the Ministry of Foreign Affairs and the Ministry of Posts and Telecommunications to further refine our proposals", and plans for a second visit are already underway. They also have invited Fan Bin (BA1RB) to join the P5 Project Leadership Team. Read the complete release, dated 29 June, at http://www.intrepid-dx.com/p5/news.php. [TNX N6PSE]

QSL ET3AA ---> Bob, N2OO For the time being Bob, N2OO has logs and QSL cards for QSOs made with ET3AA during the following time frames:
4 August 2011 (15.00-15.40 UTC)
from 8 December 2011 (12.29 UTC) to 13 December 2011 (16.13 UTC)
from 30 October 2012 (06.57 UTC) to 7 November 2012 (09.10 UTC)
from 8 November 2012 (1229 UTC) to current.
He can also confirm contacts made with ET3SID from 8 December 2011 (21.08 UTC) to 13 December 2011 (05.08 UTC) only.
Bob's OQRS is at http://df3cb.com/oqrs/n2oo/

RSGB IOTA'S 50TH ANNIVERSARY CONVENTION ---> The RSGB IOTA Committee is currently looking at the possibility of holding the celebration of IOTA's 50th Anniversary at Beaumont House, Windsor over the weekend of 4-6 July 2014. "What we need are serious expressions of interest in attending, not firm commitments at this stage", RSGB IOTA Manager Roger Balister, G3KMA says. "We have set target figures for certain dates rolling forward. If we reach these, the event will go ahead. If not, the event will not proceed". Give a look at the leaflet that can be found at http://dx-world.net/2013/iota-convention-2014/ and please let G3KMA know (g3kma[@]dsl.pipex.com) if you are interested in attending the convention.

QSL GB4RS ---> The call GB4RS is used by the President of the Radio Society of Great Britain during his period in office. For QSOs between 1 July to 31 December 2013, QSL direct to G3PJT (IRCs not accepted) or request your bureau card by sending an email to g3pjt[@]btinternet.com

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Fifteen different galleries include 11,166 cards for the ten Most Wanted DXCC Entities (2004-12), the 61 deleted DXCC Entities, obsolete prefixes, stations from Maghreb from 1945 to 1962, Allied Forces stations in Germany (1946-69), special stations commemorating ITU and IARU, Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1970), pre-1945 countries, French Departments and CONUS, plus a gallery for cards not accepted by DXCC. Your participation is encouraged - please visit www.LesNouvellesdx.fr [TNX F6AJA]

QSL VIA W2FB ---> Those who still need a card for the October 2011 operation by YB9WZJ/p and YB0MWM/9 from Doom Island (OC-239) can send their request to Steve, W2FB, who has recovered the logs and has some blank QSL cards. [TNX W2FB]

W4DXCC ---> Sponsored by the SouthEastern DX and Contesting Organization, Inc. (SEDCO), the 9th W4DXCC DX and Contest Convention will be held at the MainStay Suites Conference Center in Pigeon Forge, Tennessee on 27-28 September. Complete details can be found at www.w4dxcc.com [TNX K4SV]

+ SILENT KEYS + Recently reported Silent Keys include Albert Decastille (5T5DA), Wayne Smith (VO1WET/VO1TA) and Ivan I. Udovin (EX2A, formerly UM8MBA and UM2M), chairman of the Amateur Radio Union of Kyrgyzstan and the first in is Country to obtain 5BDXCC.

QSLs received direct or through managers: 3B8CF, 3B8MM, 3D2C, 3D2RX, 3D2SE, 3D2XC, 4A2I, 4J0LH, 4O7ML, 5M2TT, 5U5U, 5U9AMO, 5V7TT, 5W0M, 6D0LM, 6V7V, 6W/PB2T, 6Y6T, 7O6T, 7P8ZM, 9G5AA, A35UD, AA4VK/CY0, C21UF, C31CT, C98RF (AF-072), CD6713 (SA-018), CE8DMT (SA-050), CM6RCR, CR1X, CR2X, D2EB, DU1/R6AF/p (OC-090), DU3/N0QM, FO8WBB, FR5FC, FY4PR, GJ0JSY, H40T, H44G, HK1/DK7PE, HP1/S54ZZ, J5NAR, J6/N7QT, J79WTA, J8/W6HGF, JT1AA/3, JT1CO, JW7XM, K6VVA/KL7 (NA-152), KH2/N2NL, L22D (SA-022), OH0/OF3I, OH0I, OJ0X, P40YL, PB13ROYAL, PJ7/PB2T, PT0S, PW0F, PZ5T, RI0K (AS-061), RI0K/p (AS-092), SU8N (AF-109), SV2ASP/A, SX5KL, TJ3AY, TK0INT (EU-100), TK1INT (EU-104), TK2INT (EU-164), TK5EP, TS8TI (AF-083), V63JX, V6A, V73PX, VK9/OG1M, VK9/OH1VR, VK9CZ, VP2EAG, VP2EAR, VP5/W5CW, VR2XMT, VU2PAI, VY0/VE3VID (NA-174), WL7E, XT2TT, XU1A, XU7NPC, XX9THX, YB8P (OC-208), YB8XM/p (OC-271), YE90PK, YN2N, Z6/SP5CJQ, Z61DX, ZA/LZ2HM, ZD7FT, ZD7VC, ZK3N, ZK3T, ZL7LC.

Propagation Forecast Bulletin 27 ARLP027
>From Tad Cook, K7RA
Seattle, WA July 5, 2013
To all radio amateurs

SB PROP ARL ARLP027
ARLP027 Propagation de K7RA

This week solar activity fell and then rose again, with average daily sunspot numbers down 23.6 points to 86.1. Average daily solar flux fell from 122 to 107.2. The solar flux on Thursday, July 4 rose to 137.7, the highest since May 16, fifty days earlier.

There was an active geomagnetic day on Saturday, June 29 when planetary A index was 51, high latitude college A index was 73, and mid-latitude A index was 40.

The high geomagnetic activity actually occurred on Friday night on the West Coast, with a planetary A index of 6 at 0300 UTC (Saturday UTC time) and 7 at 0600 UTC. My friend Diana Sorus has been asking me when to go out to see aurora, and I've told her to go to a dark place and look north when the K index is high.

I suggested watching http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt and the daily predictions at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html and to hope for clear skies. The usual problem in the Puget Sound basin of the Pacific Northwest is we have so many overcast days, the chances of seeing aurora are limited. You need just the right combination of high K index (5 or 6 or more), dark skies, and clear weather. Diana wanted to be sure to catch the next one, so she subscribed to a service from spaceweather.com which calls or texts her whenever the K index reaches some threshold designated by her.

Last Friday evening she got that call, but unfortunately was too tired from working that day to venture out of the city to watch for aurora. This is unfortunate, because aurora was visible that night in many places, including areas far south of us (aurora is more intense the further away you are from the equator). Skies here have been clear for days, and we had a heat wave over the weekend. I don't know when she will get that chance again. Could be next week, next month or next solar cycle. I wasn't watching conditions

closely enough to go out and observe for myself.

As you can see at
http://www.swpc.noaa.gov/ftpdir/indices/oldindices/2013Q2DGD.txt,
http://www.swpc.noaa.gov/ftpdir/indices/oldindices/2013Q1DGD.txt,
http://www.swpc.noaa.gov/ftpdir/indices/oldindices/2012DGD.txt and
http://www.swpc.noaa.gov/ftpdir/indices/oldindices/2011DGD.txt the
right combination is rare.

Back on March 1, 2011 the numbers look high enough, but locally the peak activity was during daylight. March 11, 2011 also had a peak at daylight, although the evening hours may have been good also, but March in Seattle tends to be overcast. I tried to find weather records online that would tell me the sky conditions, clear or overcast, but it seems I found everything but that. I did find visibility, which is typically 8-10 miles. An alternative for us is to hop on Interstate 90 and head east 100 miles over the Cascade mountain range to Eastern Washington, where skies are often clear.

The latest prediction (Thursday, July 4) has solar flux relatively high for the next few days, at 140 on July 5 and 6, 135 on July 7, 140 on July 8 to 10, then 135, 130 and 120 on July 11 to 13, 125 on July 14 to 16, 130 on July 17 to 19, then 120 and 115 on July 20 and 21, and 110 on July 22 and 23. The forecast shows solar flux reaching a minimum of 100 on July 26 and 27, then another minimum at 95 on August 2, and another peak at 130 on August 13 to 14.

Predicted planetary A index is 20 on July 5, 15 on July 6, 8 on July 7, 5 on July 8 to 16, followed by 10 on July 17, 15 on July 18 to 20, 18 on July 21, and 5 on July 22 to 26. The geomagnetic indices then show active conditions for the following six days.

OK1HH tells us he predicts geomagnetic conditions as mostly quiet on July 5, quiet to active July 6, quiet to unsettled, July 7, quiet July 8 to 15, mostly quiet July 16 and 17, quiet to active July 18 and 19, active to disturbed July 20, quiet to active July 21, mostly quiet July 22, quiet July 23 and 24, quiet to unsettled July 25, and quiet to active July 26 and 27.

At the beginning of the new month, it is now time to look at our 3-month moving average of daily sunspot numbers. The average for the three months centered on May, 2013 (April 1 through June 30) was 106.4, the same as the 3 month average centered on April, 2013 (March 1 through May 31). Actually the two averages were not exactly the same, with the latest 3 months lower by .028. The early period had a sum of 9,792 divided by 92 days, and the latest total was 9,683 divided by 91 days. The daily sunspot number average for June was just 80.2, a drop from 125.6 in May.

The progression of our moving 3 month average for the past year, centered on June 2012 through May 2013 was 96.5, 91.9, 89.9, 81.2, 82.3, 74.4, 82.8, 73.6, 80.7, 85.2, 106.4 and 106.4.

Some radio amateurs have said that perhaps this will be a double-peak solar cycle, like the last one. We don't know what the rest of the year will bring, but the most recent NASA prediction said the peak of the current cycle would likely be in the summer of 2013, which is now. Remember that exciting period of relatively high activity (at least for this weak solar cycle) in fall 2011? Our 3-month moving averaged peaked in October and November 2011, at 118.8 and 118.6. Now we get two months in a row with 3-month averages higher than any period since the end of 2011, at 106.4 and 106.4. I hope this isn't as high as it goes.

As we've noted during peaks of the previous solar cycles 22 and 23, because the determination of the peak is actually seen using a 12-month moving average, we don't really know when the peak was until well afterward, perhaps a couple of years out. The long moving average is used to determine the official peak because there is so much day-to-day and month to month variation in sunspot numbers.

An interesting inquiry arrived from Don Prahl, CP4DR/KV7Q:

"I am living in southwestern Bolivia (FG68) high in the Andes Mountains with a station elevation at 4,000 meters (13,000 ft.) I have a very modest station running 100 watts to a vertical on the roof for HF and a roof mounted dipole for 6 meters. The broad side of the dipole is looking north. When I am rag chewing I tell folks I have a very modest station but a tower that is almost 2 1/2 miles high! While kidding about the elevation of my antenna above sea level is fun, it makes me wonder if a station closer to the ionized layer actually presents any advantage.

I have read a lot of articles regarding the advantages of tower height above ground as it pertains to angle of radiation but I have never found any information looking at it just a bit differently. The question would be, with all things being equal (antenna, power output, ionized layer altitude, etc.) would a transmitting signal at 13,000 feet above sea level achieve a longer single path hop than the same station at sea level? If there is an advantage, it would be interesting to see what the ratio of height above sea level to the gain at the receiving end is. Hey, it is tough to breath at this altitude so I need any advantage I can get!

I know that Bolivia is a much needed prize on six meters so I am patiently waiting for that perfect set of conditions so I can confirm CP land to those who are looking. As such, I am really thinking about 50 MHZ. when I pose this question to you."

Thanks, Don. Sounds like a great location. The only advantage I can think of is that the horizon is more likely to be further away, so lower angles of radiation should be practical. I will cc this to K9LA to see what he thinks. If you are looking down on everything to the north, it seems like it would be great for communicating with North America on VHF.

As always, K9LA gave an excellent and instructive response:

"Go to http://k9la.us. Click on the 'Basic Concepts' link on the left. Then select the article titled The M-Factor.

What you'll see is how the hop distance and the M-Factor (M-Factor = MUF / critical frequency) change versus vertical distance to the ionosphere. This isn't exactly your situation - your situation is with but one end at a different height. But we can use my work to see how much an effect this is.

The difference in hop distance and M-Factor is as follows.

If propagation is via a 5 degree elevation angle to the F2 region at 300 km

Normal hop = 2878 km, M-Factor = 3.25

2.5 miles closer hop = 2855 km, M-Factor = 3.26

If propagation is via a 5 degree elevation angle to the E region at 110 km

Normal hop = 1487 km, M-Factor = 4.94

2.5 miles closer hop = 1448 km, M-Factor = 5.01

The hop length decreases when you are closer to the ionosphere because the wave encounters the ionosphere closer to you. But the M-Factor increases when you are closer because the angle of incidence on the ionosphere is smaller. The effect of being a bit closer to the ionosphere is greatest for the E region.

In summary, the effect of being 2.5 miles closer is certainly there - but it is a pretty small effect. Whether it could be discerned in the real world is questionable."

Thanks, Carl!

Jon Jones, N0JK wrote on June 28: "Caught a somewhat unusual opening to the Pacific Northwest June 26 on 6 meters from Lawrence, Kansas EM28. I worked N7NW CN87 (Fox Island, Washington), W7EW CN84 (Salem, Oregon) and W7SX CN84 (Elmira, Oregon) around 0335 UTC. N7NW was probably the loudest of the three."

"This is unusual due to the distance from EM28 to the CN80 grids. It is about 2,500 km. (about 1500 miles). It is a tough distance as it is between the maximum limit for one hop Es (2,300 km) and shorter than the usual range for double hop Es at 3,600-4,400 km. Thus the Pacific Northwest stations are rare on 6 meter Es here in Eastern Kansas. Stations further west like N0LL EM09 (North-Central Kansas) and K0BJ DM99 (Northwest Kansas) work it much more frequently as they are in the usual one Es hop zone. There is a discussion of this here:

http://www.uksmg.org/content/doughnut.htm "

Later the same day, Jon wrote: "Some aurora this evening, the first I have worked since fall of 2011. On 6 meters I heard WI9WI, AA9A, KC0CF, WB0RMO/b, a EN26 station on SSB, and K9WKW via Aurora from Lawrence, KS from 0030-0130 UTC June 29."

"I worked WA9LFO EN54 (who answered my CQ) on 50.098 MHz at 0107 UTC. I was portable with 100 watts and a 2 element Yagi from a nice hill top west of Lawrence overlooking the Kansas River valley to the north."

"This aurora was not 'predicted.' It seemed to occur when the Bz went way south the afternoon of the 28th."

And this week, six meter newcomer Howard Lester, N7SO of Schuylerville, New York (FN33) wrote:

"HEY! It was my first ever 6 meter opening. I made a whole bunch of contacts from 2330-0100 to as far west as Missouri, and as far south as Florida.

On DX Watch at around 2310 Thursday night, July 3 I noticed that a few contacts were being made on 6 meters, so I decided to listen. A newcomer to 6 with my loop antenna at 15 feet, I heard some signals coming through, starting with a W4. Since I have only the little loop for an antenna, and not very high, I didn't expect much for myself. At first, my expectations were confirmed, but in a few minutes I made contact with my first ever 'DX' on 6 with two fellows in Knoxville, Tennessee, and got a good report from both. Over the course of the next two hours I worked twelve stations in nine states on both phone and CW, as far west as Des Moines, Iowa, southeast to Knoxville, and south to north Florida - all with good reports. Granted, some or most of the stations I worked have more sizeable antennas, though one was a mobile in northern Illinois, who I worked on July 4 at 0115. He was my final contact for the night.

There seemed to be no pattern, no shifting around of the available propagation; it just 'opened up.' I could hear Southern stations working up into Ontario and Quebec, and I didn't notice them working anyone to their west. Overall, I sure had a lot of fun."

And finally, regarding my report last week of my casual Field Day operation as 1C class mobile, it probably didn't meet the requirements for 1C class. I was able to drive around the cemetery dragging the counterpoise wires, but the screwdriver antenna hanging out the rear passenger window seems a bit much, so it would probably be classed as a portable operation.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see

http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for June 27 through July 3 were 71, 83, 67, 85, 102, 101, and 94, with a mean of 86.1. 10.7 cm flux was 99.5, 101, 100.2, 102.8, 107.8, 114.3, and 124.5, with a mean of 107.2. Estimated planetary A indices were 8, 22, 51, 11, 8, 4, and 4, with a mean of 15.4. Estimated mid-latitude A indices were 8, 20, 40, 11, 10, 5, and 4, with a mean of 14.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30706
SIDC SOLAR BULLETIN 06 Jul 2013, 1107UT
SIDC FORECAST (valid from 1230UT, 06 Jul 2013 until 08 Jul 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 06 Jul 2013 10CM FLUX: 142 / AP: 023
PREDICTIONS FOR 07 Jul 2013 10CM FLUX: 142 / AP: 007
PREDICTIONS FOR 08 Jul 2013 10CM FLUX: 142 / AP: 007
COMMENT:NOAA AR 1785 and 1787 seem to have reached their peak size but M-class
flares remain likely in the next 24h. The z-component of the interplanetary
magnetic field is at -10 nT since yesterday evening. No shock was seen in
the solar wind speed, which remains slow at 350 km/s. Nevertheless active
geomagnetic conditions can be expected in the coming hours.
TODAY'S ESTIMATED ISN : 080, BASED ON 14 STATIONS.

SIDC URSIGRAM 30707
SIDC SOLAR BULLETIN 07 Jul 2013, 1007UT
SIDC FORECAST (valid from 1230UT, 07 Jul 2013 until 09 Jul 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 07 Jul 2013 10CM FLUX: 131 / AP: 007
PREDICTIONS FOR 08 Jul 2013 10CM FLUX: 129 / AP: 007
PREDICTIONS FOR 09 Jul 2013 10CM FLUX: 127 / AP: 007
COMMENT:NOAA AR 1785 and 1787 have further reduced in size and number of spots but
remain capable of an M-class flare. The z-component of the interplanetary
magnetic field has returned to a northward orientation and the solar wind
speed is further reducing (now <350 km/s). The active geomagnetic
conditions of the past 24 hrs, that were presumable caused by the halo CME
leaving the Sun on July 1, 19h, will therefore come to an end. Quiet
geomagnetic conditions are expected.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1119
BID: $OPDX.1119
July 8, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W2GB, WU2D, NG3K & ADXO, W3UR & The Daily DX, K4SV, K4ZW, N4AA & QRZ DX, W4OTN/3, K6VVA, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W8XD, W9ILY, 2E1EUB, AT International, DK8JB & The DX News Letter, DL1MGB, DL1SBF, DL3UB, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3RWF, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK8YFU, LY4Q, ON4EI, ON5NT, OZ6OM & 50 MHz DX News, PD1SA, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, VE7DP, the VHF-DX-Portal (MMMonVHF) and YF1AR for the following DX information.

*** SPECIAL NOTE FROM EDITOR (By KB8NW): It is highly unlikely that there will be a bulletin next week due to personal and family commitments. However, this does not include special announcements or bulletins, but please keep sending your DX information. You never no what I may do...
73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th-June, through Sunday, 7th-July there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5R, 5T, 5W, 5Z, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9V, 9Y, A3, A4, A5, A6, A7, A9, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

2M, SCOTLAND (Satellite/Low Band Op). Paul, 2E1EUB, will once again be active as 2M1EUB for 14 days beginning August 5th. He will be driving around Scotland for anyone looking for new grids or grids they have not worked yet. Activity will be on 160m, 80m, and the satellites (mostly AO-7 B/A mode), as well as 2m SSB. He does accept E-mails and will arrange skeds to work him at <2e1eub@amsat.org>. Check out QRZ.com under 2M1EUB for more info and updates.

60M ANNIVERSARY (Can You Believe It?). It was brought to our attention by the "60m News" that July 4th, is the 10th anniversary of 60 meters becoming available to U.S amateurs. {ed. Boy does time fly!}

6V, SENEGAL (Reminder). Vladimir "Vlad", RK4FF, will once again be active as 6V7S from Le Calao in Ngaparou between July 10-16th. Activity will probably be on 80/40/20/15/10 meters using CW, SSB and RTTY. He is scheduled to be here one more time this year: October 22nd-November 27th. QSL via RK4FF. Log is available on ClubLog. Check out QRZ.com for some pictures.

9H, MALTA. Nakanishi, JJ2NYT, will be active as 9H1N from Malta between August 2-5th. Activity will be holiday style on 40-10 meters using CW and SSB. QSL via his home callsign.

AT20, INDIA (Special Event). Arasu, VU2UR, will be active as AT20RRC from Bangalore during the month of July. Activity is to celebrate 20th anniversary of the Russian Robinson Club (RRC). Operations will be on the HF bands. QSL "ONLY" via eQSL (NOT via VU2UR).

CE0X, SAN FELIX (Update). Mike, WU2D, informed OPDX this past week: "If I actually get permission and time, I will attempt to activate CE0X/WU2D. I likely will start calling then filter by districts and zones and will be on 14.185 or 190 TX and listening up 5 to start. I also want to try CW on 30M since Chile just opened that up and it will be a first for San Felix. Realistically, I cannot see that I will be operational until Wed-Thursday the July 12-13th.... 73's Mike"

CR2, AZORES (LH Op!). Operators Leonel/CU3EJ, Antonio/CU8AS, Siggi/DL2HYH, Willy/HB9AHL and Hermann/HB9CRV/CT3FN will activate the lighthouse for the first time on Formigas Island (EU-003, WLOTA LH-4293, ARLHS AZO-001 and WWFF/DPRN CTFF-039) as CR2F between July 30-31st. QSL via HB9CRV, direct, by the Bureau or LoTW. For updates, watch: http://www.to-mk.com/ct3fn

D2, ANGOLA. João, CT2HPM, is now active as D2CT from Luanda until July 26th. Activity will be 20-10 meters using mostly PSK31 and RTTY. QSL via his home callsign.

EI, IRELAND. Olivier, ON4EI, will once again be active as EI8GQB and EI1A between July 7-31st. He plans to operate from his caravan using green energy. Olivier will activate the EI1A callsign during:

- The IARU HF Worldchampionship Contest July 13-14th
- The CQ WW VHF Contest July 20-21st (on 50 MHz only)
- The RSGB IOTA Contest July 27-28th.
His objective is to enjoy radio, run the contest with green energy only and score among the "TOP 10" world stations in the SOABLP category. You can follow his activities and antenna experimentation on:
http://www.qrz.com/db/EI8GQB
This is a very interesting QRZ.com page. There you will find a live information banner with on air frequencies and information. His equipment will consist of:
18m top loaded vertical monopole for 160-80m-40m bands + 32 radials.
3 elements East-West directional inverted V beam for 40m band.
200m long beverage RX antenna East-West directional.
2 Spiderbeam antennas for 20/15/10m bands.
Rigs are Elecraft K3+P3 & Kenwood TS2000 100W.
500Ah battery bank + 180W solar panel and 400W wind generator.
Also, live video streaming will be provided on:
http://www.ustream.tv/channel/ei8gqb
QSL via PA3249, direct or by the Bureau.

ET, ETHIOPIA. Ken, K4ZW, will once again be back in Addis Ababa between July 12-19th. He plans to operate from ET3AA, the Ethiopian Amateur Radio Society (EARS) club station. He mentions to OPDX that most of his time will be spent on CW, but is going to try and be active on RTTY as well. Ken also states to look for ET3AA HQ station during the IARU HF World Championship (July 13-14th). QSLs go to N2OO. In fact, Bob is handling QSLs now for ET3AA, but he doesn't have all of the logs. There is a chart on the ET3AA QRZ.com Web page that lists the logs he does have.

FO/A & FO/M, AUSTRAL AND MARQUESAS ISLANDS. By the time you read this, Vadym, UT6UD (ex-A35UD and S21XV), will be active as FO/UT6UD from the Hiva Oa Island (OC-027), Marquesas Island, until 1500z, July 13th. He will then move onto Rurutu Island (OC-050), Austral Island. Vadym plans to be there between 0400z, July 15th and 1600z, July 22nd. Activity will be on 40-10 meters using CW, SSB and RTTY. His equipment is a TS-590 and verticals. QSL via UT6UD, direct or by the Bureau.

FS, ST. MARTIN (Reminder). Operators YL Kjerstin/AF6KJ and Travis/AF6WU will be finishing up their activity as PJ7/homecall from Sint Maarten (NA-105, WLOTA 0711) on July 9th, and then move onto St. Martin (NA-105, WLOTA 0383) to be active as FS/homecall between July 10-14th. Activity will be on multi-bands and multi-modes on HF according to the best available propagation. QSL both callsigns via AF6WU, direct or by the Bureau. Also eQSL, LoTW and Clublog. For direct QSLs, U.S. stations send 1 US stamp, 33 cents does it. DX stations send 1 USD or 1 IRC. Don't send him a standard envelope, the card is large, 4" x 5.25", and it won't fit.

FS, ST. MARTIN. Operators Randy/N0TG, Ron/AA4VK and Jeff/N1SNB will be active as FS/homecall from St. Martin (NA-105, WLOTA 0383) between October 24-31st. Activity will probably be like their PJ7 operation - a suitcase operation on 40-10 meters using CW and SSB, with wire antennas

and 100 watts. The trio will be active as FS/N1SNB during the CQWW DX SSB Contest (October 26-27th). QSL "ALL" callsigns via AA4VK.

HC, ECUADOR. Mauro, IZ1DPS will be active as HC/IZ1DPS from Ecuador between now and January 12th, 2014. Activity will be on the HF bands. QSL via IK2DUW, direct, by the Bureau or LoTW. NO eQSL.

II8, ITALY (LH Op!). Members of the Calabria DX Team and ARI Villa S. Giovanni will be active as II8LH on July 13th, from the Punta Peaao Lighthouse (WAIL CL-007, ARLHS ITA-139). QSL via the Bureau to HB9FHZ (USKA Bureau). QSL via IK8YFU direct. E-QSL Authenticity is guaranteed. Also LoTW. For more info, see: http://www.calabriadxteam.it

IOTA ACTIVATIONS. Eric, W4OTN/3, informs OPDX that he is currently planning on two IOTA DXpeditions: Smith Island (NA-140) and Hatteras (Pea) Island (NA-067). The DXpedition to Smith Island is up in the air due to him having to sail there, but the latter to Hatteras Island will definitely happen unless there is some hurricane that forces him to stay home. His plan is as follows:
NA-140 - Smith Island is a small island in Maryland's Chesapeake Bay. Available only by boat, he will be sailing there to operate from the marina using shore-based antennas and transceivers. Eric will provide an update as it gets closer to the time to make his way south. Operation will be over the last weekend in July 2013 for the annual RSGB IOTA Contest. Activity will most likely be 40-10 meters SSB. He may be able to do some CW, depending on how much practice he get before then.

NA-067. Eric will be on vacation between August 4-10th on Hatteras Island. Operating will be vacation-style and he will try to be available on 40-6 meters using CW and SSB. Eric knows this island group has been well represented in the past so he does not expect many pileups, but maybe he can work some rare ones himself!

QSL via LoTW, direct (w/SASE OR SAE and 1 IRC), or SKCC or the ARRL Bureau. Eric will update everyone on his Web page as time gets closer for these events to happen at: http://www.w4otn.us/upcoming-iota-activations

IOTA ACTIVITY BY K6VVA (NA-004/NA-050/NA-172). Rick, K6VVA, sent out the following info on June 30th [edited]: "The decision was just made about NA-172, NA-004 and NA-050.
Look at the NOAA Forecast graph at <http://www.k6vva.com/iota/na172>.
Our planned dates for NA-172 were July 17-20th. NA-172 will unfortunately NOT happen this year - the "handwriting is on the wall". ;-(
A new 'Game Plan' for next year (2014) will involve new advance arrange-ments for a potentially MUCH longer stay on the mainland to wait out any solar issues. This will also be a more costly activation due to added 'Polar Bear Guard' protection cautionary measures including paying for the boat to remain at the Island with us in the event of a need for a QRQ Exit. 'Safety First' is the highest priority for Mike/K9AJ and myself. There are a lot of costly logistical matters to be rescheduled involving

the NA-172 activation.
That's the situation. Ditto for NA-004. However, I will still make a
THIRD attempt at NA-050 myself which is more 'turnkey' to accomplish,
and not as much $$$ loss risk if solar condx take a dump on the way
there, upon arrival or during the activation. ;-(
Stay tuned for more details, and check <http://www.twitter.com/k6vva>
for any updates.
FYI & 73,..... Rick, K 6 V V A * The Locust"
UPDATE FROM RICK: Rick was going to try to activate NA-050 this past
weekend, but he had to postpone -- "Due to increased unexpected solar
disturbances, Auroral Oval, potential NA-050 fog and now the likelihood
of departure delays and missed connections due to the re-routing of many
plane flights down to the San Jose Airport resulting from the unfortunate
plane crash at nearby SFO airport, this trip is being (postponed) again."
Read the complete news release at: http://www.k6vva.com/iota/na050

IOTA NEWS.............
AF-046. Operators Nicola/CR9ABE, Jenny/CR9ABG, Xavier/CS9ABC and
Ricardo/CT3KN will be active as CQ9D from Medeira Natural
Park on Desertas Island between July 26-29th. Activity will
be on 40-10 meters using CW and SSB. They will have a very
modest setup (low power and verticals antennas). They also
will participate in the RSGB IOTA Contest (July 27-28th).
QSL via LoTW or direct to CT3KN.

AS-066. Vladimir, UA0LCZ, will be active as RI0NZ from Popov Island
between July 22-29th. Activity will be on 80-10 meters CW.
He will also be an entry in the RSGB IOTA Contest (July
27-28th). QSL via his home callsign, by the Bureau or direct.

AS-137. Members of the Nanjing Amateur Radio Club (NJARC) will be active
as BA4WL/5 from Liuheng Island, in the Zhoushan Archipelago
Group, Zhejiang Province, China, during the RSGB IOTA Contest
(July 27-28th). Operators mentioned are XU/BA8IK, Jiang/BD4WO,
Yang/BD4WN, He/BH4RQU, BH4RJP, Chen/BH4RWX, Yu/BH4RZI and
Liu/BD4WS. QSL direct only to BD4WO (2 USDs or 2 new IRCs).

EU-011. Members of the Cray Valley Radio Society team will once again
activate St. Mary's Island in the Isles of Scilly during the
IOTA Contest (July 27-28th) as Multi-Op/Mixed-Mode/24HRS/High-
Power entry. The team is usually there before the contest. In
the past the team has operated on all HF bands prior to the
contest using their callsigns/P. During the contest they will
be active as M8C and after until they leave the Islands under
their own callsigns. QSL via G4DFI, the QSL Manager of M8C and
the Club callsign. Operators mentioned this year are Nobby/
G0VJG, Richard/G7GLW, Ian/M0UAT, Guy/G0UKN, Garo/G0PZA and
Chris/G0FDZ.

EU-016. Operators Nicolò/IZ6TSA, Italo/IK6JNH and Andrea/IK6VXO will
be active as 9A8DV from Drvenik Veli Island (IOCA-017) during

the RSGB IOTA Contest (July 27-28th) as a Multi-Single entry.
QSL via IK6VXO.

EU-038. Operators Berend/PA3FAL, Peter/PE1PKR and Eric/PE3V will be
active as PE3V/p from Ameland Island during the RSGB IOTA
Contest (July 27-28th) as a Multi-Op/IOTA-DXpedition/24HRS/
Low-Power entry. QSL via PE3V.

EU-049. Tony, PY2DY, will be active as SY8APQ from Lesvos Island until
July 31st. Activity will be on 20/15 meters. QSL via PY2DY
direct or LoTW. (NO eQSL and NO Bureau)

EU-049. Isidoros, SV8GXQ, will be active with the special callsign
SX8HOMER from Chios Island (GIOTA NAS-002) starting July 30th,
for 15 days. Activity is to honor "Homer's" contribution to
the "Greek Culture and History". Activity will be on the HF
bands. QSL via his home callsign direct only.

EU-057. Joachim, DL5KUD, will once gain be active from Ruegen Island
(O-07 for the German Islands Award) during the RSGB IOTA Contest
(July 27-28th) as a Single-Op/CW/Low-Power entry. QSL via DL5KUD.
by the Bureau or OQRS.

EU-128. Francois, ON4LO, will be active as DL/ON4LO/p from Fehmarn
Island (DID O-01, WLOTA 0637) between July 14-25th. Activity
will be holiday style on the HF bands. QSL via his home
callsign, direct or by the Bureau.

EU-135. Anders, SM5EFX, will once again be active as SF2X/p from Ledskar
Island (WLOTA 0291) between now and July 31st. Activity will
be on all HF bands and modes. His main focus will be an entry
in the RSGB IOTA Contest (July27-28th). QSL via SM5EFX, direct
or by the Bureau.

EU-146. Operator Ron, ON6CQ, will once again be active as PA/ON6CQ
from Schouwen Duiveland, Netherlands, during the RSGB IOTA
Contest (July 27-28th) as a Single-Op/Mode-SSB/24HRS/High-Power
entry. QSL via ON6CQ, by the Bureau (preferred), direct or LoTW.

EU-175. Nuno, CT1EEK, will be active as CR5R from Pico Island, Azores,
between July 30th and August 5th. Activity will be holiday
style on 20-10 meters, possibly 80/40 meters, using a TS-570
running 100 watts into a dipole or vertical. QSL via CT1EEK.

NA-059. Tim, NL8F, will be active as KL7RRC from Fox Islands throughout
July, to celebrate the 20th anniversary of the Russian Robinson
Club (RRC). QSL via N7RO and UA9OBA. RRC's Expeditions QSL
Manager, Eugene, RZ3EC, will have a copy of the log to help
with earning credit for the anniversary's diploma.

NA-181. Operators Klaus/VE7KDU and Frank/VE7DP will make another attempt
to activate the Estevan Islands some time during July 11-15th.
The operation will actually take place from Barnard Island; it

is located about 80 miles west/southwest of the nearest
accessible town. Reaching their destination will depend on
the local weather and sea conditions. The plan is for a minimum
48-hour operation, activity on 30-15 meters using CW and SSB.
QSL via their home callsign, by the Bureau or direct. ADDED
NOTE: A brief activity (less than 24 hours) from one of the
qualifying islands in the NA-061 group is also possible,
immediately before or after NA-181 operation.

OC-158. (Special Event) By the time you read this, Ralph, H44RK, is
expected to be active with the special callsign H44IND from
Nggela Sule, Florida Islands. The special callsign is being
used to celebrate the Solomon Island's 35th anniversary
of independence. Activity will be on the HF bands using SSB.
QSL via NR6M.

OC-166. Adhi, YB3MM, will be active as YB3MM/7 from Derawan Island
between July 26-28th. Activity will include the RSGB IOTA
Contest (July 27-28th). QSL via IZ8CCW, direct or via the
OQRS. Log will be on ClubLog.

OC-237. Budi, YF1AR, will be active as YF1AR/3 from the Sembilangan
Lighthouse (ARLHS IDO-076, Admiralty K1158.2, NGA 23624), on
Madura Island between July 25-29th. Activity will be on 40-10
meters using mainly SSB but with some CW and Digital modes.
His operation also includes an entry in the RSGB IOTA Contest
(July 27-28th) as a Single-Op/All-Band/Low-Power entry. Equip-
ment is a Yaesu FT-450 with 100w into a 3 element yagi and
full size GP. QSL via N2OO. Log will be on ClubLog. For more
details and updates, see: http://www.yf1ar.com

OC-255. Craig, VK5CE, will be active as VK5CE/4 from the totally
uninhabited and very rare Red Island between October 16-21st.
If like his Flinders Island operation, Craig's activities will
be on 80-10 meters, with most of the operations being on
40/20/15m, using SSB and PSK. QSL via his home callsign.
For more details and updates, watch Craig's Blog page at:
http://oc255.blogspot.com.au

J3, GRENADA. Operators Clarence/WX7E and Ron/WJ7R are planning to be
active from Grenada (NA-024, WLOTA 0718) during the CQWW DX SSB Contest
(October 26-27th) as a Multi-Single entry. QSL via LoTW. Dates of stay,
callsign(s) and activities outside of the contest were not announced yet.

LDXG IS BORN (Press Release). Chris, DL1MGB, sent out the following on July 4th [edited]: "During the 2013 Ham Radio Exhibition in Friedrichshafen the foundation of the Lagunaria DX Group (LDXG) was announced. Several operators founded together in 2007 when carrying out the VK9DNX DXpedition to Norfolk Island. The group also went to VK9DWX (Willis Island 2008) and ZL8X (Kermadec Islands 2010). And it was the technical and operational brains behind the radio operations of the TX5K Cordell-DXpedition to Clipperton Island in spring of 2013.
The intention of the group is not to support other DXpeditions rather than to carry out its own ones. Besides having fun and going on DXpeditions as the main goals, the Lagunaria DX Group also supports international understanding, shares technical ideas with others and makes use of high and bullet-proof technical standards.
The group members (DJ5IW, DJ7EO, DJ9RR, DL1MGB, DL3DXX, DL5CW, DL5LYM, DL6FBL, DL8OH, DL8WPX and SP5XVY) are not only all known from a lot of DXpeditions in the past, but also as passionate contesters of the Bavarian Contest Club (BCC).
After several discussions in Friedrichshafen the group already started with planning a new one. More information about this will be available soon.
Please have a look at the homepage of the Lagunaria DX Group <http://lagunaria-dx-group.org/> to learn more about the group and its history and their DXpeditions."

LY80, LITHUANIA (Special Event). Look for the following stations to be active through July 31st. Lithuanian and Polish hams will operate special event stations to mark the 80th anniversary of the Lithuanian pilots Darius and Girenas flight across Atlantic Ocean. See the following URLs for more details: http://en.wikipedia.org/wiki/Lituanica
http://lt.wikipedia.org/wiki/Lituanica
The LRMD (Lithuanian Amateur Radio Society) will issue a special pennant to those operators and SWLs who fulfill the following conditions:
☐ EU stations 10 different special event LY80 and 5 different special event SN80 stations (also HF80LOT, 3Z80LOT) stations. Total 15 QSOs with different special events stations.
☐ DX stations 5 different special event LY80 and 3 different special event SN80 stations (also HF80LOT, 3Z80LOT) stations. Total 8 QSOs with different special events stations.

Lithuanian stations mentioned are:
LY80DG (via LY1RMD) LY80L (via LY5A) LY80U (via LY5O)
LY80B (via LY3Q) LY80M (via LY2MM) LY80X (via LY3X)
LY80E (via LY3NX) LY80N (via LY2KM) LY80Y (via LY3BY)

LY80G (via LY2GV) LY80Q (via LY4Q) LY80Z (via LY8O)
LY80H (via LY1H) LY80S (via LY4TB)
LY80K (via LY1K) LY80T (via LY2QT)

Polish stations mentioned are:
HF80LOT SN80JJY SN80SNU
3Z80LOT SN80KTR SN80PRK
SN80LOT SN80MNG SN80SNU
SN80AAG SN80MNK SN80TAW
SN80FMW SN80PRK SN80WWS

More information about Polish hams activities to mark this event,
please see: http://sites.google.com/site/sp1pmy/home/zlot-pszczelnik-2013

NP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will once again be active from here, but as NP2P during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW.

OX, GREENLAND. Operators Pat/N2IEN, Ray/W2RE and Lee/WW2DX will be active as OX/homecall from Narsarsuaq between July 11-15th. Activity will be on 40-6 meters using CW and SSB. They plan to use verticals. QSL via their home callsigns. Also, look for them to participate in the IARU HF World Championships (July 13-14th) as OX2DX. QSL via LoTW.

OY, FAROE ISLAND (Update). Ulf, DL3UB, will be active as OY/DL3UB from the Faroe Islands between July 29th and August 9th. Activity will be holiday style on 40-10 meters on CW, but with a focus on the 30/17/12 meter bands. QSL via this home callsign, direct or by the Bureau.

PJ4, BONAIRE. Frank, PH2M, will be active as PJ4M from Kralendijk, Bonaire (SA-006), between September 13-26th. Activity will be on the HF bands. QSL via his home callsign (only the 2013 operation), preferred by the Bureau or direct.

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see more than 11100 old QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2011) with more than 300 QSLs
- At least one card for each 60 deleted DXCC countries (more than 1500+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more than 3900+ QSLs)
- Album for stations from North Africa 1945-1962 (400+ QSLs)
- More than 850 QSLs from the Antarctic bases.
- Nearly 270 QSLs from the TAAF (Terres Australes and Antarctiques Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- The FG, FM, FP, FS, FY stations from 1945 to 1970
- More than 1500 cards for the old timer with more than 130 countries before 1945.
- Cards from the French Department before 1945.
- At least one card from each of the states in the U.S. before 1945.
The URL address for the Web site is: http://LesNouvellesDX.free.fr
Some cards are still needed for the collection, and your particip-ation is welcome. Please visit their site and give them your comments by sending an E-mail to: LesNouvellesDX@...
SPECIAL NOTE: A new album with more than 250 cards for ITU commemor-ative station is online and you can visit at this address: http://lesnouvellesdx.fr/galerie/galerie.php?page=listitu
PLEASE NOTE (Especially for USA and Brazil): During the year 1974 and 1975, a large number of 'ITU' stations were active and you can find on the web pages a list of QSLs needed. Your help is STRONGLY needed as usual.

QSL CORRECTION. Please note for the coming 9X0XA and 9X0NH during the upcoming CQWW DX CW Contest, the QSL info is as follows: QSL 9X0XA via G3SWH and 9X0NH via G3RWF (not G3SWH).

QSL RECEIVED VIA LoTW: 4A3RRC, 5W1SA, A61AS, A92GE, HP1/IZ6BRN, JE2PMC, KH0XH, OF3I and PJ4LS

QSLS RECEIVED VIA MAIL: 3D2XC, 7P8ZM, 8Q7DV, C98RF, FO8WBB, HP1/S54ZZ, JT1AA/3, JT1CO, K6VVA/KL7, KH2L, PT0S, SV2ASP/A, UA9FAR, VR2XMT, XE1RBV and ZD7VC

QSLS RECEIVED VIA THE BUREAU: 5R8UO, 9L0W, B3C, C50C, MD0CCE, IS0/DL6NDW, P4/DF7ZS, P40Z, PJ2/DL8OBQ, S79A, S79NEN, ST0R, T70A and V55V

SW9, CRETE. Gordon, MM0GOR, will be active as SW9GG from Crete Island (EU-015) between July 23-30th. Activity will include the RSGB IOTA Contest (July 27-28th). QSL via his home callsign to the RSGB Bureau.

TO7, REUNION ISLAND (Early Announcement). Members from the F6KOP Radio Club team will be active as TO7CC from Reunion Island (AF-016) between February 5-17th, 2014. Activity will be on all bands and modes, with an emphasis on the lower bands and RTTY. More details will be forthcoming.

TK9, CORSICA. Sebastian, IK2WZM, will be active as TK9ZM from Corsica Island between September 2-8th. Activity will be holiday style on the HF bands. QSL via his home callsign. For more details and updates, watch: http://www.mdxc.org/tk9zm

VP2E, ANGUILLA. Don, W5SQK, will be active as VP2EAF from Meads Bay, Anguilla (NA-022), between July 8-16th. He states that this is a fixed operation from the hotel room and portable from the beach using a buddipole. Log will be uploaded to LoTW when he returns home. QSL via his home callsign W5SQK.

W4DXCC DX AND CONTEST CONVENTION (Press Release) [edited]: "The W4DXCC DX and Contest Convention is the South East's largest and best attended ham radio event for 9 years running. Located at the MainStay Suites in Pigeon Forge, Tennessee, September 27-28th. A full schedule of popular presenters speak on DX and Contest subjects throughout the main convention with prize drawings between presenters, drinks and snacks included. Equipment manufac-turers are on hand to demonstrate new products and answer your equipment questions face to face. A banquet rounds out the day where the grand prizes are drawn.
The Ten Tec Hamfest is Saturday 28th starting before the convention. Both hamfest and convention can be attended on Saturday.
A full range of shopping for the family is located nearby along with water parks, go cart tracks and Dollywood for the kids. Bring the family for a wonderful weekend full of Fun.
Check out the WEB site for more details, filling fast, book early <www.W4DXCC.com>..... Thanks in advance,
73 de Dave Anderson, K4SV"

YB, INDONESIA. Bert, PD1SA, will be active as YB1/PD1SA from Indonesia between August 30th and September 28th. Activity will be mostly on 20 meters SSB, but he tells OPDX that he may also be on 80 and 40 meters. He will use a Yaesu FT-857 into a "fine wire antenna". QSL via his home callsign. ADDED NOTE: Bert informs OPDX that he will also be back in Indonesia next year (2014), possibly March or April for 2 months.

Z80, SOUTH SUDAN. Operators Massimo/Z81B and Diya/Z81D will be using the special callsign Z80ID for one day on July 9th, to celebrate South Sudan's "Independence Day". Activity will be on all HF bands, depending on open propagtion, using SSB. QSL via OM3JW.

SIDC SOLAR BULLETIN 08 Jul 2013, 1207UT
SIDC FORECAST (valid from 1230UT, 08 Jul 2013 until 10 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 08 Jul 2013 10CM FLUX: 122 / AP: 004
PREDICTIONS FOR 09 Jul 2013 10CM FLUX: 120 / AP: 003
PREDICTIONS FOR 10 Jul 2013 10CM FLUX: 120 / AP: 003
COMMENT:Solar activity was eruptive during the past 24 hours with one C9.6 class
flare originating from Catiana sunspot group 24 (NOAA AR 1785) on July 8 at
1h22 UT. Though this group has reduced in number of sunspots, it's
photospheric magnetic field remains to have beta-gamma-delta configuration.
It is capable of producing more C-class flares and maybe an M-class flare.
No geo-effective CMEs were observed. We are currently under influence of a
slow solar wind (speed around 300 km/s). The magnitude of the
interplanetary magnetic field is low (about 5 nT). Geomagnetic conditions
are quiet and are expected to remain so for the next 48 hours.

Dave, AA6YQ

21363. RE: [DX-IS] Your expectations of LotW

Yahoo group: DX-IS (2013)
Date: 2013-07-08 23:55:57 UTC
From: Ron Notarius W3WN
Topic: 21362 Message: 21363

I don't understand the point of the survey.

The first question is related to downtime. Is it scheduled downtime per month? Overall? (And how can you plan for unanticipated network or hardware issues?) And exactly what is "downtime" in the context of the survey anyway?

The second question refers to the time it takes to process a log. Compared to what? Size of the log? Size of the queue? Or just the time it takes an average log (and what is "average"?) once it is selected for processing?

And what is the purpose of the survey, anyway?

Sorry Dave. With all due respect, I find the question ambiguous and the phrasing of the questions... well, a bit argumentative.

If you're trying to stir the pot, count me out.

Ron,

I suggest "You know too much!"

I took the survey as an attempt to gauge expectations from the pool of users who, for the most part, don't have a clue about 3, 4, or 5 Nine's of availability. Within the IT industry, as you probably know, these benchmarks are well defined and have costs associated with them.

As far as delay in processing time, again we know LoTW is not a real-time system. The answers to that question should help establish a level of expectation from those same users. There are well researched "acceptable response times" to web page queries, where at some point the user will click off the website.

I answered the two questions without pondering too much of the "yeah but what about's"!

>>>The first question is "LotW should not be unavailable for more than..."

>>>This is intended to include both planned and unplanned unavailability.

>>>One typically maintains target availability in the face of possible hardware or network failures via replication.

The second question refers to the time it takes to process a log. Compared
to what? Size of the log? Size of the queue? Or just the time it takes an
average log (and what is "average"?) once it is selected for processing?

>>>I'm asking each user for their expectation, based on their typical usage patterns.

And what is the purpose of the survey, anyway?

>>>To help quantify user expectations for comparison with current and extrapolated future performance metrics, as part of capacity
and redundancy planning.

73,

Dave, AA6YQ

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30709
SIDC SOLAR BULLETIN 09 Jul 2013, 1207UT
SIDC FORECAST (valid from 1230UT, 09 Jul 2013 until 11 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 09 Jul 2013 10CM FLUX: 118 / AP: 003
PREDICTIONS FOR 10 Jul 2013 10CM FLUX: 115 / AP: 003
PREDICTIONS FOR 11 Jul 2013 10CM FLUX: 115 / AP: 005
COMMENT:Current solar activity, with several C-class flares, originates from
Catania sunspot groups 24 and 26 (NOAA AR 1785 and 1787). Catania group 24
slightly decreased in size, but remains it's magnetic complexity. Catania
group 26 has increased in size and complexity (now also having a delta
component in it's photospheric magnetic field). C-class flaring activity is
expected, with a slight chance for a M-class flare. Solar wind speed as
observed by ACE is at 320 km/s and the magnitude of the interplanetary
magnetic field is up to 8 nT with a Bz varying from -5 to +5 nT.
Geomagnetic conditions are quiet and are expected to remain so for the next
48 hours.

21368. RE: [ARRL-LOTW] Your expectations of LotW

Yahoo group: DX-IS (2013)
Date: 2013-07-09 22:11:20 UTC
From: Dave AA6YQ
Topic: 21368 Message: 21368

Results of the survey as of ~21Z today can be found in

<http://www.ambersoft.com/Amateur_Radio/TQSL/ExpectationsSurvey_2013-07-08.pdf>

The “Response Percent” and “Response Count” columns contain raw data; I added the “Cumulative Satisfaction” column.

Thanks to all who participated!

73,

Dave, AA6YQ

From: ARRL-LOTW@yahoogroups.com [mailto:ARRL-LOTW@yahoogroups.com] On Behalf Of Dave AA6YQ
Sent: Monday, July 08, 2013 5:04 PM
To: ARRL-LOTW@yahoogroups.com
Subject: [ARRL-LOTW] Your expectations of LotW

I have set up a simple two-question survey to assess your expectations of LotW’s availability and processing time. Please visit

<http://www.surveymonkey.com/s/M5VWV9V>

Thanks!

73,

Dave, AA6YQ

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30710
SIDC SOLAR BULLETIN 10 Jul 2013, 1207UT
SIDC FORECAST (valid from 1230UT, 10 Jul 2013 until 12 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 Jul 2013 10CM FLUX: 120 / AP: 019
PREDICTIONS FOR 11 Jul 2013 10CM FLUX: 124 / AP: 007
PREDICTIONS FOR 12 Jul 2013 10CM FLUX: 124 / AP: 003
COMMENT:Solar flaring activity mainly originated from Catania sunspot group 26
(NOAA AR 1787), featuring 3 C-class flares in the past 24 hours. The C4.9
flare at 6h40 UT on the 10th was the largest one. For the next 48 hours
C-flaring activity is expected to continue, with Catania sunspot groups 24
and 26 (NOAA AR 1785 and 1787) as main source candidates. LASCO/C2
detected a halo CME at 15h24 UT on the 9th. It was associated with a broad
filament eruption (NE to SW oriented) in the northern hemisphere. The CME
is travelling with an estimated speed of 440 km/s and is expected to arrive
at Earth on the 13th around 13h UT. A shock in the solar wind speed was
observed at 20h UT on the 9th. Solar wind speed currently is at 440 km/s.
The magnitude of the interplanetary magnetic field is around 10 nT, with a
mainly negative z-component. Geomagnetic conditions are unsettled to active
and are expected to remain so for the next few hours, before returning to
quiet conditions.
TODAY'S ESTIMATED ISN : 054, BASED ON 15 STATIONS.

QST de W1AW
DX Bulletin 28 ARLD028
>From ARRL Headquarters
Newington CT July 11, 2013
To all radio amateurs

SB DX ARL ARLD028
ARLD028 DX news

This week's bulletin was made possible with information provided by IZ2DPX, NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Tony, RT9T is QRV as 5B4ALB from Pachyammos, IOTA AS-004, until July 16. Activity is on all HF bands and modes. He will be active with the contest station P3N in the IARU HF World Championship. QSL 5B4ALB direct to home call and P3N via operators' instructions.

MADAGASCAR, 5R. Flavio will be QRV as 5R8NE from Nosy-Be Island, IOTA AF-057, from July 16 to 30. Activity will be on 40 to 10 meters using SSB. This includes an entry in the upcoming RSGB IOTA contest. QSL via IK2DUW.

SAN FELIX AND SAN AMBROSIO, CE0. Mike, WU2D is QRV as CE0X/WU2D on San Felix until July 15. Activity is on 20, 17 and 15 meters using SSB and some CW. QSL to home call.

CUBA, CO. A group of operators will be QRV as T49C in the IARU HF World Championship. They will be active from the La Habana, Villa Clara and Las Tunas provinces. Activity will be on 160 to 10 meters using CW and SSB. QSL via K8SIX.

ANGOLA, D2. Joao, CT2HPM is QRV as D2CT from Luanda until July 26. Activity is on 20 to 10 meters using mostly PSK31 and RTTY. QSL to home call.

SOUTH COOK ISLANDS, E5. Andy, AB7FS is QRV as E51AND and along with Kathy, E51KC will be active from Mangaia Island, IOTA OC-159, from July 15 to 19. Activity will be holiday style on the HF bands using CW and SSB. QSL via operators' instructions.

IRELAND, EI. Olivier, ON4EI is QRV as EI8GQB and EI1A until July 31 while using green energy. Activity is on 160 to 6 meters. He will be active in the IARU HF World Championship and the upcoming CQ WW VHF and RSGB IOTA contests. QSL via PA3249.

ETHIOPIA, ET. Ken, K4ZW is QRV from club station ET3AA until July 19. Activity is on the HF bands using mostly CW and possibly RTTY. This includes an entry in the IARU HF World Championship. QSL via N2OO.

MARQUESAS ISLANDS, FO. Vadym, UT6UD is QRV as FO/UT6UD from Hiva, IOTA OC-027, until July 13. Activity is on 30 to 10 meters using CW, SSB and RTTY. QSL to home call.

AUSTRAL ISLANDS, FO. After his Hiva operation, Vadym, UT6UD will be QRV as FO/UT6UD from Juli Rurutu, IOTA OC-050, from July 14 to 22. Activity will be on 30 to 10 meters using CW, SSB and RTTY. QSL to home call.

ST. PIERRE AND MIQUELON, FP. Eric, KV1J is QRV as FP/KV1J from Miquelon Island, IOTA NA-032, until July 16. Activity is on the HF bands using mainly SSB and RTTY. QSL to home call.

ECUADOR, HC. Members of the Quito Radio Club are QRV as HD082QRC until July 23 to commemorate their club's 82nd anniversary. Activity is on 160 to 2 meters using CW, SSB and RTTY. QSL direct via HC1JQ.

THAILAND, HS. Dej, E21YDP will be QRV in the IARU HF World Championship as a Single Op/Low Power CW entry. QSL via operator's instructions.

GREENLAND, OX. Operators N2IEN, W2RE and WW2DX are QRV as OX/home calls from Narsarsuaq until July 15. Activity is on 40 to 6 meters using CW and SSB. They will be active as OX2DX in the IARU HF World Championship. QSL to home calls and contest call via operators' instructions.

SWEDEN, SM. Special event station SF2013WE is QRV all of July during the European Championship in Women's Football. QSL via operators' instructions.

SUDAN, ST. Sam, K0YAK is QRV as ST2SF from Khartoum until August. Activity is on the HF bands using mainly CW and digital modes. During power disruptions he will be active using QRP power. QSL to home call.

GREECE, SV. A group of operators will be QRV as SW2UT from Neoi Poroi from July 16 to 26. Activity will be on 80 to 6 meters using CW with some SSB and RTTY. QSL via HA8UT.

UKRAINE, UR. Members of the Ukrainian Radioamateur QRP Club are QRV as EO15QRP until August 12 to celebrates its 15th anniversary. QSL via UT2AB.

LAOS, XW. Champ, E21EIC will be QRV as XW0YJY in the IARU HF World Championship as a Single Op/Mixed Mode/Low Power entry. QSL to home call.

SERBIA, YU. Members of the Radio Club Novi Sad are QRV as YU88BPQ until December to commemorate the club's 88 years of history. QSL via YU7BPQ.

MACEDONIA, Z3. Vlado, N3CZ is QRV as Z3/N3CZ until July 19 while on holiday. QSL to home call.

THIS WEEKEND ON THE RADIO. The IARU HF World Championship, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, FISTS Summer CW Sprint, SKCC Weekend CW Sprintathon and the CQC Great Colorado CW Gold Rush should keep contesters busy this upcoming weekend. Please see page 80 in the July 2013 issue of QST and the ARRL and WA7BNM Contest web sites for details.

21374. 425 DX News - #1158

Yahoo group: DX-IS (2013)
Date: 2013-07-12 17:35:46 UTC
From: r_brothers
Topic: 21374 Message: 21374

13 July 2013 A.R.I. DX Bulletin
No 1158
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4U1ITU - Ed, N4II will be active from the 4U1ITU International Amateur Radio Club station on 17 July (06.00-08.30 UTC and 16.00-18.00 UTC), 18 July (15.00-18.00 UTC) and 19 July (06.00-18.00 UTC). QSL via 4U1ITU, direct or bureau. [TNX The Daily DX]
4X - Celebrating the 19th Maccabiah Games, Isaac, 4Z1TL will be active as 4X19MG on 18-30 July. QSL via home call.
9A - Bjoern, HB9DTV will be active holiday style as 9A/HB9DTV from Pag Island (EU-170) on 13-19 July. He will be QRV on the HF bands SSB. QSL via home call, bureau preferred. [TNX rsgbiota.org]
9A - Kary, HA9MDN will be active as 9A/HA9MDN from Vir Island (EU-170) from 26 July to 2 August. He will operate SSB (including and entry in the IOTA Contest), RTTY and SSTV. QSL via home call (bureau preferred) and eQSL. [TNX NG3K]
9A - IK6JNH, IK6VXO and IZ6TSA will be active as 9A8DV from Drvenik Veli (EU-016) for the IOTA Contest. Before and after the contest they will be QRV on all bands, also on RTTY. QSL via IK6VXO. [TNX IK6VXO]
BY - A large group of operators (BA4MY, BD4KA, BD4KM, BD4KW, BD4OJ, BD4TS, BD6NN, BG3MKT, BG4NRU, BH4IGO and BH4SQE) from Marconi Radio Club BY4IB will be active as BY4IB/4 from Jiming Island (AS-146) on 21-28 July, IOTA Contest included. They will run two stations on all bands SSB, CW and RTTY. Log search on Club Log. QSL via BD4KM. [TNX rsgbiota.org]
EI - Alain, F5LMJ will be active as EI/F5LMJ/p from Ireland (EU-115) from 20 July to 3 August. Until 27 July he will be QRV from Lough Caragh, Kerry (IO52bb) and then from Calry, Sligo (IO54tg). QSL via home call. [TNX F5LMJ]
HR - According to the latest information published on qrz.com, the HQ8D operation from Vivorillos Bank (NA-223) [425DXN 1155] might now take place on either 14-20 or 21-27 July. Two stations are expected to be active on CW, SSB and RTTY. QSL via KD4POJ.
I - ARI HQ stations have dropped the final "Q" in their previously announced callsigns. During this weekend's IARU HF World Championship look for IO1H (40 and 80m CW, 20m SSB), IO4H (160m CW and SSB, 40m SSB, 80m SSB), IO5H (20m CW), IO8H (15m SSB) and IO9H (10m CW and SSB, 15m CW). QSL via bureau.

KL - Tim, NL8F is the only full time resident amateur radio operator on
Unalaska Island (NA-059). Tim is now active as KL7RRC throughout
July, to celebrate the 20th anniversary of the Russian Robinson
Club. QSL via N7RO.
LA - Look for Rene, LA/DL2JRM and Daniel, LA/DL5SE to be QRV on 80-10
metres CW and SSB from the Hvaler Islands (EU-061) on 20-21 July.
QSL via home calls, direct or bureau. [TNX rsgbiota.org]
OJ0 - Weather permitting, SM0W, SM6U and SM0CXU will be active as OJ0R
from Market Reef (EU-053) on 25-29 July, including an entry in the
IOTA Contest. QSL via G3TXF. [TNX NG3K]
OX - OX2DX is the callsign issued to WW2DX, W2RE and N2IEN for their
11-15 activity from Greenland [425DXN 1157]. QSL via LoTW, paper
cards via WW2DX. [TNX NG3K]
PY - PU1MMZ, PU1SET, PY1CPF, PY1KR and PY1MT will participate in the
IOTA Contest as ZV1M from Ilha Grande (SA-029). QSL via PY1MT,
direct or bureau. [TNX rsgbiota.org]
UA - According to the updated schedule on http://robinsons.ru, planned
expeditions under the Russian Robinson Club's 20th anniversary
special callsign now include:
23-27 July R20RRC/0 Shikotan Island (AS-062)
24-27 July R20RRC/1 Morzhovets Island (EU-119)
27-28 July R20RRC/1 Glov Island (EU-162)
29 July-25 August R20RRC/1 Olenevskij Island (RR-02-74)
9-14 August R20RRC/8 Zhuravlinyy Island (AS-109)
R20RRC/1 from EU-162 will participate in the IOTA Contest. QSL via
RZ3EC.
VE - VA7NX, VE7CRT and VE7GM will participate in the IOTA Contest from
Bowen Island (NA-091). They will operate CW and SSB using the
White Rock Amateur Radio Club's callsign VE7DB. QSL via VA7NX,
direct or bureau, and eQSL. [TNX rsgbiota.org]
W - Planned activities for Bodo, KT3Q (DF8DX) include operations from
IOTA groups NA-144 (19-20 July, as KT3Q/6 along with W6PST),
NA-143 (26-27 July, as KT3Q/5) and NA-092 (27-29 July, IOTA
Contest included, as KT3Q/5). QSL via DF8DX, direct or bureau.
ZS - Gert, ZS6AYU will be active again as C91GR from Mozambique on
19-23 July. He will operate holiday style on 40-10 metres CW only.
QSL via ZS6AYU, direct or bureau. [TNX NG3K]

IARU HF WORLD CHAMPIONSHIP ---> The objective of the contest is to contact
as many other amateurs, especially IARU member society HQ stations,
around the world as possible using the 160, 80, 40, 20, 15 and 10m bands.
This year's event (rules can be found at www.arrl.org/iaru-hf-championship)
will run from 12 UTC on 13 July until 12 UTC on the 14th. The following IARU
Member Society HQ stations are expected to participate:

Direttore Responsabile I2VGW

CQ WW DX CONTEST ---> The rules have been completely rewritten for 2013 and can be found at www.cqww.com/rules.htm - read carefully!

K6VVA/KL7 ---> Rick announced he was making an attempt (the third one!) at operating from Barter Island (NA-050) on 8-10 July [425DXN 1157]. However, "due to increased unexpected solar disturbances, Auroral Oval, potential NA-050 fog and now the likelihood of departure delays and missed connections due to the re-routing of many plane flights down to the San Jose Airport resulting from the unfortunate plane crash at nearby SFO airport, this trip is being postponed again. Plans are to re-schedule a fourth attempt at NA-050 in the next 45 days, but I will only make a posting just before boarding the first plane". [TNX K6VVA]

P5 PROJECT ---> The BBC has interviewed Paul Ewing, N6PSE regarding the efforts of the Intrepid DX Group to operate from DPRK (North Korea): https://soundcloud.com/bbc-world-service/ham-radio-in-north-korea [G3UML]

WRTC2014 STATION TEST ---> The WRTC2014 Organizing Committee will be conducting the final capability and training test for the WRTC stations and volunteers during this weekends' IARU HF World Championship. Twenty-five stations (AA3K, AD1T, AK1W, K1BG, K1GQ, K1RX, K1ZD, K6ND, K9ES, KE1J, N1JD, N1SV, N2NT, N3AD, NB1N, NI1L, NJ1F, W1CLA, W1EQ, W1HH, W1MA, W1SJ, W1UE, W1UJ, WB1Z) will be active in the contest on 80, 40, 20, 15, and 10 metres CW and SSB. Awards will be offered for working the WRTC test stations, see http://www.wrtc2014.org/competition/2013-station-test/.
In order to make sure all of the competitor stations are equal, the WRTC2014 organizers will compare the signals of the test stations by using the Reverse Beacon Network. All of the 25 stations will be on CW on certain bands and times with their beams in a specific direction: the schedule is at http://www.wrtc2014.org/station-test-schedule-for-signal-testing/

Z80ID ---> This special callsign was used on 9 July by Massimo, Z81B and Diya, Z81D to celebrate the Republic of South Sudan's Independence Day. QSL via OM3JW. A special QSL card will be printed. [TNX ON5NT]

To all radio amateurs

SB PROP ARL ARLP028
ARLP028 Propagation de K7RA

Average daily sunspot numbers over the past week rose over 23 points to 109.4, compared to the previous reporting week. Average daily solar flux was up nearly 21 points to 127.9. Two days, July 6 and July 10, had the most geomagnetic activity, with a planetary A index of 25 on July 10. Planetary A index on July 6 was 21.

The forecast issued on July 7 had a predicted solar flux of 145 on July 11 and 12, and 150 on July 13 to 15, but alas, this has been scaled back. The latest forecast calls for solar flux at 110 on July 12 to 14, then 105, 110, 115 and 120 on July 15 to 18, 125 on July 19 and 20, then 120, 110 and 105 on July 21 to 23, 100 on July 24 and 25, 105 on July 26, 110 on July 27 and 28, then 120, 125 and 130 on July 29 to 31.

Predicted planetary A index is 8, 15, 25, 12, 8 and 10 on July 12 to 17, then 15 on July 18 to 21, 8 on July 22, 5 on July 23 to August 3, and 10 on August 4 and 5.

OK1HH of the Czech Propagation Interest Group has his own geomagnetic forecast, and he foresees a mostly quiet geomagnetic field on July 12, active to disturbed on July 13, quiet to active July 14, quiet July 15, mostly quiet July 16, quiet to unsettled July 17, quiet to active July 18, quiet to unsettled July 19, active to disturbed July 20, quiet to active July 21, quiet to unsettled July 22, quiet July 23 and 24, quiet to unsettled July 25, quiet to active July 26, quiet to unsettled July 27 and 28, quiet July 29 to 31, mostly quiet August 1, quiet to active August 2, active to disturbed August 3, quiet August 4 and 5, and active to disturbed again on August 6 and 7.

Carl Luetzelschwab, K9LA is now hosting the installation file for the W6ELprop Propagation Prediction Program, which is free, and runs on computers running the Windows operating system. The file disappeared from the W6EL web page, and now you can find it by going

to http://k9la.us/ and clicking on Tutorials on the left side. The file is W6ELPropInst270.exe.

Ted Leaf, K6HI sent a link to an article about a large sunspot group, http://earthsky.org/space/large-sunspot-group-comes-into-view. The article says activity in the Sun's southern hemisphere is finally picking up. It goes on to claim that this could be an indication of a double sunspot peak, with a second peak emerging as late as early 2014. I would love to see our Sun peppered with energetic spots. Unfortunately in this cycle, when they do emerge they tend to be weak, evidence of the overall listless nature of this cycle.

K9LA talks about a second peak in his article from May 2013 at http://k9la.us/Will_Cycle_24_Have_a_Second_Peak.pdf .

Several articles this week of interest to sun watchers:

Sorry, no reports from readers this week.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for July 4 through 10 were 109, 113, 115, 112, 143, 98, and 76, with a mean of 109.4. 10.7 cm flux was 137.7, 140.8, 134.2, 125.6, 119.3, 119.9, and 117.9, with a mean of 127.9. Estimated planetary A indices were 5, 9, 21, 8, 6, 9, and 25, with a mean of 11.9. Estimated mid-latitude A indices were 4, 10, 20, 7, 7, 8, and 20, with a mean of 10.9.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30713
SIDC SOLAR BULLETIN 13 Jul 2013, 1207UT
SIDC FORECAST (valid from 1230UT, 13 Jul 2013 until 15 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 13 Jul 2013 10CM FLUX: 115 / AP: 017
PREDICTIONS FOR 14 Jul 2013 10CM FLUX: 110 / AP: 007
PREDICTIONS FOR 15 Jul 2013 10CM FLUX: 100 / AP: 007
COMMENT:Solar activity was low during the past 24 hours, with only C class flares
reported. The strongest event, a C3.5 flare, took place in NOAA AR 1785 on
July 12, 1733 UT (peak time). It was accompanied by a very faint CME
observed by LASCO C2. Due to the position of the source region, and with
the information currently available, this event does not seem to be
geoffective. C flares are possible in the next 48 hours, in particular
from NOAA AR 1785, 1787 and 1791, and we therefore foresee eruptive
conditions. We expect mostly quiet to unsettled conditions for the next 48
hours in terms of geomagnetic activity. ACE observations show that the
Earth is currently within a magnetic cloud, probably associated with the
halo CME of July 9th. The first hint of its arrival was detected on July
12th, a bit after 1600 UT, with moderate negative excursions of the Bz
component of the interplanetary magnetic field.

PREDICTIONS FOR 16 Jul 2013 10CM FLUX: 125 / AP: 003
COMMENT:Solar activity was very low in the past 24 hours, with the X-ray curve
observed by GOES at B-class level. There was a small CME observed at 11h00
UT on the 13th in LASCO/C2, propagating in the southeast direction with an
estimated speed of 290 km/s. Based on the available information, it is
expected not to be geo-effective. C-class flaring activity is expected
during the next 48 hours. Geomagnetic conditions are quiet to unsettled and
are expected to remain so for the next 48 hours.

PREDICTIONS FOR 17 Jul 2013 10CM FLUX: 115 / AP: 008
COMMENT:Six sunspot groups were reported by Catania today, and non of them was
particularly active. Strongest flare among five C-class flares reported
during last 24 hours flare was C3.6 flare, peaking at 10:55 UT on July 15.
The flare originated from the Catania sunspot group 30 (NOAA AR 1791). We
expect C-class flares and possibly, but not probably, also M-class flares.
The interplanetary magnetic field magnitude is about 6 nT, and the solar
wind speed is 400 km/s. The extended low-latitude coronal hole in the
northern hemisphere is passing the central meridian. The arrival of the
fast solar wind at the Earth is expected on July 18. The arrival of the CME
from July 13, although not probable, is expected early on July 18. We
expect quiet to unsettled geomagnetic conditions during following 48 hours.

PREDICTIONS FOR 18 Jul 2013 10CM FLUX: 116 / AP: 013
COMMENT:The flaring activity during past 24 hours was of the low C-class level.
Most of the C-class flares originated from the Catania sunspot group 30
(NOAA AR 1791) which currently has beta-gamma-delta configurations of its
photospheric magnetic field, and a significant potential to produce more
C-class flares and possibly also M-class flare. The flaring activity is
also expected from NOAA AR 1793 situated close to the east solar limb. The
Earth is currently inside a slow solar wind flow with the speed of about
370 km/s. The interplanetary magnetic field is stable with the magnitude of
about 4 nT. The arrival of the fast flow, from the low-latitude coronal
hole in the northern hemisphere which reached the central meridian
yesterday, is expected on July 18. The geomagnetic conditions are quiet and
expected to remain so in the following hours.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30717
SIDC SOLAR BULLETIN 17 Jul 2013, 1307UT
SIDC FORECAST (valid from 1230UT, 17 Jul 2013 until 19 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 17 Jul 2013 10CM FLUX: 114 / AP: 007
PREDICTIONS FOR 18 Jul 2013 10CM FLUX: 113 / AP: 019
PREDICTIONS FOR 19 Jul 2013 10CM FLUX: 113 / AP: 012
COMMENT:Solar activity is still low, with only few C-class flare reported during
last 24 hours. The Catania sunspot group 30 (NOAA AR 1791) and NOAA AR 1793
still have potential to produce C-class, and possibly M-class flares. The
CACTUS software reported the CME, first seen in the SOHO/LASCO C2 field of
view at 03:48 UT on July 16, with the speed of about 400 km/s and width of
120 degrees. From the currently available data it seems that the bulk of
the CME mass is directed northward of the Sun-Earth line. The arrival of
the CME at the Earth is not very probable, but we do expect arrival of the
CME driven shock wave. The Earth is inside a slow solar wind with the
speed of 350 km/s. The interplanetary magnetic field magnitude is about 4
nT. The arrival of the fast flow from the low-latitude coronal hole in the
northern hemisphere which reached the central meridian on July 16 is
expected on July 18. The CME driven shock wave associated with the CME on
July 16, might arrive at the Earth on July 20. We expect minor to major
geomagnetic disturbance due to arrival of the fast flow in the following 48
hours.

21383. European type envelope for QSLs

Yahoo group: DX-IS (2013)
Date: 2013-07-17 20:41:19 UTC
From: cq_dx_de_aa0aa
Topic: 21383 Message: 21383

Hi all,
JJ8DEN is asking for a SASE "European type envelope" for his QSL of FOR/KH0PR. I searched and found a lot of different sizes, just for envelopes in the U.S.

Any suggestions on the correct size when this is requested? Should one just assume that a particular size is required when requesting a QSL from a European station?

Thanks and 73,
Scott AA0AA

21384. Re: [DX-IS] European type envelope for QSLs

Hello Scott,

I guess C6 (to put an A6 letter / card inside) is what he's requesting:

http://en.wikipedia.org/wiki/Envelope

Probably his QSL is the bigger european standard messures.

73 & gl,

Axel, DL6KVA

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30718
SIDC SOLAR BULLETIN 18 Jul 2013, 1207UT
SIDC FORECAST (valid from 1230UT, 18 Jul 2013 until 20 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 18 Jul 2013 10CM FLUX: 112 / AP: 015
PREDICTIONS FOR 19 Jul 2013 10CM FLUX: 112 / AP: 044
PREDICTIONS FOR 20 Jul 2013 10CM FLUX: 113 / AP: 010
COMMENT:Solar activity is low. The last C-class flare reported was C1.6 flare,
peaking at 09:16 UT on July 17. The Catania sunspot group 30 (NOAA AR 1791)
and NOAA AR 1793 still have beta-gamma configuration of the photospheric
magnetic field, and therefore, also the potential to produce C-class and
possibly M-class flares. The newly arrived data showed that the CME from
July 16 will probably not arrive at the Earth since the bulk of the CME
mass was directed north-west of the Sun-Earth line. The interplanetary
magnetic field magnitude is about 5 nT. The solar wind speed is increasing,
and it is currently about 450 km/s. The observed increase of the solar wind
speed is probably due to the arrival of the fast flow associated with the
low-latitude coronal hole in the northern hemisphere which reached the
central meridian on July 16. We expect minor storm conditions with possibly
isolated intervals of major storm conditions in the following 48 hours.
TODAY'S ESTIMATED ISN : 068, BASED ON 18 STATIONS.

SB DX ARL ARLD029
ARLD029 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MONTENEGRO, 4O. Alex, UA3RF, and Nick, RK3RB will be QRV as 4O/home calls from July 21 to 24. Activity will be holiday style on the HF bands. QSL to home calls.

CYPRUS, 5B. Operators 5B4MF, 5B4ZN, 5B4AHE and 5B4AMF are QRV as home calls/p from Agios Georgios Island, IOTA AS-120, until July 21. Activity is primarily on 20 and 17 meters using SSB with two stations active simultaneously. This may include 30 meters using CW as well. QSL to home calls.

GHANA, 9G. Jeff, W7JVN is QRV as 9G5AC from Asamankese while on a 16-month missionary assignment. Activity is on 20 and 15 meters, using mostly SSB with some CW and PSK as his work permits. QSL via K7JH.

CHINA, BY. A number of members of the Marconi Radio Club in Weihai plan to be QRV as BY4IB/4 from Jiming Island, IOTA AS-146, from July 21 to 29. Activity will be on the HF bands using all modes. This includes being active in the upcoming IOTA contest with several stations. QSL via BY4IB.

MOZAMBIQUE, C9. Gert, ZS6AYU is QRV as C91GR from Bilene until July 23. Activity is holiday style on 40 to 10 meters using CW. QSL to home call.

ENGLAND, G. Special event station GB558VUL will be QRV beginning July 20 to September to commemorate the support effort behind getting the last Vulcan XH558 aircraft back into the air. QSL via bureau.

THAILAND, HS. Look for stations HS0AC, E2E, HS4AK, HS5AM and others to be QRV in the CQ World Wide VHF contest. QSL via operators' instructions.

JAPAN, JA. Special event station 8J1AKIBA is QRV until August 31 during the Akiba Daisuki festival being held in Tokyo's shopping district Akihabara. QSL via bureau.

SVALBARD, JW. Winfried, DL2GW is QRV as JW/DL2GW from Longyearbyen, IOTA EU-026, until July 23. Activity is on the HF bands. QSL to home call.

LITHUANIA, LY. Special event station LY55SOP is QRV until the end of July during the annual Sea of Peace activity. QSL via LY5W.

FERNANDO DE NORONHA, PY0F. Leo, PP1CZ will be QRV as PY0F/PP1CZ from July 25 to 30. Activity will be on the HF bands, primarily on the newer bands, using mostly CW and RTTY with some SSB. He may also try 160 meters. This includes being an entry in the upcoming RSGB IOTA contest. QSL via operator's instructions.

POLAND, SP. Special event station HF450NS is QRV from Nowa Sol until then end of 2013 in celebration of the city's 450 years of settlement and 270 years of city rights. QSL via SP3KEY.

CRETE, SV9. Gordon, MM0GOR plans to be QRV as SW9GG from July 23 to 30. Activity will be on the HF bands. This includes an entry in the upcoming RSGB IOTA contest. QSL to home call.

ASIATIC RUSSIA, UA0. Look for station R20RRC/0 to be QRV from Shikotan Island, IOTA AS-062, from July 20 to 27 during the celebration of the RRC's 20th anniversary. QSL via RZ3EC.

ROMANIA, YO. Members of the radio club in Miercurea-Ciuc are QRV with special event call sign YO1000LEANY during July to support the folk festival The Day of Thousand Szekely Girls. QSL via bureau.

ASCENSION ISLAND, ZD8. Bob, VP8LP is QRV as ZD8LP until August 5. Activity is on 40 to 10 meters using SSB and PSK. QSL to home call.

CAYMAN ISLANDS, ZF. Bill, W5SJ is QRV as ZF2EZ while on holiday. Activity is on the HF bands. He will also be active in the CQ World Wide VHF contest. QSL via W5JAY.

THIS WEEKEND ON THE RADIO. The CQ Worldwide VHF Contest, North American RTTY QSO Party, QRP CW Fox Hunt, NCCC RTTY Sprint, Russian Radio Team Championship, VK/Trans-Tasman Multi-Mode Contest, DMC RTTY Contest, Feld Hell Sprint and the RSGB Low Power CW Contest are all on tap for this upcoming weekend. The Run for the Bacon QRP CW Contest is scheduled for July 22. The SKCC CW Sprint and CWops Mini-CWT CW Test are scheduled for July 24. Please see page 80 in the July 2013 issue of QST and the ARRL and WA7BNM Contest web sites for details.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30719
SIDC SOLAR BULLETIN 19 Jul 2013, 1307UT
SIDC FORECAST (valid from 1230UT, 19 Jul 2013 until 21 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 19 Jul 2013 10CM FLUX: 113 / AP: 023
PREDICTIONS FOR 20 Jul 2013 10CM FLUX: 115 / AP: 030
PREDICTIONS FOR 21 Jul 2013 10CM FLUX: 116 / AP: 015
COMMENT:Solar activity is still low with only two C-class flares reported during
last 24 hours. Both of them were C2.3 flares originating from the NOAA AR
1800 situated at the moment close to the east solar limb. NOAA AR 1793
still has beta-gamma configuration of the photospheric magnetic field, and
therefore, also the potential to produce C-class and possibly M-class
flares. The prominence eruption on the east solar limb at about 17:59 UT on
July 18 was associated with the CME first seen in the SOHO/LASCO C2 field
of view at 18:24 UT. The CME had angular width of 130 degrees and projected
speed of about 550 km/s, as reported by the CACTUS software. The CME might
be Earth directed, however this cannot be confirmed, due to the data gap in
STEREO observations. The Earth is inside the fast speed stream due to the
low-latitude coronal hole in the northern hemisphere. At the moment the
solar wind speed is 600 km/s and the interplanetary magnetic field (IMF) is
rather stable with the magnitude of about 5 nT. The arrival of the coronal
hole high speed stream resulted in active geomagnetic conditions (K = 4
reported by Dourbes, K = 5 reported by IZMIRAN and NOAA reported Kp=4) on
July 18 and early on July 19. We expect minor storm conditions.
TODAY'S ESTIMATED ISN : 056, BASED ON 13 STATIONS.

SOLAR INDICES FOR 18 Jul 2013
WOLF NUMBER CATANIA : ///
10CM SOLAR FLUX : 115

20 July 2013 A.R.I. DX Bulletin
No 1159
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3DA - Roger, ZS6RJ and others will be active as 3DA0ET from Swaziland on 18-27 November, including and M/2 entry in the CQ WW CW Contest. There will be three stations active on 160-6 metres CW and SSB, and a fourth station entirely dedicated to RTTY and PSK. Complete details will be given in due course, a website is currently under construction. [TNX ZS6RJ]
5B - Look for Tamer 5B4AHE/p, Pavlos 5B4AMF/p, Spyros 5B4MF/p and Philip 5B4ZN/p to be active with two stations from Agios Georgios Island (AS-120) from about 18 UTC on 19 July until around 3 UTC on the 21st. They plan to be QRV mainly on 20 and 17 metres SSB, with some QRS CW on 30 metres. QSL via home calls. "We will try to focus on DX stations needing AS-120 for an all-time new one", 5B4MF says. "If you work one of us please do not duplicate the QSO with another one of us!". [TNX 5B4AHJ]
9M6 - Steve, 9M6DXX will be active again as 9M8Z (OC-088) on 24-29 July, including an entry in the IOTA Contest. QSL via M0URX (OQRS preferred: http://m0urx.com/oqrs/). Logs will be uploaded to LoTW as soon as possible after the operation. [TNX 9M6DXX]
BV - A large multi-national team will participate in the IOTA Contest as BP0A from Peng Hu Island (AS-103). QSL to Amateur Radio Taipei, see http://www.art.org.tw/en/qsl_en.aspx for instructions.
C3 - Special callsign C37UN will be activated on 26-28 July to celebrate Andorra's 20th anniversary as a full member of the United Nations. QSL via C37URA, direct or bureau.
CN - Once again Richard, F8FGU will be active as CN2RN from the Middle Atlas range from 24 July to 20 August. He will operate SSB and CW on the HF bands. QSL via home call, bureau preferred. [TNX F8REF]
DL - Mike, DG5LAC will be active as DG5LAC/p from the island of Juist (EU-047) from 27 July to 9 August. He will be QRV on 40-10 metres SSB, with part time participation in the IOTA Contest. QSL via home call, bureau or direct, plus LoTW and eQSL. [TNX rsgbiota.org]
EA8 - Andrew, G7COD will be active as EA8/G7COD from Gran Canaria (AF-004, WWL IL27dt) on 9-31 August. He will operate SSB and CW on 30-6 metres. QSL via home call, direct or bureau, plus eQSL and LoTW. [TNX G7COD]
EI - The Papa Lima DX Group will participate in the IOTA Contest using

their brand new contest call, EJ1Y. The team (EI3KG, EI4GK, EI5GM, EI5JQ, EI7KD, EI9FBB, EI9KC, SP7IDX and SP9NWN) will be on Inishmore, Aran Islands (EU-009) on 23-29 July [425DXN 1153], and will still be QRV as EJ0PL outside the contest. QSL via EI5JQ. [TNX NG3K]
ES - Juri, ES5GP will be active as ES5GP/8 from Kihnu Island (EU-178) on 24-29 July, including and entry in the IOTA Contest. [TNX ES1QD]
G - G0FDZ, G0PZA, G0UKN, G0VJG, G7GLW and M0UAT will be active from St Mary's Island (EU-011) on 25-30 July. They will participate in the IOTA Contest as M8C (QSL via G4DFI). [TNX M0UAT]
GM - A team from the Cockenzie & Port Seton Amateur Radio Club will participate in the IOTA Contest as GM2T from the island of Tiree (EU-008). Before the contest they will be using MM0CPS/p. QSL via GM4UYZ. [TNX NG3K]
GM - Gordon, MM0GPZ will be active from the Orkeny Islands (EU-009) on 24-29 July. He will participate in the IOTA Contest as MM2N, outside the IOTA event he will operate holiday style. QSL via home call. [TNX rsgbiota.org]
GM - Graham, M6GCS will be active as MM6GCS/p from the Outer Hebrides (EU-010) on 24-31 July, including an entry in the IOTA Contest. QSL via M6GCS, direct or bureau. [TNX rsgbiota.org]
GM - Paul, M3KBU will be active as MM3KBU/p from the Outer Hebrides (EU-010) between 26 July and 2 August. He will participate in the IOTA Contest from South Uist. QSL via M3KBU, direct only. [TNX rsgbiota.org]
GM - Lanarkshire Contest Group's members GM0ELP and M0GBK will be active as MM3T from the Isle of Bute (EU-123) on 27-28 July for the IOTA Contest. QSL via eQSL only, as 'we do not have paper QSL cards' (but IOTA chasers will be able to claim credit online once the contest logs are uploaded to www.rsgbiota.org).
HR - Dan, HQ8D went QRT from Vivorillos Cay (NA-223) around 8 UTC on 18 July, after being QRV for some 48 hours. He will return to the island this coming week, for the last time. As always, his plans depend on the Honduran Navy's schedule. After NA-223, Dan expects to be QRV for the IOTA contest from NA-160 as HQ3W. QSL via KD4POJ. Bookmark http://hriotas.com/ for updates.
I - Look for Marco IV3/IZ3GNG and Joris IV3/IZ3QHA to be active from Grado Island (EU-130) on 20-21 July. They will operate SSB and digital modes on 40-6 metres. QSL via home calls. [TNX IZ3GNG]
I - ARI Verona DX Team's members Walter I3VJW, Silverio IK3IUL and Ampelio IK3JBP will participate in the IOTA Contest as II3VR/IV3 (CW and SSB) from the island of Santa Maria di Barbana (EU-130). For a few hours before and after the contest they will operate on 30, 17 and 12 metres. QSL via IQ3VO (e-mail requests for bureau cards can be sent to veronadxteam[@]ari.verona.it). [TNX I3VJW]
IS0 - Massimo, I0PNM will be active as IM0/I0PNM from San Pietro Island (EU-165) from 20 July to 20 August. He will be QRV on 20-10 metres SSB, RTTY and PSK31, and will participate in the IOTA Contest. QSL via home call (direct).
OH - Jari, OH1JO and Juha, OH1LEG will be active as OH1K from

Kaunissaari Island (EU-140) on 25-31 July, IOTA Contest included. They will be QRV on 80-6 metres SSB and digital modes, with 20m as the main band. QSL via OH1JO, direct or bureau.
ON - King Albert II of the Belgians will formally end his twenty-year reign on 21 July and leave monarchy to Prince Philippe. To celebrate this event, Belgian amateur radio operators may replace their ordinary ON prefix with OO (Oscar Oscar) from 21 July until 20 September. [TNX ON4CAS]
ON - Special event station OQ4CLM will be active from between 16 October and 15 November. The suffix stands for Canadian Liberation March, the annual event that celebrates the liberation of the Belgian town of Knokke on 1 November 1944. QSL via ON3AIM, direct or bureau. Further information on the activity and the relevant award can be found on qrz.com. [TNX ON4RO]
OY - Ulf, DL3UB will be active holiday style as OY/DL3UB from the Faroe Islands (EU-018) from 29 July to 9 August. He will operate mainly CW on 30, 17 and 12 metres. QSL via home call. [TNX NG3K]
OZ - Olaf, DL7CX will be active as OZ/DL7CX from Mors Island (EU-171) from 20 July to 1 August, including an entry in the IOTA Contest. QSL via home call. [TNX rsgbiota.org]
OZ - Olaf, DL4HG and Andy, DL7AT will be active as OZ0TX from Mando Island (EU-125) on 26-28 July, including an entry in the IOTA Contest. QSL via DL7AT. [TNX rsgbiota.org]
OZ - Look for OZ7BQ/p to be active from Fur Island (EU-171) on 26-29 July. QSL via home call (bureau preferred) and LoTW. [TNX rsgbiota.org]
OZ - Lars, OZ1IVA will be active holiday style from Laeso Island (EU-088) from 27 July to 4 August. Main activity will be during the IOTA Contest. QSL via bureau. [TNX rsgbiota.org]
PA - Ron, ON6CQ will participate the IOTA Contest as PA/ON6CQ from Schouwen-Duiveland (EU-146). QSL via home call (bureau preferred) and LoTW. [TNX ON4TO]
PA - Special callsign PA6SAIL will be active between 19 August and 10 September for the Sail de Ruyter, the annual gathering of historic ships in Vlissingen. Look for activity on the HF bands CW, SSB, PSK and RTTY, plus 6m and 2m. QSL via PA3GEO, direct or bureau. [TNX PA7XG]
PY - Celebrating the World Youth Day to be held in Rio de Janeiro, special event station ZX1WYD is active until 31 July on the HF bands CW, SSB and digital modes. QSL VIA PY1AA and LoTW.
SV - Rich, M5RIC will be active as SW8CC from the island of Zakynthos (EU-052) on 23-30 July. He will operate SSB and RTTY on 80-10 metres, and will participate in the IOTA Contest. QSL via home call (direct).
SV9 - Gordon, MM0GOR will be active as SW9GG from Crete (EU-015) on 23-30 July, including an entry in the IOTA Contest. QSL via home call, bureau preferred.
TN - The TN2MS expedition to the Republic of the Congo [425DXN 1157] has been rescheduled, and is now expected to take place on 12-24 October. Bookmark www.tn2ms.nl for further information and updates.

UA - Vasily R7AA, Alexei RN1ON, Igor UA3EDQ and Aliy UA6YW will be active as R20RRC/1 from the Morzhovets Islands (EU-119) [425DXN 1158] on 24-28 July. They will participate in the IOTA Contest as RT6A/1. A side trip to Sosnovets Island (EU-161) is planned for 25 July, if the weather is fine. QSL R20RRC/1 via RZ3EC, QSL RT6A/1 via R7AA. [TNX RN1ON]
UA - RA1ZZ/p, RA3AV/1, RK3AW/1, RW3QNZ/1, RZ1ZZ/p and UA1ZZ/p will be active from Glov Island (EU-162) on 24-29 July. They will participate in the IOTA Contest as R20RRC/1 [425DXN 1158]. [TNX NG3K]
UR - UR3GO, UR4QTP, UR8GX, US0GM, UT7GV, UV5QAW and UV5QQ will operate as homecall/p from the Kalanchakskiye Islands (EU-179) on 24-31 July, with activity during the IOTA Contest. [TNX UR5GDX]
V2 - Tim, VE6SH will be active as V29SH from Antigua (NA-100) from 26 July to 3 August. QSL via LoTW or direct to VE6SH.
VK - Miles, VK6MAB will be active holiday style as VK6MAB/p from Rottnest Island (OC-164) on 26-28 July. He will be QRV on 40, 20, 15 and 10 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org]
W - Jon, WB8YJF will be active again as WB8YJF/4 from Ocracoke Island (NA-067) on 21-28 July. He will operate mainly CW on 80-10 metres, and will participate in the IOTA Contest. QSL via home call. [TNX NG3K]
XE - Andrea, IZ2LSC will be active as XF3/IZ2LSC from Isla Mujeres (NA-045) on 24-31 July. Activity as XE3/IZ2LSC between 16 and 23 July is from mainland Mexico. He will operate CW (QRS), SSB and digital modes on 30-6 metres. QSL via EB7DX (direct) or IZ2LSC (bureau), and LoTW. Further information via Twitter (@iz2lsc) and at http://www.timpy.it/xf3/. [TNX IZ2LSC]
XW - Steve, 9M6DXX, and James, 9V1YC will be active as XW8XZ and XW1YC from Laos on 5-10 September. They will use two stations, with XW8XZ operating SSB and XW1YC operating mainly CW with some SSB. QSL XW8XZ via M0URX, QSL XW1YC via W5UE. [TNX 9M6DXX]
YO - YO4AR, YO4HAB, YO4HAI, YO5OHO, YO8AXP, YO8SGZ and YO8SS will be active as YP13S from Sacalinu Mare (EU-183) on 24-29 July. They will be QRV on 80-10 metres CW and SSB, including an entry in the IOTA Contest. QSL via YO8AXP (direct only). Logsearch and further information at www.amatoradio.ro [TNX YO5OHO]

SCANDINAVIA TOUR ---> Mec, SP7VC and Kasia, SQ7OYL will be travelling through northern Europe between 26 July and 27 August. Their first stop will be in Lithuania, followed by Latvia, Estonia, Finland, Norway, Sweden, Denmark and Germany. They plan to operate from several islands and locators on the HF bands, plus 50, 70, 144 MHz and microvawes. Tentative dates for island operations are:
30-31 July OH/SP7VC Orslandet EU-097
2 August OH/SP7VC Anttoora EU-173
3 August OH/SP7VC Borsskar EU-101
4 August OH/SP7VC Hailuoto EU-184
6-7 August LA/SP7VC Vardo EU-141

8-10 August LA/SP7VC Mageroya EU-044
11-15 August LA/SP7VC Loppa EU-044
16 August LA/SP7VC Senja EU-046
17-18 August LA/SP7VC Lofoten EU-076
19 August LA/SP7VC Hitra / Froya EU-036
20-21 August LA/SP7VC Vigra EU-056
22 August LA/SP7VC Gurskoy EU-079
23 August LA/SP7VC Stord EU-055
24 August SM/SP7VC Tjorn / Hono EU-043
25 August OZ/SP7VC Sjaelland EU-029
26 August OZ/SP7VC Fyn EU-172

Direttore Responsabile I2VGW

CLUB LOG OQRS AND BUREAU CARDS ---> Club Log is conducting a survey about bureau cards requested through its Online QSL Request System. At present, two important rules apply to all users who wish to use CL OQRS: (1) Bureau cards must be offered, and (2) No-one may charge for a bureau card in CL OQRS. Club Log is now considering allowing users to choose to charge for bureau cards, or choose not to offer bureau cards. Please complete the survey at https://cdxc.wufoo.eu/forms/bureau-cards-via-oqrs/ and let them know what you would prefer.

H44IOTA (OC-168) ---> This note was published on qrz.com on 16 July: "We regret to inform all those stations that made contact with us on OC-168, that a validation for this IOTA may not be possible due to computer hardware failure and human error. We are seeking your understanding while we do the best we can to retrive what is possible. In the meanwhile, please wait with sending cards".

QSL Z81X ---> Some 400 OQRS envelopes were mailed on 16 July and the rest will be completed within the next few days. Direct QSLing has also started and several hundred envelopes are mailed out daily. Turnaround times for both OQRS and direct are just a day or two. OQRS bureau cards will be answered only after this initial phase. Traditional direct cards should be sent to OH0XX: Olli Rissanen, Salmelankuja 14, FI-90940 Jaali, Finland. It is also reported that plans for the upcoming South Sudan CQWW and low-band operations remain on track and the operator roster will be finalized this month. [TNX OH2BH]

QSL VIA G3SWH ---> With immediate effect, Phil G3SWH is the new QSL manager for G0ORH, M3I and MM3I (which will be QRV from the Isle of Arran, EU-123, during the IOTA Contest). There are already pages with log searches on Phil's website (www.g3swh.org.uk). OQRS is preferred, but traditional mail or RSGB bureau will also work. [TNX G3SWH]

YASME SUPPORTS EQUIPMENT ACQUISITION FOR NEW ETHIOPIAN AMATEURS --->
Ethiopia came back on the air May 30, 2011 with the re-opening of the
Ethiopian Amateur Radio Society station ET3AA. To support the
re-establishment of amateur radio in Ethiopia, the Yasme Foundation
(www.yasme.org) made a grant to pay for the fees associated with the
license examination for 25 club members. Many were successful but under
Ethiopian regulations could not receive a license without proof of
ownership of an amateur radio station.
To further support amateur radio in Ethiopia, the Board of Directors is
pleased to announce that it has made an additional grant to be used to
purchase amateur radio transceivers for three club members so that they can
satisfy the requirements of the Ethiopian licensing process. The Board
acknowledges with appreciation the substantial efforts of Ken Claerbout,
K4ZW, in facilitating the acquisition of the equipment and mentoring the
EARS members, as shown here with club member Adula at the microphone during
the 2013 IARU HF Championship contest. [TNX W6SZN]

Propagation Forecast Bulletin 29 ARLP029
>From Tad Cook, K7RA
Seattle, WA July 19, 2013
To all radio amateurs

SB PROP ARL ARLP029
ARLP029 Propagation de K7RA

Unsettled geomagnetic conditions continued this week, punctuated by periods of relative quiet. The most active days were July 14 and 15. The planetary A index was 20 and 25, and the mid-latitude A index was 15 and 33 on those dates. Of course Alaska's College A index was higher, at 58 and 34.

The A index is a daily value, and it is calculated from eight measurements per day (once every three hours) of the K index. The K index is a quasi logarithmic value based on magnetometer readings, so each one-point change represents a large difference. The K index is averaged into the daily A index, a linear scale. This gives a pretty good explanation:

http://en.wikipedia.org/wiki/K-index

Note the graph labeled "The relationship between K and A."

The planetary A index is based on the planetary K index, which is derived from readings at a network of geomagnetic observatories. The mid-latitude K and A index are from a single magnetometer at Fredericksburg, Virginia, near the intersection of Observatory Road and Magnetic Lane, inside the Fort A.P. Hill Army base, about 8 miles southeast of downtown Fredericksburg, Virginia.

You can sometimes find street names with appropriate references where magnetometers are located, for instance, Geophysical Observatory Road for the magnetometer at Newport, Washington, near 48.27 degrees north, 117.13 degrees west.

Over the past week, the average daily sunspot number declined nearly 33 points to 76.9, while average daily solar flux was down 14 points to 113.9. The average planetary A index barely moved, while the average mid-latitude A index rose two points to 12.9.

But yesterday (Thursday, July 18) the sunspot number jumped to 112, far above the average for the previous seven days.

The latest forecast shows solar flux at 120 on July 19, 125 on July 20 and 21, 120 on July 22 and 23, then 115, 110 and 105 on July 24 to 26, 110 on July 27 and 28, then 120, 125 and 130 on July 29 to 31, 135 on August 1 and 2, then 130, 125, 130 and 135 on August 3 to 6, 140 on August 7 and 8, 135 and 120 on August 9 and 10, 125 on August 11 and 12, 120 on August 13, and 125 again on August 14 to 16. It then declines to a minimum of 100 on August 20 and 21, before rising again.

Predicted planetary A index is 20 on July 19 and 20, 15 and 10 on July 21 and 22, 5 on July 23 to 25, then 30 and 10 on July 25 to 27, 5 on July 28 through August 3, 10 on August 4 and 5, 15 and 8 on August 6 and 7, 5 on August 8 to 12, 10 on August 13, and 15 on August 14 to 17.

Petr Kolman, OK1MGW sends a geomagnetic forecast from the Czech Propagation Interest Group. He says that a growing solar wind "may cause remarkable changes in the magnetosphere and ionosphere on July 19 to 22 and 25 to 28."

He predicts quiet to active geomagnetic conditions on July 19, active to disturbed July 20, quiet to active July 21, quiet to unsettled July 22, quiet July 23 and 24, quiet to unsettled July 25, quiet to active July 26 and 27, quiet to unsettled July 28, quiet July 29 to 31, quiet to unsettled August 1, quiet to active August 2, active to disturbed August 3, quiet August 4, mostly quiet August 5, active to disturbed August 6 and 7, and quiet to unsettled August 8 to 10.

At 2330 UTC on July 17 Australia's IPS Radio and Space Services sent a geomagnetic warning, predicting unsettled to active conditions July 18, active with minor storm periods July 19, and quiet to unsettled conditions July 20.

Just after last week's bulletin ARLP028 was issued, Bruce Smith, AC4G of Taft, Tennessee sent in this report: "Just wanted to report a 6 meter sporadic E opening on the morning of July 12 (finally) into EM65 from 0630 AM to 0830 AM CDT just after sun rise. Signals topped out at approximately S-5 with most QSOs made while receiving stations with S-2 signals. The following EU stations were worked or heard by this station during the time range given: EA1EJ, S57RR, G4RRA, CT1HZE, CT1FFU, CT1DIZ, EA5/G0CSC, CT1FJC, PA2M, and the special event station down in the Florida Keys, K4N (EL84). Glad to have made several EU QSOs on 6 meters for the first time this year with my moderate setup using a 5 element Yagi and 100 watts. Still looking for Africa, Asia, and the Pacific."

Keith Reedy, WA9DRO of Terre Haute, Indiana reports from last week, "One of my favorite bands is 12 meters. Not much joy on that band lately, just a few openings from time to time state side. However I

did hear an Israeli station on 24.964 MHz last Monday evening July 8 at about 8 PM local time. I am using a 3 element beam at about 35 feet. What does this mean, don't know, but, I hope more of the same."

David Moore sent a link to this Los Angeles Times article about the current weak solar cycle:

http://www.latimes.com/news/science/sciencenow/la-sci-sn-solar-cycle-in-100-years-20130711,0,6978639.story

The article presents an interesting observation about weak solar cycles in the early part of any century. Note they corrected a typo in the original article which confused astrology with astronomy. Oh my!

Elwood Downey, WB0OEW of Tucson, Arizona sent a similar article, about the weak peak:

http://www.space.com/21937-sun-solar-weather-peak-is-weak.html

Pat Hamel, W5THT of Long Beach, Mississippi wrote on July 15, in an email titled "Frustrating propagation modes", "The red lines on the maps show it was a super weekend for part of the country on six meters. I have spent part of today (until they packed up), Saturday, and Sunday listening on the K4N six-meter announced frequencies. I am too close to them. I kept getting what sounded like meteor pings.

This is one of the benefits (?) of living in the middle of the Gulf Coast. If the weather would have been foggy all the way across the gulf, I would have had a pipeline."

Perhaps he was referring to maps here:

http://www.dxmaps.com/spots/map.php

Or here:

http://aprs.mountainlake.k12.mn.us/

Jeff Hartley, N8II of Shepherdstown, West Virginia wrote on July 15: "E-skip has been down this year compared to normal, but at least the 6 meter Es openings are a bit more frequent with several multi-hop to the west and one to EU/Northern Africa along with another to EA8 only. 15 and 17 seem down quite a bit from June. It has been tough to work the county hunter mobiles on 17 quite often out in the upper Midwest and Montana/Wyoming/Colorado.

The IARU contest was about as expected with some fun to be had from big PVRC stations operating as NU1AW/3 (IARU HQ) and W1AW/4. I was at NU1AW/3 from N3HBX (signing the /3 was a pain over hundreds of times). But, it was a lot of fun being a multiplier for everyone.

40 opened fairly early to EU with some very strong signals from the big guns in EU and the little guys in the QRN. Northern Europe was weak and watery for the most part but we did log about 4 Asiatic Russians on the west edge in zone 30.

75 phone was pretty good to Europe with rather poor activity. The HQ stations from Chile and Argentina called in with decent signals. There was enough North American activity to keep us fairly busy thru 0500Z and the Yagi fixed at 300 degrees helped a lot with zone 6. Only one zone 2 (VE6) and one zone 3 (VE4) called in along with VA3RAC and several VE2's and 3's. Most signals were loud enough to be heard easily through the constant S9+ QRN.

20 was the "money band" with very good 1000+ QSO totals from us on phone and the usual 20 meter CW team from DX contests at W3LPL operating 2 interlocked radios picking off QSO's in between CQ's as we were doing as well. We had the usual good 20 meter opening around European Russia sunrise and after 0200-0400Z."

Steve Long, AC6T of Santa Barbara, California notes "As an occasional 6 meter fan, I have noticed this past 2 months that the Midwest, East Coast and even Pacific Northwest have enjoyed terrific multihop ES propagation all over the country. Also, frequent openings to Japan and Europe. I'm puzzled (not to mention disappointed) why my corner of DM04 (Santa Barbara) and Southern California in general have had so few decent openings. 6 meters has been a great white noise source nearly all summer. Even Arizona seems to do better than we do. Any wisdom as to why this might be?"

I have NO idea. Happenstance?

Maybe the activity during the CQ Worldwide VHF Contest this weekend will change the 6 meter fortunes of Southern California. See http://www.cqww-vhf.com/ for more information.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for July 11 through 17 were 85, 87, 66, 88, 77, 61, and 74, with a mean of 76.9. 10.7 cm flux was 113.4, 117.6, 114,

112.9, 114.1, 113.9, and 111.3, with a mean of 113.9. Estimated
planetary A indices were 18, 9, 10, 20, 25, 5, and 5, with a mean of
13.1. Estimated mid-latitude A indices were 15, 9, 8, 15, 33, 5,
and 5, with a mean of 12.9.

Subject: [DX-IS] European type envelope for QSLs

Hi all,
JJ8DEN is asking for a SASE "European type envelope" for his QSL of FOR/KH0PR. I searched and found a lot of different sizes, just for envelopes in the U.S.

Any suggestions on the correct size when this is requested? Should one just assume that a particular size is required when requesting a QSL from a European station?

Thanks and 73,
Scott AA0AA

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30720
SIDC SOLAR BULLETIN 20 Jul 2013, 1407UT
SIDC FORECAST (valid from 1230UT, 20 Jul 2013 until 22 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Jul 2013 10CM FLUX: 114 / AP: 015
PREDICTIONS FOR 21 Jul 2013 10CM FLUX: 113 / AP: 015
PREDICTIONS FOR 22 Jul 2013 10CM FLUX: 113 / AP: 012
COMMENT:The only C-class flare reported during the last 24 hours was C2.1 flare
originating from the NOAA AR 1793. This active region currently has beta-
gamma configuration of the photosperic magnetic field and the potential to
produce C-class and possibly M-class flares. The newly arrived data showed
that the CME on July 18 associated with the prominence eruption on the east
solar limb, is most probably not Earth-directed. The Earth is still inside
the fast speed stream due to the low-latitude coronal hole in the northern
hemisphere. At the moment the solar wind speed is 530 km/s and the
interplanetary magnetic field (IMF) is rather stable with the magnitude of
about 2 nT. We expect unsettled to active geomagnetic conditions due to the
currently ongoing influence of the fast stream. The arrival of the fast
flow from the low-latitude coronal hole (also crossing the equator) in the
southern hemisphere, which just reached the central meridian is expected on
July 23.
TODAY'S ESTIMATED ISN : 037, BASED ON 12 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30721
SIDC SOLAR BULLETIN 21 Jul 2013, 1307UT
SIDC FORECAST (valid from 1230UT, 21 Jul 2013 until 23 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 Jul 2013 10CM FLUX: 115 / AP: 010
PREDICTIONS FOR 22 Jul 2013 10CM FLUX: 116 / AP: 010
PREDICTIONS FOR 23 Jul 2013 10CM FLUX: 115 / AP: 007
COMMENT:Solar activity is still low with only three C-class flares reported during
last 24 hours. Majority of the flares originated from the NOAA AR 1800
which has at the moment beta configuration of the photosperic magnetic
field. The strongest flare was C3.1 flare which peaked at 08:44 UT on July
21. The flare was associated with the coronal dimming and therefore
probably also with the CME. However, this cannot be confirmed due to the
data gap in STEREO and SOHO/LASCO observations. We expect C-class flares
and also possibly M-class flares. The solar wind speed is currently 400
km/s, and the interplanetary magnetic field magnitude is about 3 nT. We
expect quiet to unsettled geomagnetic conditions.
TODAY'S ESTIMATED ISN : 034, BASED ON 13 STATIONS.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th-July, through Sunday, 21st-July there were 208 countries active. Countries available: 3A, 3B8, 3B9, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T33, T5, T7, TA, TF, TG, TI, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND. Roger, ZS6RJ, informs OPDX that there will be a 3DA0ET DXpedition to Swaziland taking place between November 18-27th. He mentions that the team will be finalized sometime next month after everyone over

on the EU side is back from their holidays. This will include their roles etc... along with the Web site and QSL information. Roger did provide the aims of the DXpedition, which are:
* To participate in the CQWW DX CW Contest (November 23-24th) as a Multi-2 category contestant.
* To give as many folk as possible a new entity or band/mode slot, providing CW, RTTY and SSB.
* To address the often-neglected need for digital modes via a full time dedicated RTTY/PSK station running from the start for the entire duration of the DXpedition.
* To operate 160 meters through 6 meters.
* Equipment:
Rigs - 2X Kenwood TS-590's, 1X Yaesu FTDX3000D, & 1 or 2X Elecraft K3's
Linears - 4X Expert (3X 1K and 1X 2K FA's) linear amplifiers, sponsored by Expert Amps USA
Antennas - 3X KIO Hexagonal Beams, 1X 75 foot vertical for 160, 80 and 40 meters TX, 1X 2 element 30 meter wire beam, 1X 160/80 meter RX antenna with preamp.
* QSL Policy/Website/Log:
- They will be announcing a Web site address shortly.
- They will be using ClubLog for band-slot chasers and for online log checking.
- They will be updating both Clublog and LoTW a couple of times each day during the operation.
- They will be providing QSL cards via both Bureau and direct.
Any queries can be directed to Roger, ZS6RJ.

9G, GHANA. Jeff, W7JVN/9G5AC, reports on QRZ.com [edited]: "My wife Beverly (WB7NLY) and I have been called to a church mission in Ghana, Africa. I thought it would be nice to be on a DXpedition here so I brought my Yaesu FT 857 radio with me and have set up a humble little station at my house. I have a 20 meter inverted V dipole antenna mounted on a 30 foot bamboo pole. The natives here use these poles to mount a small UHF TV antenna on. Every house has a bamboo pole antenna. Some are longer than the one I found, but I thought I was very lucky to find that one. I use a 12 volt battery off my generator for power for the radio. Who needs power in the house as long as the radio will work? I will get on 20 and 15 meters SSB whenever I get a chance and when the bands are open here. With the antenna I have and only 100 watts, I don't think I will have a big signal out of Ghana but I have made several contacts so far with good reports. I will be in Asamankese, Ghana (which is in the bush), for about 16 months. Date of this post is July, 2013. I am looking forward to working as many stations as possible, and I hope you are one of them.... 73 Jeff 9G5AC"

9H, MALTA (Correction). Nakanishi, JJ2NYT, will be active as 9H3N (not 9H1N) from Malta between August 2-5th. Activity will be holiday style on 40-10 meters using CW and SSB. QSL via his home callsign.

9H, MALTA. Emma, M6JDH, will be active as 9H3EH from Mellehia between July 22nd and August 28th. No other details were provided.

9M4, WEST MALAYSIA (LH Op!). Members of the Melaka DX Team will be active as 9M4LHU from the Pulau Undan LightHouse on Undan Island (AS-097) sometime in August (around the ILLW event). QSL via 9M2ESM direct. Look for more details to be forthcoming.

9M8, EAST MALAYSIA. Steve, 9M6DXX, will once again be active as 9M8Z from Sarawak (OC-088) between July 24-29th. Activity will include the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/SSB-Mode/High-Power/24HRS entry. QSL via M0URX, OQRS <http://m0urx.com/oqrs/>, direct <http://www.qrz.com/db/M0URX>
or via the RSGB Bureau.
Logs will be uploaded to LoTW as soon as possible after the operation.

A2, BOTSWANA. After a very successful 7P8D DXpedition to Lesotho in 2012, Donovan, ZS2DL, will lead a team of operators in April of 2014 to Botswana and be active as A22D (license was just issued on July 8th). Activity will be on 160-10 meters using CW, SSB and RTTY. Botswana is high on the wanted lists for both CW and RTTY. They are looking for CW operators and sponsors for this operation. QSL via ZS2DL direct. Log will be posted on ClubLog, so a OQRS will be available. Look for QSOs to be uploaded to LoTW about 6 months after the DXpedition. Look for more details to be forthcoming. Also, watch the Web site at: http://www.a22d.net

AH0/KH0, MARIANA ISLANDS. Operators Kuny/W1FPU (7L1FPU) and his 13 year old son Yoshiki/JF1UCV are now active as AH0BT and KH0UA from the Mariana Islands until July 26th. Activity will be on 40-6 meters including the WARC bands. QSL routes are AH0BT via 7L1FPU (Bureau/direct) and KH0UA via JF1UCV (direct only).

C82, MOZAMBIQUE (Press Release #3). The following was sent out on July 16th [edited]: "This has been a busy month for the C82DX team. With only 90 days before we are QRV we have filled the remaining operating positions and added several individuals to our off site support team. Joining us are such well known DXers as Bill/K1MM, Bruce/W6OSP, Charlie/NF4A and Wild Bill/N2WB. Our South African contingent now includes Pierre/ZS6PJH Chairman of the Pretoria ARC.
We now have secured the vehicles and trailers that will take us overland from Pretoria to Xai Xai, Mozambique. South African members of our team have traveled to Xai Xai to map the operating site and make a deposit on our rented compound. Coax, laptops, and extra linears have been sourced. In addition to our team license, our team members have all received personalized C92 callsigns.
Low Band operations remain the primary objective and we have secured both Titanex and Battle Creek Special verticals. We have also obtained the sponsorship of Array Solutions with one of their new shared apex loop array RX systems and W3YY FSK/CW interfaces. They join ICOM (our main equipment supplier with IC7600s) and SteppIR (CrankIRs) as our major donors to our DXpedition.
During the day we will operate all HF bands including 6 meters. Our website has been expanded by our webmaster, K6MM. If you haven't been there lately, please visit, <www.c82dx.com>, where you can learn more about our plans.

Tom, N4XP and Don, N1DG -- DXpedition Co-leaders"

CE0X, SAN FELIX (Update). A few sources are reporting that Mike, WU2D, was on San Felix and had his radio equipment with him. However, the Armada (Chilean Navy on the island) would not let him operate. Last heard, Mike is back on the mainland. No details if he will try to return to San Felix again.

COLVIN AWARD GRANTS ANNOUNCED. The ARRL has announced that they have made Colvin Award grants <http://www.arrl.org/colvin-award-grants> to help support three upcoming DXpeditions. Recipients are the K9W Wake Atoll, T33A Banaba Island, and FT5ZM Amsterdam Island DXpeditions. The K9W DXpedition is scheduled for September-October 2013, the T33A DXpedition for November 2013 and the FT5ZM DXpedition for January-February 2014. More details, see: http://www.arrl.org/news/arrl-announces-colvin-awards-to-dxpeditions

D2, ANGOLA (Update). João, CT2HPM, is now active as D2CT from Luanda until July 26th. Activity will be 20/17/15/12/10 meters using mostly PSK31 and RTTY. His equipment is a Kenwood TS-480SAT into a EzWire antenna. QSL via CT2HPM.

E5, SOUTH COOK ISLANDS. Fabio, IZ0YIV, will be active as E51YIV from the following islands between October 9-17th. His tentative schedule is:
October 9-13th - Rarotonga Island (OC-013)
October 13-17th - Aitutaki Island (OC-083)
Activity will be holiday style, possibly on 20/17/15m (he has not yet decided), using SSB and the Digital modes (RTTY, PSK, JT65 and JT9 mainly). QSL via his home callsign, direct, by the Bureau or via eQSL or LoTW.

ET, ETHIOPIA (YASME Press Release): "YASME SUPPORTS EQUIPMENT ACQUISITION FOR NEW ETHIOPIAN AMATEURS -- Ethiopia came back on the air May 30, 2011, with the re-opening of the Ethiopian Amateur Radio Society station ET3AA. To support the reestablishment of amateur radio in Ethiopia, the Yasme Foundation made a grant to pay for the fees associated with the license examination for 25 club members. Many were successful but under Ethiopian regulations could not receive a license without proof of ownership of an amateur radio station.
To further support amateur radio in Ethiopia, the Board of Directors is pleased to announce that it has made an additional grant to be used to purchase amateur radio transceivers for three club members so that they can satisfy the requirements of the Ethiopian licensing process. The Board acknowledges with appreciation the substantial efforts of Ken Claerbout, K4ZW, in facilitating the acquisition of the equipment and mentoring the EARS members, as shown here with club member Adula at the microphone during the 2013 IARU HF Championship contest.
The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing (long distance communication) and the introduction and promotion of Amateur Radio in developing countries. For additional information about The Yasme Foundation, visit our website at <www.yasme.org>.

GB75, ENGLAND (Special Event). Look for special event station GB75RH to be active from the International Scout and Guide (Girl Scout) Camp in the Walesby Forest Scout Activity Centre, 21 miles (34 km) NNE of the City of Nottingham and located in the legendary Sherwood Forest, between July 26th and August 3rd. Activity is to celebrate the 75th anniversary of the sites acquisition by the City of Nottingham Scouts. Amateur Radio has long since featured in these camps which are usually held every 4 or 5 years, and this year a station was again one of the many activities available to the young people attending the camp. With a large international team of 17 operators, the stations will be able to demonstrate the best of amateur radio to the many young visitors attending. Amateur Radio expanded the international nature of the camp with 5 HF stations operating on all bands from 80-10 meters, plus 1 station operating on 6m and 2m. QSL via the Bureau or direct to G0GDU.

GJ, JERSEY. Members of the Bristol Contest Group will be active as GJ6YB during the RSGB IOTA Contest (July 27-28th) from Jersey (EU-013, WLOTA L-0818) as a Multi-Op/Island-DXpedition/Mixed-Mode entry. QSL via G3SWH, direct or by the Bureau.

GJ, JERSEY. Members of the Jersey Contest Group will be active as GJ2A from Jersey Island (EU-013, WLOTA L-0818) during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/High-Power entry. QSL via LoTW, or direct to GJ3DVC.

H40, TEMOTU PROVINCE (Update). Sigi, DK9FN, will once again return to the Temotu Province for a fifth time and be active as H40FN, but this time from Lata, Nendo Island (OC-100) between December 21st and January 10th (2014). QSL via DK9FN (not HA8DD) effective from July 1st, direct or by the Bureau. More details will be forthcoming. Watch the QRZ.com Web site at: http://www.qrz.com/db/H40FN

HONDURAN IOTA EXPEDITIONS. By the time you read this, Dan, HR2DMR, who was active as HQ8D from Vivorillos Cay (NA-223) this past week for about 4 days and then went QTH leaving the island, should be returning to Vivorillos for another 4 day operation. Since there is no facilities on the Island, Dan had to stop after the 4th day to return to the main land to resupply (fuel, water and food). He also mentions things might change depending on the Honduran Navy's needs. Activity from Vivorillos will be on CW, SSB and possibly RTTY. This will be his last activity from here. The QSL Manager is Dwayne, KD4POJ, and he provides some details about Dan's operation at: http://hriotas.com
ADDED NOTES: After NA-223, Dan will be active for the RSGB IOTA Contest from Cochinos Island (NA-160) as HQ3W. Of further interest, Dan mentions

he is planning to activate Tigre Island (NA-060), but no firm dates as yet.

II8, ITALY (LH Op!). Members of the Calabria DX Team will activate the Capo dell'Armi Lighthouse (JM77UW, ARLHS ITA-014 and CL-008 WAIL) on Saturday, August 13th. The callsign will be II8LH. QSL via the Bureau to HB9FHZ (USKA bureau). QSL via direct to IK8YFU. Also, log will be upload to eQSL and LoTW. For more info, visit: http://www.calabriadxteam.it

IOTA NEWS.....
JUST A REMINDER THAT NEXT WEEKEND IS THE RSGB IOTA CONTEST!!!!!! Complete details and rules are available at:
http://www.rsgbcc.org/hf/iota.shtml
http://www.rsgbcc.org/hf/rules/2013/riota.shtml

AS-074. Ian, 9M2FB, will be active from Pulau Ketam Island (Crab Island) during the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/12HRS/Low-Power entry. QSL via 9M2FB.

AS-117. Aki, JA4FHE, will be active as JA4FHE/4 from O-shima Island (Yamaguchi Prefecture) during the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/15m/12HRS entry. QSL via his callsign.

AS-120. By the time you read this, operators Spyros/5B4MF, Philip/5B4ZN, Tamer/5B4AHE and Pavlos/5B4AMF should be active as homecall/p from the "Agios Georgios" islet off the coast of Akamas, Cyprus, until 0300z Sunday, July 21st. Activity will be mostly SSB on 17 and 20m but also some 30m slow CW. QSL via their home callsigns.

AS-135. Operators Dale/BA4TB, Tim/BD4TJ, Mi/BD4TQ, Meng/BD4TT, Zhou/BG4TYQ, Zhou/BG4TVT, Zhang/BG4TMC and BG4TDF will be active as BA4TB/5 from Dongxilang Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Single entry. QSL via BA4TB.

AS-139. Operators Terry/BA7NQ, Mouland/BD7JLJ, Yang/BD7IXG, Rumei/BD7LMD, Lin/BI7IOB, Weijian/BH7IHE, Junxi/BI7OZD, Shiyu/BD7KSF, De/BA7JA, Wu/BA7IA, Ya/BA7JG, Alan/BA1DU, Liao/BA7QT and Chen/BD7RL will be active as BY7RA/7 from Weizhou Island between July 25-29th. Activity will be on 80-6 meters. They will also be in the RSGB IOTA Contest (July 27-28th) as a Multi-Op entry. QSL via BA4EG.

EU-006. Members of Limerick Radio Club will be active from the Inishere Islands as as EJ0A during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/DXpedition/Mixed-Mode/Low-Power entry. QSL via EI4GXB. Operators mentioned are Brendan/EI0CZ, Ger/EI4GXB, John/EI6IW, Simon/EI7ALB, Paddy/EI8GY, Dermot/EI2GT, David/EI2GBB and Tony/EI9IL.

EU-006. (Update/Change) Members of the Papa Lima DX Group will be active as EJ0PL from Inishmore Islands (Aran Islands) between July 23-29th. Ten operators plan to have three stations active

on 80-6 meters using CW, SSB and the Digital modes. Activity will include the RSGB IOTA Contest (July 27-28th) using the callsign EJ1Y as a Multi-Op/High-Power entry. They will use Hexbeams (20-6m) and verticals (80-30m). Updated operators are Michal/EI3KG, John/EI4GK, Adam/EI5JQ, Oleg/EI7KD, Waldi/SP7IDX, David/EI9FBB, Ark/EI9KC and Mietek/SP9NWN. QSL via EI5JQ, direct or by the Bureau. An OQRS will be available via ClubLog. Log will be uploaded to LoTW, eQSL and HRDLOG.net.

EU-008. Members of the Cockenzie & Port Seton Amateur Radio Club will once again activate GM2T from the Isle of Tiree (IOSA NH04, SCOTIA DI10, WLOTA 2232, WAB NM04), the most westernly part of Scotland's Inner Hebridean Islands, during the RSGB IOTA Contest (July 27-28th) as a Multi-Op entry. Operators mentioned are: Cambell/MM0DXC, Bob/GM4UYZ, Robin/MM0VTV, Steve/MM0GZA, Geoff/MM5AHO, Brian/M0RNR, Tanner/MM0SEN, Gary/MM0FZV, John/MM0JXI, Paul/MM0VPR, Cephas/MM0INS and Ellis/GM4GZW. QSL via GM4UYZ, direct or eQSL and LoTW. ADDED NOTE: Operators will try to operate before the contest using the callsign MM0CPS/P. For more info, see: http://www.cpsarc.com

EU-008. Ed, GW3SQX, will be active as GM7O from Skye Island (IOSA NH07, SCOTIA CN14, WLOTA 1626) during the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/CW-Mode entry. QSL via GW3SQX.

EU-009. Michael, DL6MHW, will be active as MM/DL6MHW from Orkneys (Mainland), Scotland, during the RSGB IOTA Contest (July 27-28th) as a Single-Op/Mixed-Mode/12HRS/Low-Power entry. QSL via DL6MHW.

EU-010. Operators John/MM0CCC, Colin/GM0RLZ, Clive/GM3POI, Keith/GM4YXI and Chris/GM3WOJ will be active as GM7V from Benbecula Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/DXpedition/Mixed-Mode/High-Power entry. QSL via N3SL.

EU-012. Operators Ian/G3WVG and Nigel/G3TXF will be active as MZ5A from the Scottish Shetland Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op entry. QSL via G3TXF.

EU-025. Joe, IT9RZU, will be active from Sicily Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/CW-Mode/Low-Power entry. QSL via his home callsign, by the Bureau or LoTW.

EU-031. Gian, IC8WIC, will be active from Capri Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op entry. QSL via his home callsign or by the Bureau.

EU-031. Operators Antonio/IZ8DPL, Angelo/IZ8FSH, Jozef/OM3GI, Tibor/OM3RM and Miroslav/OM5RW will be active as IR8A from Ischia Island during the RSGB IOTA Contest (July 27-28th). QSL via

IZ8GBH. Visit the IR8A Web page at: http://www.ir8a.com

EU-031. Operators Tony, IC8FBU, will be active from Capri Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode entry. QSL via the Bureau. Suggested bands and times: 40m 0021-0100z, 80m 0100-0300z, 20m 0600-0800z, 10m 0800-1100z and 15m 1100-1200.

EU-051. (Update) Operators Stefano/IK6JRI, Fred/IK7JWX, Ciclane/IZ6JOD, Giuseppe/IT9FTP, Calogero/IT9INO and Davide/IT9DFI will be active as IE9/homecall from Ustica Island (IIA P-0001, MIA MI-116, LH SI-027, ITA-136, L-0848, WFF IFF-485, WW. Loc. JM68OQ) between July 24-29th. Activity will include the RSGB IOTA Contest (July 27-28th) as IE9/IK6JRI, but before and after the contest look for operations on the HF bands CW/SSB, as well as 30/17/12 meters digital modes and 6 meter SSB. QSL IE9/IK6JRI via IK6JRI, direct or by the Bureau. All others via their home callsign, direct or by the Bureau.

EU-055. Operators Jan/LA1MNA, Nils/LA6IOA, Bjørn/LA6SFA, Morten/LA7XIA Knut/LA9RY will be active as LN7H from Bokn Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/DXpedition entry. QSL via LA7H.

EU-064. Members of the F6KOP team, Provins ARC, will be active as F6KOP/p from Noirmoutier Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/Mixed-Mode/DXpedition/24HRS/Low-Power entry. Operators mentioned are Johan/F4GTD, Antoine/F5RAB and Maurice/F5NQL. QSL via F6KOP, Bureau is preferred. ADDED NOTE: Look for operators to be active before the contest, a few hours on Friday and Saturday morning, using the same callsign and checking their gear. However, they will be using an Ultra portable station, with only one transmitter, a laptop and Vertical antennas, an AC/DC generator and maybe a 500w PA. Antennas will be set up very close to the beach.

EU-064. A team composed by Geoffrey/F4FVI, Pierre/F4GXS, Johan/F4GTD, Phillipe/F5TRO, Maurice/F5NQL and Nicolas/F8BDB will be operating as TM2NOI from Noirmoutier Island between August 9-11th. This is the third IOTA activation by this young team. Activity will be on the IOTA frequencies using SSB, Digi and CW. QSL via the Bureau and direct to F4FVI. For more details, see: http://www.qrz.com/db/TM2NOI

EU-075. Operators George/SV1CDY, Thomas/SV2CLJ, Kostas/SV1GSU, Antony/SV1OAN and Emmanuel/SV1JGX will be active as J48A from Aegina Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op entry. QSL via SV1OAN.

EU-115. Operators Neil/EI3JE, Dan/EI3JZ, Mark/EI3KD, John/EI8IR, Jerry/EI6BT and Dave/EI4BZ will be active as EI7M from Ireland (mainland) during the RSGB IOTA Contest (July 27-28th) as a

Multi-Op/Mixed-Mode entry. QSL via EI6HB.

EU-119/ Operators Vasily/R7AA, Alexei/RN1ON, Igor/UA3EDQ and Aliy/UA6YW
EU-161. will be active as R20RRC/1 from Morzhovets Island (EU-119)
between July 24-28th. Activity will include the RSGB IOTA
Contest (July 27-28th) signing as RT6A/1. QSL R20RRC/1 via
RZ3EC and RT6A/1 via R7AA. ADDED NOTE: Depending on the WX,
the team may also activate Sosnovets Island (EU-161) on July
25th. Callsign was not mentioned.

EU-120. Look for M0NMS/p to be active from Isle of Wight (WLOTA 2985)
during the RSGB IOTA Contest (July 27-28th) as a Single-Op/
12HRS/Low-Power entry. QSL via LX1NO.

EU-120. Darren, G0TSM, will be active as M7X from Isle of Wight (WLOTA
2985) during the RSGB IOTA Contest (July 27-28th) as a Single-
Op/Mixed-Mode/12HRS/High-Power entry. QSL via G0TSM.

EU-120. Operators Richard/G3ZGC, Colin/M0DDT, Ray/G4FON, Steve/M0SEL,
Stuart/M0RXX, George/2E0FEC and 2E0MJE will be active as G7N
from Isle of Wight (WLOTA 2985) during the RSGB IOTA Contest
(July 27-28th). QSL via G5XV direct, or G7N by the Bureau.

EU-124. Members of the Barry Amateur Radio Society (BARS) will once
again activate Flatholm Island during the RSGB IOTA Contest
(July 27-28th) using the callsign GW8K as a Multi-Op/Island-
DXpedition/24HRS/Low-Power entry. Operators mentioned are
Philip/MW0DHF, Ken/GW1FKY, Steven/MW0VRQ and George/MW0TDQ.
QSL via MW0DHF, direct or by the Bureau.

EU-129. Operators Claus/DL8DZL and Axel/DL8RL will be active as DL8DZL/p
from Usedom Island during the RSGB IOTA Contest (July 27-28th).
QSL via DL8DZL.

EU-132. Adam, DJ0IF, will be active as SN0RX from Wolin Island during
the RSGB IOTA Contest (July 27-28th). QSL via SP8RX.

EU-136. Jozef, OM5AW, will be active as 9A/OM5AW from Krk Island during
the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/
DXpedition/Mixed-Mode/Assisted/High-Power/12HRS entry. QSL via
OM2FY.

EU-140. Operators Jari/OH1JO and Juha/OH1LEG will be active as OH1K
from Kaunissaari Island between July 25-31st. Activity will
include the RSGB IOTA Contest (July 27-28th). Operations will
mainly be on 20 meters SSB, but they will also be on 80-6
meters. QSL via OH1JO.

EU-147. Operators Vasily/RU3SD and SWL/R3S-367 will be active as
RK3SWB/1 from Berezhnoy Borshovets Island during the RSGB
IOTA Contest (July 27-28th) as a Multi-Single entry. QSL via
QRZ.com info.

EU-162. Operators Sukhanov/UA1ZZ, Vladimir/RZ1ZZ, Vasil/RA1ZZ, Oleg/ RK3AW, Aleksandr/RA3AV and Alexey/RW3QNZ will be active as homecall/p and R20RRC/1 from Glov Island in the White Sea between July 28-29th. They will also be an entry in the RSGB IOTA Contest (July 27-28th) as UA1ZZ/p. QSL via UA1ZZ. All personal/home callsigns via their home addresses.

EU-165. Massimo, I0PNM, will once again be active as IM0/I0PNM from San Pietro Island (IIA CI-007, MIA MIS-050, WLOTA 2989). His activity will take place during the RSGB IOTA Contest (July 27-28th) as a Single-Op/DXpedition/SSB-Mode/Unassisted/24HRS entry. QSL via his home callsign direct only.

EU-170. Matus, HA9MDN, will be active as 9A/HA9MDN from Vir Island between July 26th and August 2nd. Activity will include the RSGB IOTA Contest (July 27-28th) as a Single-Op/SSB-Mode/Low-Power entry. Operations will be on SSB, RTTY and SSTV. QSL via HA9MDN, by the Bureau or eQSL.

EU-178. Juri, ES5GP, will be active as ES5GP/8 from Kihnu Island between July 24-29th. Activity will include the RSGB IOTA Contest (July 27-28th) as a Single-Op/SSB-Mode entry.

EU-179. Operators Nick/UR3GO, Vitaly/UR4QTP, Ivan/UR8GX, Mike/US0GM, Alex/UT7GV, Vitaliy/UV5QAW and Alexey/UV5QQ will be active as homecall/p from the Kalanchakskiye Islands between July 24-31st. Activity will be on the HF bands using CW and SSB. QSL via the home callsigns. ADDED NOTE: Ivan, UR8GX, will be active during the RSGB IOTA Contest (July 27-28th) as a Single-Op entry from Kalanchakskiye.

EU-183. A small number of Romanian hams will be active as YP13S from Sacalinu Mare Island between July 24-29th. The team has already received approval for access on the island. The Romanian government has declared the area an ecological reserve and no settlement is permitted on the island. Operators mentioned are Vasile/YO4AR, Vasile/YO4HAB, Vali/YO4HAI, Chris/YO5OHO, Laur/ YO8AXP, Bebe/YO8SGZ and Alex/YO8SS. Activity is planned for 80-10 meters using CW and SSB. QSL via YO8AXP. For more details, see: http://www.amatoradio.ro

EU-186. Operators Metin/TA1ED and Tevfik/TA1HZ will be active as TC0GI from Gokceada Island during the RSGB IOTA Contest (July 27-28th). This will be a totally portable operation with generator power for electricity. Activity will be on 80-10 meters. QSL via TA1HZ direct only.

NA-026. Mike, N2GC, will be active from Long Island, NY, during the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/High-Power entry. QSL via LoTW or direct to N2GC.

NA-036. Gabor, VE7JH, will be active as VA7SIL from the VE7UF's contest station on Vancouver Island during the RSGB IOTA Contest (July

27-28th) as a Single-Op/CW-Mode entry. QSL via VE7JH.

NA-045. Andrea, IZ2LSC, will be active as XF3/IZ2LSC during an IOTA holiday style DXpedition from Isla Mujeres between July 24-31st. Also, look for some activity as XE3/IZ2LSC (mainland) between now and July 23rd. He states that his main commitment is for the IOTA activation. QSL via EB7DX direct, by the Bureau to his home callsign IZ2LSC or LoTW. For more details, see: http://www.timpy.it/xf3
Also following him on Twitter: @iz2lsc

NA-067. Jon, WB8YJF, will be active as WB8YJF/4 from Ocracoke Island (USI NC001S), NC, between July 21-28th. Activity will be on 80-10 meters using mainly CW with some SSB and RTTY. He also plans to be active in the RSGB IOTA Contest (July 27-28th) as Single-Op/All-Band/High-Power entry. QSL direct for FAST reply or by the Bureau.

NA-067. Marty, W4MY, will operate from Harkers Island, NC, during the RSGB IOTA Contest (July 27-28th) running 100 watts on 80-10 meters. QSL via W4MY.

NA-137. Operator Doug, K1DG and friends will be active as N1LI from Long Island, ME, during the RSGB IOTA Contest (July 27-28th) as a Multi-Op entry. QSL via N1LI.

NA-140. Ethan, K8GU, will be active as K8GU/3 from Middle Hooper Island during the RSGB IOTA Contest (only on July 27th) as a Single-Op/Mix Mode entry. Activity will be 40-10 meters. If conditions are poor, he may be CW-only. QSL via K8GU.

OC-109/ (Update) The DX-World.net is reporting that John/YB5NOF plans
OC-122. to activate Natuna Selatan (OC-109) and Tambelan (OC-122) island sooner than expected.

OC-136. Operators Steve/VK3MEG and Marcel/VK3FAAJ will be active as VK3MEG from Phillip Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/Assisted/Low-Power entry. They will use 40m dipole and 3 element tribander (20/15/10m). QSL via LoTW, EQSL or by the Bureau.

SA-035. A group of YL operators will be active as YW5RYL from Los Roques between November 7-10th. Operators mentioned are Carolina/YV4AW, Maika/YY5ALO, Geraldine/YY2GAL, Laura/YY5OLA, Ramirez/YY5ANG, Mary/YY5MCO and Yumayra/YY5YVR. Activity will be on 160-6 meters using CW, SSB and the Digital modes. More details are forthcoming and a Web page is under construction.

SA-054. Members of the Grupo DX Caracas will be active as YW5X from Orchila Island (ARLHS VEN-022, WLOTA 3044) between August 1-31st. QSL via DM4TI only.

JA DX CONVENTION. It was announced that the "Japan DX Meeting 2013" will be held on August 24th in Tokyo. For more details, see: http://www.jdxm.jp/e.html
They state, "We, Japanese DXers, are looking forward to meeting lots of Hams from all over the world!"

OH0, ALAND ISLAND. Operators Jukka/OH6LI and possibly others will be active as OH0V from Aland Island (EU-002) during the RSGB IOTA Contest (July 27-28th) as a All-Band entry. QSL via OH6V or LoTW (preferred).

OJ0, MARKET REEF. Weather permitting, operators Teemu/SM0W/OJ0R, Rick/SM6U, and Thomas/SM0CXU/PY2ZXU will be active as OJ0R from Market Reef (EU-053) between July 25-29th. The group plans to be active during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/Island-Dxpedition entry. QSL via G3TXF.

OJ0, MARKET REEF. Pasi, OH3WS, will be on Market Reef (EU-053) as a voluntary worker between September 21-27th, and will be active as OJ0W during his spare time. Activity will be on 40-10 meters mostly CW. He states that he may be in the SAC Contest (September 21-22nd). QSL via OH3WS, by the Bureau or direct to: Pasi Bergman, Tuulipolku 4, 13500 Finland. ADDED NOTE. A YL Mirja (not Pasi's YL) will be there on the Reef with him and was very interested in HAM radio in Sept. 2012. When they were there last time, she made some QSOs. Pasi states, "I will give her a possibility to make QSOs as a second operator on SSB. It has been a long time since OJ0 was QRV by any YL-operator. We'll see what happens."

OO, BELGIUM (Special Prefixes). On July 21st, His Royal Highness Prince Philippe will become the new king of Belgium and His Royal Highness King Albert II has reigned for 20 years. For both occasions, all radio amateurs with a Belgian license will be allowed to use the prefix "OO" instead of "ON" from July 21st until and including September 20th, 2013. Belgian vanity callsigns (with only one letter in the suffix) may not change their prefix. Some vanity callsigns already have an "OO" prefix. A commemorative award will be available for working a number of these "OO" stations. Details will be forthcoming soon.

OQ4, BELGIUM (Special Event). Members of the ONZ Oost Kust Radio Club (ON4CLM) and other radio amateurs belonging to UBA clubs and groups will activate the special station OQ4CLM from Knokke between October 16th and November 15th. This is the club's 32nd anniversary activating the special event station. The suffix "CLM" stands for "Canadian Liberation March". Activity is to remind everyone of the 33km march that the Canadian troops did coming from the town Hoofdplaat in Holland to liberate the town Knokke in 1944. Each year, the ONZ uses a different prefix, and this year they were granted the use of the special prefix OQ instead of ON. QSL via ON3AIM. For more information and details about the special event station, visit their Web sites at: http://www.qrz.com/db/oq4clm http://www.oq4clm.be

OX, GREENLAND. Operators Mia/OZ5MD and Bjorn OZ5BD will be active as OX5M and OX5T, respectively, from Sisimiut, Greenland (NA-018), for at least the next two years. Activity will be on 40-6 meters using CW and SSB. QSL via OZ0J.

P4, ARUBA. Doug, NA1DX, will be active as P40DE from Aruba (SA-036, WLOTA 0033) between July 21-26th. He plans to operate CW, SSB, PSK and RTTY QRP with an Elecraft KX3 and Buddipole. Visit his Web site for more details and the QSL information at: http://www.ellmore.net/na1dx

P5 BBC IDXG INTERVIEW AND VIDEO SLIDE SHOWS AVAILABLE ON THE WEB.....
* Dan Damon of the BBC has interviewed Paul Ewing, N6PSE, regarding the efforts of the "Intrepid-DX Group" to activate North Korea (P5). You can find the interview (37 minutes) during the BBC program at: http://www.bbc.co.uk/programmes/p01blrbt
Another similar interview will soon appear on Voice of America.

* Paul, N6PSE, reports, "We have added two new video slide shows from our recent visit to the Democratic People's Republic of Korea. The first video shows the children of the DPRK. The second video slide show shows many aspects of our travels throughout the DPRK. You can find the videos by going to <www.intrepid-dx.com> and select videos from the main menu."

PA, THE NETHERLANDS (Special Event). Look for special event stations PA6SAIL to be active between August 19th and September 10th. Activity will be on the HF bands using CW, SSB, PSK and RTTY. Also 6m and 2m. A special QSL card will be issued for working this callsign. Operations are in supporting the maritime event "SAIL De Ruyter" at Vlissingen. QSL via PA3GEO (by the Bureau or direct).

THAILAND VHF QSL ROUTES. There was many HS and E2 club stations active during this past weekend's CQ WW VHF Contest. Here are their QSL routes:
HS0AC host by E21EIC QSL via E21EIC (6m only) *
E2E host by HS1CHB QSL via E21EIC (6m only)
HS4AK QSL via E20YLM
HS5AM QSL via HS5IGY
* Champ, E21EIC, states, "For HS0AC and E2E, I will send QSLs of ALL QSOs on 6m via the Bureau."

E7 IARU HF 2013 QSL ROUTES. QSL E7HQ, E70ARA, E720IARU, E720RS and E720SRRS via E77E.

NEW QSL ROUTES. Phil, G3SWH, announced that he has been appointed as the QSL Manager for G0ORH, M3I and MM3I effective immediately. MM3I will be active from the Isle of Arran (IOTA EU-123) during the 2013 RSGB IOTA Contest. There are already pages with log searches on Phil's Web site at: http://www.g3swh.org.uk
OQRS is preferred, but snail mail or RSGB bureau will also work.

PJ5/K3TRM logs have now been uploaded to LoTW and ClubLog.

TS8P (Djerba 2010) QSL STATUS. Fred, IK7JWX, reports that he has finished the TS8P QSLs for the Djerba DXpedition in 2010. For Bureau QSLs, send him QSOs data via E-mail.

QSL RECEIVED VIA LoTW: 3V8BB, 5B75FOC, 8P3A, 8P6NW, 8P6SH, 8P9AA, 9M6XRO, AO6FOC, CP4BT, CT1CDP, CU3AN, D4C, DK5WL, E51E, EF8USA, FJ/K5WE, FJ/N5WR, FS/K9EL, GH3IT, GT4FOC, HB9CXZ, IR4M, IS0FOC, J68HZ, J75LG, JA5IU, JA8MS, JJ2LPV, KH6FOC, KH7M, M0VIE, M0VPE, NP4Z, OE3NKB, OZ1HDF, PJ4/NA2AA, PJ4LS, PJ4X, PY2KC, PY2YW, PZ5T, R7DX, R75FOC, RN3QN, SE2R, SG8X, SN7Q, SQ6ODD, TM5FOC, TR8CA, TT8TT, VA7DX, VE3YAA, VP2V/K6TOP, XT2CC, XV1X, YT7AW, YV5OIE, YW5W, ZL7J and ZM1A

QSLS RECEIVED VIA MAIL: 5N7M, 5W0M, 5X8C, A41KJ, CE3SX, EP3SMH, HC2IWM/8, HR1AGC, JX5O, HK0/DL5YWM, KH0N, KH2L, LT1F, OJ0UR, OZ/PA7PA, P43A, PT0S, TK0INT, TK1INT, TK2INT, TN2T, TX5K, V85TL, VK9NT, VP2ETE, XX9AS, XY0Y, ZK3N and ZL9HR

QSLS RECEIVED VIA THE BUREAU: 3B7SP, 3XY1D, 4K9SONG, 4K9W, 4K0CW, 4X/N2TA, 570SP, 706T, 9H3TX, 9M2/R6AF/P, A35YZ, A6/DL2RMC, AP2TN, DL2EW, EA9/SP7VC, HD2A, HS0ZFA, HZ1FI, J38XX, JT7WFF, JW/DJ3KR, LY2BIS, MJ/SQ4MP, P33W, PJ5/SP6EQZ, PJ7PT, R25XAA, S79QT, S9DX, SV5/OH2DZ, SV5/RD1AP, SV9/DF8DX, T8XX, TG9IDX, TX5SPA, UP100GS, V21ZG, V31YN, V5/DJ2HD, V5/DL9NDS, VP2MGZ, VP2MWG, VP2MYL, VR2EH, XV0VR, YI9KT, YJ0ABP, YV0D, YW5LR, YW5PI, YW6A, YW7A, ZD8D and ZK2C

S7, SEYCHELLES. Cesare, I0WDX, will be active as S79WDX from Digue Island (AF-024), in the Seychelles Island group between November 12-23rd. Activity will be 160-6 meters, propagation permitting, using an Icom IC-7000 into a vertical by I1UJX and dipoles for 80 and 160m. QSL via I0WDX direct or LoTW. No QSLs via the Bureau.

TN2, REPUBLIC OF CONGO (Update to OPDX.1114/1117/1118 - Date Change). Once again in close cooperation between the DAGOE Foundation, Mercy Ships and 4 Dutch radio amateurs, planning is being done for a DXpedition to Republic of Congo. The Team will stay in Pointe Noire between October 12-24th (not September 28th-October 11th as announced earlier). The team will use the callsign TN2MS (not TN5MS as first announced) for this coming activity. For more details and updates, visit their Web page at:
http://www.tn2ms.nl
Also on Twitter at: https://twitter.com/DXpedition

TO4, MARTINIQUE. Thierry, F4BDG, will be active as TO4FM from Martinique (NA-107) between October 5-20th. Activity will be on the HF bands. QSL via EA5GL or on eQSL and LoTW.

V5, NAMIBIA. Operators Serge/UX0HX, Max/UZ1HZ and Alex/UT5UY will be active in holiday style as V5/homecalls from Namibia between August 1-8th. Activity will be on 80-10 meters using CW and SSB. QSLs for V5/UX0HX, V5/UZ1HZ and V5/UT5UY are via UT5UY direct or by the Bureau.

VK9M, MELLISH REEF (Press Release). The following was sent out on July 11th: "After their successful operation from Campbell Island in Dec., 2012, six members of the ZL9HR team and additional operators are today announcing their intention to activate Mellish Reef in early 2014.
Mellish Reef is located in the Coral Sea, approximately 1,100 kilometers northeast of Brisbane, Australia. Currently number 24 on ClubLog's Most Wanted List, Mellish Reef was last activated in 2009. An international team will operate for 12 days, using 6 stations with linear amplifiers and vertical antennas.
Discussions are underway with the appropriate authorities and potential transport suppliers. Additional information will be available on the team's soon to be activated web site after the documentation is finalized.
Currently signed up for the project are: Pista/HA5AO, Dave/K3EL, Glenn/KE4KY, Jacky/ZL3CW, George/HA5UK, Gene/K5GS and Les/W2LK. As the project progresses we will announce additional operators and details.
Please direct questions to: Mellish2014@...
73, Team Mellish 2014"

XE, MEXICO (Special Event). Members of the La Federacion Mexicana de Radioexperimentadores, A.C. (Mexican Federation of Radio Experimenters FMRE) will be on the air from Cancun, Mexico, with the special callsign XE3FMRE celebrating the National Convention FMRE 2013. Activity will take place between October 2-7th, and operations will be on 80-6 meters using CW, SSB, RTTY, PSK31 and may be WSJT (Grid SQ. EL61). QSL via XE1LM.

XW, LAOS. Operators Steve/9M6DXX and James/9V1YC will operate as XW8XZ and XW1YC, respectively, from Laos between September 5-10th. They plan to have two stations on the air. XW8XZ activity will be on SSB and XW1YC

will mainly be CW with some SSB. QSL XW8XZ via M0URX and XW1YC via W5UE.

Z81X SOUTH SUDAN NEWS (Press Release From OH2BH). "Some 400 OQRS envelopes were mailed today and the rest will be completed within a next few days. Direct QSLing has also started and several hundred envelopes are mailed out daily.
Turnaround times for both OQRS and direct are just a day or two. OQRS bureau cards will be answered only after this initial phase.
Please note the fastest QSL address is as follows:
Olli Rissanen, OH0XX
Salmelankuja 14, Jääli,
FI-90940, Finland
It is also reported that plans for the upcoming South Sudan CQWW and low-band operations remain on track and the operator roster will be finalized this month."

ZD8, ASCENSION ISLAND. Marko, N5ZO, will once again be active as ZD8O from Ascension Island (AF-003) during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band entry. QSL via OH0XX.

ZD8, ASCENSION ISLAND. Jorma, OH2KI, will be active as ZD8X in November. Activity will be before, during and after the CQWW DX CW Contest (November 23-24th). Activity during the contest will be Single-Op/Single-Band (10m) entry. Look for him on the bands outside of the contest. QSL via OH2KI.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30722
SIDC SOLAR BULLETIN 22 Jul 2013, 1307UT
SIDC FORECAST (valid from 1230UT, 22 Jul 2013 until 24 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 22 Jul 2013 10CM FLUX: 120 / AP: 004
PREDICTIONS FOR 23 Jul 2013 10CM FLUX: 122 / AP: 003
PREDICTIONS FOR 24 Jul 2013 10CM FLUX: 125 / AP: 005
COMMENT:Three sunspot groups were reported by Catania today, with numbers 33, 35
and 34 (corresponding to NOAA ARs 1793, 1800 and NOAA H-alpha plage 1799
respectively). No C-class flares were reported during the last 24 hours,
but C-flares remain probable in Catania sunspot groups 33 and 35, with a
weak chance for an M-class flare. An equatorial coronal hole reached the
solar central meridian today. The fast solar wind stream from this coronal
hole is expected to arrive at the Earth on July 25. The Earth is currently
inside a slow (around 400 km/s) solar wind flow with weak to average
(around 3-4 nT) interplanetary magnetic field magnitude. We expect quiet
geomagnetic conditions in the coming hours.
TODAY'S ESTIMATED ISN : 037, BASED ON 13 STATIONS.

From: Lance Martin
Topic: 21403 Message: 21403

Ok Guys,

Why isn't there any activity from Pratas Island BQ9? Why is it so rare?
I see there is an activation of another island near Taiwan..
What's the score?

73, Lance - VK6DU

I don't know, Lance. It and BV7H "appeared" on the DXCC List
around the same time. Pratas seems to be rarer than BV7H. I'm pretty
sure it is a military base, but with the expansion of interest in Ham
radio in China, you'd think some BY Hams would have activated it. I
wish someone would.

Good Morning gents:

The last contacts I show here are 10, 15, & 20 meters on April 9,
2000. Indeed a good while ago.

73,
Mike, W5UC
Is it October yet?

That article pretty well explains why it's difficult to activate. It's claimed by both Taiwan and mainland China. The only way there is by military transport. But at least there's more to it than Scarborough Reef!

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30723
SIDC SOLAR BULLETIN 23 Jul 2013, 1207UT
SIDC FORECAST (valid from 1230UT, 23 Jul 2013 until 25 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 23 Jul 2013 10CM FLUX: 112 / AP: 007
PREDICTIONS FOR 24 Jul 2013 10CM FLUX: 114 / AP: 005
PREDICTIONS FOR 25 Jul 2013 10CM FLUX: 117 / AP: 018
COMMENT:Six sunspot groups are reported by Catania today. C-class flares are
possible in Catania sunspot groups 33, 35, and 38. Catania sunspot group 33
(NOAA AR 1793) evolved from beta-gamma to beta configuration of its
photospheric magnetic field. Catania sunspot group 35 (NOAA AR 1800) shows
evidence of emerging magnetic flux. Catania sunspot group 38 (no NOAA
number yet) just appeared from behind the east solar limb. The Earth is
currently inside a slow (around 380 km/s) solar wind flow with average (4-5
nT) interplanetary magnetic field magnitude. We expect quiet geomagnetic
conditions in the coming hours. On July 25 we expect the arrival of the
fast flow from the equatorial coronal hole, possibly resulting in active
geomagnetic conditions.
TODAY'S ESTIMATED ISN : 052, BASED ON 15 STATIONS.

According to K9EL (CQ DX Marathon manager), DL1AL spontaneously showed
up as 5A1A once before, a few years ago, and made only a few QSOs.
That doesn't mean it's legit this time, but it could be. John is
investigating...

Never, at least not initially. After 30-40 years you learn odd behaviour and a lot of little hints make you very suspicious. Since you can't prove a negative, you can work him and see if (a) you get a card, and (b) if the DXCC Desk will accept it.

Or . . . look at your needs and decide you don't want to bother finding out.

73, Paul VE1DX

21415. Re: [DX-IS] 5A1A yesterday

Subject: Re: [DX-IS] Pratas Island

That article pretty well explains why it's difficult to activate. It's claimed by both Taiwan and mainland China. The only way there is by military transport. But at least there's more to it than Scarborough Reef!

SIDC FORECAST (valid from 1230UT, 24 Jul 2013 until 26 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 24 Jul 2013 10CM FLUX: 109 / AP: 007
PREDICTIONS FOR 25 Jul 2013 10CM FLUX: 112 / AP: 018
PREDICTIONS FOR 26 Jul 2013 10CM FLUX: 115 / AP: 005
COMMENT:Six sunspot groups are reported by Catania today. One of them (Catania
number 35, NOAA AR 1800) has beta-gamma configuration of the photospheric
magnetic field. We expect flaring activity on the C-level, although the
last C-class flare took place on July 21 and only B-class flares are
reported during the last days. The Earth is currently inside the slow
(around 350 km/s) solar wind flow with weak to average (3-4 nT)
interplanetary magnetic field magnitude. We expect quiet geomagnetic
conditions in the coming hours. Tomorrow we expect the arrival of the fast
flow from the equatorial coronal hole, possibly resulting in active
geomagnetic conditions.
TODAY'S ESTIMATED ISN : 044, BASED ON 11 STATIONS.

PREDICTIONS FOR 27 Jul 2013 10CM FLUX: 115 / AP: 003
COMMENT:During the last 24 hours, Catania sunspot group 35 (NOAA AR 1800) produced
three weak C-class flares, the strongest one being the C1.8 flare peaking
at 21:43 UT yesterday. We expect more C-class flares in this group, but the
probability for flaring at the M-level is low. A filament eruption at the
solar central meridian (between Catania sunspot groups 35 and 44) starting
around 02:00 UT today was accompanied by coronal dimmings and a post-
eruption arcade, as shown by the SDO/AIA data. However, no corresponding
CME was detected by SOHO/LASCO or STEREO/COR. The Earth is currently
inside a slow (around 320 km/s) solar wind flow with average (around 5 nT)
interplanetary magnetic field magnitude. We expect quiet geomagnetic
conditions until the arrival of the interaction region between the slow and
fast solar wind flows later today (followed by the fast flow from the
equatorial coronal hole), which may result in active geomagnetic
conditions.
TODAY'S ESTIMATED ISN : 058, BASED ON 18 STATIONS.

SB DX ARL ARLD030
ARLD030 DX news

This week's bulletin was made possible with information provided by HA0HW, KI1U, NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. Feco, HA8KW is QRV as 3V8SM until August 1. Activity is holiday style on the HF bands using only CW. This includes a possible 12 hour entry in the RSGB IOTA contest from Jerba Island, IOTA AF-083. QSL this operation to home call.

WEST MALAYSIA, 9M2. Ian, 9M2FB will be QRV from Pulau Ketam Island, IOTA AS-074, during the RSGB IOTA contest as a Single Op/CW/Low Power/12Hrs entry. QSL to home call.

EAST MALAYSIA, 9M8. Steve, 9M6DXX is QRV as 9M8Z until July 29. This includes being a Single Op/All Band/SSB/High Power/24Hrs entry. QSL direct via M0URX.

CHINA, BY. A group of operators will be QRV as BA4TB/5 from Dongxilian Island, IOTA AS-135, in the RSGB IOTA contest as a Multi/Single entry. QSL via BA4TB.

ANDORRA, C3. Station C37UN is QRV until July 28 in celebration of 20 years of full UN Membership for Andorra. QSL via C37URA.

EASTER ISLAND, CE0. Jose, CE3YHO has moved to Rapa Nui, IOTA SA-001, and plans to be QRV as CE0YHO beginning in August. QSL via operator's instructions.

ESTONIA, ES. Juri, ES5GP is QRV as ES5GP/8 from Kihnu Island, IOTA EU-178, until July 29. This includes being active in the RSGB IOTA contest as a Single Op/SSB entry. QSL to home call.

JERSEY, GJ. Members of the Bristol Contest Group will be QRV as GJ6YB in the RSGB IOTA contest as a Multi Op/Island DXpedition/Mixed

Mode entry. QSL via G3SWH.

HONDURAS, HR. Dan, HQ8D, plans to be QRV as HQ3W from Cochinos Island, IOTA NA-160, in the RSGB IOTA contest. QSL via KD4POJ.

JAPAN, JA. Special event station 8N1FUJI will be QRV from July 28 to March 2014 to commemorate Fuji Mountain being recognized by UNESCO as a heritage site. Activity will be on all bands and modes. QSL via bureau.

ALAND ISLANDS, OH0. Jukka, OH6LI and possibly others will be QRV as OH0V in the RSGB IOTA contest as an All Band entry. QSL via OH6V.

MARKET REEF, OJ0. A group of operators are QRV as OJ0R until July 29. This includes being a Multi Op/Island DXpedition entry in the RSGB IOTA contest. QSL via G3TXF.

BRAZIL, PY. A group of operators are QRV as PX8Z from Cotijuba Island, IOTA SA-060, until July 28. Activity is on all bands using CW and SSB. QSL via PY8WW.

GREECE, SV. Norbert, OM6NM will be QRV as SV8/OM6NM from Thassos Island, IOTA EU-174, in the RSGB IOTA contest. QSL to home call.

TURKEY, TA. Operators TA1ED and TA1HZ will be QRV as TC0GI from Gokceada Island, IOTA EU-186, in the RSGB IOTA contest. Activity will be on 80 to 10 meters using generator power. QSL direct via TA1HZ.

EUROPEAN RUSSIA, UA. Special event station R2009IT is QRV until August 31 to commemorate the death of military aerobatics pilot Igor V. Tkachenko who died in a collision in 2009. QSL via RN3DHL.

NAMIBIA, V5. Operators UX0HX, UZ1HZ and UT5UY will be QRV as V5/home calls from August 1 to 8. Activity will be holiday style on 80 to 10 meters using CW and SSB. QSL all calls via UT5UY.

CANADA, VE. Mike, KI1U is QRV as KI1U/VE9 from Grand Manan Island, IOTA NA-014, until July 28. Activity is on the HF bands. He will also be active in the RSGB IOTA contest as a Single Op/Low Power CW entry. QSL to home call.

MEXICO, XE. Andrea, IZ2LSC is QRV as XF3/IZ2LSC from Isla Mujeres, IOTA NA-045, until July 31. Activity is on the HF bands. This includes being an entry in the RSGB IOTA contest. QSL direct via EB7DX.

INDONESIA, YB. Budi, YF1AR is QRV as YF1AR/3 from the Sembilangan Lighthouse, ARLHS IDO-076, on Madura Island, IOTA OC-037, until July 29. Activity is on the HF bands using mainly SSB with some CW and digital modes. QSL via N2OO.

THIS WEEKEND ON THE RADIO. The RSGB IOTA Contest, SKCC CW Sprint, CWops Mini-CWT CW Test, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, US Counties QSO Party, New Jersey QSO Party and the ARS CW Flight of the Bumblebees are all on tap for this upcoming weekend. Please see page 80 in the July 2013 issue of QST and the ARRL and WA7BNM Contest web sites for details.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30726
SIDC SOLAR BULLETIN 26 Jul 2013, 1207UT
SIDC FORECAST (valid from 1230UT, 26 Jul 2013 until 28 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 26 Jul 2013 10CM FLUX: 109 / AP: 017
PREDICTIONS FOR 27 Jul 2013 10CM FLUX: 111 / AP: 005
PREDICTIONS FOR 28 Jul 2013 10CM FLUX: 114 / AP: 003
COMMENT:Catania sunspot group 35 (NOAA AR 1800) kept the beta-gamma configuration
of its photospheric magnetic field and exhibited a slight growth during the
last 24 hours. It produced a C2.1 flare peaking at 22:44 UT yesterday,
which is the strongest flare since the beginning of the week. We expect
more C-class flares from this active region, with M-flares being very
unlikely. Yesterday the Earth entered the interaction region between the
slow and fast solar wind flows (with the fast flow produced by the
equatorial coronal hole currently situated in the western hemisphere). The
interplanetary sector boundary was crossed early yesterday afternoon, and
the interplanetary magnetic field (IMF) magnitude reached 15 nT, with
several intervals of southward IMF. As a result, the K-index reported by
Dourbes, IZMIRAN, and NOAA reached 4 (active geomagnetic conditions). The
peak speed of the fast stream was around 600 km/s (reached this morning).
Currently the Earth is still inside the fast solar wind stream, with the
speed around 550 km/s. As the IMF magnitude already decreased to 5-7 nT, we
expect unsettled to quiet geomagnetic conditions in the coming hours.
Active geomagnetic conditions are nevertheless possible, although not very
likely.

*** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late RSGB IOTA Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the RSGB IOTA Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 20th-July, through Friday, 26th-July there were 211 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS

2U, GUERNSEY (Satellite Op!) Peter, 2E0SQL, is now active as 2U0SQL from Guernsey (IN89RL) until July 30th. Activity will be sporadic on the satellite passes. He will be focusing on FO-29 and SO-50 passes. Peter states, "... no firm pass times, but hopefully will have internet access and will

try posting on Twitter (@2E0SQL) when I'll be on." Due that he is camping, Peter will be battery powered using a FT-817 and a Arrow antenna. QSL via his home callsign, direct or by the Bureau.

5A, LIBYA. Abubaker, DL1AL, is now active as 5A1AL near Tripoli. Activity so far has been on 40/30/20/6 meters CW. He informs OPDX that he will be active on the HF bands and 6 meters using CW and SSB [at the moment for PSK, the modem does not work yet]. QSL via DL1AL.

5Q2, DENMARK. Paolo, I2AE, will be on holiday and a big radio tour as 5Q2AE from Denmark starting July 27th. He plans to activate OZFF, DEN, WCA, IOTA and DIA reference numbers. Paolo suggests to look for him on 14244 and 7144 kHz SSB only, and possibly on 50144 and 18144 kHz. QSL via I2AE, direct or by the Bureau. SWL send him an E-mail. To view his route on a map and other detailed info, see: http://www.qrz.com/db/I2AE

9A, CROATIA (28th EU STAR AWARD). The following is a press release from Mato, 9A3SM: "This award is issued by the Croatian Amateur Radio Association (HRS) to celebrate entry of the Republic of Croatia into the full membership of European Union as 28th member. Award is issued to all licensed amateur radio operators and SWL. Award requirements: 15 different special 9A28* callsigns and 15 countries members of European Union on any band or mode in period from July 1st to December 31st 2013. Log extract with evidence of payment should be sent to the address of HRS. Award fee is 5 ☐ or 8 USDs. Money transfer should be made to HRS bank account:
Zagrebacka banka, d.d. Paromlinska 2, 10 000 Zagreb
SWIFT: ZABAHR2X (CROATIA ☐ 28 EU STAR AWARD)
IBAN : HR4323600001101561569
Address for award application: HRVATSKI RADIOAMATERSKI SAVEZ, Dalmatinska 12, HR-10000 Zagreb, Croatia"

IOTA NEWS.............
JUST A REMINDER THAT THIS WEEKEND IS THE RSGB IOTA CONTEST!!!!!! Complete details and rules are available at:
http://www.rsgbcc.org/hf/iota.shtml
http://www.rsgbcc.org/hf/rules/2013/riota.shtml

AF-083. Feco, HA8KW, will be active as 3V8SM from the club station of the Tunisian Scouts on Jerba Island, Tunisia, between July 26th and August 1st. Activity will be holiday style CW only, but will include the RSGB IOTA Contest (July 27-28th), possibly as a 12-hour CW entry. He will use 100w and wire antennas. Jerba Island is in the Gabes/Medenine Region IOTA Group. QSL 3V8SM for this time frame only via HA8KW (HA Bureau or direct).

AS-006. Farid, VR2UNG, will be active from Hong Kong during the RSGB IOTA Contest (July 27-28th) as a Single-Op/Single-Band (20m)/ Low-Power entry. QSL via VR2FUN direct or LoTW.

EU-020. Anders, SM0THU, will be active as SM0THU/1 from Gotland during the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/

12HRS/QRP entry. QSL via LoTW or by the Bureau.

EU-025. Giuseppe, IT9VDQ, will be active from Sicily Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/Mixed-Mode entry. QSL direct to his home callsign.

EU-025. Mike, IF9ZWA, will be active as IT9/IF9ZWA from Sicily's mainland during the RSGB IOTA Contest (July 27-28th) as a Single-Op/SSB-Mode/All-Band/12HRS entry. QSL via LoTW or direct to his home callsign.

EU-047. German operators have once again activated the special callsign DM50IOTA, but this time from Borkum Island between now and July 28th. Activity will include the RSGB IOTA Contest (July 27-28th). QSL via DL2VFR, by the Bureau or direct. For more details and updates, visit the QRZ.com Web site or: http://www.iota-expedition.com
ADDED NOTES: This is the fourth German Island group activated by DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate all German IOTAs during that time. If you have worked DM50IOTA from all German IOTAs by the end of 2013, you can apply for a special award. The German team plans to activate the following IOTAs later in the year:
EU-057 - Hiddensee Island; September 28th and October 3rd
EU-129 - Usedom Island; October 16-17th

EU-048. Members of the Lanester ARC (F6KPQ) will be active as TM2BI from Belle Île en Mer between now and July 31st. Activity will be on 80-10 meters using CW, SSB and the Digital modes. They will also be in the RSGB IOTA Contest (July 27-28th). Operators mentioned David/F4FDA, Mickael/F4FFZ, Gwena/F4FHZ and Nath, Chris/F5CBQ, François/F5JNE, Phil/F5PHW and Jean-François/F6DZD. QSL via F6KPQ, direct or by the Bureau or LoTW.

EU-054. Antonino, IT9RDG, will be active as IF9/IT9RDG from Favigna Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/SSB-Mode/All-Band/12HRS entry. QSL via LoTW or direct to his home callsign.

EU-054. Sal, IT9BXR, will once again be active as IF9/IT9BXR from Favignana Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/24HRS/Low-Power entry. QSL via IT9BXR.

EU-068. The Gull Team will be active as TM5KD from Sein Island between July 26th (1300z) and July 30th (1100z). Operators mentioned are Bastien/F4EYQ and Jieli, and Jean-François/F4EYR. They will be in the RSGB IOTA Contest (July 27-28th).

EU-073. (Update/Change) Members of the Taranto ARMI section and the 599 DX Team will once again be active as IJ7T from San Pietro Isle (IIA TA-002) between July 26-28th. Activity will be on the HF bands, 6 and 2 meters using CW, SSB and the Digital modes.

They will participate in the RSGB IOTA Contest (July 27-28th).
Operators mentioned are I7LGM, IK7MOF, IK7WDS, IZ7AUH, IZ7FMM,
IZ7LDC, IZ7NLZ and IZ8EGM. QSL via IZ7AUH, direct or by the
Bureau. QSL cards can also be requested via the OQRS on ClubLog.
For more information and updates, visit:
http://www.qrz.com/db/IJ7T
http://www.armi.ta.it
ADDED NOTE: All operators will sign IJ7/IQ7UJ from San Pietro
Isle (DCI-TA038, IIA-J002, MIA-MI094) on July 26th. QSL via
IZ7AUH.

EU-080. Members of the Demons DX'ers [EA1HET] <http://www.demonsdxers.es>
will be active as ED1K from Ons Island during the RSGB IOTA
Contest (July 27-28th) as a Multi-Op entry. Operators mentioned
are Nacho/EA1ND, Juan/EA1NK, Pablo/EA1NL, Enrique/EA1AJV,
Aki/EA1HV, Juan/EB1AIR, Leopoldo/EA1DGL, Pablo/EB1OU and
Nacho/EB1GER. QSL via EA1NK, direct or by the Bureau. QSL
card via direct to: Juan J .Lamas, P.O.Box 531, 15780 Santiago
de Compostela, Spain. Direct QSL requests via E-mail to:
juan@...
Sending SASE and 2 USDs/IRC for postal rates will be appreciated.
Paypal available. All other QSL cards will be sent via the
Bureau unless requested via direct.

EU-096. Tony, OH1TD, will be active from his summer home on Korpo Island
during the RSGB IOTA Contest (July 27-28th) as a Single-Op/
All-Band entry. QSL via OH Bureau or direct to OH1TD.

EU-115. Olivier, ON4EI, will once again be active as EI8GQB and EI1A
between now and July 31st. He plans to operate from his caravan
using green energy. Olivier will activate the EI1A callsign
during the RSGB IOTA Contest July 27-28th. QSL via PA3249,
direct or by the Bureau. For more details, see OPDX.1119 or
visit: http://www.qrz.com/db/EI8GQB

EU-120. Members of the Addiscombe Amateur Radio Club will be active
as G4ALE/P from Isle of Wight during the RSGB IOTA Contest
(July 27-28th). Operators mentioned are Peter/G3SJX, Steve/
G3UFY and Mike/G3VYI. QSL via G4ALE.

EU-123. Tom, GM0FGI, will be active from the Isle of Bute (Scottish
Islands CL2, WW Loc IO75lr, WAB NS15) during the RSGB IOTA
Contest (July 27-28th) as a Single-Op/SSB-Mode/High-Power
entry. QSL via his home callsign, direct, by the Bureau or
LoTW. Visit his Web page at: http://www.kilchattan-bay.co.uk

EU-124. Members of the Luton VHF Group will be active as GW2L from
Holy Island during the RSGB IOTA Contest (July 27-28th).
Operators mentioned are Ian/G1JCC, Don/G4LOO, Terry/G4UEM,
Andy/G8ATD and Bryan/M0BIK. The group will be staying in a
cottage for a week, so they will be on the HF bands after
the IOTA contest. Some of the group are also planning to

activate Holy Island mountain as a SOTA site during the week. QSL via G3SVJ. For more details, see: http://www.g3svj.org.uk

EU-130. In celebration of their 65th anniversary, members of the ARI VERONA DX TEAM will activate the Island of Santa Maria di Barbana (IIA GO -013) during the RSGB IOTA Contest 2013 (July 27-28th). Thanks to the collaboration of Father Gianfranco, J52OFM (one of J52EME-J52HF), they got authorization to operate 48 hours during the IOTA Contest 2013. The callsign to be used is II3VR/IV3. Operators mentioned are Walter/I3VJW, Ampelio/ IK3JBP and Silverio/IK3IUL. Activity will be on all bands, operating both on CW and SSB, in the category: Multi-Single/ All Mode/24 Hours. During the pre-contest and post-contest, operators will be active for a few hours and will be operating on the WARC bands. QSL via IQ3VO, direct or by the Bureau. For more details, see: http://www.ari.verona.it/veronadxteam/ii3vr-iv3.htm

EU-140. Kari, OH5TS, will be active from Kuorsalo Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via OH5TS or LoTW.

EU-140. Members of the OH5AD group and possibly others will be active as OG5A from Suuri-Musta Island during the RSGB IOTA Contest (July 27-28th) as a Multi-Single/DXpedition entry. QSL via OH5AD or OG5A by the Bureau. Operators mentioned are Simo/ OH5GIO, Timo/OH5GJZ and Vili/OH5GEV.

EU-186. Last year, members of the Turkish group called TCSWAT (Special Wireless Activity Team) activated Kefken Island (AS-159) for the IOTA Contest. This year Gokceada Island (EU-186) will be activated for the contest. The team will be consisting of Metin/TA1ED, Tevfik/TA1HZ, Murat/TA1PB, Yasar/TA3D and Ali/ TA7EB. Claimed by 41.4% of participants, Gokceada lies on the northern part of Agean Sea and is a well-known tourist destination <http://www.gokceada.gov.tr/>. Their radios include a Kenwood TS-480, Kenwood TS-570 and Yaesu FT-857D. The antennas they will be using are a Windom 80-10m wire antenna and a 5-element Spiderbeam on top of a Gipiderbeam Al mast. Station will be powered by a generator. The team hopes to arrive on the Island Friday evening and will depart Sunday evening. QSL cards will be printed at the end of December, and will be distributed to QSL Bureaus from Messe in 2014. TCSWAT will QSLs 100%, so please do not hurry.

NA-014. Operators Kevin/VE9MY and Linda/VE9GLF will be active as home-call/p from Deer Island (CISA NB-005) before, during and after the RSGB IOTA Contest (July 27-28th). Both callsigns will be used as a Single-Op/SSB-Mode/Low-Power entries. QSL both call-signs via their home callsigns, LoTW, direct or by the Bureau (preferred - E-mail requests are accepted). Visit: http://qsl.net/ve9my

NA-045. Keith, K5ENS, will be active as XE3/K5ENS from Isla Mujeres (WLOTA 1716, WWFF XEFF-020) during the RSGB IOTA Contest (July 27-28th) as a Single-Op/SSB-Mode/All-Band/Low-Power entry. He is expected to be here until July 31st. QSL via LoTW or direct to his home callsign.

NA-050. Rick, K6VVA, will make his FOURTH attempt to activate Barter Island. He hopes this effort from NA-050 during a predicted propagation period will have OK condx and have at less 2 days of decent operations. Be advised there could be delays reaching NA-050 due to local area "fog". If this re-booked FOURTH attempt at NA-050 is a "GO", Rick will make a Twitter post <http://www.twitter.com/k6vva> from the airport by 0130 UTC on 30 JULY 2013. For more details, see: http://www.k6vva.com/iota/na050

NA-112. Wilson, KS4S, will be active from Sunset Beach Island, NC, during the RSGB IOTA Contest (July 27-28th) as a Single-Op/ CW-Mode/Low-Power entry. QSL via KS4S.

NA-148. Scott, NE1RD, will be active as NE1RD/1 from Georges Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/ SSB-Mode/12HRS/QRP entry. QSL via his home callsign.

OC-021. Pri, YB0ECT, will be active from Java Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/Single-Band (20m)/ CW-Mode/Low-Power entry. QSL via W2FB.

OC-109/ (Update) The DX-World.net is reporting that operators John/ OC-122. YB5NOF, Anton/YB5QZ, Joni/YB9WZJ and YE5WM will activate Natuna Selatan (OC-109) as YE5S and Tambelan (OC-122) as YE5T very soon. The first activity will be from Tambelan after August 8th. Natuna Selatan activity afterwards, all weather dependent. QSL via W2FB.

OC-143. Zen, YB0MZI, will be active as YB0MZI/4 from Sumatra Island during the RSGB IOTA Contest (July 27-28th) as a Single-Op/ Low-Power entry. QSL via LoTW.

SA-018. Javier, CA7CAQ, will be active from Chiloe Island (WW Loc FE36fu) during the RSGB IOTA Contest (July 27-28th) as a Single-Op entry. QSL via CA7CAQ direct.

SA-030. Members of the Radiogrupo Sur will be active as CV5A from Flores Island (WLOTA LH-0528, ARLHS URU-001) between August 15-18th. Their activity will coincide with the International Lighthouse Lightship Weekend (ILLW). Activity will be on all bands and modes. For more details, see: http://cv5a.cx.uy

J7, DOMINICA. Operators Gerry/WA6POZ and Terry/N0TW will be active as J79GF and J79TW, respectively, from the Sea Cliff Cottages on the NE side of Dominica (NA-101) between July 30th and August 7th. Both operators will be taking IC-706's and some wire antennas, for 10, 15, and 20 meters.

They both plan to be active in the 10-10 SUMMER QSO Party on August 3-4th. Gerry informs OPDX, "It is mainly going to be SSB, but I am bringing a key. I don't know much about the accommodations so we plan on just to have some hamming and do a little site seeing. QSL via their home call-signs. Gerry does use LoTW.

NCDXF PRESS RELEASE (NCDXC Donates 8,000 USDs To NCDXF). Glenn Johnson, W0GJ, Vice President of NCDXF, sent out the following on July 23rd [edited]: "At their July 20, 2013 picnic, the Northern California DX Club presented a check for 8,000 USDs to the Northern California DX Foundation. NCDXF President Rusty Epps (W6OAT) stated, 'This donation, the largest ever received from a Club, will help to provide critical funding to DXpedtions high on the Most Wanted List. Often without support such DXpedtions would not be possible. We are very grateful for this donation and value our partnership with NCDXC.' Credit for the success of NCDXF is made possible by our contributors, individuals and clubs, who help make DX happen. Joining or renewing membership has never been easier. Please visit our website at <http://www.ncdxf.org>."
For more details and a photo of the check being presented, go to the NCDXC Web page at: http://www.ncdxc.org

C37UN (QSL by the Bureau or direct): Unio de Radioaficionats Andorrans, P.O. Box 1150, Andorra la Vela 553, Andorra.

QSL RECEIVED VIA LoTW: 1A0C, 4K5D, 4O/YO3JW/P, 4U1ITU, 5T0SP, 5U9AMO, 8P2K, 8P9AA, A45XR, A61DJ, A92IO, AC4LN/6Y5, CN8KD, CW5W, FJ/N5WR, FJ/N5WR, FS/K9EL, II0ESA, J28AA, JW9DFA, JY9ET, KH6FOC, MU0FAL, NP4Z, OX3FV, PJ4/K5KG, PJ4LS, PJ5/K3TRM, TT8TT, VK7CW, XT2TT, XV9DT, YI1RZ and ZM1A

QSLS RECEIVED VIA MAIL: 5W0M, CE2/CX1EK, CY9M, FS/K9EL, H40T, H44G, HC2IWM/8, HT2N, NH8S, T31A and Z81X

QSLS RECEIVED VIA THE BUREAU: C4Z, E21DYP, HS0ZIN, TF4X and VK4KEE

TF, ICELAND (Special Event). Operators Villi/TF3DX and Lenio/PY3DF will activate the special event station TF3ESP from the Harpa Conference Centre in Reykjavik during the 98th Esperanto World Conference until July 27th, and sporadically after that date. Operations include SSB and CW. QSL via TF3DX.

TK13, CORSICA (IOTAs Op!). Laurent, F8BBL, will be active as TK13RNB [Radio Nature Balade] from Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390, DDFM 2A) between July 27th and August 10th, in the Cargese location. Operators Michel (TK/F5OZF) and Solange (TK/F5RXL) will also be with him. There will be daily activity, but holiday style on 80-10 meters using CW, SSB and the Digital modes. He will be running 100 watts using a FT-857 into a M1 vertical antenna. During their stay, they will also activate the following:
* Monday, August 5th: Trip to Sanguinaires Island (EU-104, DIFM TK-002, DDFM 2A, Grid Squ. JN41HV); Callsign TK13RNB/p.
* Thursday, August 8th: SOTA activity from Erbaghiolu (SOTA TK-158); Callsign TK13RNB/p.

QSL via F8BBL <http://rnb.dx-cw.net>, direct or by the REF Bureau (only this Bureau, please) or LoTW. Log search via ClubLog.

TO7, MAYOTTE (Early Announcement). Hartwig, DL7BC, will once again be active as FH/DL7BC from Mayotte (AF-027) between March 21st and April 4th, 2014. Activity will be from Bruno's, DH1BL/FH4VOS, QTH. Operations will be on 20-10 meters (40m possibly) plus participation in CQWW WPX SSB Contest signing TO7BC. He will use 100 watts into a SpiderBeam. QSL via his home callsign, direct or by the Bureau. For more details, visit his Web site at: http://www.qslnet.de/member/dl7bc/en_TO7BC.htm

YOUTUBE VIDEO (The Amsterdam Island Expedition - 2014). Ralph Fedor, K0IR, posted the following video on YouTube this past week, and states, "This video describes the collective expedition adventures of the 14 men who will travel to Amsterdam Island in January of 2014. The team is made up of 14 amateur radio operators from around the world." The video is almost 7 minutes and can be viewed at: http://www.youtube.com/watch?v=0qHkdADyxuA#at=95

ZS8, MARION ISLAND. The "DX-World.net" reports that a new YL operator Nadia, ZS8A, will soon be active. Meanwhile, propagation and busy working schedules have kept David/ZS8Z and Carson/ZS8C operating on limited time.

The following stations are expected to be active in the
RSGB IOTA Contest (July 27-28th, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2013 RSGB IOTA Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/iota2013.html

QST de W1AW
Propagation Forecast Bulletin 30 ARLP030
>From Tad Cook, K7RA
Seattle, WA July 26, 2013
To all radio amateurs

SB PROP ARL ARLP030
ARLP030 Propagation de K7RA

At 2330 UTC on July 24, Australia's IPS Radio and Space services issued a geomagnetic disturbance warning. Increased geomagnetic activity is expected due to a coronal mass ejection. They predict quiet to unsettled conditions on July 25, active to minor storm on July 26, and active conditions on July 27.

As this bulletin nears release early Friday morning, the planetary A index was 4 on four recent readings, followed by 2 on the last one. But the mid-latitude K index was 4 on three recent readings, then 5 on the last two. Geomagnetic activity is increasing, as expected.

Over the past reporting week, compared to the previous period (July 11 to 17) average daily sunspot numbers decreased by less than four points to 73.4, while average daily solar flux declined slightly more than three points to 110.6.

NOAA/USAF predicts Planetary A Index at 18 on July 26, 12 on July 27, 8 on July 28, 5 on July 29 to 31, 8 on August 1, 5 on August 2 to 8, 8 on August 9 to 11, 5 on August 12 and 13, 8 on August 14 and 15, 5 on August 16 and 17, 10 on August 18, 15 on August 19 to 22, and then 8, 5 and 8 on August 23 to 25.

The outlook for solar flux calls for 105 on July 26 and 27, then 110, 115, 120, 125, 130, 135, 130, 125, 120, 125, 120 and 125 on July 28 through August 8, 120 on August 9 to 12, 115 on August 13, 120 on August 14 to 17, 125 on August 18, 120 on August 19 and 20, and 125 on August 21 to 23. The latest projection shows a short term solar flux peak at 135 on September 4 and 5 after a minimum of 100 on August 27 and 28.

OK1MGW from the Czech Propagation Interest Group sees quiet to active geomagnetic conditions on July 26 and 27, quiet to unsettled July 28 and 29, quiet on July 30 and 31, quiet to unsettled August 1, quiet to active August 2, active to disturbed August 3, quiet

August 4, mostly quiet August 5, active to disturbed August 6 and 7, quiet to unsettled August 8 to 11, quiet August 12 and 13, quiet to active August 14 and 15, and quiet to unsettled August 16 and 17.

Juan Carlos, CO8TW lives in Santiago de Cuba, about 600 miles southeast of Havana. He put up a new propagation web site that has many useful features and an interesting mix of information. Check it out at http://www.qsl.net/co8tw/pro.htm.

Another interesting propagation page I ran across recently is at http://qrzcq.com/page/propagation.

G4CJC has a 10 meter report at http://www.southgatearc.org/bands/10metres/.

The NOAA/NWS Space Weather Prediction center has a Facebook page at https://www.facebook.com/pages/NOAA-NWS-Space-Weather-Prediction-Center/232532740131296.

Note the July 16 article about the K index,and a map of North America showing how high the planetary K index has to be in order to see aurora borealis from any location. For my location near Puget Sound, it seems to say a K index at 8 or higher would be good. But for Northern Minnesota and North Dakota a K index of only 4 seems adequate. Of course on Facebook is the always timely and useful page from NW7US titled "Space Weather and Radio Resources at HFRadio.org", at https://www.facebook.com/pages/NOAA-NWS-Space-Weather-Prediction-Center/232532740131296.

David Moore sent an interesting article from The Guardian about the Met Office now offering coverage of space weather. Met originally was short for meteorological but now is the official name for the British weather and climate service. Read it at http://www.guardian.co.uk/news/2013/jul/23/met-office-space-weather-forecasting.

There also is yet another article about the current solar cycle being the weakest in the past 100 years, this time from Sky and Telescope: http://www.skyandtelescope.com/news/The-Weakest-Solar-Cycle-in-100-Years-216752671.html.

Jeff Hartley, N8II of Shepherdstown, West Virginia wrote in response to the comment last week about the lack of 6 meter openings into DM04. Jeff is in FM19, and wrote on July 20, "It has not been a good Es season from here, but we have had several multi-hop openings since July 1 mostly out into Arizona and New Mexico along with one to Oregon, Washington, and VE7. Only once did I catch Europe and it was only to France and Portugal. So, I am not too surprised that many are disappointed with their 6 meter openings this year. Even the 20 meter E-skip is much less frequent than normal this year."

"Today, July 20 there was a Russian sponsored contest and in a few short minutes I heard/worked strong stations from HS, YD, BH8, UN, and UA9 on 15 meter CW around 1245Z. This was the best shape in which I have heard 15 in some time."

On July 19, Jon Pollock, K0ZN of De Soto, Kansas wrote, "Even though sunspot numbers have been modest, I was on last night (July 18) between about 0130-0330 UTC (on 17 meters) and from my QTH in Eastern Kansas I worked several stations in the Central Pacific including E51AND in the Cook Islands and some ZL's, all on CW and with decent (but not strong) signals. Interestingly, on both ends of these QSO's we were running high power into basic unity gain antennas and only netted about S-5 signals, so path loss was moderately high. But, the bottom line is, 18 MHz was open into the Pacific from Kansas well into the late evening. I still find that if 17 meters sounds 'dead' with low noise, it is usually open with very long skip and the main problem is a lack of activity, not a lack of propagation."

Good point, Jon. You can also listen for beacons if you suspect a quiet band is not actually dead (or make some calls.), or get a trial account at QupNow (see http://q-upnow.com/) and click on HF Availability. This relies on up-to-the-minute global measurements of TEC (Total Electron Content in the ionosphere), and allows you to test propagation on any path, but only for the current time. It shows the relative signal strength all long that path, from your QTH to the target location and continuing on out the other side over the great circle route. Note that it also works on 160 meters. You can either enter coordinates for both locations, or it may be more convenient to use the grid square entry method.

Don May, N5DN of Houston, Texas pointed out that on July 25, Spaceweather.com ran an article about the weak solar cycle titled "Underwhelming". "Kinda makes a DXer want to cry.", weeps Don, and we can all certainly empathize. But, there is still room for hope. The article also said, "Solar physicist Dean Pesnell of the Goddard Space Flight Center thinks Solar Cycle 24 is double peaked--and the second peak is yet to come." If you can't find the article and accompanying graphic, go to http://www.spaceweather.com/ and enter July 25 in the Archives drop-downs in the upper right.

Chip Margelli, K7JA of Garden Grove, California (DM03) wrote "Although 6 meters has been terrible this year, I did just work KH6HME (KH7Y operating) on 144.276.5 MHz on SSB and CW. Fred started at 5x1 and came up to about 5x5. Time was 1857 UTC on 25 July. Good to hear Fred activating Paul Lieb's memorial callsign." Chip notes that Fred was running 80 watts and an 8 element Yagi from Mauna Loa. Chip was running 100 watts using a TS-2000 and an 8 element LFA Yagi ten feet above his roof.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good

information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for July 18 through 24 were 112, 94, 57, 49, 53, 84, and 65, with a mean of 73.4. 10.7 cm flux was 114.8, 113.6, 112.5, 109.4, 109.9, 106.7, and 107.6, with a mean of 110.6. Estimated planetary A indices were 15, 14, 6, 5, 6, 5, and 5, with a mean of 8. Estimated mid-latitude A indices were 16, 13, 6, 4, 6, 5, and 6, with a mean of 8.

27 July 2013 A.R.I. DX Bulletin
No 1160
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3V - Feco, HA8KW will be active holiday style as 3V8SM from Djerba Island (AF-083) from 26 July to 1 August, including possibly a 12-hour CW entry in the IOTA Contest. He will operate CW only from the Tunisian Scouts' local club station. QSL for this operation only via HA8KW, direct or bureau. [TNX HA0HW]
5H - Byron, KF8UN will go on safari in Tanzania on 2-20 August and will be QRV as 5H3BB mainly on 20 metres SSB, with maybe some CW and activity on 15 and 40 metres. QSL via home call. [TNX The Daily DX]
9A - Tom 9A2AA, Neno 9A5N and Tibi HA3HP will try to operate from 50-60 different Croatian islands between 3 and 11 August. They plan to be QRV "from early morning to late evening", exact locations will be mentioned during the QSOs. [TNX 9A2AA]
8Q - Herbert, DL7AHF and Michael, DG8MH are active as 8Q7HF and 8Q7MH from the Maldives (AS-013) until 11 August. They do not expect to participate in the IOTA Contest. QSL via home calls, direct and bureau. [TNX DX Newsletter]
CT8 - Nuno, CT1EEK will be active as CR1D from Pico Island (EU-175), Azores from 30 July to 5 August. He will be QRV on 20-10 metres, and maybe 80 and 40m. QSL via CT1EEK. [TNX The Daily DX]
CX - A large group of operators from Radiogrupo Sur will be active on all bands and modes as CV5A from Flores Island (SA-030) and lighthouse on 15-18 August. QSL via CX2ABC. Further information can be found at http://cv5a.cx.uy [TNX rsgbiota.org]
F - Bastien, F4EYQ and Jean-Francois, F4EYR will be active as TM5KD from Sein Island (EU-068) on 26-30 July, including an entry in the IOTA Contest. QSL via F5KKD. [TNX F5NQL]
F - Geoffrey F4FVI, Johan F4GTD, Pierre F4GXS, Maurice F5NQL, Philippe F5TRO and Nicolas F8BDB will be active as TM2NOI from Noirmoutier Island (EU-064) on 9-11 August. They will operate SSB, CW and digital modes. QSL via F4FVI (direct or bureau), eQSL and LoTW. Further information can be found at http://www.qrz.com/db/TM2NOI [TNX F4FVI]
G - The Blandford Garrison Amateur Radio Club will operate special event station GB60KW between 26 July and 4 August to commemorate the 60th anniversary of the cessation of the Korean War. GB60KW will be operating using both CW and SSB on the HF bands (plus FM

on the 70cm band) with both vintage and modern radio equipment. QSl via bureau. Further information can be found on qrz.com. [TNX G0ZEP]
HC - Emanuele, IK2OHG will be active as HC2IOH from Ecuador from 10 August to 12 September. He will operate holiday style on 40-10 metres mainly CW, with some SSB and RTTY. QSL via IK2OHG, direct or bureau, and LoTW.
I - Alberto, IT9MRM will be active from Isola delle Palme (EU-025, S029 for the Italian Islands Award) on 5-9 August. On 11 August look for IT9MRM/p, IT9EJW/p and IW9FRB/p to operate SSB and CW from Isola Forte Vittoria e Garzia (EU-025, IIA S036). QSL via home calls. [TNX IT9MRM]
J7 - Gerald, WA6POZ will be active as J79GF from Dominica (NA-101) from 31 July to 7 August. QSL via home call (direct) and LoTW.
KL - Rick, K6VVA has rebooked his fourth attempt at operating from Barter Island (NA-050) between 31 July and 4 August. "This effort is to hopefully be QRV on NA-050 during a predicted period of OK condx and have at 2 days of decent operations", he says. If this time everything appears to be a 'go', he will make a Twitter post from the airport by 01.30 UTC on 30 July. Look for K6VVA/KL7 to operate mainly CW on 40, 30, 20 and 17 metres. QSL via N6AWD, direct and bureau. Check http://www.k6vva.com/iota/na050/ for further information and warnings, and http://www.twitter.com/k6vva for updates. [TNX K6VVA]
OZ - Chris, DL4FO will be active as OZ/DL4FO from Tuno Island (EU-172) on 4-16 August. He will operate mainly CW on the HF bands and 6 metres. QSL via home call. [TNX rsgbiota.org]
GM - Andy, M1LOL and Ray, M1REK will be active as MM1REK from the Isle of Coll (EU-008) on 4-10 August. They will operate SSB and digital modes on 80-10 metres. QSL via M1REK, direct or bureau. [TNX rsgbiota.org]
HL - Members of the Gwangju DX Club (6L0NJ) will be active as D7G from Jindo Island (AS-060) from about 6 UTC on 16 August until about 2 UTC on the 18th. They will operate CW, SSB, PSK and RTTY on 80-10 metres. QSL via 6L0NJ, direct or bureau. [TNX HL4CCM]
SV - SV8GXQ (SSB) and SV8JTP (PSK) will be active as SX8HOMER from Chios Island (EU-049) starting on 30 July for 15 days. QSL via SV8GXQ, direct only.
TA - Metin TA1ED, Tevfik TA1HZ, Murat TA1PB, Yasar TA3D and Ali TA7EB will participate in the IOTA Contest as TC0GI from Gokceada Island (EU-186). They plan to arrive in the evening of 26 July and depart 48 hours later. The QSL cards will be printed in late December, and all of the QSOs will be confirmed automatically via the bureau; the QSL route for direct cards is via TA1HZ. [TNX TA1HZ]
TK - Laurent, F8BBL will be active as TK13RNB from Corsica from 27 July to 10 August. He will operate holiday style on 80-10 metres mainly CW, with some SSB and digital modes, from Cargese, on the main island (EU-014). Two side trips as TK13RNB/p are planned: on 5 August from the Sangunaires Islands (EU-104, (along with TK/F5OZF and TK/F5RXL), and on 8 August from Erbaghiolu for the Summits On

The Air programme. QSL via F8BBL, direct or bureau, and LoTW. Log search on Club Log. [TNX F5NQL]
UA - RV1AQ/p, RN1AW/p and RA1AKJ/p are active from Peschanyy Island (EU-117) until 28 July, with participation in the IOTA Contest. [TNX RN1AW]
UA - The final plans for the 24-29 July activity from Glov island (EU-162) [425DXN 1159] are for the operators to be signing RA1ZZ/p, RA3AV/1, RK3AW/1, RW3QNZ/1, RZ1ZZ/p and UA1ZZ/p before the IOTA Contest. QSL RA1ZZ/p via RW3XZ, others via home call. They will then participate in the contest as UA1ZZ/p, and use R20RRC/1 (QSL via RZ3EC) after the contest. [TNX qrz.ru]
V5 - Sergey UX0HX, Max UZ1HZ and Alex UT5UY will be active holiday style as V5/home calls from Namibia on 1-8 August. They will operate CW and SSB on 80-10 metres. QSL for all of them via UT5UY, direct or bureau. [TNX UT5UY]
VE - Special event station VC2CGJCS will be activated by the Club Radio Amateur de l'Estrie (VE2RAE) on 2-17 August for the XXIV Canada Games/Jeux du Canada to be held in Sherbrooke, Quebec. [TNX Southgate ARC]
VK - Tony, VK3VTH will again be active as VK3VTH/7 from King Island (OC-233) on 15-18 August. He will operate SSB only on 20 and 40 metres from two different locations, and during the International Lighthouse and Lightship Weekend his QTH will be at the Currie Lighthouse. QSL via VK3VTH, direct or bureau ("all QSOs will be sent appropriate QSL card via the VK3 Bureau immediately after the activation", he says).
W - The Cape Ann Amateur Radio Association will be active as W1T from Thacher Island (NA-148) on 2-5 August. QSL via W1GLO (direct), LoTW and eQSL. [TNX rsgbiota.org]
W - Eric, W4OTN will be QRV holiday style from Hatteras Island (NA-067) on 4-10 August. "I'll try to be available 6m through 40m, phone and CW", he says. QSL via home call, direct or bureau.
YB - YB5NOF, YB5QZ, YB9WZJ, YC5RA, YE5WM and possibly a couple of other operators will be active as YE5T from Tambelan Island (OC-122) and YE5S from Serasan Island (Natuna Selatan Islands, OC-109). Actual dates will be announced in due course, the license is good from 26 August to 26 September. QSL via W2FB. [TNX JN6RZM]
YB - The YB9Y expedition to Pulau Brassi (OC-276, new one for IOTA) [425DXN 1156] is now scheduled to take place on 20-28 October. While Steve W2FB is organizing fundraising from NA/EU (Paypal sbusono[@[gmail.com), Shu JN6RZM (jn6rzm[@]nifty.com) will collect Paypal donations to help providing a linear amplifier from 30 July until 31 August. It is also possibile to donate directly at the expedition's website (http://yb9y.com/).

RSGB IOTA CONTEST ---> The following stations have announced their participation in this year's event (from 12 UTC on 27 July through 12 UTC on the 28th). For lastest additions please give a look at www.rsgbiota.org, and at the announced operation list maintained by Bill NG3K (http://www.ng3k.com/Misc/iota2013.html). Complete details on the IOTA

Contest can be found at www.iotacontest.com.
The IOTA SWL Contest has been picked up by the Radioascolto SWL Club, and
it will run in parallel with the IOTA Contest. Complete details can be found
at http://www.radioascolto.org/swl/ or from the IOTA SWL Contest Manager
(iw1qla[@]tin.it). Good luck to you all!

CROATIA 28TH EU STAR AWARD ---> Issued by the Croatian Amateur Radio Association (HRS), this award celebrates the accession of Croatia to the European Union as the 28th member State. The rules can be downloaded at http://www.hamradio.hr/download/CROATIA_28_EU_STAR_ENG.pdf [TNX 9A3SM]

H44IOTA ---> Reference the notice posted on the IOTA website on 25 June [425DXN 1156], "we have noted the subsequent posting on the H44IOTA qrz.com website to the effect that a validation of OC-168 'may not be possible due to computer hardware failure and human error'. This is indeed the case as we understand that with the non-availability of the logs for the land-based part of this operation, QSOs cannot of course be confirmed for IOTA. Should the missing logs become available, we will reconsider the position. In the meantime we can confirm that we have accepted documentation showing land-based operations from OC-149, OC-047 and OC-158 and credits will be given for valid cards submitted. As a reminder, operations by yachtsmen with on-board amateur radio stations present IOTA Management with particular challenges with regard to rule compliance and they are routinely

asked to provide validation in accordance with the detailed requirements outlined in Section F of the IOTA Directory Rules. In the case of the recent H44IND operation and forthcoming H40IOTA ones it is suggested that until acceptable validation is reported as having been received, the sending of QSLs be delayed". [TNX rsgbiota.org]

ILLW ---> The 16th annual International Lighthouse/Lightship Weekend, conducted under the sponsorship of the Ayr Amateur Radio Group, will take place from 00.01 UTC on 17 August until 23.59 UTC on the 18th. Complete information on this popular event, including a list of participating stations, can be found at http://illw.net/

P5 PROJECT ---> "We have added two new video slide shows from our recent visit to the Democratic People's Republic of Korea. The first video shows the children of the DPRK. The second video slide show shows many aspects of our travels throughout the DPRK. You can find the videos by going to www.intrepid-dx.com and select videos from the main menu". [TNX N6PSE]

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30727
SIDC SOLAR BULLETIN 27 Jul 2013, 1307UT
SIDC FORECAST (valid from 1230UT, 27 Jul 2013 until 29 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 27 Jul 2013 10CM FLUX: 112 / AP: 013
PREDICTIONS FOR 28 Jul 2013 10CM FLUX: 114 / AP: 003
PREDICTIONS FOR 29 Jul 2013 10CM FLUX: 115 / AP: 004
COMMENT:Catania sunspot group 35 (NOAA AR 1800) keeps the beta-gamma configuration
of its photospheric magnetic field. It produced several weak C-class flares
in the last 12 hours. We expect more C-class flares from this active
region, with M-class flares possible but very unlikely. A partial halo CME
(angular width around 135 degrees, principal angle 215 degrees) was
detected by SOHO/LASCO yesterday first appearing in the LASCO C2 field of
view at 18:36 UT. It was accompanied by the C1.5 flare peaking at 19:28 UT
situated just behind the south-west limb (a post-eruption arcade was
detected by SDO/AIA). The CME speed was around 500 km/s according to the
CACTus software. Due to the CME source region position behind the limb, we
do not expect the CME-associated interplanetary disturbance to arrive at
the Earth. SDO/AIA observed a filament eruption accompanied by coronal
dimmings and a post-eruption arcade in a bipolar magnetic region situated
between Catania sunspot groups 35 and 44 (NOAA ARs 1800 and 1805). It was
associated with the C1.8 flare peaking at 21:49 UT yesterday. There is no
indication in the SOHO/LASCO and STEREO/COR data that this eruption was
accompanied by a CME. The Earth is currently inside the trailing part of
the fast solar wind stream. The wind speed is around 440 km/s and the
interplanetary magnetic field magnitude is around 5-6 nT. Although Dourbes
reported an interval of active geomagnetic conditions earlier today (K = 4
between 6 and 9 UT) in response to the passage of the fast flow, we expect
quiet to unsettled geomagnetic conditions in the coming hours.
TODAY'S ESTIMATED ISN : 049, BASED ON 07 STATIONS.

SOLAR INDICES FOR 26 Jul 2013
WOLF NUMBER CATANIA : 097
10CM SOLAR FLUX : 110
AK CHAMBON LA FORET : 017
AK WINGST : 012
ESTIMATED AP : 014
```

ESTIMATED ISN : 052, BASED ON 15 STATIONS.

21430. new one?

Yahoo group: DX-IS (2013)
Date: 2013-07-27 23:51:45 UTC
From: Derek Wills
Topic: 21430 Message: 21430

>>The British government is examining plans to designate the Scottish military
>>base that houses the Trident nuclear deterrent as sovereign United Kingdom
>>territory if the people of Scotland vote for independence in next year's
>>referendum.

Full article:

http://www.guardian.co.uk/uk-news/2013/jul/10/mod-trident-scotland-independence

The idea is that this would have the same status as the British Sovereign
Base Areas in Cyprus (ZC4).

Might be hard to get operating permission though...

Would ZC4 still be counted as a separate entity under the current rules?

Derek aa5bt

21432. Ohio/Penn DX Special Bulletin #1121.1

Yahoo group: DX-IS (2013)
Date: 2013-07-28 09:40:32 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 21432 Message: 21432

```
SB DX @ WW < KB8NW $OPDX.1121.1
Ohio/Penn DX Special Bulletin No. 1121.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1121.1
BID: $OPDX.1121.1
July 28, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network, K0IR, OH2BN and W6SZN for the following DX information.
```

FT5ZM ☐ AMSTERDAM ISLAND DXPEDITION (Press Release ☐ July 27, 2013):
"Since our last Press Release in early May, the Amsterdam Island
DXpedition team has made significant progress.
We have begun receiving supplies and equipment at our Atlanta staging
area. Thanks to N4GRN for arranging secure storage. DX Engineering was
the first to deliver a large shipment. They have been terrific to work
with. Our 10 mono-band, 3 element beams from Cycle 24 and Force 12 are
expected to arrive in the next few weeks. The 30 foot towers for our
beams are being acquired by our friends in VK6.
W6IZT, N4GRN, K9CT, and VA7DX have completed the networking framework
for the two station sites. They have obtained the computers and network
equipment, completed a terrain analysis, and they have equipment in the
'burn in' stage.
WB9Z and his crew have prepared over 10,000 feet of radials for the
Amsterdam low band antennas. Thanks go to NV9L, K9NU, N9TK, K9TP, N9LAH,
W9ILY, K9CJ, and 'Lee.'
Our plans for several low band receiving systems are also complete.
We will be hearing and being heard very well from FT5ZM on the low bands
Our 'on island' procedures are progressing well. We☐ve satisfied the
sanitation and waste management plan required of us. We have the floor
plans and dimensions of our two operating sites so we can pre-plan our
power distribution wiring and equipment placement. We will be expected
to help with some routine base chores like helping to clean the dining
room, setting the tables, etc. So we will also have a 'KP' roster, as
well as our radio operating roster. Our team will become a real part
of the small community on Amsterdam Island.
Arnie N6HC, our team doctor and our friends W0GJ and K9SG are finalizing
our medical and emergency kits. Outdated drugs are being replaced, etc.
Our Pilot team to date is:
NV9L, Val : North American pilot and chief pilot
MM0NDX, Col: European pilot

KH6CG, Stu : Oceania pilot

Our Chief Financial Officer and fundraiser K4UEE along with his able assistants: LA6VM and JA1ELY have been working hard to make sure DXers worldwide know about this upcoming DXpedition to the number 4 'most needed' DXCC entity and they are given an opportunity to help with our considerable expenses. At this time we are about 2/3 of the way to our goal. Taking into account what we expect from direct QSL requests and OQRS, we are about $75,000 short. This is of some concern.

For more information on our DXpedition budget, please see:
http://www.amsterdamdx.org/why-does-this-dxpedition-cost-so-much/

Thanks for your interest and support of this exciting project.
Our website is <www.amsterdamdx.org>"

OH0B - ALAND ISLANDS IN THE IOTA CONTEST FROM EU-002 (Press Release from OH2BN). "Three seasoned warhorses - OH2BH, OH2MM and OH2PM - are now getting their feet wet, joining forces under the youthful and advanced technology guidance of Kim, OH6KZP to operate in two pairs as part of their first serious IOTA effort. The Finns will also challenge the Swedes who are currently deployed on the far western front at Market Reef (OJ0). Follow the battle and get involved...even if the bright red Aurora is looming over the Northern IOTA counters.
<http://www.swpc.noaa.gov/pmap/gif/pmapN.gif>
QSL via OH2BH."

YASME PRESS RELEASE (YASME SUPPORTS DEVELOPER OF VIEWPROP). Dated July 26th: "The Board of Directors of The Yasme Foundation is pleased to announce that it has made a grant to support further development of ViewProp <zl2ham.wikispaces.com>, a new utility for propagation visualization developed by Rick Kiessig, ZL2HAM. ViewProp integrates information from the Reverse Beacon Network and worldwide spotting networks with station location information from QRZ.com and mapping through DXAtlas. The result is a real-time, worldwide view of amateur radio signals and operation. ViewProp also supports a "playback" function to review historical data and provides the user with a number of options to configure both the input data stream and the way in which the information is displayed. Currently in beta testing by a global user's group <groups.yahoo.com/group/viewprop>, the Yasme grant will enable ZL2HAM to complete development with appropriate networked software tools and release it for public use. The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing (long distance communication) and the introduction and promotion of Amateur Radio in developing countries. For additional information about The Yasme Foundation, visit our website at <www.yasme.org>.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30728
SIDC SOLAR BULLETIN 28 Jul 2013, 1307UT
SIDC FORECAST (valid from 1230UT, 28 Jul 2013 until 30 Jul 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 28 Jul 2013 10CM FLUX: 106 / AP: 010
PREDICTIONS FOR 29 Jul 2013 10CM FLUX: 104 / AP: 004
PREDICTIONS FOR 30 Jul 2013 10CM FLUX: 105 / AP: 004
COMMENT:Several weak C-class flares were detected during the last 24 hours in
Catania sunspot groups 33 (NOAA AR 1793, currently behind the north-west
limb) and 35 (NOAA AR 1800). We expect flaring activity to continue at the
C-level (with an M-class flare unlikely), especially in the Catania sunspot
group 35 (NOAA AR 1800) that keeps the beta-gamma configuration of its
photospheric magnetic field. The Earth is currently inside a slow (around
440 km/s) solar wind flow with slightly elevated (around 6 nT)
interplanetary magnetic field magnitude. We expect quiet to unsettled
geomagnetic conditions.
TODAY'S ESTIMATED ISN : 048, BASED ON 09 STATIONS.

PREDICTIONS FOR 31 Jul 2013 10CM FLUX: 107 / AP: 004
COMMENT:X-ray background is in the B-level. A new sunspot group emerged in the
northern hemisphere, left to NOAA AR 1801. This new appearance might
trigger C-flare activity. The solar wind speed is around 400 km/s. Bz is
around -2/3 nT. The geomagnetic index K measured in Dourbes, Belgium
reached values up to 4 this morning. We expect although quiet to unsettled
conditions for the coming 48 hours.
TODAY'S ESTIMATED ISN : 066, BASED ON 15 STATIONS.

PREDICTIONS FOR 01 Aug 2013 10CM FLUX: 113 / AP: 011
COMMENT:NOAA AR 1800 turns over the west limb, out of view. The region produced 2
C-class flares yesterday, July 29. NOAA AR 1801 (Catania 38) flared once in
the C-level today, July 30. C-flares are possible the coming day, but in
general the X-ray flaring activity is limited. The geomagnetic conditions
are quiet at the moment: speed 400 km/s, interplanetary magnetic field of
5nT. The Bz component is negative at the moment. If this stays so for a
longer time, unsettled geomagnetic conditions can occur. From July 2, Earth
can be situated in the fast solar wind stream emanating from the norther
coronal hole which passed today the central meridian.

PREDICTIONS FOR 02 Aug 2013 10CM FLUX: 116 / AP: 013
COMMENT:NOAA AR 1801 (Catania 38) produced a C-flare yesterday, July 30. A new
region turned over the east limb: NOAA AR 1809 (Catania 55). It was the
source of a B and C-flares yesterday and today. We expect more C-flares
from this region. The geomagnetic conditions are quiet. From August 2,
Earth might come under the influence of a fast solar wind emanating from
the coronal hole in the northern hemisphere. Unsettled conditions are
possible.

ZCZC AE31
QST de W1AW
DX Bulletin 31 ARLD031
>From ARRL Headquarters
Newington CT August 1, 2013
To all radio amateurs

SB DX ARL ARLD031
ARLD031 DX news

This week's bulletin was made possible with information provided by NC1L, the Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

LIBYA, 5A. Abubaker, DL1AL is now QRV as 5A1AL from Tripoli. He is active on the HF bands plus 6 meters using CW, SSB and PSK. QSL to home call.

GHANA, 9G. Jeff, W7JVN is QRV as 9G5AC while he and Beverly, WB7NLY are here on missionary work. Activity is mainly on 20 and 15 meters using SSB. QSL via K7JH.

MOZAMBIQUE, C9. John, ZS5J is QRV as C91J until August 3. Activity is on 40, 20 and 15 meters. QSL via operator's instructions.

REUNION ISLAND, FR. A large group of operators will be QRV as TO1PS from the volcano and UNESCO World Heritage site Piton de la Fournaise on August 3 and 4. Activity will be on all bands and modes. QSL via FR1GZ.

JERSEY, GJ. Operators ON8ZZ, ON8ZL and ON5NQ are QRV as MJ/OT9Z until August 9. Activity is on the HF bands using CW, SSB, RTTY and PSK with two stations. QSL via ON8ZL.

SARDINIA, IS0. Massimo, I0PNM is QRV as IM0/I0PNM from San Pietro Island, IOTA EU-165, until August 20. Activity is on 20 to 10 meters using SSB, RTTY and PSK31. QSL direct to home call.

DOMINICA, J7. Gerry, WA6POZ is QRV as J79GF until August 7 from the Northeast coast. Activity is on 20, 15 and 10 meters. This includes a possible entry in the 10-10 International Summer SSB contest. QSL to home call.

BULGARIA, LZ. Members of the Radio Club Blagovestnik are QRV using special event call sign LZ1105PIO during August to commemorate Saint Ioakim Osogovski. Activity is on all bands. QSL via LZ1KCP.

LEBANON, OD. Special event station OD5ARMY is QRV for three days in recognition of the Lebanese Army. QSL via operators' instructions.

FAROE ISLANDS, OY. Ulf, DL3UB is QRV as OY/DL3UB until August 9. Activity is holiday style on 30, 17 and 12 meters using CW. QSL to home call.

GREECE, SV. Operators SV8GXQ and SV8JTP are QRV as SX8HOMER from Chios Island, IOTA EU-049, until August 13. Activity is on the HF bands using SSB and PSK. QSL direct to SV8GXQ.

EUROPEAN RUSSIA, UA. Special event station R863LC is QRV until October to celebrate the 1150th anniversary of Smolensk. QSL via R3LC.

NAMIBIA, V5. Sergey, UX0HX, Max, UZ1HZ and Alex, UT5UY are QRV as V5/home calls until August 8. Activity is holiday style on 80 to 10 meters using CW and SSB. QSL all calls via UT5UY.

CANADA, VE. Members of the Radio Amateur Club of l'Estrie are QRV as VC2CGJCS until August 17 for the XXIV Canada Games in Sherbrooke. QSL via VE2RAE.

VENEZUELA, YV. Members of the Caracas DX Group are QRV as YW5X from Orchila Island, IOTA SA-054, until August 31. QSL via DM4TI.

PRINCE EDWARD AND MARION ISLANDS, ZS8. Nadia, ZS8A plans to soon be QRV from Marion Island. In addition, Carson, ZS8C and David, ZS8Z are active as time permits. QSL via operators' instructions.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Sri Lanka, 4S7NZG, 2013 operation; Somalia, 6O0LA, 2013 operation; Spratly Islands, 9M4SLL, 2012 and 2013 operations; Democratic People's Republic of the Congo, 9Q6CC, 2010 and 2011 operation; Rwanda, 9X0EME, 2013 operation; Afghanistan, T6JM, 2012 operation; Laos, XW0YJY, 2013 operation; Laos, XW4XR, current operation; and South Sudan, Z80ID, Special 1-Day operation for Independence day celebration on July 9, 2013.

If you've had any of these rejected in a prior application, send a note to bmoore@... to be placed on the list for an update to your record.

THIS WEEKEND ON THE RADIO. The ARRL August UHF Contest, North American CW QSO Party, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint CW Ladder, TARA Grid Dip Shindig, 10-10 International Summer SSB Contest, European HF Championship, The RSGB RoPoCo CW and the SARL HF Phone Contest are all scheduled for this upcoming weekend. The ARS Spartan CW Sprint is scheduled for August 6. Please see August QST, page 73, and the ARRL and WA7BNM Contest web sites for

details.

03 August 2013 A.R.I. DX Bulletin
No 1161
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3DA - The website for the 18-27 November 3DA0ET DXpedition to Swaziland
[425DXN 1159] is now up and runnig at www.swazidx.org. A survey
(link on the homepage at the top on the right) is being run asking
DXers some questions about where they need 3DA0ET the most. The
organizers are looking for more team members, and "would like to
have some great RTTY operators along". If interested please
contact Roger ZS6RJ (roger.jones[@]vodamail.com) or Frosty
(3da0cf[@]gmail.com).
4O - Look for 4O/YT4RA and 4O/YT7AW to be active from Montenegro on
6-15 August. Focusing on 30, 17 and 12 metres and digital modes,
they will operate from the Durmitor National Park, "followed by
seaside activity, with possible stopover on IOTA group EU-163".
QSL via home calls. [TNX DX World]
4O - Jacek, SP5OXJ will be active holiday style as 4O/SP5OXJ from
Budva, Montenegro on 13-20 August. He will be QRV on 40-20 metres
CW and digital modes. QSL via home call, direct or bureau, and
LoTW. [TNX SP5OXJ]
9M2 - A team of ten operators from the Melaka DX Club will be active as
9M2MI from Undan Island (AS-097) and lighthouse on 16-18 August.
They will be QRV on 40, 20, 17, 15, 12 and 10 metres SSB and CW.
QSL via 9M2YOT (direct only).
9M2 - Once again Rich, PA0RRS will be active as 9M2MRS from Penang
Island (AS-015) from 31 December until 23 February 2014. He will
operate CW, RTTY and PSK on 40-10 metres. QSL via home call,
direct or bureau, as well as LoTW and eQSL. [TNX PA0RRS]
9M6 - Dave, G4BUO will be active as 9M6/G4BUO from Gaya Island (OC-133)
on 4-6 August. He will operate CW only, "fitting in with holiday
arrangements". QSL via home call. [TNX rsgbiota.org]
CN - The Council of Europe Radio Amateur Club (CERAC) in partnership
with the Association Royale des Radio-Amateurs du Maroc (ARRAM)
will be active as 5C0CE on 19-21 August. QSL via F5LGF, logsearch
on www.tp2ce.eu [TNX F6FQK]
DL - Ben, DL7BY will be active holiday style as SM6/DL7BY/p from Orust
Island (EU-043) on 4-16 August. QSL via home call, direct or
bureau. [TNX DX Newsletter]
E5_sc - Fabio, IZ0YIV will be active holiday style as E51YIV from the

South Cook Islands in October. He will operate SSB and digital modes mainly on 20, 17 and 15 metres from Rarotonga (OC-013, 9-13 October) and Aitutaki (OC-083, 13-17 October). QSL via home call, direct or bureau, LoTW and eQSL. [TNX IZ0YIV]
F - Celebrating the 20th anniversary of the twinning between the Radio Club de Neuville et du Haut Poitou (F5KFL) and the Amateur Radio Club of Ronse/Renaix (ON4RSX), special event station TM20RSX will be active on 10-17 August on all bands and modes. QSL via F5KFL and eQSL. [TNX VA3RJ]
GM - GM8SRS/p is the callsign to be used from the Isle of Coll, (EU-008) on 4-10 August [425DXN 1160]. Mike 2E0MPC, Andy M1LOL and Ray M1REK will be active on 80-10 metres CW, SSB and digital modes. QSL via M1REK, direct or bureau. [TNX rsgbiota.org]
JD1_mt - Once again Take, JG8NQJ is active in his spare time as JG8NQJ/JD1 from Minami Torishima (OC-073) until mid-September. He operates CW mainly on 17 metres, with some activity on 15, 12 and 10 metres. QSL via JA8CJY (direct) or JG8NQJ (bureau).
ON - Kurt, ON4CB and others will be active on 80-10 metres as OR9W/p from lighthisp "West-Hinder I" on 17-18 August for the International Lighthouse Lightship Weekend. QSL via ON4CB. [TNX ON4CB]
OX - Bo, OZ1DJJ will be active again as OX3LX from Greenland in August. According to the tentative schedule published on on his website (http://geronne.dk/index.php/ox3lx/ox3lx-dxped), he plans to be QRV from Kangerlussuaq (NA-018) on 4-5 August (HF bands and 6 metres) and from Aasiaat Island (NA-134) on 5-9 August (HF bands and maybe some 6m), while from around the 15th until the 23rd he plans to plans to operate from either NA-018 (main island) and/or NA-243, with a focus on 2m EME and MS. QSL via OZ1PIF.
OX - A group of YL operators (HL1KDW, JR3MVF, LA6RHA, SM6KAT and WA0WOF) will be active as OX5YL from Kangerlussuaq (NA-018), Greenland on 16-20 August. QSL via PA5YL, direct or bureau. Please visit http://home.online.no/~la6rha/greenland2013.htm for further information.
OZ - Dieter, DF2SD will be active holiday style as OZ/DF2SD from the island of Fano (EU-125) on 17-30 August. He will operate RTTY on 30, 17 and 12 metres only (possibly with some SSB). QSL via home call, direct or bureau, LoTW and eQSL. [TNX rsgbiota.org]
P2 - JA1NLX, Akira, will be active as P29VNX from Lissenung Island, Bismarck Archipelago (OC-008) on 8-13 September. He will operate CW, RTTY and PSK31 on 30-10 metres. QSL via JA1NLX (direct only) and LoTW. An OQRS for direct and bureau cards will be available at Club Log (bureau cards will be sent through Global QSL). He has a webpage on www.asahi-net.or.jp/~yy7a-ysd/P29VNX-2013.htm
SM - Ric, DL2VFR will operate CW with some SSB as SD7V from Oland Island (EU-037) on 10-23 August. Some activity during the International Lighthouse Lightship Weekend is possible, most likely from Tokenas Udde. QSL via DL2VFR, direct or bureau, plus LoTW and eQSL. [TNX DL2VFR]
UA - Special event station UE80RWW will be active until 15 September to

commemorate the 80th anniversary of the beginning of broadcasting
in Volgograd (formerly Stalingrad). QSL via R4AAS. Logsearch and
further information can be found at http://ue80rww.cqvlz.ru/en/
UA - Valery RG8K, Victor RW0BG and Igor UA9KDF will be active from
Zhuravlinyy Island (AS-109) on 5-11 August, using two callsigns:
RT9K/p (5-8 August, QSL via RX9KM) and R20RRC/8 (9-11 August, QSL
via RZ3EC). They plan to be QRV on 80-10 metres CW, SSB and
digital modes. Follow them on www.aprs.fi (search for ua9kdf-2
while moving and rt9k-14 while on the island). [TNX DX World]
W - Members of the Old Barney ARC (www.obarc.org) will be operating as
N2OB from "Old Barney", the Barnegat Lighthouse on Long Beach
Island (NA-111) on 3 August from about 13 UTC to 21 UTC. Expect
main activity on 20 and 40 metres SSB, QSL via N2OB. [TNX The
Daily DX]

Direttore Responsabile I2VGW

AMSTERDAM 2014 ---> Since their last Press Release in early May, the FT5ZM
DXpedition team has made significant progress. They have begun receiving
supplies and equipment at their Atlanta staging area, the networking
framework for the two station sites has been completed, as well as the
plans for several low band receiving systems ("we will be hearing and being
heard very well from FT5ZM on the low bands"), and the "on island"
procedures are progressing well. As for fundraising, "at this time we are
about 2/3 of the way to our goal. Taking into account what we expect from
direct QSL requests and OQRS, we are about $75,000 short. This is of some
concern". More information on the DXpedition budget can be found at
http://www.amsterdamdx.org/why-does-this-dxpedition-cost-so-much/ [TNX K0IR]

CO2WF & T40C ---> "I have relinquished my position as QSL manager for CO2WF
and T40C", Phil N1KI says. "Please send QSLs via operator's instructions".

DXCC NEWS ---> The following operations have been approved for DXCC credit:
4S7NZG Sri Lanka (renewal, 2013 operation)
6O0LA Somalia (2013 operation)
9M4SLL Spratly Islands (2012 and 2013 operations)
9Q6CC Democratic People's Republic of the Congo (2010-11 operation)
9X0EME Rwanda (2013 operation)
T6JM Afghanistan (2012 operation)
XW0YJY Laos (2013 operation)
XW4XR Laos (current operation)
Z80ID South Sudan (special operation for Independence day celebration, 9
July 2013)
If you have had any of these rejected in a prior application, send a note
to bmoore[@]arrl.org to be placed on the list for an update to your record.
Also, please note the submission date and/or reference number where the

rejection was noted to expedite the search for any rejected QSOs. [TNX NC1L]

FOCUS75 ---> During the month of May 2013 the First Class CW Operators' Club hosted a CW QSO Party, FOC75, to help celebrate the Club's 75th Anniversary. Over 60 stations around the world signed with the *FOC prefix, making over 200,000 CW QSOs and leading to over 1,600 applications for the commemorative certificate. FOC publishes a quarterly magazine for its members called "FOCUS", edited by Gabor, S57WJ. But this FOC75 event met with such huge success that we have decided to publish an extra edition, called "FOCUS75", which is available to all: just go to www.g4foc.org to download it. You can also download a poster with pictures of some of the operators who used the special *FOC calls. [TNX G3SXW]

IOTA NEWS ---> The following operations in the period June/July 2013 have provided acceptable validation and are therefore approved for IOTA credit: FO/UT6UD (OC-027 & OC-050), H44IND (OC-158), HQ8D (NA-223), HQ8S (NA-035), K6VVA/KL7 (NA-152), T46C (NA-204), YB3MM/7 (OC-166) and YP13S (EU-183). [TNX G3KMA]

OO AWARD ---> The Belgian Amateur Radio Society (UBA) sponsors a commemorative award for contacts made with ON stations using special prefix OO from 21 July to 20 September 2013 [425DXN 1159]. Only OO callsigns with 2 or 3 letters in their suffix count towards this award. Belgian amateurs/SWLs need 25 different stations with at least 5 different OO prefixes, amateurs/SWLs in the rest of Europe need 15 different stations with at least 3 different OO prefixes, amateurs/SWLs in the rest of the world need 7 different stations with at least 2 different OO prefixes. The award will be issued in electronic (PDF) format and it will be free of charge. Log extracts should be mailed before the end of 2013 to the UBA Award Manager, Egbert Hertsen ON4CAS (Egbert.hertsen[@]telenet.be). [TNX ON4CAS]

SLOVAK QSL BUREAU ---> Effective 1 August, the Slovak Amateur Radio Association's QSL Bureau has a new postal address: Slovensky Zvaz Radioamaterov (SZR), P.O.Box 14, 900 31 Stupava, Slovakia. However, those who use courier services must not use the POB, but send the cards direct to the QSL Bureau Manager (OM3JW): Stefan Horecky, Mlynska 2, 900 31 Stupava, Slovakia. [TNX OM3JW]

THE END OF AN ERA ---> "The Voodoo Contest Group has taken part in CQ World-Wide CW Contest from West Africa each November for the past 19 years, operating in ten different countries. We have won the Multi-Operator contest six times. Thirty different operators have participated over the years, travelling from UK and USA.
In 2004 we published a book: 'Contesting in Africa: Multi-Multi on the Equator' describing the first ten years. It is now time to update the story. The timing of this is important because we have now come to the End of an Era, so to speak: we will no longer return to West Africa to take our large stock-pile of equipment out of storage for the 20th time. It has been donated to the Liberian Amateur Radio Association.
The modern form of 'book' is a web-site - so we have developed one. The

group offers a huge vote of thanks to John Warburton G4IRN for investing so much skill, time and energy into this project. The site comprises offerings from many of the Contest group and tells, hopefully in detail but also in an entertaining way, the story of these past 19 years.
Visit http://voodoocontestgroup.com to join us on those amazing journeys, laugh with us, take part in our celebration of two decades, almost two sunspot cycles, of Contest Dxpeditioning". [TNX G3SXW]

YASME SUPPORTS DEVELOPER OF VIEWPROP ---> The Board of Directors of The Yasme Foundation (www.yasme.org) is pleased to announce that it has made a grant to support further development of ViewProp, a new utility for propagation visualization developed by Rick Kiessig, ZL2HAM.
ViewProp (http://zl2ham.wikispaces.com/) integrates information from the Reverse Beacon Network and worldwide spotting networks with station location information from QRZ.com and mapping through DXAtlas. The result is a real-time, worldwide view of amateur radio signals and operation. [TNX W6SZN]

+ SILENT KEYS + "The Voice of Pitcairn" that over the years gave many DXers their first QSO with this DXCC Entity is no longer with us. Tom Christian, VP6TC/VR6TC, MBE passed away on 7 July at 78 years of age. First licensed in 1957, he was the President of the Pitcairn Island Amateur Radio Association when Ducie Island became eligible for DXCC credit (November 2001) as a result of a favourable vote to accept PIARA as an International Amateur Radio Union member-society. He also served for forty years on the Pitcairn Island Council as the Governor's Representative.

QSLs received direct or through managers: 3D2RX, 4L1MA, 4O3A, 5B4AFM/p (AS-120), 5B4AHL, 5N7M, 5R8IC, 5T0SP, 5W0M, 6Y6T, 7T5OI/p, 7T9A, 7X5KBS, 8Q7KP, 9L1BTB, 9M2CNC, 9M4SLL, 9N7JO, 9Q6CC, 9U4U, A3EAQ, A41OO, A61Q, A73A, AH7G, BV1EK, C31CT, C4W, CE2/CX1EK, CR3L, CR5FC, CY9M, DU6/OE9MON, E21EJC, E21YDP, E51EWP, E51M, EA6SX, EE8X, EF8M, EP3SMH, ER1LW, ES1TU, ET3AA, EX2F, EY8MM, FJ/K5WE, FJ/N5WR, FR1LB, FS/K9EL, GD6IA, GH3IT, GS3PYE/P (EU-008), H40T, H44G, H44IOTA (OC-047), H44IOTA (OC-149), H44S (OC-285), HC2/RC5A, HC2IWM/8, HK1R, HS0ZEE, HT2N, IA5A (EU-028), J35X, J39BS, J49C, J69DS, J69MV, J75PX, KH2/N2NL, KH6MB, LY5A, NH8S, NP4Z, OA6TT, OH0B, OH0BCI, OH0R, OH1VR/VP9, P43A, PJ5/K3TRM, PT0S, PY0F/PP1CZ, R10RLHA (AS-149), RI1ANU, SU1IE, SU8N, SU9AF, SV2ASP/A, SV5BYR, T31A, T5TC, T6MO, TA3TTT, TF3ML, TG9AHM, TS8TI, TX5K, UK8OM, UK8OWW, V63YAH, V73TS, V85XD, VK9NT, VP2ME, VU2BGS, VU2PHD, VU7KV, XV3RZ, XW0ZJZ, XW3DT, YB3MM/7 (OC-237), YB8P (OC-208), YS1/NO7B, Z81X, ZA/UA4WHX, ZB2FK, ZD7DL.

ARLP031 Propagation de K7RA

ZCZC AP31
QST de W1AW
Propagation Forecast Bulletin 31 ARLP031
>From Tad Cook, K7RA
Seattle, WA August 2, 2013
To all radio amateurs

SB PROP ARL ARLP031
ARLP031 Propagation de K7RA

The weekly averages of daily sunspot numbers and solar flux barely changed at all compared to the previous week. Average daily sunspot numbers went from 73.4 to 79.6, while average daily solar flux decreased from 110.6 to 109.7.

The weak peak of this solar cycle continues. We are moving toward the fall season, which is always seasonally better than summer for HF propagation. Let's hope for a rise in solar activity to complement the seasonal change.

The latest prediction from NOAA/USAF for the near term has solar flux at 115 on August 2-3, 110 on August 4-6, then 115, 120 and 115 on August 7-9, 105 on August 10-12, 100 on August 13, 105 on August 14-18, 100 on August 19-24, and 125 on August 25. Flux values hit a minimum around 100 on September 3-4, and rise to a peak of 135 on September 11-12.

Expected planetary A index is 8, 12 and 8 on August 2-4, 5 on August 5-8, 8 on August 9-10, 5 on August 11-20, then 10, 15 and 10 on August 21-23, 5 on August 24-26, 10 on August 27, 15 on August 28-31, 8 on September 1, and 5 after September 1.

Petr Kolman, OK1MGW presents a weekly geomagnetic prediction from the Czech Propagation Interest Group. He predicts active to disturbed conditions for today, August 2, quiet to active August 3, quiet to unsettled August 4, mostly quiet August 5, quiet to unsettled August 6-7, mostly quiet August 8-11, quiet August 12-13, quiet to active August 14-15, quiet to unsettled August 16-18, mostly quiet August 19-20, quiet to active August 21-22, and mostly quiet August 23-24. Petr says that growth in the solar wind may cause remarkable changes to the magnetosphere and ionosphere on August 2-3 and 14-16.

NASA released their monthly solar cycle prediction, and there is no change from last month. You can read it at http://solarscience.msfc.nasa.gov/predict.shtml.

At the beginning of each month we take a look at the latest numbers from our 3-month moving average of daily sunspot numbers. We do not see any upward trend. We see two peaks, one toward the end of 2011 and another smaller peak this spring. In 2011, the 3 month periods centered on October and November had average daily sunspot numbers of 118.8 and 118.6. This spring the 3-month periods centered on April and May had averages at 106.4 each. Could these be the double-peaks of solar activity that some have predicted for this sunspot cycle?

The 3-month moving averages of daily sunspot numbers centered on January through June 2013 were 73.6, 80.7, 85.2, 106.4, 106.4, and 97.5. Just to clarify, the 3-month period centered on June includes sunspot numbers for all of the 92 days from May 1 through July 31. The sum is 8,970. Divide that total by 92, and the result is exactly 97.5.

Jon Pollock, K0ZN of DeSoto, Kansas reported 17 meter observations in last week's bulletin ARLP030, and this week has another report. He wrote, "I won't keep reporting this, but I thought this was again instructive since I am seeing this so frequently lately. On Friday, July 26 I was up late and again decided to give 17 meters a try at Midnight CST. Again 17 meters was very quiet, no signals at all. i.e. 'Dead'. Except that I heard some weak thunderstorm crashes in the background. My experience has been that often when you hear that, the QRN source is a long way away. I called CQ about five times (400 watts CW into a ground mounted vertical with a large radial system) and VK7CW in Burnie, Tasmania came back (now about 12:15 AM CST) with a nice signal, about S-6. He was running 100 watts to a hexbeam. We ended up having a rag chew, and ours were the only signals either one of us could hear on the band over a 9,380 mile path from Eastern Kansas. Again, 17 meters is more often than not open when it seems dead, often for long haul contacts."

Rick Lindquist, WW1ME sent a link to yet another article about the current solar cycle being the weakest in one-hundred years. It also mentions a July meeting of the American Astronomical Society Solar Physics Division, which was in Bozeman, Montana. You can read the article at http://www.universetoday.com/103803/solar-cycle-24-on-track-to-be-the-weakest-in-100-years/.
The American Astronomical Society promises to have downloadable presentation files from the meeting, but nothing yet. They will be posted at http://solar.physics.montana.edu/SPD/SPD2013/.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of

the numbers used in this bulletin, see
http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of
past propagation bulletins is at
http://arrl.org/w1aw-bulletins-archive-propagation. More good
information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve
overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL
bulletins are at http://arrl.org/bulletins.

Sunspot numbers for July 25 through 31 were 71, 58, 64, 68, 97, 105,
and 94, with a mean of 79.6. 10.7 cm flux was 106.9, 109.5, 107.9,
109.4, 112.1, 113.1, and 108.7, with a mean of 109.7. Estimated
planetary A indices were 11, 14, 11, 7, 6, 6, and 5, with a mean of
8.6. Estimated mid-latitude A indices were 10, 23, 10, 8, 7, 6, and
5, with a mean of 9.9.

21446. DXCC radio optional

Yahoo group: DX-IS (2013)
Date: 2013-08-04 03:52:41 UTC
From: KQ8M
Topic: 21446 Message: 21446

Isn't it cool. I can stop worrying about building my own station and just use someone else's right from the comfort of my own homes.
Imagine working Mongolia on 160 from Ohio most any night the band is open. No more listening to all that static for the S1 JT. Only
need to go to http://remotehamradio.com And work that DX from a nice station at the other end of the country. WOW, my DXCC totals
are going to soar.9BWAZ is even easier now thanks to this group of ever expand stations. Thanks guys. Saving me thousands of
dollars.

I don't think a REMOTE CONTACT like that is valid for DXCC. Transmitting antenna needs to be IN the country you're in.

I don't think remote stations are likely to be common.

Read the DXCC rules. It is clearly NOT ALLOWED and the contact will NOT count for DXCC. Read DXCC Section I Basic Rules, (6) contacts made through "repeater" devices or any other power relay method ... are INVALID FOR DXCC.

You CAN'T TELEPHONE hookup to a station adjacent to the DX you're trying to reach and call it a contact. You can't COMPUTER connect to a station adjacent to the DX you're trying to reach.....etc.

Improve your home station and listen more.

Well, John according to a correspondence I have had with one of the people from there it is.

I had asked them if they informed their users that contacts do not count towards DXCC he claimed and I quote: ".A person need not
have a station nor invest in any part of his station to qualify for and receive endorsements for the DXCC awards."

Also I said "I do believe using the internet to "relay" a person's information is not within the DXCC rules." To which his reply was
"The internet is not a relay."

If he feels that he has worked 9 band DXCC using his warped methods, and skirted method of his the DXCC rules, so be it. It is on his conscience, not ours. However, those of us who have worked 9B (and I have not) we know we honestly did it with our rigs, antennas', and skills of busting cops, tuners, and all else, we can feel the honest joy of the honor roll. The real DESERVING.

The relevant DXCC rule is:

"9. All stations must be contacted from the same DXCC entity. The
location of any station shall be defined as the location of the
transmitter. For the purposes of this award, remote operating points
must be located within the same DXCC entity as the transmitter and
receiver. "

Using a remote station is not the same thing as going through a repeater.

I'll leave aside my views on remotehamradio.com, but that's what the
DXCC rules say.

Actually Dale, my comments were typed tongue in check. I personally would never walk down this road. It is an ethical thing for me although I know a large number of members don't believe in ethics only the letter of the law. I have written to my DXAC member and also to the DXCC desk asking for clarification on this aspect. If we ARE allowed to use someone else's station across the internet in another part of the country then I personally believe it will eventually ruin the integrity of the DCC program.

As more and more stations come on line like this, and I am sure there will be some "renting" their stations, then more and more people will figure they no longer need to build their own stations and with just a computer or even cell phone, operate someone else's.

21457. RE: [DX-IS] DXCC radio optional

Yahoo group: DX-IS (2013)
Date: 2013-08-04 15:28:30 UTC
From: Ron Notarius W3WN
Topic: 21446 Message: 21457

And this is why I said "here we go again" - to which I got a wisecrack from Tim in return.

We have been over this ground many times before. Clearly to no avail.

First and foremost, remote stations (remote base, internet radio, whatever) have their places. Some people have few or no other options under their circumstances. that is not a tangent I wish to go down right now.

Second, use of those stations have their own inherent restrictions and limitations. One of which is that if the remote station is not located in the same DXCC entity that the operator is located in, those contacts do not count for DXCC awards. This is nothing new, this has been in the rules (& interpretations thereof) for decades.

Third, it doesn't matter what the owners of the remote stations say. It only matters what the ARRL DXCC desk says. It would be unfortunate if they (deliberately or inadvertently) mislead their users. That is between the owners and the users. but IMHO, it is up to the operators to ensure that their operating conforms to the DXCC rules. It's clearly no skin off the owner's noses.

Fourth, if someone wishes to break the rules (call it "cheating" if you want) to earn an operating award, be it DXCC or something else. so? We know they haven't actually accomplished anything by doing so. If you don't honestly earn an operating award, all you have is a piece of parchment or paper.

But kvetching about it in countless troll posts isn't going to change a thing.

If you don't want to operate the remote stations. don't. It's as simple as that.

Well, John according to a correspondence I have had with one of the people from there it is.

I had asked them if they informed their users that contacts do not count towards DXCC he claimed and I quote: ".A person need not have a station nor

invest in any part of his station to qualify for and receive endorsements for the DXCC awards."

Also I said "I do believe using the internet to "relay" a person's information is not within the DXCC rules." To which his reply was "The internet is not a relay."

What is there to clarify? The rules are clear.

The rules (see DXCC rule 9, and thanks Ian N6ML for posting this early) currently state that remote stations that are located in a different entity from the operator do not count. I don't see where this is a misunderstanding here.

Regardless of what the owner(s) of a remote station(s) says.

And for the record, I for one would not ask for, nor would I support, a change to DXCC Rule 9 to permit this type of operating. Because I agree that such a change WOULD change the integrity of the program.

That is the current rule, but in the United States (and Canada, or any other very large DXCC), it presents a problem. I rarely hear and/or work East/Southeast Asia from my location here in Washington, DC, so my DXCC totals lack most of those countries. I could access a remote station on the West Coast and pick a bunch of them off pretty easily if I wanted to. Personally, I won't even go to another ham's house to work a new DXCC (and it was very tempting during the 7O6T DXpedition when I just couldn't get them from home). It only means something to me if I do it from my own equipment.

From: Carl 1
Topic: 21446 Message: 21460

There are or have been #1 honor roll members in every state in the union, and I would think DC.

73, de Carl. K8AV

> That is the current rule, but in the United States (and Canada, or any other very large DXCC), it presents a problem. I rarely hear and/or work East/Southeast Asia from my location here in Washington, DC, so my DXCC totals lack most of those countries. I could access a remote station on the West Coast and pick a bunch of them off pretty easily if I wanted to. Personally, I won't even go to another ham's house to work a new DXCC (and it was very tempting during the 7O6T DXpedition when I just couldn't get them from home). It only means something to me if I do it from my own equipment.

From: John Peters
Topic: 21446 Message: 21461

I suspect that answer merely means you MAY BORROW someone elses station. But the Antenna must be in the country you claim to be in.

Subject: RE: [DX-IS] DXCC radio optional

Well, John according to a correspondence I have had with one of the people from there it is.

I had asked them if they informed their users that contacts do not count towards DXCC he claimed and I quote: ".A person need not have a station nor invest in any part of his station to qualify for and receive endorsements for the DXCC awards."

Also I said "I do believe using the internet to "relay" a person's information is not within the DXCC rules." To which his reply was "The internet is not a relay."

Paul,
Before ARRL changed Rule 9, I had DXCC from several places in the USA. When the current Rule 9 was adopted I jumped to Honor Roll Nr 1. It is easy to work Europe from Maine, Africa from SC or FL, Asia from Seattle and San Diego, etc. I certainly prefer the current rule 9. BUT the antenna must still be in YOUR COUNTRY.

Ha...this is funny

I see once again the real DXCC rule has made it into the responses rather than the 50mile WAS rules or the xFeet contest rules. Good we are learning

A couple of thoughts then I will be quiet!

Who is this pain running http://remotehamradio.com that sends spam advertising email to all my mobile device under arrl email addresses!

What brain dead individual would pay that kind of membership fee to run a station over the internet. (try working a major pile up that way)

If you can't work every major DX with 100watts and a Doublet you have a lot to learn. (obviously not every band.. but a contact!)

Never mind my main station I have worked 259 DXCC over the last 10 years in a remote location with 100watts and a doublet....and I'm only there for less than a week a month.

So here is the deal I'll let you use my wire remotely for $9.95 a month....send money.

Bob

From: GARY HUBER
Topic: 21446 Message: 21464

Pretty pricey for a casual DXer. Even if it meets the DXCC rules, the guy who uses the remote rig to better his DXCC scores still knows how he did it. Not for me. I'd prefer to run a small vertical or wire and a 100 W when I down-size. I can see a need for remote operation when there are antenna and or rig restrictions but something specifically like remotehamradio.com.... I don't think so...

The relevant DXCC rule is:

"9. All stations must be contacted from the same DXCC entity. The
location of any station shall be defined as the location of the
transmitter. For the purposes of this award, remote operating points
must be located within the same DXCC entity as the transmitter and
receiver. "

Using a remote station is not the same thing as going through a repeater.

I'll leave aside my views on remotehamradio.com, but that's what the
DXCC rules say.

21467. Re: [DX-IS] DXCC radio optional

Yahoo group: DX-IS (2013)
Date: 2013-08-05 03:16:25 UTC
From: iain macdonnell - N6ML
Topic: 21446 Message: 21467

The rules cover that too...

"6. All contacts must be made with amateur stations working in the
authorized amateur bands or with other stations licensed or authorized
to work amateurs. Contacts made through "repeater" devices or any
other power relay methods (other than satellites for Satellite DXCC)
are not valid for DXCC credit."

21468. RE: [DX-IS] DXCC radio optional

Yahoo group: DX-IS (2013)
Date: 2013-08-05 03:21:37 UTC
From: Ron Notarius W3WN
Topic: 21446 Message: 21468

However, contacts via Amateur Radio Satellite are ONLY eligible for the
special Satellite DXCC award. See Rule 6.

Subject: Re: [DX-IS] DXCC radio optional

There is a satellite DXCC, which is technically going through a repeater.

John AF5CC

----- Original Message -----
From: "iain macdonnell - N6ML" <ar@...>
To: <DX-IS@yahoogroups.com>
Sent: Sunday, August 04, 2013 2:19 PM
Subject: Re: [DX-IS] DXCC radio optional

The relevant DXCC rule is:

"9. All stations must be contacted from the same DXCC entity. The
location of any station shall be defined as the location of the
transmitter. For the purposes of this award, remote operating points
must be located within the same DXCC entity as the transmitter and
receiver. "

Using a remote station is not the same thing as going through a repeater.

I'll leave aside my views on remotehamradio.com, but that's what the
DXCC rules say.

Thats my thought. I have 267 so far using 100 w and a piece of wire. Thats how I started 54 years ago and how i'm going to finish. DXCC isn't supposed to be easy.

From: Zack Widup
Topic: 21446 Message: 21471

Do you just want a certificate you can wave in front of other people's noses, or do you want to have fun in the chase? I run low power (mostly) to wire antennas. I enjoy having a tough pileup to crack. I'm pleased if I get through on the first couple calls but don't mind sitting in the chair for a few hours at my home station trying to bust a pileup. Then I can say I did it at my own station in the Black Hole.

SB DX ARL ARLD032
ARLD032 DX news

This week's bulletin was made possible with information provided by QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MAURITIUS, 3B8. 3B8/HB9ARY is QRV until August 11. Look for him on 1830 kHz on CW at local sunrise, 0130Z. He expects to return to 3B8 every six months. QSL direct via HB9ARY or through the Swiss bureau.

GREENLAND, OX. Station OX5YL will be a group of YL operators QRV from August 16-20. At the radios will be HL1KDW, JR3MVF, LA6RHA, SM6KAT and WA0WOF. QSL direct or via bureau to PA5YL.

ST. PIERRE and MIQUELON ISLANDS, FP. Peter, FP/DJ4TC and Hermann, FP/DL2NUD will be QRV from September 10-21. They will be QRV only on 2 meters, 70 centimeters and 23 centimeters using JT65B and JT65C. QSL via their home calls.

CANARY ISLANDS, EA8. Bob, DL7VOA will be operating as EA8/DL7VOA until August 17. Listen for him during his evenings mostly on CW. QSL to DL7VOA, direct or via the Bureau. Members of the Grupo DX Gran Canaria and URE Las Palmas will be active as AO8LH from Puna de la Aldea Lighthouse. Activity will be on all HF bands using CW, SSB and RTTY. QSL via EA8AKN and LoTW. Andrew, G7COD, will be active as EA8/home call from Gran Canaria from August 9-31. Activity will be on 30 through 6 meters using CW and SSB. QSL via his home call sign, direct, by the Bureau or eQSL and LoTW.

ALAND ISLAND, OH0. OH0/DM2ECM, will be active until August 16. His main activity is meteor scatter work during the peak of the Perseids meteor shower, with a random operating schedule and plan.

RODRIGUEZ ISLAND, 3B9. The Verona DX Team will be QRV for EME activity on 144 and 432 MHz as well as HF operations from September 1-9. The team is currently awaiting approval of the call sign 3B9EME. Operators include Walter, I3VJW; Luc, I3LDP; Rony, IZ3KIF and Alessandro, IK5MIC. They will have two stations on at the same time on the HF bands, with an emphasis on 160, 80, 40, 30, 17 and 12 meters, using CW, SSB, RTTY, JT65hf and PSK31.

MONTENEGRO, 4O. Operators Goran, YT7AW and Ivan, YT4RA/IV3CTS will be active as 4O/home calls until August 15. Activity will be starting from Durmitor National Park (4OFF-002), and then followed by seaside activity, with a possible stopover on EU-163 (Crna Gora). QSL via their home calls per QRZ.com.

TANZANIA, 5H. Byron, KF8UN will be QRV as 5H3BB until August 20. Look for him on 40 through 15 meters, but mostly on 20 meters using SSB with some CW. QSL direct via his home call.

MALDIVES, 8Q. Operators Herbert, DL7AHF and Michael, DG8MH will be active as 8Q7HF and 8Q7MH, respectively, until August 11. QSL via their home call signs.

ECUADOR, HC. Emanuelle, IK2OHG, will be active as HC2IOH from Guayaquil between August 10 and September 12. Activity will be holiday style on 40-10 meters, including 30, 17 and 12 meters, using CW, SSB and RTTY. QSL via his home call sign, direct, by the bureau or LoTW.

PALAU, T8. Masashi, JL1FUQ will be QRV as T88GJ from September 20-24. Activity will be limited or dates may change because of his work, but look for him on 20, 17, 15, 12, 10 and 6 meters using SSB and possibly AM, PSK31 and RTTY. QSL via his home call sign, by the bureau or direct.

NAMIBIA, V5. Winfried, DK9IP will be active as V55V from V52W's QTH in Omaruru for the Worked All Europe DX CW Contest, August 10 and 11, as a Single-Op/High-Power entry. QSL via DJ8VC. Before and after the contest, he will sign V5/DK9IP. Activity will be on 160-10 meters, possibly with some RTTY and 6 meter operation, until August 13. QSL V5/DK9IP via his home call sign.

VIETNAM, XV. Masanobu, JR5JAQ is active as XV2JJ. His length of stay is unknown. Activity has been on 20, 17 and 15 meters, mainly CW with some SSB. QSL via JH5RXS, direct or by the Bureau.

LAOS, XW. Champ, E21EIC will be active as XW0YJY during the Worked All Europe CW Contest as a Single-Op/All-Band/Low-Power entry. Outside of the contest, Champ will try 6 meters some days around 50.112 MHz. He is expected to be QRV until September 14 on on 160-2 meters. QSL via E21EIC and LoTW.

PORTUGAL, CT. The Associacao de Radioamadores da Vila de Moscavide will be active as CS2HNI from the lighthouse at Forte do Cavalo

(PT-0012 - ARLHS POR-021) during the International Lighthouse/Lightship Weekend 2013, August 17 and 18. Look for them using SSB on 40, 20, 15 and 10 metres. QSL via CT1RVM, bureau preferred.

JUAN FERNANDEZ, XR0. XR0ZR will be QRV from November 8 to 20. Activity will be on 160-6 meters. Operations will include 6 meter EME and possibly 2 meter EME.

OPERATIONS APPROVED FOR DXCC CREDIT. Somalia, T5TC, 2013 operation; Laos, XW2CW, 2012 operation.

THIS WEEKEND ON THE RADIO. The Worked All Europe CW, Straight Key Weekend Sprintathon, Maryland-DC QSO Party, Fall VHF Sprint-50 MHz and NJQRP Skeeter Hunt are all on tap for this weekend. Please see August QST, page 73 and the ARRL and WA7BNM contest web sites for details.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30809
SIDC SOLAR BULLETIN 09 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 09 Aug 2013 until 11 Aug 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : No forecast
PREDICTIONS FOR 09 Aug 2013 10CM FLUX: 104 / AP: 007
PREDICTIONS FOR 10 Aug 2013 10CM FLUX: 104 / AP: 007
PREDICTIONS FOR 11 Aug 2013 10CM FLUX: 105 / AP: 007
COMMENT:solar activity remained quiet and is expected to remain so for the next 24
hours although C-class flaring becomes more likely with the increasing
complexity of AR NOAA 1813 (Catania 63). Geomagnetic conditions where quiet
and are expected to remain so for the next 48 hours.

From: jjreisert@...
Topic: 5561 Message: 21479

SB PROP @ ARL $ARLP032
ARLP032 Propagation de K7RA

ZCZC AP32
QST de W1AW
Propagation Forecast Bulletin 32 ARLP032
>From Tad Cook, K7RA
Seattle, WA August 9, 2013
To all radio amateurs

SB PROP ARL ARLP032
ARLP032 Propagation de K7RA

Solar indicators barely moved this week, with average daily sunspot numbers up 5.8 points to 85.4, and average daily solar flux down 2.4 points to 107.3.

Predicted solar flux for the next week is low, with the predicted average for Thursday, August 8 through Wednesday, August 14 at 104.9, a little lower than the 107.3 average for this past week.

Solar flux is predicted at 105 on August 9-16, 110 on August 17-18, 105 on August 19-24, 110 on August 25-28, 115 on August 29, 105 on August 30 through September 2, 110 on September 3-4, and 115 on September 5-12.

Predicted planetary A index is 10, 22, 25, 12 and 5 on August 9-13, 12 on August 14-15, 5 on August 16-20, then 10, 15 and 10 on August 21-23, 5 on August 24-30, then 12, 17, 8, 5 and 8 on August 31 through September 4, 5 on September 5-9, and 8 on September 10-11.

OK1HH predicts the geomagnetic field will be quiet to unsettled August 9, quiet to active August 10-11, mostly quiet August 12, quiet on August 13, active to disturbed August 14, mostly quiet August 15-17, quiet to unsettled August 18, mostly quiet August 19, quiet August 20, quiet to unsettled August 21, active to disturbed August 22, quiet to unsettled August 23, quiet to active August 24, quiet August 25-30, and active to disturbed August 31.

In recent bulletin ARLP024 we noted that the site for downloading W6ELprop had a bad link, and then referenced an ftp site. Now that ftp site requires a login, so the best place to find W6ELprop is via K9LA. Go to http://www.k9la.us and click on Tutorials and note the W6ELPropInst270 link.

Many emails arrived this week concerning the sun's 180-degree flip in magnetic polarity, upcoming at the solar cycle peak. Check out

http://science.nasa.gov/science-news/science-at-nasa/2013/05aug_fieldflip/, and
http://earthsky.org/science-wire/the-suns-magnetic-field-is-about-to-flip.

Thanks to K9TF, K6HI, K3MJ, WB0OEW and M0VNG among others for the
heads-up.

Here is an interesting comment about the 100-year-sunspot-minima
theory:
http://informthepundits.wordpress.com/2013/08/02/sunspot-cycle-in-100-year-dip/.

And check this amazing photo of a sunspot:
http://io9.com/behold-the-clearest-photo-of-a-sunspot-ever-taken-1054493465.

Roland Anders, K3RA told us recently about some experiences with
unexpected propagation on 15 meters. On August 6, he sent this:

"The antenna is a 3 element SteppIR at 50 feet (DB18 with two
'trombones' for 40/30. As for Lawyers Hill, it is not all that high
above sea level (about 200 feet) but I have a pretty sharp drop off
NE to South. The terrain is not all that high here, about 200 feet,
and the land rises steadily to the NNW and around to SW. But to the
NE to South it drops off very steadily from my antenna for miles,.
So it is a relatively good location."

"Friday August 2 I worked about 25 Oceana and Asian stations with
some Europeans intermixed from 1318 UTC to 1703 UTC. Asia/Oceana
included YB, JA, DU, HL, VK8, 9M6, and HS. (All on 15 meters)."

"On Saturday August 3 I worked about 25 Pacific/Asia stations (YB,
JA, XV, DU, UA9, VK8) from 1210 UTC til 1350 UTC on 15 meters. I
moved to 17 meters at 1430 UTC which was wide open to Europe, and
also worked a couple JA's there at 1500 UTC. At about 1600 UTC I
heard a weak SM station in QSO with another European station on 12
meters. I called CQ and worked about 40 European stations until I
quit at 1815 UTC. I don't know how much longer 12 meters was open
from East Coast USA to Europe. During that time I worked stations
from F to 4X, and as far north as SM and south to CU3."

"On Sunday August 4, I worked a YB on 15 meters at 1220 UTC, then
moved to 12 meters and worked a half dozen European stations on 12
meters from 1230 UTC until 1300 UTC. I was unable to stay on much
longer, so I don't know how conditions panned out the rest of the
day on 12 meters."

"On Monday, August 5 conditions to Asia on 15 meters did not repeat.
European stations were present, but not strong."

"I could not listen until noon today (August 6), but nothing coming
through from YB and Europe not strong on 15 meters."

Thanks Rol.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for August 1 through 7 were 88, 112, 104, 75, 59, 61, and 99, with a mean of 85.4. 10.7 cm flux was 112.1, 112.9, 107.3, 104.8, 104.3, 103.9, and 105.5, with a mean of 107.3. Estimated planetary A indices were 5, 4, 5, 16, 16, 7, and 4, with a mean of 8.1. Estimated mid-latitude A indices were 4, 3, 6, 11, 11, 6, and 6, with a mean of 6.7.

21480. 425 DX News - #1162

Yahoo group: DX-IS (2013)
Date: 2013-08-09 19:14:18 UTC
From: r_brothers
Topic: 21480 Message: 21480

10 August 2013 A.R.I. DX Bulletin
No 1162
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4S - This year the Radio Society of Sri Lanka's annual activity during the International Lighthouse Lightship Weekend (17-18 August) will take place from Dondra Head Lighthouse, on the extreme southern tip of the main island (AS-003). Look for 4S7LGT to be QRV on 40-15 metres. [TNX 4S7JL]
6W - Freddy, F5IRO will be active as 6V7O from Senegal on 12-26 August. He will operate mainly CW on 40-10 metres. QSL via F8DFP, direct or bureau. The logs will be uploaded to Club Log and LoTW at end of August. [TNX DX World]
9A - Leo, S50R will be active as 9A/S50R from Solta Island (EU-016) on 9-17 August. QSL via home call, direct or bureau, and LoTW. [TNX rsgbiota.org]
9A - Dirk, DO7DP will be active holiday style as 9A/DO7DP from Rab Island (EU-136) on 10-24 August. He will operate on the HF bands using PSK31, RTTY and some SSB. QSL via home call, direct or bureau. [TNX DX Newsltter]
9A - Marco, IZ3GNG will be active as 9A/IZ3GNG from Rab Island (EU-136) on 13-18 August and from Korcula Island (EU-016) on 19-26 August. QSL via home call (email requests for bureau cards to iz3gng[@]gmail.com). [TNX IZ3GNG]
A4 - A team from the Royal Omani Amateur Radio Society will operate SSB, CW and digital modes as A43MI from Masirah Island (AS-014) on 20-24 September. QSL via A47RS. [TNX A41MA]
CT7 - Jose Luis CT1GZB (SSB and CW), Carlos CT1CSY (SSB) and Rafael CT2JXT (PSK31 and RTTY) will be active as CR6LH from the lighthouse at Cabo Raso (ARLHS POR-011) on 17-18 August for the ILLW. QSL via CT1GZB, direct or bureau. [TNX CT1GZB]
CT7 - The Associacao de Radioamadores da Vila de Moscavide will operate SSB on 40, 20, 15 and 10 metres as CS2HNI from the lighthouse at Forte do Cavalo (ARLHS POR-021) on 17-18 August during the ILLW. QSL via CT1RVM, bureau preferred. The special callsign honours the memory of Artur Machado, CT2HNI (SK in 2009). [TNX CT1RVM]
EA - The reconstruction of Donostia-San Sebastian started immediately after the city burned to the ground during a tragic siege in 1813. Commemorating those events, the Union de Radioaficionados de Donostia (EA2URD) will use special callsign EH200D (QSL via

EA2URD) for the rest of the year. The first two activities will take place on 24-25 August (from the Mota Castle) and 31 August-1 September (from EA2URD's HQ). Also, amateur radio operators in the province of Gipuzkoa will be allowed to use "200" in their prefix (e.g. EA200XYZ for EA2XYZ) between 24 August and 15 September. [TNX EA2EA]

EA8 - Grupo DX Gran Canaria and URE Las Palmas will participate in the ILLW (17-18 August) as AO8LH the lighthouse at Punta de la Aldea on the island of Gran Canaria (AF-004). Look for activity on the HF bands CW, SSB and RTTY. QSL via EA8AKN and LoTW. [TNX EA8RM]

GI - The Lagan Valley ARS (GI4GTY) will be active as GB0REL from the East Lighthouse on Rathlin Island (EU-122) on 16-18 August. QSL via LoTW only.

GW - The official entrants list for this year's ILLW (http://illw.net/index.php/entrants-list-2013) includes GC0OBS from St Tudwal's. Please note that the operators (G8CQH and G4WMH) will will be located on mainland Wales, as they did last year, and not on the nearby island. Both the St Tudwal's Islands (EU-106) are private property, and the owners "do not allow the public, let alone radio hams, to visit" (MM0NDX). QSL GC0OBS via G4WMH.

I - The Calabria DX Team will be active as II8LH from the lighthouse at Capo Spartivento (WAIL CL-009, ARLHS ITA-043) on 10 August. QSL via HB9FHZ (bureau) or IK8YFU (direct), LoTW and eQSL.

I - Look for Paolo, IA5/IZ5NFD, to be active from Elba Island (EU-028) on 12-18 August. He will be QRV on 40-2 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org]

I - A group of operators from ARI Genova (IQ1GE) will be active as II1L from La Lanterna (ARLHS ITA-177, WAIL LI-005) for the ILLW on 17-18 August. QSL direct or bureau. [TNX IZ1BZS]

OZ - Bernd, DL2SBE will be active holiday style as OZ/DL2SBE from Lolland Island (EU-029) on 10-24 August. He will operate SSB, PSK and RTTY. QSL via home call, direct or bureau. [TNX rsgbiota]

SP - Look for SP2BIK, SP2BRN, SP2IZC and SP2TQW to be active as SN2NP from the historic lighthouse at Gdansk Nowy Port on 16-18 August. QSL via SP2BIK, direct or bureau. [TNX SP2BIK]

SV5 - Look for SV5/EM5F to be active from QRV from Rhodes, Dodecanese Islands (EU-001) on 15-24 August. QSL via UR5FAV (email address for bureau cards: orionua[@]orion.od.ua) and LoTW.

SV9 - Luc, ON6DSL will be active as SV9/ON6DSL/p from Crete (EU-015) on 12-21 August. He will operate SSB on 40-15 metres QRP (5 watts). QSL via home call. bureau preferred. [TNX NG3K]

V5 - Winfried, DK9IP will be active as V55V from Namibia for the Worked All Europe DX CW Contest (10-11 August). QSL via DJ8VC. Outside the contest, on 8-13 August, he will be QRV as V5/DK9IP (QSL via home call) on all bands, possibly with some RTTY and 6m activity. [TNX NG3K]

VE - Jim, AE1C will be active holiday style as AE1C/VE9 from Grand Manan Island (NA-014) on 18-25 August. QSL via home call. [TNX rsgbiota.org]

YB - Budi, YF1AR will be active as YF1AR/1 from the Cikoneng-Anyer

Lighthouse (ARLHS IDO-081) in Banten province of Java (OC-021)
until 11 August. He will be QRV on 40-10 metres mainly SSB, with
some CW and digital modes. QSL via N2OO. [TNX YF1AR]
YB - YB5NOF and others [425DXN 1160] now expect to be active as YE5T
from Tambelan Island (OC-122) from 28 August to 1 September, and
as YE5S from Serasan Island (OC-109) on 4-8 September. QSL via
W2FB. [TNX JN6RZM]
YV - The Grupo DX Caracas has plans be active as YW5X from Isla La
Orchila (SA-054) on 20-26 August. QSL via DM4TI. [TNX N6VR]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The July 2013 issue is now available for download
at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

AMSTERDAM 2014 ---> FT5ZM will be located at two operating sites 2.5 km
apart (see www.amsterdamdx.org/ft5zm-operating-sites/). From both sites they
will use verticals and dedicated receive antennas for the low bands, and
3-element monoband Yagis for the high bands. "Your support and financial
contributions are critical to our success", the organizers say. "If you
have not yet made a contribution to this DXpedition, we ask that you please
consider doing so by going to the Donate button on our home page. We need
your help".

DXCC NEWS ---> T5TC (Somalia, 2013 operation) and XW2CW (Laos, 2012
operation) have approved for DXCC credit. If you have had any of them
rejected in a prior application, send a note to bmoore[@]arrl.org to be
placed on the list for an update to your record. Also, please note the
submission date and/or reference number where the rejection was noted to
expedite the search for any rejected QSOs. [TNX NC1L]

NA-050 ---> The logsearch for K6VVA/KL7's recent activity from Barter
Island is now up and running at www.k6vva.com/iota/logsearch/. Rick made
3,446 QSOs (all but 140 on CW) with 2,919 unique callsigns. A summary and a
few pictures can be found on http://dx-world.net.

RI1FJ ---> Evgenij, RI1FJ (UA4RX) is leaving Franz Josef Land in
mid-August, and "is 99.9% sure there will be nobody to replace him on ham
bands for the 2013-14 season". During his last three activities as R1FJT
(2006-2008) and RI1FJ (2010-2011 and 2012-2013), Evgenij made about 80,000
contacts and managed to earn the DXCC Challenge with more than 1,000
band-point QSOs confirmed by LoTW. His final log will be uploaded to LoTW
shortly after he is back on mainland Russia. QSL via UA2FM (OQRS on Club
Log). [TNX UA2FM]

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30810
SIDC SOLAR BULLETIN 10 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 10 Aug 2013 until 12 Aug 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 Aug 2013 10CM FLUX: 104 / AP: 007
PREDICTIONS FOR 11 Aug 2013 10CM FLUX: 102 / AP: 014
PREDICTIONS FOR 12 Aug 2013 10CM FLUX: 100 / AP: 011
COMMENT:There are currently 4 numbered AR on the solar disk. A solitary C2.0 flare
occured on August 9th around 20:10 UT from an unnumbered AR on the East
limb. A small increased solar wind speed up to 480 km/s was detected by
ACE, probably due to a very small coronal hole which was associated with a
passing of the current sheet. Geomagnetic where quiet and are expected to
remain so for the next 24 hours. In the night of August 11th-August 12th
we expect active conditions due to the arrival of the CME of August 7th.
TODAY'S ESTIMATED ISN : 046, BASED ON 11 STATIONS.

SOLAR INDICES FOR 09 Aug 2013

PREDICTIONS FOR 13 Aug 2013 10CM FLUX: 106 / AP: 011
COMMENT:There are currently 6 numbered AR on the solar disk. Solar activity was
mostly quiet, but counted 2 low C-class flares both from AR NOAA 1818.
Activity is expected to remain mostly quiet although an isolated C-class
flare is possible. Geomagnetic conditions where quiet to active in the last
24 hours. In the evening of August 12th active conditions are expected due
to the arrival of the CME of August 7th.
TODAY'S ESTIMATED ISN : 053, BASED ON 17 STATIONS.

VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-August, through Sunday, 11th-August there were 222 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

40, MONTENEGRO. Jacek, SP5OXJ, will be active as 4O/SP5OXJ from Budva between August 13-20th. Activity will be holiday style on 40-20 meters using CW and the Digital modes. QSL via his home callsign or LoTW.

6W, SENEGAL. Just a reminder that Francis, F6BLP, will once again be active as 6W7SK from Saly Portudal, 80 kms south of Dakar on the coast, between January 3-31st, 2014. Activity will be holiday style using the same station as last time (IC-7000 into G5RV antenna) operating mainly CW on 80-10 meters. If possible, he also hopes to be active on 160m with an Inverted L. QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more details, logs and pictures of his last operation, visit: http://www.f6blp.org

AFRICAN TOUR. YL Ann, W6NN, will be active from the following areas as:
* EA8/W6NN - Tenerife, Canary Islands; August 11-16th
* 9H3NN - Gozo Island, Malta; August 21-26th
All activities will be holiday style on 40-10 meters using all modes. QSL via her home callsign, direct or by the Bureau. See QRZ.com for details. Logs will be posted on ClubLog.

CE0Z, JUAN FERNANDEZ ISLAND. Operator "Mario", in his capacity as aerodrome manager on Juan Fernandez Island, has recently been active as CE0ZOL. He is not a DXer nor a contester. Mario is likely to be active when time permits during the weekends. He will be stationed on the island for 6 months. Activity has been on 40 meters SSB (on 7080 kHz around 2200z). More details will be forthcoming. QSL via QSL via CE3RAC: Radio Club Dirección General de Aeronáutica Civil, P.O. Box 15 - Aeropuerto AMB, Santiago, Chile.

CE, CHILE (ILLW Op!). Look for the following Chilean lighthouse to be in the International Lighthouse/Lightship Weekend (ILLW) event August 16-17th:
* Punta Herradura, Lighthouse - Ref No. NAC. 120; Manuel, CE2UNE, will be active on 40/20/15/10 meters, using 100 watts and a YAESU 1700 into a Delta loop and dipole antennas. Chilean hams please QSL by sending a SASE, and foreign stations with 2 IRCs to the following address: Manuel Mejias Gallardo, Ana Moral Cuesta Nº1710, Ovalle, CHILE.

* Coquimbo Lighthouse, - Ref. No. NAC.115; Hector, CE3FZL, will be active on 40/20/15/10 meters, using an ICOM IC-718 with 100 watts into a Delta loop and dipole antennas. Chilean hams please QSL by sending a SASE, and foreign stations with 2 IRCs to the following address: Hector Frias, P.O. Box 9570 cc, Santiago, Chile.

* Curaumilla Lighthouse - ILLW Ref. No. CL0017; Freddy, CE3NLU, will be active on 40/20/15/10 meters SSB, using a Kenwood TS-140, Kenwood TS440 into a Hy-Gain 14-AVQ. QSL via CE3AA, direct or by the Bureau. More information is available on QRZ.com.

CS, PORTUGAL. Members of the Association of Radioamadores of the Village of Moscavide (ARVM) will once again be active as CS2HNI from the Farol do Forte do Cavalo lighthouse (ILLW PT-0012, DFP FES-12, ARLHS POR-021) at Forte do Cavalo - Sesimbra (DCFP F-038, DMHP ST-028, WCA CT-00214) during the International Lighthouse/Lightship Weekend (August 17-18th). Activity will be on 40/20/15/10 meters SSB. QSL via CT1RVM, by the Bureau is preferred. PLEASE NOTE: This special event station is in memory of their good friend Arthur Gil, CT2HNI.

DXCC RULES TO BE REVIEWED! From the "Minutes of 2013 Second Meeting -
ARRL Board of Directors - dated July 19-20th, 2013" Item 35:
<http://www.arrl.org/files/file/About%20ARRL/Board%20Meetings/2013%20Second%20Meeting%20Minutes.pdf>
"On motion of Mr. Fenstermaker, seconded by Mr. Vallio, the following
resolution was ADOPTED:
WHEREAS: The ARRL's DXCC program is very successful and is recognized
as the premier DX award available to Radio Amateurs. It has been at least
10 years since the DXCC rules were comprehensively reviewed by the DX
Advisory Committee (DXAC) and/or another committee and ratified by the
ARRL Board of Directors. These changes to DXCC have been very successful
and resolved many previous problems and inconsistencies in the DXCC rules
and program; and,
WHEREAS during this time, changing international conditions and situations now warrant review of these rules to insure the DXCC rules acknowledge such changes and events.
NOW BE IT THEREFORE RESOLVED that the ARRL Board of Directors tasks the
Program and Services Committee to request the DX Advisory Committee (DXAC)
study and, if warranted, recommend changes to the DXCC Rules for the ARRL
Board of Directors to discuss.
A status report shall be forwarded to the Programs and Services Committee
prior to the January 2014 Board Meeting with a final report and recommendations forwarded to the Programs and Services Committee prior to the July
2014 Board Meeting."

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that
the following operations are approved for DXCC credit:
T5TC ☐ Somalia; 2013 Operation
XW2CW ☐ Laos; 2012 Operation

NOTE: If you've had these rejected in a prior application, send a note
to <bmoore@...g> to be placed on the list for an update to your record.
Also, please note the submission date and/or reference number where the
rejection was noted to expedite the search for any rejected QSOs.

FP, ST. PIERRE AND MIQUELON ISLANDS. Operators Peter/DJ4TC and Hermann/
DL2NUD will be active as FP/homecall from a motel on Miquelon Islands
(NA-032) between September 10-21st. Activity will only be on 2 meters,
70 and 23 centimeters using JT65B and JT65C. Their WW Loc. is (GN17tc).
QSL via their home callsigns, direct or by the Bureau.

FT5ZM AMSTERDAM ISLAND DXPEDITION UPDATE (From The FT5ZM Web Page).
Ralph, K0IR, updated the Web page this past week with details (as well
as pictures) of the landing and operating sites for the FT5ZM DXpedition
on Amsterdam Island. He states, "We have been assigned two operating sites
on the north end of the island. One site, a shelter called Mataf, is
located just northeast of the base. It is over 400 feet from the sea and
the beach area has small cliffs, is rugged and rocky, and is exposed to
the high sea. Having antennas at the water's edge is not really an option.
The slope downward and to the north favors propagation to most major
population areas. We will use verticals for the low bands and 3-element
Yagis for the high bands." Check out the complete press release (with

pictures) at: http://www.amsterdamdx.org/ft5zm-operating-sites

H4, NICARAGUA (Update to OPDX.1116). Members from the Spanish Aitana DX Group (ADXG) will be active as H7H from Octavio, YN2N, radio shack in Nicaragua between October 1-16th. Operators mentioned are Javi/EA5KM (CW), Fer/EA5FX (CW), Eugen/EA5HPX (CW), Fran/EA7FTR (SSB/RTTY), Jose/EA1ACP (SSB/RTTY) and Carlos/EA1DVY (SSB/RTTY). Pilot station named is Ismael/ EA1AZ. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via EB7DX, direct or by the Bureau. An OQRS will be available for direct and Bureau QSLs. All QSOs will be confirmed via LoTW. For more details and updates, visit: http://nicaragua2013.com

HL, SOUTH KOREA. Dom, SQ9KWW, will be active as HL3/SQ9KWW between August 12th and September 2nd. Activity will be on the HF bands using wire antennas and 100 watts. QSL via his home callsign, direct or eQSL.

HV, VATICAN. As of August 9th, HV0A has been active and is expected to be active "for some day" per Sergio, IK0FTA. Activity will be active on the HF bands, mostly on CW and during the peak of Perseids meteor shower on the VHF bands. QSL direct to IK0FVC or LoTW.

ILLW 2013. Just a reminder that next weekend is the "International Lighthouse Lightship Weekend" [ILLW] (August 17-18th). It was announced this past week that the ILLW has broken a record for registrations. There are over 460 registered as this was being written. Complete details on the ILLW event, update and registered stations can be found at the following URL links: http://illw.net/
http://illw.net/index.php/entrants-list-2013
http://w8tts.com/ILLW/ILLW-Lights.html
https://www.facebook.com/ILLWeekend

IOTA NEWS.............
AF-019. Landi, IW5ELA, will be active as IG9/IW5ELA from Lampedusa Island between September 8-13th. Activity will be on the HF bands, mainly CW and using FT-857 with 100 watts into a multiband vertical. QSL via his home callsign, by the Bureau and direct.

AS-014. Members of the Royal Omani Amateur Radio Society (ROARS) will be active as A43MI from Masirah Island between September 20-24th. Activity will be on CW, SSB and the Digital modes. QSL via A47RS, direct or by the Bureau. Visit the ROARS's Web page at: http://www.a47rs.org/welcome_en.html

EU-016. Leo, S50R, is now active as 9A/S50R from Solta Island (ACIA IC-656, CIA-51, IOCA CI-126, MIA MC-389, WLOTA 2833) until August 17th. Activity will be holiday style on the HF bands. QSL via his home callsign, direct, by the Bureau or LoTW. Visit his Web site at: http://s50r.s50e.si

EU-016. Bela, HA8BE, is now active as 9A/HA8BE from Brac Island (CI-010, WW loc JN83GJ) until August 17th. Activity will be

on the HF bands mostly on CW, but some SSB too. He will try to be active on or near the IOTA frequencies. QSL via his home callsign, by the HA Bureau or direct.

EU-028. Paolo, IZ5NFD, will once again be active as IA5/IZ5NFD from St. Andrea in the north western part of Elba Island (IIA LI-001, MIA MI-022, WLOTA 0609, Grid Loc. JN52) between August 12-21st. Activity will be holiday style on 40-2 meters on CW during his early mornings (0500z) and his evenings (2100z). QSL via his home callsign, direct or by the Bureau.

EU-029. Bernd, DL2SBE, is now active as OZ/DL2SBE from Lolland Island (DIA SJ-015, WLOTA 2773) until August 24th. Activity will be on the HF bands, using SSB, PSK, RTTY and SSTV. Equipment is an Icom IC-706MKIIG, Expert 1K, Hexbeam (20-6m), W3DZZ for 80-40m or a vertical with 18m Spiderbeam Pole. Bernd also plans to be active as OZ/DL2SBE/m. QSL via his home callsign, by the Bureau or direct. More details on QRZ.com.

EU-057. Marc, PE1FJN, will be active as as DL/PE1FJN/p from Ruegen Island (DID O-007, WLOTA 1712) between August 18-31st. Activity will be limited to his spare time (family holiday), but he will be using an Elecraft K1 with 2.5 watts into a Buddipole GP. Operations will be focused on 30m CW. QSL via PE1FJN, direct or by the Bureau.

EU-172. Operators Heinz/DC5WW, Robert/DK2RO, Anton/DL8AW, Norbert/ DL9NAC and Thilo/DL9NBJ will be active as 5Q7Y from Langeland Island September 14-21st. QSL via Anton, DL8AW, by the Bureau, direct and LoTW. You can also use the Clublog OQRS Service (fee: 1 EURO). Anton, states, "If you want to send direct cards, please include an SASE (only with German stamps) or SAE plus sufficient return postage. I don't want to earn money by sending cards directly, I just want to cover my expenses. In Germany sending international letters (no matter to which country) costs 0.75 EUR (about 1 USD). You also can use a valid IRC." Log will be uploaded as often as possible.

OC-109/ (Update) Operators John/YB5NOF, Anton/YB5QZ, Joni/YB9WZJ and OC-122. YE5WM will activate Tambelan (OC-122) as YE5T between August 28th and September 1st. Natuna Selatan (OC-109) activity will be afterwards between September 4-9th. All activations are weather dependent. QSL via W2FB.

OC-065. By the time you read this, Ralph, H44RK, is expected to arrive on Swallow Islands. Once Ralph finishes his projects on the island, look for his to be active as H40IOTA on 20 and 15 meters. Per DX-World.net, suggested times are 0700-0900z on 14260 kHz and after that on 21260 kHz.

OC-261. (Reminder!) Craig, VK5CE, will be active as VK5CE/p from Flinders Island between August 15-21st. Activity will be on

80-10 meters, with most of the operations being on 40/20/15m,
using SSB and PSK. QSL via his home callsign. For more details
and updates, watch Craig's Blog page at:
http://oc261.blogspot.co.uk

SA-054. (Update) Members of the Grupo DX Caracas will be active as
YW5X from Orchila Island (ARLHS VEN-022, WLOTA 3044) between
August 20-26th. The YW5X will be active to commemorate the
Navy's Dìa Venezuela 2013 during the month of August. The
dates will depend on Navy transport. QSL via DM4TI only.
Look for updates on QRZ.com.

JD1, OGASAWARA. Toshi, JP1IOF, will once again be active as JD1BLC from
Chichijima Island (AS-031, WLOTA 2269, JCG #10007) in the Ogasawara group
between Novenmber 7-15th. Activity will be on all HF bands and modes. QSL
via his home callsign, direct or by the Bureau. Log will be uploaded to
LoTW and ClubLog. An OQRS will be available via ClubLog.

JW, SVALBARD. Operators Sig/DL2JIM, Rene/DL2JRM and Dan/DL5SE will be
active as JW5E from the club station in Longyearbyen, Spitsbergen Island
(EU-026, WLOTA 0125), between September 13-16th. Activity will be on all
HF bands and modes. They will also be an entry in the Worked All Europe
(WAE) DX SSB Contest (September 14-15th). QSL only direct to:
Svalbardgruppen Av NRRL Clubstation, PO Box 498, N 9171 Longyearbyen,
Norway. ADDED NOTE: Netti/DO6XX will join Rene/DL2JRM to be active as
JW/homecall from the JW5E club station between September 20-23rd. Rene
will be active as JW/DL2JRM and will focus on the Scandinavian Activity
CW Contest (SAC) (September 21-22nd). Netti will be active as JW/DO6XX
and will be on all HF bands using SSB and RTTY. QSL via home their
callsigns, direct or by the Bureau. For more details about JW5E station,
visit: http://jw5e.com

CONGRATULATIONS TO W3HNK. Joe Arcure, W3HNK, has hit a milestone. It's has been 50 years this month since this world-famous/known QSL Manager began serving as manager for many DX stations (+400). We bet that many DXers throughout the world have received a QSL from Joe. Read an article written about Joe that was posted this week by the ARRL at: http://www.arrl.org/news/veteran-dx-qsl-manager-w3hnk-marks-50-years-of-service

QSL ROUTES FOR II8LH. The Calabria DX Team activated the Paola Light-house (WW Loc. JM89AI, reference ARLHS ITA-111 and CL-002 WAIL) and the the Capo Spartivento Lighthouse (WAIL CL-009, ARLHS ITA-043, WW Loc. JM77UW) this past weekend. QSL via Bureau: HB9FHZ (USKA bureau). QSL via direct to IK8YFU. Also, e-QSL authenticity guaranteed and LoTW. For more info, see: http://www.calabriadxteam.it

QSL RECEIVED VIA LoTW: 9V1YC, CO7WT, CR5CW, EI3JB, EJ0PL, FG4NO, G0JKZ, KP2HC, OX3KQ, RJ5DX, V63XG and YF1AR/3

QSLS RECEIVED VIA MAIL: 7P8D, 8Q7KP, 9M2/OK1CZ, 9L5MS, D44TWO, D85C, RI1ANU, TM6M and TX5K

QSLS RECEIVED VIA THE BUREAU: 4B1AC, 4K6/JR0HYT, 4K9W, 4S7KKG, 5V7SI, 7J1AYJ, 7K3BKZ, 8J1RL, 9G5S, 9M1JKL, 9M2TO, 9M6/OH2YY, 5R8VB, 5R8X, 5X1VB, 5Z4/UA4WHX, 7Q7VB, 9J2VB, 9M4SLL, 9M6DXX, 9X0VB, A25NW, AH0BT, BA2IA, BA4WR, BD3DBU, BD3MV, BD3OM, BD5PN, BD6IF, BD7JUI, BD8NBG, BD9AC, C21UF, C4SV, CR2X, CT3/DF8AA, CT8/DL1CW, CT9/DL3KWF, CU1ARM, CU2ARA, CU2CE, CU3URA, CU5AM, CU6GRP, CU7CRA, CU9AC, CY9M, D3AA, D60VB, DA0I, DJ2AX, DL4FN, DR1A, DV7HTK, EA6/DL6CT, EA8/DF8AA, EN2012UEFA, FM/K9NW, HB100FLP, HB60LU, HS0ZIN, IK7RVY, IS0R, J20VB, J8/JA7SGV, KH2/JS6RRR, KH0WW, LZ1437MGS, LZ1737SSS, LZ67VZ, LZ907SKB, LZ916SSLZ1515PSB, MU/F4ERS, MU/F5CWU, N1BJ/KH2, OH0V, OH2BH, OP4K, P40X, S21YZ, S79NU, SV8/LZ1QN, SWL-YL-RS-01, TI5N, TK/DL4FF, TN2T, TO3X, TU2/F5PTM, TU2T, V5/DK9IP, V51VV, VE3RZ, VE3XL, VE7IMD, VK4TT, VK9LA, VP8ORK, W1AW/90, W3STX/KH0, XV2DLH, XV3AA, YL2PN and YM94KK

T4, CUBA (ILLW Op!). Members of Federación de Radioaficionados de Cuba (FRC) and the Cuba DX Group (GDXC), will activate several stations for the next International Lighthouse Lightship Weekend (ILLW). Look for the following stations:
Roncali Lighthouse - Callsign T40C; Ref. No. ILLW CU0002; QTH Cabo San Antonio; activity on HF/6m using SSB/CW/DIG; WW
Loc. EL71; QSL via EA7FTR.
Morro Castle Lighthouse La Habana - Callsign T49C; Ref. No ILLW CU0003; activity HF on SSB/CW; WW Loc. EL83; QSL via K8SIX
Maya Lighthouse - Callsign CO9EAA; Ref. No. ILLW CU0005; activity HF on SSB; WW Loc. EL93; QSL via the Bureau
Morro Castle Santiago de Cuba Lighthouse - Callsign T48SC; Ref. No. ILLW CU0004; activity HF on SSB/CW; WW Loc. FK19; QSL
via Bureau.
Punta Maisí Lighthouse - Callsign T48FM; Ref. No. ILLW CU0001; activity HF on SSB/CW; WW Loc. FL20; QSL via Bureau

TX5, AUSTRAL ISLANDS. Operators Grant/KZ1W and Rob/N7QT will be operating from Raivavae Island (OC-114) on an Elecraft/SteppIR/WWDXC sponsored DX-pedition between October 2-14th. They will be using the new CrankIR portable antenna system from SteppIR, as well as Elecraft K3 transceivers and KPA500 amplifiers. The TX5? callsign is still pending, and this announcement will be updated when it is issued. Their operational base will be two bungalows located on the north side of Raivavae Island, and less than 20 feet from the Pacific Ocean. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK. Log will be updated daily to Clublog <www.clublog.org> with QSOs data/history; internet bandwidth permitting. QSL available via LoTW, eQSL, by the Bureau, or direct (SASE + IRC).

V4, ST. KITTS. John, W5JON/V47JA, informs OPDX that he will be active once again from his vacation home in Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG) between October 10th and November 10th. Activity will be on SSB and the RTTY/Digital modes. He will also use his contest callsign V49J during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band entry. Equipment is a Kenwood TS-590S and Elecraft KPA500 Amplifier. Antennas include: a 80-10m Multi-band Dipole, and metal roof mounted S9, 18' and 31' Verticals and 3 element Yagi for 6m. Also, XYL Cathy, W5HAM, will occasionally operate as V47HAM. ALL QSLs go to W5JON direct

or via LoTW. NO Bureau QSLs.

ZL, NEW ZEALAND. Atsu, 5W1SA, will be active as ZL1EA with QRP rig between
September 7-10th. He states that there is a good chance for him to be
active from Rotorua, the lakeside of the island on September 8th. QSL
via LoTW.

21487. Re: [DX-IS] New address for GACW website

Yahoo group: DX-IS (2013)
Date: 2013-08-12 01:20:56 UTC
From: Ted Melinosky
Topic: 21482 Message: 21487

Hello Raul:

I have made the change as you asked.
But when I look at the website, I do not see links for the awards. Did I miss them? What are they called?

Best wishes,

Ted K1BV

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30812
SIDC SOLAR BULLETIN 12 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 12 Aug 2013 until 14 Aug 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 12 Aug 2013 10CM FLUX: 114 / AP: 008
PREDICTIONS FOR 13 Aug 2013 10CM FLUX: 118 / AP: 007
PREDICTIONS FOR 14 Aug 2013 10CM FLUX: 120 / AP: 007
COMMENT:NOAA AR 1817 is expected to be the main player in the coming 48 hours with
risks of M class flares. It evolved rather quickly in the past 24 hours,
and it is now a complex and elongated sunspot group. The central part shows
a wide penumbra making the link between two opposite polarity sunspots.
Strong C flares occurred in this region on August 11 (C6.7 at 2131UT and
C8.4 at 2158 UT peak time). A M1.5 flare occurred in this region on August
12, 1041 UT peak time. Indirect signatures of CMEs were observed, on disk,
with EUV imagers, but data gaps in coronagraphic data during these flares,
do not allow to confirm this. We expect active flaring conditions in the
next 48 hours. C flares are possible for NOAA AR 1818. We foresee mostly
quiet conditions in terms of geomagnetic activity for the next 48 hours.
Current interplanetary conditions, as measured by ACE are quiet.

21489. Beta test of spot quality filtering for RBN spots

Yahoo group: DX-IS (2013)
Date: 2013-08-12 21:34:20 UTC
From: Pete Smith N4ZR
Topic: 21489 Message: 21489

It's been a busy and rewarding couple of weeks. Sometimes, I'm quite overwhelmed by the willingness of hams to invest large amounts of time and intelligence in advancing our hobby, not for any personal gain but simply because they care and enjoy what they are doing.

This is one such case. The AR Cluster V6 Telnet server at the RBN has just been replaced with a beta version that provides quality scores for each RBN spot, as well as filters enabling users to apply those scores to limiting the spots they receive. Note that if you don't set any of the new filters, the node will continue to function as it always has, except for the addition of a validity code as part of the comment on each RBN spot. All existing filters will continue to work as before.The full story is at
<http://www.ab5k.net/ArcDocsVer6/UserManual/ArcDx_CT1BOH.htm>
<http://www.ab5k.net/ArcDocsVer6/UserManual/ArcDx_CT1BOH.htm>.

Special thanks to CT1BOH, who did extensive analysis of RBN data and developed the innovative algorithms being used, and to AB5K, for the hard work of coding and testing the filters for incorporation in this new version of his cluster software.

While users will see the new tags in spots coming from the RBN ARC6 Telnet server, in order to use the filters the node they are connected to must be running the beta server software as well.Users can test with the RBN node at arcluster.reversebeacon.net, port 7000.Node sysops who want to try the beta are encouraged to contact AB5K.

These are the validity codes:

? - Not yet verified. The first and/or second identical spot of the same station, including erroneous spots of callers
V - Valid, meaning that at least three identical spots (call and frequency) have been posted by Skimmers worldwide
Q - QSY?, meaning that it is the first and/or second spot of a station on a new frequency, where spots of that station were previously verified. Sometimes, this will be a legitimate QSY, but the tag may also indicate an I/Q image of a good spot.
B - Bust, based on whether a new spot is enough like ones already seen and tagged Valid, except for a difference in the callsign.This is based on a really clever applied math concept called the Levenshtein distance. Google for more info.
. - Unique, meaning that there are only one or two stations currently spotting stations in a given country. Will often change to V if more stations spot it, but in the meantime you won't miss that P5 because only one RBN station heard it.

You can filter so that you get only Valid spots, or so that you can block all busted spots, or so that you get no Q spots until they are verified (so I/Q images will not come through). You can even tell the cluster node to let through spots with a "." tag, so you don't miss the really rare one who is only spotted by one or two stations. Full info and examples at the URL above.

I do not assume that this is the last word on improving RBN spot quality. Beta means beta. Please experiment, see what you think, and let me know. One particularly fruitful line of inquiry would be to compare the arrival time of unfiltered spots and spots that have been judged Valid, to note instances when an apparently legitimate spot doesn't get through or is judged to be a bust, or when a bust is not caught.

In this connection, in testing we have noticed that sometimes a Busted call will be mistakenly judged Valid, because there are more busts than good spots in a time window. Often, this seems to be due to spacing errors (RN4ZR for N4ZR), frequent omission of portable designators by ops (N4ZR instead of P5/N4ZR), and PTT cutting off the first dit (E4ZR for N4ZR)

Please send your comments/reports to me, and I'll see to their onward distribution. Do not send them to this reflector!

73, Pete N4ZR
Check out the Reverse Beacon Network at
http://reversebeacon.net,
blog at reversebeacon.blogspot.com.
For spots, please go to your favorite
ARC V6 or VE7CC DX cluster node.

21490. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-08-13 14:01:03 UTC
From: Paul Dunphy
Topic: 19749 Message: 21490

```
:Issued: 2013 Aug 13 1225 UTC

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30813
SIDC SOLAR BULLETIN 13 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 13 Aug 2013 until 15 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 13 Aug 2013 10CM FLUX: 120 / AP: 011
PREDICTIONS FOR 14 Aug 2013 10CM FLUX: 124 / AP: 017
PREDICTIONS FOR 15 Aug 2013 10CM FLUX: 128 / AP: 018
COMMENT: Solar activity is expected to be eruptive with C class flares likely from
NOAA ARs 1817 and 1818. There remains a small risk for an isolated M class
flare to occur in one of these two regions. A CME was associated with the
M1.5 flare of Aug. 13, but coronagraphic data suggest that the bulk of the
CME is essentially going southward, and that it will miss the Earth. We
expect mostly quiet geomagnetic conditions for the next 24 hours, and then
unsettled to active conditions by the end of Aug. 14, due to a coronal hole
becoming geoeffective.
TODAY'S ESTIMATED ISN : 077, BASED ON 13 STATIONS.

#-----------------------------------------------------------------#
SIDC URSIGRAM 30814
SIDC SOLAR BULLETIN 14 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 14 Aug 2013 until 16 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 14 Aug 2013 10CM FLUX: 131 / AP: 017
PREDICTIONS FOR 15 Aug 2013 10CM FLUX: 135 / AP: 012
PREDICTIONS FOR 16 Aug 2013 10CM FLUX: 138 / AP: 007
COMMENT: We expect solar activity to stay at eruptive levels with risks of C class
flares essentially from NOAA ARs 1817 and 1818. A small eruption occurred
to the west of AR 1817 on Aug. 13, around 1230 UT. It was associated with a
CME which appeared to be non geoeffective. Geomagnetic activity is expected
to be mostly unsettled for the next 24 hours, as the Earth entered a fast
wind stream linked to a coronal hole in geoeffective position. Current
observations by the ACE spacecraft show a solar wind speed around 450 km/s
and Bz fluctuations diminishing compared to the last 20 hours.

21492. Rohn 45G Saddle Clamps

Yahoo group: DX-IS (2013)
Date: 2013-08-14 14:35:25 UTC
From: GARY HUBER
Topic: 21492 Message: 21492

I will soon take down my 30 year standing Rohn 45G tower and replace it with new Rohn 45G tower. One item now NO longer available from Rohn are saddle clamps which are used with the house bracket and other items which utilize a U-bolt with one and one-half inch leg spacing. The saddle clamps fit around (almost half way) the one and one-quarter inch O.D. tower leg with a pair being used with each U-bolt.

I have NOT been able to find a replacement or a source for Rohn 45G saddle clamps. I need at least four pieces. If you have a source, please email me direct; AB9M at ARRL dot NET.

Best regards,

CSM(r) Gary L Huber – AB9M

Thanks Jim, but not what I need. What I'm trying to replace fits between the bottom of the U of the U-bolt and the tower leg and a second one reversed would form an O around the tower leg.

I wonder if these would work?

http://www.cycle-24.com/u-bolt-saddle-clamps/u-bolt-saddle-clamps-for-1-25-inch-tubing/

If I understand you correctly, you want the saddle, without the
U-bolt? Maybe if you contact them, they can sell you some of the
saddles only.

21496. RE; Rohn 45G Saddle Clamps

Yahoo group: DX-IS (2013)
Date: 2013-08-15 00:06:03 UTC
From: GARY HUBER
Topic: 21496 Message: 21496

Thanks to all for responding, but no I have not seen anything at DXenginering which comes close to meeting the requirement to fit in the bottom of the U of the U-bolt with a reversed piece over the legs of the U-bolt forming an O around the tower leg. The leg is one and a quarter inch O.D. the legs of the U-bolt has a one and a half inch separation, so the saddle clamps are a little less than one-eighth thick and two of them act as a shim and pad to spread the clamping force rather than the U-bolt radial circumference against the contact point of the leg.

I may have to reverse engineer a pair of http://www.dxengineering.com/parts/dxe-sad-125a on each leg with a squared bottom U-bolt, or something similar. Rohn just uses a one and a quarter inch space between legs U-bolt now for the 25G and 45G current house bracket, so I may have to get my head wrapped around the idea that just a U-bolt is good enough.

Best regards,

21498. RE: Rohn 45G Tower Saddles

Yahoo group: DX-IS (2013)
Date: 2013-08-15 13:37:16 UTC
From: GARY HUBER
Topic: 21498 Message: 21498

I have located a source of New Old Stock (NOS) Rohn Hardware including the tower saddles I need . As I do NOT have authorization to reveal details, I will not, until I have permission, then only to those who contact me off-list unless the source says otherwise.

Thank you to all who have responded via the reflectors or direct..... I should have done this months ago.

Best regards,

CSM(r) Gary L Huber

DX Bulletin 33 ARLD033
>From ARRL Headquarters
Newington CT August 15, 2013
To all radio amateurs

SB DX ARL ARLD033
ARLD033 DX news

This week's bulletin was made possible with information provided by IZ1JLF, NC1L, PS7DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SRI LANKA, 4S. Members of the Radio Society of Sri Lanka plan to be QRV as 4S7LGT from the Dondra Head Lighthouse, ILLW LK-0001, during the ILLW. Activity will be on 40 to 15 meters. QSL via 4S7LGT.

WEST MALAYSIA, 9M2. Operators 9M2YOT, 9M2AUR, 9M2ESM, 9M2ARR, 9M2TRX, 9M2UST, 9W2GSG, 9W2EJT, 9W2JUM, and 9W2FNN will be QRV from the Pulau Undan Lighthouse, ILLW MY-0017, on Undan Island, IOTA AS-097, for the ILLW. Activity will be on 40 to 10 meters using CW and SSB. QSL direct via 9M2YOT.

CHILE, CE. Look for a group of operators to be QRV as T40C in the ILLW from the Roncali Lighthouse, ILLW CU-0002. Activity will be on the HF bands and 6 meters using CW, SSB and digital modes. QSL via EA7FTR.

PORTUGAL, CT. Members of the ARVM will be QRV as CS2HNI from the Farol do Forte do Cavalo Lighthouse, ILLW PT-0012, during the ILLW. Activity will be on 40, 20, 15 and 10 meters using SSB. QSL via CT1RVM.

CANARY ISLANDS, EA8. Members of the Grupo DX Gran Canaria and URE Las Palmas will be QRV as AO8LH from the Punta de la Aldea Lighthouse, ARLHS CAI-032, during the ILLW. Activity will be on the HF bands using CW, SSB and RTTY. QSL via EA8AKN.

WALES, GW. Peter, G8CQH and Matt, G4WMH will be QRV as GC0OBS during the ILLW. QSL via G4WMH.

REPUBLIC OF KOREA, HL. Members of the Gwangju DX Club are QRV as D7G from Jindo Island, IOTA AS-060, until August 18. Activity is on 80 to 10 meters using CW, SSB, RTTY and PSK. QSL via 6L0NJ.

ITALY, I. Members of the La Spezia ARI Team will be QRV as IP1T from Tino Island, IOTA EU-083, during the ILLW. Activity will be on the HF bands including 6, 4 and 2 meters. QSL via IZ5JLF.

BELGIUM, ON. Francois, ON4LO plans to be QRV as ON4LH/LH from the Antwerpen Harbor Lighthouse, ARLHS BEL-042, during the ILLW. Activity is on 80 to 10 meters. QSL to home call.

GREENLAND, OX. Operators Unni, LA6RHA, Mio, JR3MVF, Chae, HL1KDW, Kay, WA0WOF and Solveig, SM6KAT are QRV as OX5YL from the club station in Kangerlussuaq, IOTA NA-018, during the Greenland YL Expedition 2013. QSL via PA5YL.

NETHERLANDS, PA. Special event station PA6SAIL will be QRV from August 19 to September 10 during the maritime event Sail de Ruyter in Vlissingen. Activity will be on the HF bands, including 6 and 2 meters, using CW, SSB, RTTY and PSK. QSL via PA3GEO. In addition, look for station PA6WOSHELL to be QRV from Shell Tower during the ILLW. QSL via PA1WO.

BRAZIL, PY. Look for ZX7T to be QRV in the Verde Amarelo contest. QSL via PS7HD.

POLAND, SP. Operators SP2BIK, SP2BRN, SP2IZC and SP2TQW will be QRV as SN2NP from the Nowy Port Lighthouse in Gdansk during the ILLW. QSL via SP2BIK.

DODECANESE, SV5. Alex, UR5FAV is QRV as SV5/EM5F until August 24. Activity is on the HF bands. QSL to home call.

AUSTRALIA, VK. A group of amateurs are QRV as VK5CWL until August 20. Activity is on 160 to 6 meters using CW, SSB and PSK. This includes an entry in the ILLW from the Cape Willoughby Lighthouse, ILLW AU-0095. QSL via VK5PAS.

OPERATION APPROVED FOR DXCC CREDIT. The following operation has been approved for DXCC credit: Republic of South Sudan, Z81X, 2013 operation. If you had this rejected in a prior application, send a note to bmoore (at) arrl.org to be placed on the list for an update to your record.

THIS WEEKEND ON THE RADIO. ARRL Rookie RTTY Roundup, ARRL 10 GHz and Up Contest, North American SSB QSO Party, International Lighthouse/Lightship Weekend (ILLW), QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint CW Ladder, SARTG World Wide RTTY Contest, Russian District Award Contest, Keyman's Club of Japan CW Contest, Feld Hell Sprint, CVA DX CW Contest and the SARL HF Digital Contest are all scheduled for this upcoming weekend. The Run for the Bacon QRP CW Contest and NAQCC-EU Monthly CW Sprint are scheduled for August 19. Please see August QST, page 73 and the ARRL and WA7BNM

contest web sites for details.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1122
BID: $OPDX.1122
August 5, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, K2SX, N2OO, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, K4SV, N4JF, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, AT International, DK8JB & The DX News Letter, DL1AL, DL1SBF, DxCoffee.com, DX-World.Net, EA2EA, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, F6FQK, G3SXW, HK6DOS, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OM3JW, ON4CAS, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF), XR0ZR Team and ZS6RJ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th-July, through Sunday, 4th-August there were 221 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, P5, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S0, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUEZ ISLAND. After the success of the J52EME DXpedition by the Verona DX Team, the team is pleased to announce the activation Rodriguez Island (AF-017), for EME activity on 144 and 432 MHz as well as HF oper-

ations between September 1-9th. The team is currently awaiting approval of the callsign 3B9EME. Operators mentioned are Walter/I3VJW (CW & Digital), Luc/I3LDP (SSB), and Rony/IZ3KIF & Alessandro/IK5MIC (SSB & Digital). They will have 2 stations on at the same time on the HF bands, with an emphasis on 160/80/40/30/17/12 meters, using CW, SSB, RTTY, JT65hf and PSK31. Suggested frequencies are:
CW - 1825, 3520, 7020, 10105, 14020, 18075, 21020, 24895 and 28020 kHz
SSB - 1835, 3780, 7065/7160, 14150, 18150, 21300, 24945 and 28430 kHz
RTTY - 3580, 7050, 10140, 14080, 18100, 21080, 24920 and 28080 kHx
6M - SKEDs

For more details, visit the 3B9EME Web site at:
http://www.ari.verona.it/veronadxteam/3b9_2013.htm

3DA0, SWAZILAND (Update to OPDX.1120). Roger/ZS6RJ and a Multi-International team of operators will be active as 3DA0ET from Piggs Peak, Swaziland, between November 18-27th. Some of the operators also took part in the 2012 7P8D DXpedition. According to Frosty, K5LBU, the 3DA0ET team is still looking for operators, especially some RTTY operators. Currently, operators mentioned are Emil/DL8JJ, Frosty/K5LBU, Neil/VA7DX, Keith/VE7MID, Sam/ZS6BRZ and Roger/ZS6RJ. If you are interested in be an operator, contact: Roger/ZS6RJ at: roger.jones@...
Frosty/K5LBU at: 3da0cf@...
They plan to have 4 stations on the air, covering all the HF bands (160-10 meters) and 6 meters using CW, SSB and RTTY. There will be a focus on RTTY and they plan to have a dedicated full-time RTTY station on the air from start to finish. Roger, ZS6RJ, informs OPDX readers, "We're also running an up-front survey (link on the home page) asking DXers what bands/modes etc. they need the most for Swaziland. We're going to use the information we get as a tool to focus our areas of concentration in our operating schedule once we're there and try to hit the 'most wanted' band slots per continent." Activity will also include the CQWW DX CW Contest (November 23-24th) as a Multi-two entry. Dick, N7RO, will be the QSL Manager for 3DA0ET. Tony, LZ1JZ, will be printing and supplying the QSL cards. QSOs will be uploading daily to LoTW and ClubLog. They will not be using eQSL. More specific details about direct and Bureau QSLs will follow in due course, closer toward the end of the DXpedition. Watch the 3DA0ET Web page for updates at:
http://www.swazidx.org

4O, MONTENEGRO. Operators Goran/YT7AW and Ivan/YT4RA/IV3CTS will be active as 4O/homecall from Montenegro between August 6-15th. Activity will be starting from Durmitor National Park (4OFF-002), and then followed by seaside activity, with possible stopover on EU-163 (Crna Gora). QSL via their home callsigns as per QRZ.com.

5A, LIBYA (Update). Abubaker, DL1AL, who is now active as 5A1AL near Tripoli, informs OPDX that his stay will depend on the holiday and the business here and there. Activity this past week has been on 40/30/20/6 meters CW and 20 meters SSB. QSL via DL1AL.

5C0, MOROCCO. The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) in partnership with the "Association royale des Radio Amateur du Maroc" (ARRAM) will be active as 5C0CE at 2300z, August 19th. Activity is to commemorate the Revolution, the King and the People, (August 20th) and Youth Celebration's Day (August 21st). Operations are usually on all HF bands and modes, and possibly the satellites. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr
The ARRAM Web site is at: http://www.arram.org
QSL cards will be printed beginning September.

5H, TANZANIA (Just A Reminder). NODXA member Byron, KF8UN, will be active as 5H3BB from here between now and August 20th. He will be there on a safari with his YL Sandy, K8FUN. Activity is possible on 40-15 meters, but mostly 20 meters and on SSB with some CW. He will use an IC-706 into a mag mount vertical and/or dipole. QSL via his home callsign direct.

8Q, MALDIVES. Operators Herbert/DL7AHF and Michael/DG8MH will be active as 8Q7HF and 8Q7MH, respectively, from the Maldives Islands (AS-013) until August 11th. QSL via their home callsign.

9M2, WEST MALAYSIA. Toru, JH0CJH, will once again operate as 9M2/JH0CJH from Kuala Lumpur between August 5-9th. Activity will be on all HF bands and 6 meters, but mainly 40-10 meters. Mode will be mainly CW, but he will try to work on RTTY and PSK31. QSL via his home callsign, direct, by the Bureau or LoTW.

9M2, WEST MALAYSIA (Update IOTA/LH Op!). Members of the Melaka DX Team will be active as 9M2MI (not 9M4LHU as first announced) from the Pulau Undan LightHouse on Undan Island (AS-097, WLOTA LH 3792, ARLHS WMA 013) between August 16-18th. Their activity will include this year's International Lighthouse/Lightship Weekend [ILLW] (August 17-18th). Activity will be on 40/20/17/15/12/10 meters using CW and SSB. Operators mentioned are Mohd/9M2YOT, Aimil/9M2AUR, Syamsul/9M2ESM, Abdul/9M2ARR, Kamarul/9M2TRX, Mohamad/9M2UST, Nazmi/9W2GSG, Mohd/9W2EJT, Hanizan/9W2JUM and Khairul/9W2FNN. QSL via 9M2YOT direct only. Look for more details and updates at: http://www.melakadxclub.blogspot.com

AO8, CANARY ISLANDS (LH Op!). Members of the Grupo DX Gran Canaria and URE Las Palmas will be active as AO8LH from Puna de la Aldea Lighthouse (DME: 35020, DIE: S-005, FEA: D2814.7, CAI: 032, EAFF-078) during the ILLW, August 17-18th. Activity will be on all HF bands using CW, SSB and RTTY. The ARLHS number is currently unassigned. QSL via EA8AKN and LoTW.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
4S7NZG ☐ Sri Lanka (renewal); 2013 Operation
6O0LA ☐ Somalia; 2013 Operation
9M4SLL ☐ Spratly Islands; 2012 ☐ 2013 Operations
9Q6CC ☐ Democratic People's Republic of the Congo; 2010☐2011 Operation
9X0EME ☐ Rwanda; 2013 Operation
T6JM ☐ Afghanistan; 2012 Operation

XW0YJY ☐ Laos; 2013 Operation
XW4XR ☐ Laos; Current Operation
Z80ID ☐ South Sudan; Special 1-Day operation for Independence Day
celebration July 9th, 2013

NOTE: If you've had any of these rejected in a prior application,
send a note to <bmoore@...> to be placed on the list for an update
to your record. Also, please note the submission date and/or reference
number where the rejection was noted to expedite the search for any
rejected QSOs.

EA8, CANARY ISLANDS. Bob, DL7VOA, will be active as EA8/homecall between
now and August 17th. Activity will be holiday style, CW and mainly during
his evening night. QSL via DL7VOA, direct or by the Bureau.

EA8, CANARY ISLANDS. Andrew, G7COD, will be active as EA8/homecall from
Gran Canaria (AF-004, DIE S-005, WLOTA L 0969) between August 9-31st.
Activity will be on 30-6 meters using CW and SSB. QSL via his home
callsign, direct, by the Bureau or eQSL and LoTW.

EH200, SPAIN (Special Event). Members of the Union de Radioaficionados
de Donostia (URD) will activate the Spanish special event station EH200D
from La Mota Castle between August 24-25th, and then again from the URD HQ
(EA2URD) between August 31st and September 1st. Activity is to commemorate
the bicentenary of the reconstruction of Donostia- San Sebastian. QSL via
EA2URD. More detailed info is available on QRZ.com and on the Web page:
http://www.ea2urd2013.blogspot.com.es

FOC PRESS RELEASE (FOCUS75 Magazine). Roger, G3SXW, FOC Committee Secretary,
sent out the following on July 29th: "During the month of May 2013 the
First Class CW Operators' Club hosted a CW QSO Party, FOC75, to help
celebrate the Club's 75th Anniversary. This turned into a major CW fun
event for the whole month. Over 60 stations around the world signed with
the *FOC prefix, making over 200,000 CW QSOs and leading to over 1,600
applications for our commemorative certificate - well beyond our wildest
dreams. This was a major tribute to Samuel Morse, Alfred Vail and to the
Club's motto: 'A man should keep his friendship in constant repair'
(Samuel Johnson, 1709-1789).
FOC publishes a quarterly magazine for its members called 'FOCUS', a
high-quality magazine edited by Gabor, S57WJ. But this FOC75 event met
with such huge success that we have decided to publish an extra edition,
called 'FOCUS75'. FOC is pleased to share this special edition of our
magazine with not only members but also anyone who enjoys CW. Just go
to <http://www.g4foc.org/> to down-load it. Read the whole story of this
month-long celebration of Morse Code, especially the operating experiences
around the world, and see photos of those who made it happen in a pull-out
poster.
CW is alive and well and will remain so for at least the next 75 years -
FOC will see to that!"

FT5ZM AMSTERDAM ISLAND DXPEDITION UPDATE (From The FT5ZM Web Page).
[edited] "The Amsterdam Island DXpedition team wants to hear well and be
well heard on the low bands. This means we need a lot of wire.
WB9Z, with the help of NV9L, K9NU, N9TK, K9TP, N9LAH, W9ILY, KE9I, K9CJ,
and 'Lee', has prepared over 10,000 feet of radials for our 30, 40, 80,
and 160 meter verticals. We will also have several low band receive
antennas ☐ both wire antennas and a receive 4-Square. In the photo
<http://www.amsterdamdx.org/wp-content/uploads/DSCF0105-150x150.jpg>,
Jerry ☐ WB9Z, and our pilot, Val ☐ NV9L, are shown with over 10,000 feet
of pre-cut radials and over 10,000 feet of coax cut to length with
connectors attached."

HC, ECUADOR. Emanuelle, IK2OHG, will be active as HC2IOH from Guayaquil
between August 10th and September 12th. Activity will be holiday style
on 40-10 meters, including 30/17/12 meters, using CW, SSB and RTTY. QSL
via his home callsign, direct, by the Bureau or LoTW.

IOTA NEWS.............
AS-060. Members of the South Korean Gwangju DX Club (6L0NJ), will be
active as D7G from Jindo Island between August 16-18th.
Activity will be on 80-10 meters using CW, SSB, PSK and
RTTY. QSL via 6L0NJ, by the Bureau or direct.

AS-109. REMINDER! Members of the Russian Robinson Club (RRC) continue
to activate various islands and lighthouses to celebrate the
RRC's 20th anniversary until September 30th. Look for the RT9K
team to be active as R20RRC/8 from Zhuravlinyi Island (RR-026-43)
between August 9-14th. Activity will be on 40-10 meters using
CW, SSB and PSK. QSL R20RRC/1 via RZ3EC. For more details and
updates, watch: http://robinsons.ru

EU-008. JUST A REMINDER! Operators Andy/M1LOL and Ray/M1REK will be
active as MM1REK from the Isle of Coll (IOSA NH05, SCOTIA DI12,
WLOTA 2123) in the Inner Hebrides group between August 5-10th.
Activity will be on 80-10 meters SSB and the Digital modes.
QSL via M1REK, by the Bureau or direct. See the Web site at:
http://www.m1rek.co.uk/isle-of-coll

EU-037. Ric, DL2VFR, will be active as SD7V from Öland Island starting
Saturday, August 10th, until Friday, August 23rd. Activity
will be mostly on CW and some SSB. Also, a short entry in the
ILLW (August 17-18th) is possible from Tokenäs Udde Lighthouse
signing SD7V/LH. QSL for SD7V only via DL2VFR (by the Bureau,
LoTW, eQSL or direct).

NA-058. Twelve operators from the Tamiami ARC will be active as K4S
from Sapelo Island between September 12-14th. Activity will
be on 160-10 meters using CW, SSB, RTTY and PSK.

NA-134/ (Update) Bo, OZ1DJJ, is now active as OX3LX from Kangerlussuaq
NA-243. until August 5th. Look for him to activate Aasiaat Island
(NA-134) between August 5-9th, but after that look for him
to be active from NA-243 a week later (August 15-23rd).

Activity will be active on the HF bands. QSL via OZ1PIF.
For more info and updates, see: http://geronne.dk

OC-197. Adhi (Bimbo), YB3MM, will be active as YB3MM/p from Bawean Island sometime soon. For updates, watch his Web Blog page at: http://www.yb3mm.com

OC-233. Tony, VK3VTH, will be active as homecall/7 from King Island between August 15-18th. Activity will be on 40/20 meters using SSB. He will also be in the International Lighthouse/Lightship Weekend, from Currie Lighthouse (AU-0016), August 17-18th. QSL via VK3VTH, direct or by the Bureau. Bureau cards will be sent for all QSOs immediately after the activation. No LoTW or eQSL for King Island operation.

OC-236. Operators Kadek/YB9BU and Teddy/YC1BPO will be active as homecall/8 from Gangga Island at the end of August.

OC-276. (Update - NEW ONE!) Members of the "ORDA PAPUA DXPEDITION TEAM" will activate for the first time Mapia Island as YB9Y between October 20-28th. Operators mentioned are Yanuarius/YB9YZ, Triadi/YB0KVN, Faisal/YB1PR, Pri/YB0ECT, Gjellani/YB1GJS, Tatang/YB1MH, Wisnu/YB0AZ, Ronny/YB9WR, Jozardy/YD1JZ, Kasmuri/ YD1MRI, Danu/YD1GCL, Terry/YC1KAF, Rizal/YD1ORZ, Suryadi/YB0JS, Yoyon/YB1CCF, Heri/YB1KAR, Terry/YC1KAF, YL Ria/YC0KVM, YL Susana/YD1LUX, Randi/YC0RAN, Syafruddin/YB9SB, YL Laily/YB0TSU, Edy/YD1XUH, Achmad/YC1CDV, Wahyu/YC1CWK, Ujang/YC0LLY, Sadao/ WK1S/JA1PBV and Dervin/PD9X. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via YB1GJS, direct or by the Bureau. A OQRS will be used on ClubLog. For more details and updates, see: http://yb9y.com

J3, GRENADA (Update to OPDX.1104/1105). Operators Tom/OE2ATN and Franz/ OE2SNL had to cancel their suitcase DXpedition to Grenada Island between October 28th and November 10th.

NEW WEB PAGE (New Voodoo Contest Group Web Site). Roger, G3SXW, sent out the following press release on July 29th [edited]: "The Voodoo Contest Group has taken part in CQ World-Wide CW Contest from West Africa each November for the past 19 years, operating in ten different countries. We have won the Multi-Operator contest six times. Thirty different operators have participated over the years, travelling from UK and USA.
In 2004 we published a book: 'Contesting in Africa: Multi-Multi on the Equator' describing the first ten years. It is now time to update the story. The timing of this is important because we have now come to the End of an Era, so to speak: we will no longer return to West Africa to take our large stock-pile of equipment out of storage for the 20th time. It has been donated to the Liberian Amateur Radio Association.
The modern form of 'book' is a web-site - so we have developed one.
The group offers a huge vote of thanks to John Warburton, G4IRN, for investing so much skill, time and energy into this project. The site comprises offerings from many of the Contest group and tells, hopefully in detail but also in an entertaining way, the story of these past 19 years. All the facts and figures are there but more importantly also the experiences: those long bus-journeys between countries and the fascinating sights along the way, visiting African villages, and every amateur radio aspect from managing pile-ups, to maintaining deteriorating amplifiers, to negotiating transmitting licences and much, much more, embellished with many video clips. The group has certainly learned a lot about life in West Africa and thoroughly enjoyed every minute, every challenge.
Visit <http://voodoocontestgroup.com> to join us on those amazing journeys, laugh with us, take part in our celebration of two decades, almost two sunspot cycles, of Contest DXpeditioning.
Enquiries: Roger Western/G3SXW <g3sxw@...>, John Warburton/ G4IRN <G4IRN@dxdx.co.uk>"

OO AWARD 2013 (Update). On July 21st, His Royal Highness Prince Philippe became the new king of Belgium and His Royal Highness King Albert II has reigned for 20 years. For both occasions, all radio amateurs with a Belgian license will be allowed to use the prefix "OO" instead of "ON" from July 21st until and including September 20th, 2013. Belgian vanity callsigns (with only one letter in the suffix) may not change their prefix. Some vanity callsigns already have an "OO" prefix.
The Belgian IARU Society UBA is issuing a commemorative award for working a specific number of these OO stations. Details are as following:

Stations located in	Number of different OO stations needed	Among those worked, minimum of OO prefixes needed
Belgium	25	5
Europe, except Belgium	15	3
Outside Europe	7	2

Please note that only OO stations with at 2 or 3 letters in their suffix count towards this award. Each OO stations can only be counted once regardless of the band/mode used. The award will be issued in electronic (PDF) version. No fee required. Log extracts should be mailed before the end of 2013 to the UBA Award Manager Egbert Hertsen ON4CAS: Egbert.hertsen@...

SWL stations may apply while indicating the callsign the OO stations had QSO with. The awards will be sent out mid October 2013.

PJ6 & PJ7, SABA AND SINT MAARTEN. Operators Rob/N7QT and Hugh/W4VAB will be heading to both Saba [NA-145] (November 7-17th) and Sint Maarten [NA-105] (November 17-24th) Islands on a suitcase mini-DXpedition. They will be using the new CrankIR portable antenna system from SteppIR, as well as Elecraft KX3/K3 transceivers. Activity will be on 80-10 meters using the following modes: CW, SSB and digital modes (RTTY, PSK and JT65). Operating callsigns on Saba will be PJ6/N7QT and PJ6/W4VAB. While on Sint Maarten, callssigns will be PJ7/N7QT and PJ7/W4VAB. QSL information: via LOTW, eQSL, Bureau, or Direct(SASE + IRC).

PJ7, SINT MAARTEN. Operators Dennis/K2SX, Les/W2LK and Andy/K2LE will be active as homecall/PJ7 from Dawn Beach on the eastern side of St. Maarten (NA-105, WLOTA 0711) between November 19-26th. QSLs should go to their home calligns. Activity will include this year's CQWW DX CW Contest (November 23-24th) using a special callsign, yet to be determined. QSLs for the contest operation should go to W2LK. K2SX and W2LK have previously operated together in the CQWW contests from V31, KH6 and from Andy's super station K2LE in VT. K2LE has also been active in contests from P40LE.

ATBSG13 via: Bharat Scouts & Guides, 16 M.G.Marg, I.P.Estate, New Delhi 110002 India. Members of the Bharat Scouts and Guides activate this special callsign for the 9th Asia-Pacific Regional/Internet Jamboree. Operators were VU2RBI, VU2TCU, VU3KRT and VU3OWL.

H44IOTA QSL STATUS. QSL Manager Rex, NR6M, reports, "All QSL request for H44IOTA that I have received have been mailed out." ADDED NOTE: Rex reports, "H44IND has been validated by RSGB".

N2OB was active from Long Beach Island (NA-111),NJ, from the Barnegat Lighthouse "Old Barney" (ARLHS USA039), on August 4th. QSL via N2OB.

NEW MANAGER. Oscar, HK6DOS, reports that his new QSL Manager is now Francisco, EA7FTR.

OM QSL BUREAU CHANGE. Steve, OM3JW, OM QSL Bureau Manager reports: "Postal address of Slovak QSL Bureau was changed. New address is: Slovak Amateur Radio Association (SARA), P.O.Box 14, 900 31 Stupava, Slovakia. If you will send QSL by courier you must use address: Stefan Horecky OM3JW, Mlynska 2, 900 31 Stupava, Slovakia (mobil phone +421 903 860 235). Don't use PO Box please!"

QSL ROUTE CHANGE. Phil, N1KI, reports that he is no longer the QSL Manager for CO2WF and T40C. He states, "We had a good run, and I wish much DX and good luck to Winty."

QSL RECEIVED VIA LoTW: 5W0XT, 7Z7AB, FO4BM, FP/KV1X, GJ6YB, HK0/F6BFH, HK4SAN, JO3JIS, JT1RF, KX0XH, LT0N, LU4ECN, MJ/PA1AW, P29NI, P29VPB, R3AW, RA9CMO, RX1CQ, S55O and VA7ST

QSLS RECEIVED VIA MAIL: 3D2RX, 5N7M, 5T0SP, 6W/HA0NAR, 7T9A, 7X5KBS, C4W, D44TWO, E51M, E51EWP, ET3AA, EY8MM, FT5ZB, GS3PYE/p, H44S, J49C, J5NAR, OH1VR/VP9, SU8N, SU1IE, TO2D, TS8TI, TX5K, TZ6BB and YE1Z

QSLS RECEIVED VIA THE BUREAU: 3B9/OE4AAC, 3Z2012RKT, 4O1A, 4O3A, 4O7A, 8J1ING, 8J1R, 8J1RL, 8Q7OE, 9M2TO, AH0BT, B3C, BY1WXD/1, BY1WXD/5, C31CT, DR20BRA, FM5LD, H44GL, HF2012EFC, HS0ZJU, IS0HFE, KH0/JS1KSU, LZ1500PNB, LZ1737SSS, LZ916SS, OH0HG, SN2012GD, SN2012JZU, SN2012WA, SV9COL, T88KF, TJ3AY, TK5AE, TO4M and WH2DX

SILENT KEY. It has been reported by several sources that [edited], "Tom Christian, VP6TC/VR6TC, longtime famous ham from Pitcairn Island, who probably gave most of us that 'new one,' has passed away, peacefully, on July 7th. Tom was diagnosed with possible Parkinson's and early signs of Alzheimer's/dementia in December, 2009, while on a family visit in New Zealand. His wife, Betty Christian, VP6YL/VR6YL, says his health 'deteriorated all too quickly,' and the last few months were "cruel ones to watch such a strong, vibrant man reduced to where he was not really aware of his surroundings and then was unable to walk and swallow food or liquid.' Tom was buried July 8th in the cemetery on Pitcairn. Lack of available transportation prevented most of Tom and Betty's children making it back for the funeral. Tom was known as the 'Voice of Pitcairn,' was an M.B.E., Member of the British Empire, and served on the Pitcairn Island Council as the Governor's Representative for 40 years."

T33, BANABA ISLAND (Update). It was reported on July 30th, a "40 foot container with over 17,000 pounds of equipment and supplies left this afternoon and is on its way to the Long Beach, California, terminal. It is due to sail on August 4th. The container will travel from California to New Zealand to Fiji and then on to Tarawa. Tarawa is our site of ocean departure for Banaba." For a picture and short video, go to: http://www.t33a.com/news.html
The international team of operators are expected to activate Banaba Island (OC-018) sometime between November 5-18th. The current list of operators mentioned are Jay/AA4FL, Alan/AD6E, Gerhard/DJ5IW, Franz/DK1II, Dominik/DL5EBE, Axel/DL6KVA, László/HA0NAR, Al/K3VN, Cliff/KD6XH, David/N1EMC (Co-leader), Arnold/N6HC, David/N6HD, Mike/N9NS, Ricardo/PY2PT, Jay/W2IJ (Co-leader), Charlies/W6KK, Ann/WA1S, Robert/WA1F, and Ron/WA6FGV and Chris/VK3FY. Activity will be on 160-10 meters using CW, SSB and RTTY. Their suggested frequencies (with specific dates) have been posted on the T33A Web page. They will have six stations on the air at two different sites. A OQRS by ClubLog will be available and will be the preferred method to use for your QSL confirmation. Logs will be posted to Logbook Of The World (LoTW) approximately 6 months after the conclusion of the DXpedition. Direct QSLs are via W2IJ. QSLs will also be available direct by the Bureau. For more details, visit the T33A Web page at: http://www.t33a.com/index.htm

T8, PALAU. Masashi, JL1FUQ, will be active as T88GJ from Palau Islands (OC-009) between September 20-24th. Activity will be limited or dates may change because of his work, but look for him on 20/17/15/12/10/6 meters using SSB and possibly AM,PSK31 and RTTY. Equipment is Yaesu FT-897D with a THP HL-550FX amp into 6m 5 element yagi and a 2 or 3 element HF yagi. QSL via his home callsign, by the Bureau or direct to: Masashi Sampei, 1-2-12-1305, Kasumigaoka, Fujimino City, Saitama Pref., 356-0006 JAPAN.

V49, ST. KITTS AND NEVIS. Bob, K5WA, will be active as V4/K5WA from Calypso Bay, St. Kitts (NA-104), between November 20-27th. His activity will include the CQWW DX CW Contest (November 23-24th) signing as V49J. Activity outside of the contest will be on 160-10 meters CW. He will use an Elecraft K3 into a 31 ft. vertical. QSL V49J via W5JON direct only or via LoTW. QSL V4/K5WA via K5WA.

V5, NAMIBIA. Winfried, DK9IP, will once again be active as V55V from V52W's QTH in Omaruru this time for the Worked All Europe DX CW Contest [WAE] (August 10-11th) as a Single-Op/High-Power entry. QSL via DJ8VC. Before and after the contest, he will sign V5/DK9IP. Activity will be on 160-10 meters, possibly some RTTY and 6m. QSL for V5/DK9IP via his home callsign. Winfried is expected to be there between August 8-13th.

VK9NT (Closes the Financial Records). Chris, VK3QB, reports on July 27th: "As of 14 July 2013, VK9NT finances have been closed. All operators have seen and approved of the financial records. Due to the generosity of radio amateurs and clubs, all freight costs have been reimbursed to the 11 operators. On behalf of the VK9NT team we thank all amateurs who contributed to help offset our costs. Any further donations either via the VK9NT website or via our QSL Manager will be directed to ODXG Inc to cover some of the expenses that the club paid to assist VK9NT."

W4DXCC DX AND CONTEST CONVENTION. Now in its 9th year, the W4DXCC and Contest Convention is the Southeast's largest and most highly attended ham radio event. This year W4DXCC IX takes place at the MainStay Suites in Pigeon Forge, Tennessee, on September 27-28th. A full schedule of presenters will speak on DX and Contest subjects throughout the convention. The Ten Tec Hamfest is the same day and scheduled, so both Ten Tec and W4DXCC can be taken in the same day. It is a good time to bring the family as they can do other activities in the area. It's a great time for all.
For more details, see: http://www.w4dxcc.com
Ten Tec Hamfest: http://www.tentec.com/categories/Visit-Our-Hamfest!--2013

XR0, JUAN FERNANDEZ (Press Release/Update #2) [edited]. "Finally, the team was completed! We are pleased to to share our experience with Hans, DL6JGN.
The flights and locations have already been fixed and confirmed. Now the team will focus on technical aspect of the DXpedition, such as antennas, radios and RX systems.
Unfortunately, the island is surrounded by high mountains, and certainly does not allow us to be open to 360 degrees. Despite this, we will place our setup of antennas in order to satisfy the largest number of amateur radio operators as possible.
Surely, a major focus will be given to the RTTY, which we think is highly requested by the hamradio community.
We would like to remind you again, how important for us, is your financial support. At the time we were able to cover only part of the huge costs that this expedition required.
To give you an idea of costs, the total budget of the whole operation JUANFERNANDEZ2013 is approximately 56,000 USDs (42,000 ☐).
That said, we would be eternally grateful if you decide to support and help us accomplish this our adventure.
On our website, <http://www.juanfernandez2013.com>, you can do it (donate) very simply..... 73 XR0ZR Team"

XV, VIETNAM. Masanobu, JR5JAQ, is now active as XV2JJ. His length of stay is not known. Activity has be on 20/17/15 meters mainly CW with some SSB. QSL via JH5RXS, direct or by the Bureau.

XW, LAOS (Update). Champ, E21EIC, will be active as XW0YJY during the Work All Europe CW Contest [WAE] (August 10-11th) as Single-Op/All-Band/Low-Power entry. Outside of the contest, Champ will try 6 meters some days (watch on 50.112 MHz). He is working in Laos and is expected to be there until September 14th. Champ's activity also will be on 160-2 meters. He mentions also that during this period he will be working between Vientiane, Laos, and Bangkok, Thailand. QSL via E21EIC and LoTW. Visit it his FaceBook and Web page at: https://www.facebook.com/SomChamp http://www.e21eic.net/index.php
ADDED NOTES FROM CHAMP. He states that he will be at the Tokyo Ham Fair 2013 (August 24-25th) and would like to invite all HAMs to visit the Radio Amateur Society of Thailand (RAST) booth number A-12. He will be the only one at the booth. Champ mentions that he will have QSL cards with him for the stations he manages or has operated from. You can pick up a card , but please send a request to his E-mail <e21eic@...>.
Also, Champ will operate from Japam using his JA callsign which is JH1TEQ. QSL via E21EIC.

YF1, INDONESIA (LH and IOTA Op!). Budi, YF1AR, (member of the YB Land DX Club) will be active as YF1AR/1 from the Cikoneng-Anyer LightHouse (ARLHS IDO-081), Banten, Java Island (OC-021), between August 7-11th. QSL via N2OO. For more info, see:
http://www.yf1ar.com/2013/08/yf1ar1-cikoneng-anyer-lighthouse-banten.html

YW0, AVES ISLAND (Update to OPDX.1117). It has been announced that the callsign YW0A has been approved by the Venezuelan's National Telecommunication Commission (CONATEL). Rafael, YV5RED, reports on his Blog page <http://yv5red-tr.blogspot.com/2013/07/conatel-yw0a-aprobada-y-en-marcha.html> that "the National Telecommunications Commission authorizes the Civil Association (4M5DX Group) 4M5DX, to use the special callsign YW0A, for a period of one year, counted from the date of notification...." The CONATEL also authorizes the following frequencies bands: "1800-2000 kHz, 3500-4000 kHz, 7000-7300 kHz, 10100-10150 kHz, 14000-14350 kHz, 18068-18168 kHz, 21000-21450 kHz, 24890-24990 kHz, 28 to 29.7 MHz, 50-54 MHz, 144-148 MHz, 220-225 MHz, 430-440 MHz ... " No specific dates have been announced yet (just sometime between November 1st, 2013, and February 28th, 2014. It is suggested to watch the following media Web pages for updates at:

21503. Beta test of spot quality filtering for RBN spots - sopot format issue

Yahoo group: DX-IS (2013)
Date: 2013-08-16 10:26:22 UTC
From: Pete Smith N4ZR
Topic: 21503 Message: 21503

You may have noticed that RBN spots from your favorite cluster node have started arriving with two different formats. This happens because a number of nodes connect both to the RBN's ARC6 node and to its DXSpider node, which does not carry the AB5K/CT1BOH spot filtering tags.

I have discussed this with AB5K, who advises that he does not see the quality tags as a permanent part of the output of ACR6. They are there for debugging, and will be removed when the beta process is completed. This should mean that those of you who have written programs that rely on the format of the Comment field (finding certain data in a certain column) will only be inconvenienced for a limited time, and can connect to the DXSpider node in the meantime.

--
73, Pete N4ZR
Check out the Reverse Beacon Network at
http://reversebeacon.net,
blog at reversebeacon.blogspot.com.
For spots, please go to your favorite
ARC V6 or VE7CC DX cluster node.

21504. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-08-16 14:01:01 UTC
From: Paul Dunphy
Topic: 19749 Message: 21504

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30816
SIDC SOLAR BULLETIN 16 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 16 Aug 2013 until 18 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 16 Aug 2013 10CM FLUX: 127 / AP: 022
PREDICTIONS FOR 17 Aug 2013 10CM FLUX: 127 / AP: 017
PREDICTIONS FOR 18 Aug 2013 10CM FLUX: 125 / AP: 007
COMMENT: Eruptive conditions should persist for the solar activity over the next 48
hours, with C class flares likely from NOAA AR 1817 and 1818, and a slight
risk for an isolated M class event from both regions. Active geomagnetic
conditions were observed at local levels (Dourbes) during the past 24
hours. Active to minor storm periods were observed at planetary levels. We
expect unsettled to active conditions to persist for the next 24 hours and
then return to mostly quiet conditions by Aug. 17- Aug. 18. ACE
measurements show disturbed Bz and high solar wind speed (around 800 km/s)
in relation with the northern coronal hole.

17 August 2013 A.R.I. DX Bulletin
No 1163
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9H - Rich, KE1B (9H3MMM) and Anna, W6NN (9H3NN) will be active from Malta (EU-023) on 21-26 August. They will operate holiday style on 40-10 metres CW, SSB and RTTY. QSL via home calls, direct or bureau, plus LoTW and eQSL. Logsearch and OQRS on Club Log.
C9 - A team from South Africa and the US (K1MM, K6TD, N1DG, N4XP, N9JA, NF4A, W6OAT, W6OSP, ZS6P, ZS6PJH and ZS6RI) will be active as C82DX from Xai Xai, Mozambique on 15-22 October. They will operate CW, SSB and RTTY on 160-6 metres, with a focus on the low bands. QSL via Club Log's OQRS (direct and bureau) and LoTW (six months after the conclusion of the DXpedition). Traditional direct requests should go to C82DX, P.O. Box 333, Bethlehem GA 30620. USA. Further information can be found at www.c82dx.com
CX - A team from Radiogrupo Sur will be active on all bands and modes as CW5X from the lighthouse at Punta Jose Ignacio on 16-18 August. QSL direct to CX2ABC. Further information can be found at http://cw5x.cx.uy/ [TNX Radiogrupo Sur]
DL - Hans, DL2RU will be active as DL2RU/p from Fehmarn Island (EU-128) on 17-22 August. QSL via home call, direct or bureau. [TNX DX Newsletter]
E4 - Peri, HB9IQB (www.hb9iqb.ch/palestine.html) will be active again as E44PM from Palestine "in late August". He will be runnning 100 watts into wire verticals. QSL via HB9IQB, direct or bureau. Peri plans to upload his log to LoTW and Club Log on a daily basis. [TNX DX World]
I - ARI La Spezia will participate in the ILLW as IP1T from San Venerio lighthouse on Tino Island (EU-083). Expect activity on the HF bands, as well as on 6, 4 and 2 metres. QSL via IZ5JLF. [TNX IZ5JLF]
I - Bruno, IZ0DIB and Marco, IZ6ASI will operate SSB as IZ0DIB/6 from Senigallia lighthouse on 17-18 August for the ILLW. [TNX IZ6ASI]
I - Alessandro, IW5ELA will be active as IG9/IW5ELA from Lampedusa Island (AF-019) on 8-18 September. He will operate mainly CW. All of the QSOs will be confirmed automatically via the bureau. Logsearch on Club Log.
J8 - A polish team (SP2EBG, SP3CYY, SP3GEM, SP6EQZ, SP6IXF, SP9FOW and SP9PT) will be active as J88HL from St. Vincent (NA-109) on 17-29

November. They will have at least three stations active 24/7 on
160-10 metres CW, SSB and RTTY, with a serious effort on the low
bands. They will also have equipment for 6 metres. QSL route to be
announced; logsearch and OQRS on Club Log. Bookmark
http://j88hl.dxing.pl/ for updates. [TNX SP6EQZ]
JA - Look for Kenji, JA4GXS/4 to be active from Kasadojima (AS-117) on
17 August from about 7 UTC until about 22 UTC. He will be QRV on
40, 30 and 20 metres SSB and CW. QSL via home call, direct or
bureau. [TNX JI3DST]
LY - Sam, LY5W will be active as LY5W/p from the Nida Lighthouse on
16-20 August. He will operate mainly CW and SSB with some RTTY.
[TNX LY5W]
OZ - Special station OZ6SYL will be active on 22-25 August for the
Scandinavian Young Ladies Radio Amateurs' 10th anniversary meeting
that will take place in Roskilde (http://oz.sylra.is/). QSL via
OZ7AGR.
OZ - Heinz DC5WW, Robert DK2RO, Anton DL8AW, Norbert DL9NAC and Thilo
DL9NBJ will be active as 5Q7Y from Langeland Island (EU-172) on
14-21 September. QSL via DL8AW, direct or bureau (OQRS on Club
Log), and LoTW.
S5 - The following special event callsigns are expected to be in use to
celebrate EuroBasket 2013 (the FIBA European Basketball
Championship to be held in Slovenia on 4-22 September): S500EB,
S513EB, S521EB, S522EB, S523EB, S531EB, S533EB, S539EB, S541EB,
S542EB, S543EB, S544EB, S546EB and S563EB. QSL via bureau.
SV5 - Hans, ON6ZK active as SV5/ON6ZK/p from Kos Island (EU-001) on
23-30 August. He will be QRV mainly on 20 metres SSB and CW. QSL
via home call, bureau preferred. [TNX NG3K]
TK - Sebastian, IK2WZM will be active as TK9ZM (www.mdxc.org/tk9zm/)
from Corsica (EU-014) on 2-8 September. He will operate holiday
style on the HF bands and 6 metres. QSL via home call. [TNX
Mediterraneo DX Club]
V5 - Hardy, DF3GY and Hans, DF2UU will participate in the IARU Region 1
SSB Field Day (7-8 September) and the WAE SSB Contest (14-15
September) as V55V from Namibia. QSL via DJ8VC. Outside the
contests they will operate CW and SSB as V5/DF3GY and V5/DF2UU on
160-6 metres. [TNX NG3K]
VE - Dana, VE1VOX will be active as VY2/VE1OTA from West Point
Lighthouse on Prince Edward Island (NA-029) on 16-18 August. QSL
via VE3EXY. [TNX NG3K]
VK - Albert, VK3KLB and others will be active as VK7LH from Low Head
Lighthouse on the main island of Tasmania (OC-006) on 17-18 August
for the ILLW. They plan to have up to three stations operating
simultaneously depending upon conditions. QSL via VK3KLB.

DX MAGAZINE MOST WANTED SURVEY ---> The DX Magazine's annual Most Wanted Survey is being conducted now through 15 October. The survey form can be found at http://dxpub.com/survey/survey2013.html. Many DXCC Entities have been added to the survey for this year, but if you still need something that is not listed, simply use the "Additions or Comments" space at the end of the form). The overall results will be published in the January-February 2014 issue of The DX Magazine, and the world-wide results will be posted to the web site around 15 January 2014. The breakdown by mode/Low Bands will be published in the March-April 2014 issue of the magazine. [TNX N4AA]

DXCC NEWS ---> Z81X (Republic of South Sudan, 2013 operation) has been approved for DXCC credit. If you have had this rejected in a prior application, send a note to bmoore[@]arrl.org to be placed on the list for an update to your record. Please note the submission date and/or reference number where the rejection was noted to expedite the search for any rejected QSOs. [TNX NC1L]

GACW ---> The new website for the Grupo Argentino de CW (GACW) can be found at http://www.gacwar.org [TNX LU6EF]

ILLW ---> The 16th annual International Lighthouse/Lightship Weekend, conducted under the sponsorship of the Ayr Amateur Radio Group, will take place from 00.01 UTC on 17 August until 23.59 UTC on the 18th. Complete information on this popular event, including a list of participating stations, can be found at http://illw.net/

OH2BH ---> "Changing Times in DX Hunt", the keynote lecture delivered by Martti Laine, OH2BH on 29 June at Ham Radio 2013 (Friedrichshafen), is now available - slides and audio (five separate .pps files) - on the Documentary Archive Radio Communications' website at www.dokufunk.org/laine [TNX OE1WHC]

KV4 STATIONS ---> The KP2 QSL Bureau "constantly receives QSLs for KV4 stations who are not located in the US Virgin Islands", Fred, K9VV/NP2X (KP2 QSL Bureau Manager) reports. Nowadays the KV4 prefix is assigned to the continental USA, the only KV4 callsigns that are located in the US Virgin Islands (KP2) are KV4BA, KV4BT, KV4BW, KV4CF, KV4DN, KV4FZ, KV4HR, KV4IE and KV4KW.

QSL VIA NR6M ---> The new mailing address for NR6M is: Rex Turvin, 18040 W Banning Street, Casa Grande AZ 85193, USA. He is the QSL manager for 5W0W, CO2HQ, DU1WGA, DU1/W7XA, H40IOTA, H44IND, H44IOTA, H44RK, H44USMC, H40RK, RU0LAX, RU0LAX/p, VP2V/AA7V and VP2V/KE2VB. Logsearch and OQRS are available for most of them, see www.qrz.com/db/NR6M.

WRTC 2014 ---> WRTC2014, Inc., host of the 2014 World Radiosport Team Championship (WRTC) has announced that the application process for individuals that would like to participate in WRTC2014 as a Team Leader is now open. Team Leader applications must be submitted no later than 13 September. A total of 54 Team Leaders will be selected from the top

qualifiers in 29 regions from around the world. Each Team Leader then selects their teammate for the competition. The Team Leader qualification formula consists of 12 scores selected from 55 qualifying events between October 2010 and March 2013. Full details of the qualification process as well as the Team Leader application form can be found on the WRTC2014 web site (www.wrtc2014.org). In addition to the regional qualifying, there is also a slot dedicated to a contest team with both members less than 25 years old before July 2014. Those interested in being considered for the Youth Team must follow the Team Leader application process.

XZ1Z ---> Zorro, JH1AJT was QRV on 17 and 20 metres as XZ1Z from Nay Pyi Taw, the capital city of Myanmar, on 13-16 August while on a mission for the Foundation for Global Children. He expects to return next month. His operating permission, issued by the Ministry of Communications and Information Technology, is valid until 12 September. QSL via JH1AJT. [TNX JA1TRC]

+ SILENT KEYS + Recently reported Silent Keys include Amir Jaganjac (E75O), Thomas C. Meier (K7ZZ), Morris J. Young (KR5V), Gordon Leland (KU4EC), Milind "Micky" Korde (VU2IZO), N.G. Nanda (VU2NG), G. Scott Henninger (W8GS) and Henry "Harry" Burton (ZL2APC).

QSLs received direct or through managers: 3B9FR, 3C0E, 3C6A, 3D2RX, 4K6C, 5B4AFM/p (AS-120), 5N7M, 5T0SP, 5X8C, 6W/HA0NAR, 6Y5/G3SWH, 7P8D, 7T9A, 7X5KBS, 8Q7DV, 8Q7KP, 9L5MS, 9M2/OK1CZ, 9U1RSI, 9X0ZM, A92GR, AD5A/KL5 (NA-158), AP2MB, BV2DQ, C4W, C91LW, CP4DR, D2QR, D44TWO, D85C, DU9/JA1PBV (OC-175), E51EWP, E51M, ER4A, ES5G, ET3AA, EY7AD, EY8MM, FT5ZB, GS3PYE/p, H44AJ (OC-285), H44IND (OC-158), H44S (OC-285), HC2/KF6ZWD, HD8A, HP1WW, HV5PUL, IA5A (EU-028), J49C, J5NAR, J68HZ, J69MV, J75PX, JD1BMH, JT1CO, KH0XH, M8C, OH1VR/VP9, OJ0R, RI1ANU, SU8N (AF-109), T6LG, TM28UFT, TM6M, TO2D, TO5PX (NA-107), TS8TI (AF-083), TX5K, TZ6BB, V31IV, VK0TH, VK4SWE (OC-227), VR2XMT, VU7KV, VY0/VE3VID (NA-174), YB8RW/p (OC-236), YB8XM/p (OC-271), YE1Z, Z81X.

ARLP033 Propagation de K7RA

ZCZC AP33
QST de W1AW
Propagation Forecast Bulletin 33 ARLP033
>From Tad Cook, K7RA
Seattle, WA August 16, 2013
To all radio amateurs

SB PROP ARL ARLP033
ARLP033 Propagation de K7RA

Again this week, solar activity was unchanged, with average daily sunspot numbers slipping from 85.4 to 85, and average daily solar flux increasing 4.4 points to 111.7. Geomagnetic conditions were stable.

The latest solar flux prediction from USAF/NOAA has flux values of 125 on August 16, 130 on August 17-18, 120 on August 19-20, 110 on August 21-23, 105 on August 24, 110 on August 25-26, 115 on August 27-29, 110 on August 30, 105 on August 31 through September 6, then 110 and 115 on September 7-8 and 120 on September 9-11.

Predicted planetary A index is 12 and 8 on August 16-17, 5 on August 18-19, then 12 and 15 on August 20-21, 8 on August 22-23, 5 on August 24-30, then 12, 15, and 10 on August 31 through September 2, and 5 on September 3-7.

OK1HH issues his own weekly geomagnetic activity forecast, and he sees mostly quiet geomagnetic conditions August 16-17, quiet to active August 18, quiet on August 19, mostly quiet August 20, quiet August 21, active to disturbed August 22, quiet to unsettled August 23, quiet to active August 24, quiet to unsettled August 25-28, quiet August 29-30, active to disturbed September 1, quiet to unsettled September 2, quiet on September 3-5, mostly quiet September 6-8, active to disturbed September 9, quiet to active September 10, and active to disturbed September 11. OK1HH says "a positive storm phase" is expected August 22, and a growing solar wind may cause remarkable changes in the magnetosphere and ionosphere on August 16, and 21-22, and September 1-2, 6-7, and 11.

At 0318 UTC on August 16, the Australian Space Forecast Centre issued a geomagnetic warning, saying a high speed wind stream is spewing from a coronal hole. Unsettled to active geomagnetic levels are expected today, August 16, and minor storm levels are possible.

Scientific American has a 60 second podcast explaining why the changing magnetic polarity of the sun is nothing to worry about. Listen at http://www.scientificamerican.com/podcast/episode.cfm?id=solar-magnetic-field-flip-poses-no-13-08-15.

We get our solar flux data directly from the observatory in Penticton, British Columbia where they measure and report the numbers. It has been available at ftp://ftp.geolab.nrcan.gc.ca/data/solar_flux/daily_flux_values/fluxtable.txt but this week that server seemed unreachable. I poked around for quite some time and finally found the same data in html rather than plain text format at http://www.spaceweather.ca/data-donnee/sol_flux/sx-5-flux-eng.php.

Al Kaiser, N1API of Meriden, Connecticut asked, "If you have two flares at the same time from two different sunspot areas on the sun, do they add up to give a bigger class of flare, or just end up as one longer event?"

They are counted and rated separately. And if the flares are on different areas of the sun, they are probably pointing in different directions, so one or both might not affect earth.

Randy Crews, W7TJ of Spokane, Washington has long been fascinated by the idea that the current solar cycle 24 may turn out to have two peaks, like the last few cycles. He writes, "There have been several predictions that cycle 24 might have a second peak. Well maybe - maybe not. Cycle 21 had a definite single peak: November of 1979. Cycle 22 had two peaks: September of 1989 and January of 1991. Cycle 23 also had two peaks: April/July of 2000 and December of 2001. K9LA presented some interesting analysis regarding the declining magnetic strength of sunspots since 1995 and especially cycle 24." See http://myplace.frontier.com/%7ek9la/Looking_Ahead_To_Solar_Cycle_25.pdf

Randy continues, "Anyone who brings up a NASA photo of sunspots during Cycle 21-23 will see many large magnetically complex sunspots vs. Cycle 24's 'freckles' of small magnetically simple spots. So we MAY see a second peak IF the magnetic strength of the sunspots holds, or better yet increases. If not, a second peak is doubtful, and chances are the peak of activity has passed (as defined by the average monthly solar flux and average monthly sunspot count). The Sun is always full of surprises. During the CQWW Contest of October 2003 the solar flux punched up to 290!"

Ah, Randy, wouldn't that be nice to see again! In fact, your current author's stewardship of this bulletin began in 1991, not because of any particular expertise regarding astrophysics, but due to a similar sudden burst of solar activity, which happened to coincide with the former (and only other) author of this bulletin becoming too ill to write (see http://oldqslcards.com/W1HDQ.pdf). The event was Thursday, January 31, 1991 when the solar flux reached

357. Someone needed to write about this. I had no idea when I alerted folks in Newington that it would be me.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for August 8 through 14 were 90, 51, 76, 90, 85, 98, and 105, with a mean of 85. 10.7 cm flux was 104.4, 103.6, 102.5, 110.4, 114.1, 122, and 125.2, with a mean of 111.7. Estimated planetary A indices were 5, 9, 6, 6, 6, 9, and 10, with a mean of 7.3. Estimated mid-latitude A indices were 4, 11, 7, 7, 6, 9, and 9, with a mean of 7.6.

SIDC SOLAR BULLETIN 17 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 17 Aug 2013 until 19 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 17 Aug 2013 10CM FLUX: 120 / AP: 007
PREDICTIONS FOR 18 Aug 2013 10CM FLUX: 120 / AP: 007
PREDICTIONS FOR 19 Aug 2013 10CM FLUX: 115 / AP: 007
COMMENT: We expect solar activity to stay at eruptive levels with chances for C
class flares from NOAA ARs 1817 and 1818 and a slight risk for an isolated
M class flare. Geomagnetic conditions should be essentially quiet for the
next 48 hours.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30818
SIDC SOLAR BULLETIN 18 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 18 Aug 2013 until 20 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 18 Aug 2013 10CM FLUX: 123 / AP: 007
PREDICTIONS FOR 19 Aug 2013 10CM FLUX: 120 / AP: 007
PREDICTIONS FOR 20 Aug 2013 10CM FLUX: 120 / AP: 012
COMMENT: NOAA AR 1818 produced a complex eruptive event on August 17, resulting in
two M flares within one hour: a M3.3 peaking at 1824 UT and a M1.4 peaking
at 1933 UT. This complex event was associated with a fast CME (~1000 km/s
as seen from COR2 A). The bulk of the CME appears to go essentially
westwards, with respect to the Earth, but we might cross the eastern flank
of this CME on the second half of August 20. The 10 MeV proton flux rose
slightly but didn't reach the event threshold. Flaring activity is expected
to remain at eruptive levels for the next 48 hours, with C class flares
likely from NOAA ARs 1818 and 1824, and a slight risk of an isolated M
class flare from AR 1818. We expect essentially quiet geomagnetic
conditions for the next 48 hours. There is a small chance of periods of
enhanced activity (unsettled to active) on the second half of August 20,
due to the CME of August 17.
TODAY'S ESTIMATED ISN : 074, BASED ON 10 STATIONS.

DX Bulletin No. 1124
BID: $OPDX.1124
August 19, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web Page, K1XN & GoList, NC1L, NJ1Q & W1AW, N3AD, NG3K & ADXO, W3UR & The Daily DX, K4ZW, N4AA & QRZ DX, N4JF, KH6BZF, N7US, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OE1WHC, ON4CAS, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SP5UAF, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11th-August, through Sunday, 18th-August there were 221 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5R, 5T, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2013 MOST WANTED SURVEY (Now available on the DX Publishing Web site). Carl, N4AA, editor of "QRZ DX" and "The DX Magazine", reports that by popular demand many countries have been added to the survey for this year. Deadline for entry is October 15, 2013. To participate, fill out

the survey form at: http://dxpub.com/survey/survey2013.html
The results are usually published in the January-February 2014 issue of "The DX Magazine", and the world-wide results will be posted to the Web site around January 15th, 2012, as well. The breakdown by mode/Low Bands will be published in the Mar/Apr 2014 issue of the magazine.

3D2, FIJI (Also T33A News). Jay, AA4FL, announced on QRZ.com this past week [edited]: "I will be arriving in Fiji on October 30, 2013, in route to Tarawa with the final destination to Banaba Island for the T33A DX-pedition. I will also have a day to operate on the return leg, info to be posted. 3D2FL has been issued and I will have an ICOM IC-7000 with me. Operation will be 100w, most likely PSK31. See <www.t33a.com> for information about the Banaba DXpedition. On Banaba Island, I will also be providing dental (teeth) extractions for the local residents. Thank you to the Medical Amateur Radio Council (MARCO) <www.marco-ltd.org> and its charitable arm Medishare <www.medishare.org>, for support of this effort. Hope to work you!.... 73, Jay"
ADDED NOTE: Ann, WA1S, will also be active as 3D2AC from Fiji at the end of October on her way to join the T33A team. Activity will be on the HF bands. QSL via her home callsign.

9H, MALTA (Monkeys Invade Gozo Island?? [see QRZ.com]). Operators Rich/KE1B and Anna/W6NN will be active as 9H3MMM and 9H3NN, respectively from Gozo Island (EU-023) between August 21-26th. Activity will be holiday style on 40-10 meters, including 30/17/12m and using CW, SSB and RTTY. They expect to have InterNet access, and plan to upload logs to Clublog daily. You can check your QSO status and request a QSL card via the Online QSL Request System (OQRS). QSL via their home callsigns, direct and by the Bureau (see QRZ.com for details). All logs will be uploaded to LoTW and eQSL after the DXpedition (late August 2013).

9H, MALTA. Orazio, IT9DBF, will be active as 9H3BF on Malta (EU-023) between September 2-6th. Activity will be on 20 meters using a Yaesu FT-897D powered by a solar panel and battery. QSL via IT9DBF direct or eQSL via his main callsign.

9H, MALTA. Klaus, DD1AY, will once again be active as 9H3GK from the Dolmen Resort Hotel, Bugibba, St. Paul's Bay, Island of Malta (EU-023, MIA MM-001, WLOTA 1113) between November 13th and December 4th. This is his third visit' there. Activity will be on the HF bands using mainly SSB. His equipment is a FT-100 into MFJ Tuner and DX-Wire vertical antenna. QSL via his home callsign, direct preferred. For more info and pictures from his previous trips, check out his QRZ.com page.

9M2, WEST MALAYSIA. Mirek, VK6DXI, will once again be active as 9M8DX/2 from Kuala Lumpur between August 18th and September 3rd. Activity will be limited since this is a business trip, but he will operate after "working hours" on some CW during his local evening hours. QSL via SP5UAF.

C8, MOZAMBIQUE (Update to OPDX.1114/1115/1120). An international team of operators will be active as C82DX from Xai Xai (WW Loc KG64) between October 15-22nd. Operators' list has been updated and includes Bill/K1MM,

Doug/N1DG, Tom/N4XP, Kevin/K6TD, Charlie/NF4A, Ray/N9JA, Charles/W6OAT, Bruce/W6OSP, Tjerk/ZS6P (C91TJL), Pierre/ZS6PJH and Christian/ZS6RI. Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are available in OPDX.1114. QSL routes have now be announced. QSL via the OQRS by ClubLog (Highly Recommended/Preferred Method) to receive a QSL either direct and by the Bureau. To QSL direct via the mail, send it to: C82DX, Box 333, Bethlehem, GA 30620 USA [Please do not send IRCs. See details on their Web page]. They will not confirm QSOs via the eQSL system. The C82DX Web page is at: http://c82dx.com

CENTRAL AMERICAN TOUR. Look for Rick, AI5P, to be active from some of the following Central America countries throughout the month of September. His tentative schedule is as follows:
Panama - Callsign HP1/AI5P; between August 31st and September 6th
El Salvador - Callsign YS1/AI5P; between September 6-12th
Nicaragua - Callsign YN2PX; between September 12-23rd
Activity will be holiday style on the HF bands and mainly CW. QSL via his home callsign.

CY0P SABLE ISLAND DXPEDITION (Update). The following was posted on the CY0 DXpedition Web page, August 10th [edited]: "The intention remains to fly to Sable Island on September 30th, using Maritime Air, and bookings have been made for the aircraft and for local accommodations in Halifax for Murray and Rick prior to departure. Murray intends to focus on getting the VE1RGB and AI5P stations on the air on the day of arrival, likely using wires, and his own station up and running with Yagis on the second day. All but one of the beams have been received, pre-assembled, tuned and disassembled, and mono-band dipoles for 40M through 10M are on order from Amateur Radio Supplies. One telescoping fiberglass mast (39 feet) has been pre-rigged and will carry a 160M wire dipole fed with window line and driven by a K3 to operate on all bands. The second mast, an aluminum Army-surplus assembly, is on hand.
Marshalling of equipment continues in Halifax. Where possible, resources retained from previous CY0 DXpeditions are being re-used (e.g., masts) and to save shipping weights from the USA to Canada, other items of equipment (e.g., the back-up HF radio) are being loaned from Canada. Weight for this trip, like all DXpeditions, is a concern: total allowed weight for the Britten-Norman Islander aircraft is 1400 pounds, including passengers. Because of that □ and other than fresh fruit to combat scurvy (J) -- the team will attempt to exist on freeze-dried food.
Of interest to contesters, VE1RGB will be S&P in the California QSO Party on Oct. 5-6th, operating as VE1RGB/CY0 and sending the MR exchange: a contest multiplier; an IOTA (NA-063); and a DXCC entity with a single QSO! Other than that, based on antenna selections and equipment, it is anticipated that the VE1RGB station will focus on western EU and on NA while Murray and Rick will be more intent on Asia and other DX. It is expected that operations will be conducted 24/7.
The QSL Manager for CY0P will be VE1RGB. Since most of the logging will on paper (i.e., to save weight), LoTW, eQSL and ClubLog will not be supported. Direct QSLs will require 2 USDs to cover postage and QSL card

costs; otherwise, cards will probably be returned via the bureau, although there is now also a cost for that service from Radio Amateurs of Canada. A significant portion of the QSLs will be mailed from Canada; the remainder may be mailed from the US where postal rates are less onerous. Since this adventure is being privately funded, any additional contributions accompanying QSL requests will be gratefully received. To that end, it may be useful to point out that the round-trip charter air flight for Sable Island 2013 is $12,000 and accommodations on Sable are $300 per day per person. Operations from CY0 are not in-expensive. Please consider this fact in helping to offset the costs of QSL'ing. Thank you.
For additional information on some of our plans, see the 'upcoming' September issue of DX Magazine and/or the September issue of the Halifax ARC Reflector <http://www.halifax-arc.org/>. Check also on QRZ.com under AI5P, VE1RGB, WA4DAN and/or CY0P for updates, as well as this site, at <http://www.CY0dxpedition.com>."
Just a reminder that the DXpedition to Sable Island will take place between October 1-11th. Activity will be on 160-10 meter using CW, SSB and RTTY.

DAYTON HAMVENTION RTTY CONTEST DINNER TO RETURN IN 2014. It was reported this past week that after a 10 year absence, the Dayton RTTY Contesting Dinner will be back in 2014. It will take place on Thursday evening, May 15th, at the Crowne Plaza Hotel in downtown Dayton. Fred Dennin, WW4LL, reportedly will be the dinner's host, and they are currently trying to find a guest speaker and sponsors for door prizes for that evening. If you would like to help sponsor or donate a door prize, contact Fred at <fdennin@...>. Look for more details to be forthcoming.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
Z81X ☐ Republic of South Sudan; 2013 Operation

NOTE: If you've had these rejected in a prior application, send a note to <bmoore@arrl.org> to be placed on the list for an update to your record. Also, please note the submission date and/or reference number where the rejection was noted to expedite the search for any rejected QSOs.

E4, PALESTINE. Peri, HB9IQB, has announced that he will once again be active as E44PM from Bethlehem in late August (specific dates were not provided). The license was renewed in April. He will be using his Elecraft K2 with 100 watts into wire vertical antennas. Logs will be uploaded daily to both LoTW and ClubLog. QSL via his home callsign, direct, by the Bureau or LoTW (preferred). Watch for updates on his Web site at: http://www.hb9iqb.ch/palestine.html

E6, NIUE. Adam, K7ST, is now active as E6ST from Niue (OC-040). The length of his stay is unknown at this time. Activity so far has been on 20 meters SSB, but he does have capabilities to operate on 40/20/17/15 meters. Adam is running 100 watts and a vertical. QSL E6ST via EA5GL. ADDED NOTE: Adam's next stop will be sailing to Tonga aboard the "SV Bravo". Read more about Adam's and his XYL Cindy, KF7UPI, sailing trip on the "SV Bravo" which

started from Seattle, Washington, in September 2010, with great photos
at: http://www.svbravo.blogspot.com

GD6, ISLE OF MAN. Chris, GM3WOJ (ZL1CT), will once again be active as
GD6IA from the contest station <http://www.gd6ia.com/> there during the
CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/High-Power
entry. QSL via GD6IA, direct only to: GD6IA, PO Box 1, PEEL City, Isle
of Man IM5 1XG, British Islands. No QSL Bureau - No eQSL - No LoTW.

IOTA NEWS.....
EU-125. Just a reminder that Dieter, DF2SD, will be active as OZ/DF2SD
from Fano Island (DIA NS-002, WWFF OZFF-004) until August 30th.
Activity will be holiday style on the 30/17/12 meter bands
only, using mainly RTTY and some SSB. QSL via his home callsign,
direct or by the Bureau.

NA-004/ Rick, K6VVA, will activate Crescent Island (NEW USI) next year
NA-172. (2014) between July 16-18th, and also activate Endeavor Island
(NA-004, USI AK-046S) between July 21-22nd. Activity from both
islands will be on the HF bands using mainly CW. QSL route to
be determined. For more information and updates, watch the
following at: http://www.k6vva.com/iota/na172
Twitter - http://twitter.com/k6vva

OC-108. Reports indicate that Anambas Island will take place during
mid-September after the YE5S activity (see OPDX.1121) .

OC-197. (Update) Adhi (Bimbo), YB3MM, will be active as YB3MM/p from
Bawean Island between August 24-25th. Operations may be post-
poned or cancelled depending on the weather. Activity will
be on 20 and 15 meters using a Kenwood TS-450 into monobander
beams. QSL via IZ8CCW, direct or PayPal. For updates, watch
his Web Blog page at: http://www.yb3mm.com

SA-054. (Update/Reminder) Members of the Grupo DX Caracas will be active
as YW5X from Orchila Island (ARLHS VEN-022, WLOTA 3044) between
August 20-26th. The YW5X will be active to commemorate the
2013 Venezuelan Navy Day during the month of August. The dates
will depend on Navy transport. Operators were announced via
DX-World.net. They are Edgar/YV2IF, YV2CAR, Jose/YV4GLD,
Homero/YV4DHS, Juan/YV4TEA, Juan/YY4KWB, Edgar/YY4ACU, VY5EED,
John/YV5IUA, Nelson/YV5JCN, Jhon/YV5KG, Federico/YV5NCZ,
Gregorio/YV5OK, Alfonso/YV5GPA, Vic/YV5ZV, Reinaldo/YV5AM,
Rojas/YV5LAY, jose/YV5JF, Ray/YV5EU, Edwin/YV5EN, Luis/YV5LFX,
Daniel/YY6DFF, Cesar/YV6CR and Reinaldo/YV8AD. QSL via DM4TI
only. Look for updates on QRZ.com.

J8, ST. VINCENT. A team of Polish operators will be active as J88HL from
St. Vincent Island (NA-025) between November 17-29th. Operators mentioned
are Bob/SP2EBG, Jan/SP3CYY, Jurek/SP3GEM, Wlodek/SP6EQZ, Janusz/SP6IXF,
Roman/SP9FOW and Wojciech/SP9PT. Activity will be on 160-6 meters with
a focus on the lower bands, and using CW, SSB and RTTY. They will at

least have three stations running 24 hours a day. Each one with a power amplifier. There will not be a team effort during the CQWW DX CW Contest, but possibly one operator will take part in the contest as a Single-Op/ All-Band entry while the others operate outside the contest on the WARC bands or SSB and digital modes. QSL via their OQRS (TBA). For more details and updates, visit their Web Page at: http://j88hl.dxing.pl

MAJOR IOTA 2014 DXPEDITION (Ops Needed!). Operators Fred/IK7JWX (Team leader) and Antonio/IK8VRH (Logistics) are looking for operators to participate in a major IOTA DXpedition to either Tanzania or Kenya in April of 2014. Islands mentioned in Tanzania are Zanzibar City [or Unguja] (AF-032 - 55%), Pemba Island (AF-063 - 30.3%) or Mafia Island (AF-054 - 30.0%). Island mentioned in Kenya is Lamu Island (AF-040 - 35.8%). If interested, contact Fred at: ik7jwx2003@...

PJ4, BONAIRE (Early Announcement). Dave, WJ2O, will be active from Bonaire (SA-006, WLOTA 1279, WWFF PAFF-024) between May 21-28th, 2014. Callsign was not mentioned (possibly PJ4/homecall), but his activity will include the CQWW WPX CW Contest (May 24-25th) as a Single-Op/ All-Band/High-Power entry. Activity outside of the contest will be on all HF bands (possibly 6 meters) using mainly CW. QSL Via N2ZN.

PRESS RELEASE (Friedrichshafen, Germany). Wolf Harranth, OE1WHC, from the Amateur Radio Section of ORF (Austrian Broadcasting Corporation) and the Documentary Archives Radio Communications/QSL Collection, has informed OPDX that Top DXer Martti Laine, OH2BH, was a prominent Guest Speaker at the Friedrichshafen, Germany, Ham Radio, in June 2013. His keynote lecture, "Changing Times in DX Hunt", is now available ☐ slides and audio ☐ at: http://www.dokufunk.org/laine

CU3AA via direct, by the Bureau, eQSL or LoTW. Activity this past weekend during the ILLW was from Farol da Ponta da Serreta/Ponta da Serreta Lighthouse. Reference numbers are: ILLW PT-0029, ARLHS AZO-022, AFFA CUFF-083 (Área Protegida para a Gestão de Habitats ou Espécies do Planalto Central e Costa Noroeste), DPRN/WWFF CTFF-052, DMP 1901, DDFP AGH-017, DFP FAZ-014, DFFP FP-154, WCA CT-0369, DMHP AZ-021, DIA CU3, DIP AZ-003 and PIP AC-003.

HP2TP via HP1RCP. Members of RADIO CLUB OF PANAMA and PANAMA CANAL AMATEUR RADIO ASSOCIATION activated Toro Point Lighthouse (PAN 021) during this past weekend's ILLW.

BOGUS ALERT. Rick, K6VVA, reports that someone posted a bogus cluster spot that had him operating as K6VVA/P5 on 20 meters.

VY2/VE1OTA via VE3EXY, direct or by the Bureau. Dana, VE1VOX, was operating from the West Point Lighthouse (CAN-524, IOTA NA-029) in this past weekend's ILLW.

QSL RECEIVED VIA LoTW: DR1A, EA1PO, EB1TR, HV0A, JO1COV, PY0F/PP1CZ, RX6LG, V51YJ, V6B and VE3XN

QSLS RECEIVED VIA MAIL: 3C0E, 3C6A, 5X8C, 6Y5/G3SWH, 8Q7DV, 8Q7KP, 9X0ZM, D2QR, D64K, HD8A, HK1/F6BFH, J75PX, JT1CO, OJ0R, RI1ANU, TO5PX, TX5K, UK1PGO, VR2XMT, VU7KV, XW1B and XW4XR

QSLS RECEIVED VIA THE BUREAU: 3DA0NW, 4L6QC, 8P9UR, 8J1MORSE, 9J3A, 9U7T, A61C, A92IO, AL7HG, EN2012UEFA, EY8/K4ZW, FM5WE, FS/N0BSH, H44MX, HG2011N, HK3W, J28RO, JG8NQJ/JD1, K9AJ/VY0, KL7D, KL7/N6PG, KP2/K0BBC, KP4RV, LZ1620PPZ, LZ969SCP, MU/PA9M, NL7HH, OE2013Q, OE2013S, OG3077F, PJ2/AA1M, PJ2/K9WVB, PJ2/W8WTS, PJ7/K3TC, PJ7/WA1S, RP67NF, RW0BG/9, S9MX, SV5/LZ1WL, SV5/SM8C, T32AJ, TI5/K9NW, TU2SI, UN9L, V23BZR, V63HO, V63KZ, VO1/K5KG, VP2V/K9NW, W3HF/KH2, WL7WH, XF3/IZ2LSC, YC9BEC, YC9DD, Z60ID, ZA/LZ1UQ and ZF2JT

SV5, DODECANESE. Hans, ON6ZK, will be active as SV5/ON6ZK/P from Kos Islands (EU-001) between August 23-30th. Activity will be on 20 meters mainly. Watch 14170 kHz for SSB or 14050 kHz for CW. Equipment will be a FT-857 with 50 watts using a fishstick pole as a 1/4 vertical from the hotel balcony. QSL via ON6ZK, by the Bureau (preferred) or direct with SASE.

TM5, FRANCE (Special YL Event). It was announced that French YLs will be gathering in Sarayonne on August 24th. To celebrate this event, look for special event station TM5SIA to be active until that day. Activity will be on the HF bands and 2 meters. YL operators mentioned Aline/F4GPA, Christine/F4GDI, Maryse/F4HBC, Sophie/F4DHQ, Marie F5UAY and Brigitte/F4DPD and Danielle/F0GLR (2m op!). QSL via F5KCC or eQSL. For more details, see: http://www.ref-union.net/yls/fr/meeting-2013-fr

VP2M, MONTSERRAT. Alan, N3AD, will once again be active as VP2MMM during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/High-Power entry. Activity will be from Gingerbread Hill in St.Peter's. Alan informs OPDX [edited], "I will arrive on Tuesday, November 19th and leave on Tuesday, November 26th. Since I have to assemble antennas there, I will not be on the air before Wednesday or possible Thursday. I will be active in the contest and will be on before the contest depending on how many snags I run into assembling antennas. Before the contest, I will stick with CW on 160-10 meters as at that time my goal is to test the station for the contest. On Monday after the contest, I do have to disassemble antennas, but will try to leave one wire antenna up and use it with tuner on some of the WARC bands - CW only." QSL via W3HNK.

W9DXCC DX CONVENTION (Update/Press Release). Jim, N7US, sent the following dated August 14th [edited]: "Thanks to those who have already registered for W9DXCC. For those who haven't registered, the cutoff for the discount hotel rate using the group code of 'W9D' is next Friday, August 23rd, and the pre-registration convention discount ends August 31st. The hotel's Web site is: http://www.hielkgrove.com
The list of W9DXCC speakers has been updated to those shown below. Please encourage your friends and fellow club members to join us for an outstanding convention. --- ANNOUNCING The 61st Annual W9DXCC Convention & Banquet, Saturday, September 21, 2013, Holiday Inn - Elk Grove Village, Illinois.
Sponsored by the Northern Illinois DX Association.

Banquet Speaker: Joe Taylor K1JT
Master of Ceremonies: Jim O☐Connell W9WU
PRESENTATIONS:
T6MO Afghanistan Operations ☐ Eric Hall K9GY
Propagation Update ☐ Cycle 24 Predictions ☐ Carl Luetzelschwab K9LA
H44AJ DXpedition to Sikaiana Atoll ☐ Mike McGirr K9AJ
NH8S Swains and 3D2C Conway Reef ☐ Craig Thompson K9CT
Amsterdam Is Preparations FT5ZM ☐ Jerry Rosalius WB9Z
Flag Antennas - an Update ☐ Gary Breed K9AY
Is 3 dB Worth a Divorce? ☐ Glenn Johnson W0GJ
20 Years of VooDoo Radio ☐ Lee Finkel KY7M
Northern California DX Foundation Update
And much more ☐ See website for details

GRAND BANQUET AND PRIZES

DX University 2013 - Learn the details of successful DXing from: Carl
Luetzelschwab K9LA, Dave Patton NN1N, John Sweeny
K9EL, Paul DeFelice K9NU, Mike McGirr K9AJ, and
Jack Hudson W9MU
Friday, September 20th 9 AM☐5 PM

COME EARLY:
Register for the course 'DX University' from 10 am-5 pm Friday
Friday Welcome Pizza Reception and Registration 5pm Friday

FOLLOWED BY: Late Friday Hospitality Suite Hosted by Northern Illinois
DX Association

STAY LATE: Saturday Night Hospitality Suite Hosted by Greater Milwaukee
DX Association

For further convention information, contact Kermit Carlson, W9XA,
at: W9XA@...

For information about taking the course 'DX University,' contact
Jack Hudson, W9MU, at: jack@...

Details and Registration at: http://www.w9dxcc.com
Elk Grove Village Holiday Inn ☐ Special Room Rate Code: 'W9D' "

WEBINAR (2013 IARU Contest From ET3AA). Ken Claerbout, K4ZW, shares his
experience of operating the 2013 IARU Contest with students of the Addis
Ababa Institute of Technology from their club station ET3AA. Attendees
will see the history of ET3AA and preparation leading up to the contest.
This was the very first contest for many of the ET3AA students. See how
they did! As a bonus, Ken will share some secrets of breaking DX pile-ups
as learned from the DX side of things. Webinar date is Thursday, August
29th; Time - 9 PM EDT (Friday, August 30th - 01:00 UTC). The registration
link is: https://www2.gotomeeting.com/register/869327418

XP, GREENLAND. Henning, OU2I/OZ1BII, will once again be active as XP2I
from Kanger-lussuaq between November 21-24th. Activity will be CW only
on all HF bands. He will participate during the CQWW DX CW Contest
(November 23-24th) as a Single-Op/All-Band/Low-Power entry. QSL via
LoTW. For more details and updates, see: http://www.oz1bii.dk/index.htm

XZ, MYANMAR. On short notice this past week, Zorro, JH1AJT, was active
from Nay Pyi Taw, on a mission for the Foundation for Global Children
(FGC), and received operating permission on August 13th from the Ministry
of Communications and Information Technology (MCIT) which is good until
September 12th. However, by the time you read this Zorro will be QRT on
Saturday, August 17th. The good news is that Zorro will return in early
September and sometime in November. Activity will be limited to his spare
time. He uses a TS-590 and two GPs, for 20 and 17m (watch 14250, 18125
and 18145 kHz). QSL via JH1AJT: Zorro Miyazawa, P.O. Box 8, Oiso, Naka-gun,
Kanagawa 259-0111, JAPAN.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30819
SIDC SOLAR BULLETIN 19 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 19 Aug 2013 until 21 Aug 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 19 Aug 2013 10CM FLUX: 130 / AP: 006
PREDICTIONS FOR 20 Aug 2013 10CM FLUX: 130 / AP: 023
PREDICTIONS FOR 21 Aug 2013 10CM FLUX: 130 / AP: 012
COMMENT: The strongest solar event of the past 24 hours was a C1.9 flare originating
from NOAA AR 1817 at 9h22 UT. We expect solar activity to stay at eruptive
levels with chances for C class flares mainly from NOAA ARs 1817, 1818
and 1824 and a small risk for an isolated M class flare. An increase in
the solar wind speed is expected due to the effects of the recurrent
equatorial CH high-speed stream. Enhanced geomagnetic activity is possible
(unsettled to active) for the next two days, in relation to the CH and
the possible arrival of the CME of August 17.
TODAY'S ESTIMATED ISN : 091, BASED ON 16 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30820
SIDC SOLAR BULLETIN 20 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 20 Aug 2013 until 22 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Aug 2013 10CM FLUX: 128 / AP: 014
PREDICTIONS FOR 21 Aug 2013 10CM FLUX: 128 / AP: 020
PREDICTIONS FOR 22 Aug 2013 10CM FLUX: 132 / AP: 007
COMMENT: Flaring was eruptive featuring several C-class flares from NOAA active
regions 1818, 1819 and 1825. Two CMEs were observed in the past 24 hours.
The CME observed by LASCO/C2 on 19 August at 23h12 UT seems backsided and
is not geo-effective. The CME observed on 20 August at 8h12 UT is
associated to a large filament eruption. The CME travels with a speed of
600 km/s calculated based on STEREO data and goes mostly south of the
ecliptic plane. There is a chance that Earth will be affected by the
northern part of the CME structure, arriving late 23 August, possibly
resulting in active to minor storm conditions. Current geomagnetic
conditions are quiet to unsettled. Periods of enhanced geomagnetic activity
are possible (unsettled to active) for the next 48 hours, in relation to
the arrival of the equatorial coronal hole high speed stream and the CME of
August 17.
TODAY'S ESTIMATED ISN : 084, BASED ON 14 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30821
SIDC SOLAR BULLETIN 21 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 21 Aug 2013 until 23 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 Aug 2013 10CM FLUX: 135 / AP: 018
PREDICTIONS FOR 22 Aug 2013 10CM FLUX: 138 / AP: 008
PREDICTIONS FOR 23 Aug 2013 10CM FLUX: 138 / AP: 003
COMMENT: Solar activity was eruptive with a C2.2 flare as strongest flare
originating from NOAA AR 1828. A faint partial halo CME was observed in
LASCO/C2 around 5h00 UT which was confirmed by STEREO A and B data. It
seems to be associated to a small filament eruption located near S15E15,
observed in PROBA2/SWAP and GONG H-alpha data. The CME seems to be
travelling mainly to the east with a projected speed of 360 km/s. First
analysis suggests a possible arrival at 25 August at 9h UT, but this will
be further evaluated. We expect C-class flaring activity to continue. There
is a slight chance for M-class flares, especially from NOAA active regions
1820 and 1827 that currently have a beta-gamma configuration of their
photospheric magnetic field. ACE has observed a jump yesterday at 22h UT in
all the plasma parameters jump, but not the magnetic field. This seems to
be the arrival of the equatorial CH fast speed stream. Local K-index at
Dourbes currently is at K=3 and Kp went up to Kp=4, due to combined effects
of the fast speed stream and some influence of a flank of the CME of August
17, that possibly arrived at 2h this morning. Unsettled geomagnetic
conditions are expected to continue and return to quiet after 24 hours.
TODAY'S ESTIMATED ISN : 095, BASED ON 13 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30822
SIDC SOLAR BULLETIN 22 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 22 Aug 2013 until 24 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 22 Aug 2013 10CM FLUX: 125 / AP: 016
PREDICTIONS FOR 23 Aug 2013 10CM FLUX: 125 / AP: 006
PREDICTIONS FOR 24 Aug 2013 10CM FLUX: 128 / AP: 026
COMMENT: A C4.2 flare on 22 August at 5h00 UT was the strongest event of the past 24
hours. The flare originated from NOAA AR 1818, which is currently located
at the west limb. NOAA AR 1820 is the strongest candidate for further
C-class flaring, given it's magnetic complexity. There is a slight chance
for M-class flaring. No Earth directed CMEs were observed. Solar wind
speed as observed by ACE has evolved from about 460 km/s to 520 km/s with a
maximum of 580 km/s. The magnitude of the interplanetary magnetic field is
varying between 5 and 10 nT, with a fluctuating Bz component between -5 and
+5 nT. Current geomagnetic conditions are unsettled to active; with both K
at Dourbes and estimated NOAA Kp making excursions to K=4. Geomagnetic
activity is expected to return to quiet levels in the next few hours. A new
increase to active levels is predicted on 23 August in the afternoon due to
the arrival of the CME of 20 August. On 24 and 25 August we expect effects
of the CME of 21 August, combined with some minor influence of a fast speed
stream from two small coronal holes, one in the southern hemisphere that
just past the central meridian and another low latitude in the northern
hemisphere currently at a central position.
TODAY'S ESTIMATED ISN : 095, BASED ON 13 STATIONS.

SB DX ARL ARLD034
ARLD034 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

NEPAL, 9N. Satish, 9N1AA has been QRV on 20 meters around 0100z and 15 meters around 0730z. QSL via N4AA.

BAHRAIN, A9. David, A92IO is generally active on 30 meters between 0130 and 0300. He is also active on 80 to 4 meters, including 60 meters. QSL via operator's instructions.

JUAN FERNANDEZ ISLAND, CE0. Mario is QRV as CE0ZEL and is here for six months. Activity is as time permits. QSL via CE3RAC.

PALESTINE, E4. Peri, HB9IQB is QRV as E44PM from Bethlehem until August 31. Activity is on the HF bands and 6 meters. QSL to home call.

NIUE, E6. Adam, K7ST is QRV as E6ST. His length of stay is unknown. Activity is generally on 40, 20, 17 and 15 meters using SSB. QSL via EA5GL.

FRENCH POLYNESIA, FO. Jean-Marc, F5LCI is QRV as FO/F5LCI from Hao Atoll, Tuamotu Archipelago, IOTA OC-066, until November 8 while with the local military unit. He is active on 40 to 10 meters using QRP power on CW and JT65-JT9. QSL direct to home call.

GALAPAGOS ISLANDS, HC8. Geoff, G8OFQ is QRV as HC8/G8OFQ from Isabella Island, IOTA SA-004, until the end of September. Activity is on 40 to 10 meters generally during 2200 and 0600z and during the weekends. QSL to home call.

PERU, OA. Arno, DL1CW plans to be QRV as OA1/DL1CW near Tumbes from August 26 to September 2. Activity will be on the HF bands using

only CW. QSL to home call.

NETHERLANDS, PA. Special event station PF31CAVENTE will be QRV from August 27 to 30 from a holiday camp for kids in Vaassen. They will be active on 40, 20 and 10 meters using RTTY and PSK. QSL via PA7HPH.

BANGLADESH, S2. Rana, S21R is QRV from Dhaka and is here for one month. He is active on the HF bands. QSL via N4VA.

POLAND, SP. Special event station 3Z45MFFZG is QRV until August 31 during the 45th International Folklore Festival in Zakopane. QSL via SP9PTG.

DODECANESE, SV5. Hans, ON6ZK is QRV as SV5/ON6ZK/p from Kos, IOTA EU-001, until August 30 while on holiday. Activity is on 20 meters using CW and SSB. QSL to home call.

COTE d'IVOIRE, TU. Dimitri is QRV as TU5DF until October 31 and has been active on 15 meters using CW around 1330z. QSL via F5SWB.

INDONESIA, YB. Adhi, YB3MM will be QRV as YB3MM/p from Bawean Island, IOTA OC-197, on August 24 and 25, weather-permitting. Activity will be on 20 and 15 meters. QSL via IZ8CCW.

VENEZUELA, YV. A group of operators are QRV as YW5X from Orchila Island, IOTA SA-054, until August 26 to commemorate the 2013 Venezuelan Navy Day. QSL via DM4TI.

COUNTRY NAME CORRECTION. As listed in DX News ARLD033, the T40C operation in the ILLW from the Roncali Lighthouse, ILLW CU-0002, took place from Cuba, not Chile.

OPERATION APPROVED FOR DXCC CREDIT. The following operation has been approved for DXCC credit: Angola, D2CT, 2013 operation.

THIS WEEKEND ON THE RADIO. The Hawaii QSO Party, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC CW Sprint Ladder, SCC RTTY Championship, YO DX HF Contest, Kansas QSO Party, QRP ARCI Welcome to CW QRP, Ohio QSO Party, CVA DX SSB Contest and the SARL HF CW Contest are all on tap for this weekend. The SKCC CW Sprint and CWops Mini-CWT CW Test are scheduled for August 28. Please see August QST, page 73 and the ARRL and WA7BNM contest web sites for details.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30823
SIDC SOLAR BULLETIN 23 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 23 Aug 2013 until 25 Aug 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 23 Aug 2013 10CM FLUX: 130 / AP: 015
PREDICTIONS FOR 24 Aug 2013 10CM FLUX: 124 / AP: 017
PREDICTIONS FOR 25 Aug 2013 10CM FLUX: 120 / AP: 023
COMMENT: Several minor C-class flares were observed by GOES, mainly originating from
NOAA AR 1820 and 1828. A CME observed in LASCO/C2 on 22 August at 8h36
travels mainly southward and will likely miss the Earth. C-class flaring
is expected to continue for the next 24 hours. Solar wind speed as
observed by ACE is around 500 km/s. The magnitude of the interplanetary
magnetic field is near 5 nT, with a mainly negative Bz component. Current
geomagnetic conditions are unsettled. A new increase to active levels is
predicted later today due to the arrival of the CME of 20 August. On 24 and
25 August we expect active to minor storm levels (K possibly up to 5) due
to the arrival of the CME of 21 August, combined with some minor
influence of a coronal hole fast speed stream.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3B8 - Darren, G0TSM will be active holiday style as 3B8/G0TSM from Mauritius Island (AF-049) on 18-28 September. He hopes to operate SSB, CW and RTTY for 2-3 hours a day, running 100 watts into simple wire antennas on 40-10 metres and a 2-element quad on 6 metres. The log will be uploaded to LOTW and Club Log during the holiday. As for QSLling, please use the OQRS on Club Log for bureau or direct cards, and refrain from sending paper QSLs. Also requests for bureau cards can be made via email (daz[@]g0tsm.com). [TNX G0TSM]
3B9 - Verona DX Team's members Lucio I3LDP, Walter I3VJW, Alex IK5MIC, Rony IZ3KIF and Ilario IZ3STA will be active as 3B9EME from Rodrigues Island (AF-017) on 2-13 September. They will operate CW, SSB and digital modes on 160-6 metres with two stations, as well as EME on 50, 144 e 432 MHz. QSL via I3LDP. Further information at http://www.ari.verona.it/veronadxteam/3b9_2013.htm.
9A - Jan, PA4JJ will be active holiday style as 9A/PA4JJ from Porec (Croatian mainland) from 26 August to 4 September. Expect him to operate mainly digital modes. QSL via home call (OQRS on www.pa4jj.nl (http://www.pa4jj.nl)). [TNX PA4JJ]
9M2 - The Malaysian Special Expedition Team (http://9m2se.blogspot.com) will be active again as 9M2SE from Indah Island (AS-074) on 31 August until 9 UTC on 1 September. The activity is in celebration of the 56th anniversary of Malaysia's indipendence. They will operate CW and SSB on 40-10 metres, running 100 watts into a vertical and a tribander yagi. QSL details on qrz.com [TNX 9M2PJU]
BY - CAMSAT (AMSAT China) will hold "a big DX party" from the outskirts of the city of Dunhuang in northwestern China (Zone 23, WWL NM79aw) on 19-28 October. Alan, BA1DU and a very large group of operators coming from all over the country will be active with four well equipped stations: one for 2 and 6 metres, one for 70 centimetres and two for 160-10 metres. Meteor Scatter and EME activity will be emphasized (this will include participation in the ARRL EME Contest), as well activity on the low bands. Special callsign BJ9TA will be used for operating above 50 MHz and on the low bands, while BY9GA/9 will be used for the other bands and for participation in the CQ WW SSB Contest. QSL via BA1DU. [TNX BA1DU]

EA - Manolo, EA5HJY will be active on SSB and digital modes as EG5VCE during the 68th Vuelta Ciclista a Espana, the long distance road bicycle race (Tour of Spain) to be held from 24 August to 15 September. QSL via bureau to EA7HBC.
EA - Gabriel, EA3AKA and Manel, EA3EGB will be active as EF3EGB from the Medas Islands (EU-078) from 30 August to 2 Septmber. They plan to operate SSB, CW and RTTY on the HF bands and 6 metres with two stations. QSL via EA3EGB. [TNX rsgbiota.org]
FO - Jean-Marc, F5LCI is working on Hao Atoll (OC-066), French Polynesia until 8 November. He operates QRP as FO/F5LCI on 40-10 CW and JT65-JT9. QSL direct to home call. [TNX The Daily DX]
GW - Derek, G3KHZ and Steve, G4EDG operated from St Tudwal's West Island (EU-106) back in May 2006. Since then the owner of this private island has not allowed anyone to visit. "We are pleased to announce that the two of us have been given special permission to make a repeat trip", Derek says. "Dates are not finalised yet but we will probably be QRV for 3 or 4 days commencing around 6 September". Expect GW3KHZ/p to be a CW only operation. QSL via G3KHZ. [TNX G3KHZ]
HC - Mauro, IZ1DPS is active as HC/IZ1DPS from Ecuador until January 2014. So far he has been QRV on 20, 17 and 15 metres CW. QSL via IK2DUW.
HC8 - Geoff, G8OFQ is active as HC8/G8OFQ from the Galapagos Islands (SA-004) until the end of September. He operates SSB only on 40-10 metres, "between 22.00 and 06.00 UTC during the week and long during the weekends". QSL via home call. [TNX The Daily DX]
I - The Calabria DX Team will be active as II8LH from the lighthouses at Capo Spartivento on 24 August and at Capo Trionto on the 25th. QSL via HB9FHZ (bureau) or IK8YFU (direct), LoTW and eQSL.
J3 - JA1MZL (AE6AU), JH1ROJ (KG8XV), JJ1LIB (N1GO), JN1RVS (K6NAO) and JN3NFQ (K1GI) will be active from Grenada on 21-29 November. They plan to operate CW, SSB and digital modes on 160-10 metres, and to participate in the CQ WW CW Contest. "We are negotiating with NTRC to obtain the special event call sign for our operation", Isao JH1ROJ says. A dedicated website is under construction. QSL via JA1HGY (OQRS to be activated on Club Log) and LoTW. [TNX JH1ROJ]
JY - Jovica, E78A (ex 6W1SJ, 9K2/T94FC, ST0RM, ST2A, T94FC, T98A, TT8JT) is now active as JY9FC from Amman, Jordan. He operates mainly CW with sine SSB and digital modes during his spare time. QSL via E73Y, direct or bureau (OQRS to be activated on Club Log). [TNX E73Y]
PA - Fred, PA1FJ will be active as SV8/PA1FJ/p from Chios Island (EU-049) from 29 August to 9 September. He will operate QRP on 40-6 metres SSB and CW. QSL via bureau to home call. [TNX rsgbiota.org]
PA - Look for Marcel, PD5MVH to be active on the HF bands as PD5MVH/p from Schiermonnikoog Island (EU-038) from 31 August and 14 September. QSL via home call, bureau or direct. [TNX VA3RJ]
VE - Bodo, DF8DX will be active as VE7/DF8DX from Bowen Island (NA-091) on 25-26 August. He will operate CW only. QSL via DF8DX. [TNX

rsgbiota.org]
W - Bodo, DF8DX will be active as KT3Q/7 from Vashon Island (NA-065) on 24 August. He will operate CW only, loof for him around 14040 kHz. QSL via DF8DX. [TNX rsgbiota.org]
YB - Reportedly Kadek, YB9BU might be active as YB9BU/8, along with YB8RW/p and YC8TM/p, from Gangga Island (OC-236) between 30 August and 2 September.
YB - The schedule for a few forthcoming IOTA operations from Indonesia looks a bit fluid.
* On 17 August JN6RZM reported that after the operations from IOTA groups OC-122 (YE5T, 28 August - 1 September) and OC-109 (YE5S, 4-8 September) [425DXN 1162], YB5NOF had plans to be active from Anambas Island (OC-108) around mid-September.
* On 20 August Imam, YB4IR reported on qrz.com that he and a team from ORARI will be active as YE5R from Anambas Island (OC-108) on 15-20 September.
* On 23 August YB5NOF told JN6RZM that, owing to transportation issues, the new itineary should be OC-122, then OC-108 followed by OC-109.
Keep an eye on JN6RZM's blog (http://jn6rzm.cocolog-nifty.com/) and on the DX cluster!
YB - Look for YF1AR/9, YB0AI/9 and YB3MM/9 to be active from Kimaam Island (aka Pulau Yos Sudarso, Pulau Dolok, Pulau Dolak, Kolepom Island and Frederik Hendrik Island), claimed to qualify for the Irian Jaya's Coastal Islands South group (OC-275, new one for IOTA) on 10-16 September. They will operate SSB, CW and digital modes on 40-10 metres, with two stations running 100 watts and one station running 1 kW. QSL YF1AR/9 via N2OO, QSL YB0AI/9 via home call (direct), QSL YB3MM/9 see qrz.com. Further information at www.yf1ar.com (http://www.yf1ar.com) [TNX YF1AR]

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5C0CE ---> The 20-21 August 5C0CE activity [425DXN 1161] has been blocked at the last minute by Moroccan authorities, F6FQK reports. The reason is unknown. This was expected to be an operation organized by the Council of Europe Radio Amateur Club in partnership with the Association Royale des Radio-Amateurs du Maroc.

9M6DXX GOING QRT ---> "After more than eight years in Malaysia, my wife Eva, 9M6EVA, and I have decided to move on to another part of the world. We leave Malaysia on 1 November, therefore 9M6DXX will go QRT some time in October. 9M8Z has already closed down; the last QSO from that station was made in the RSGB IOTA Contest in July. We will be moving to Bonaire and we hope to be active with PJ4 callsigns before the end of the year". [TNX 9M6DXX/G4JVG]

CLUB LOG OQRS SURVEY ---> The results from the survey about bureau cards and online QSL requests [425DXN 1159] are now available on G7VJR's website at http://g7vjr.org/2013/08/club-log-oqrs-survey-results/

DXCC NEWS ---> D2CT (Angola, 2013 operation) has been approved for DXCC credit. [TNX NC1L]

DXPEDITION OF THE YEAR POLL ---> The Clipperton DX Club's "DXpedition of the Year" poll for 2012-13 is now open until 8 September at http://wp.cdxc.org/. The operations selected for the poll are those supported by the Club and with at least one CDXC member in the team. [TNX F5CWU]

TX5K ---> "The QSL manager has informed me that the goal date for TX5K LoTW upload is 1 October". [TNX KY6R]

VK5CE/P ---> Craig, VK5CE has posted a day by day account and a few pictures of his recent activity as VK5CE/p from Flinders Island (OC-261) on his blog (http://oc261.blogspot.com.au/). QSL via home call, direct or bureau.

XZ1Z ---> The logsearch and OQRS for the 13-16 August operation from Myanmar are now available on Club Log. 2313 QSOs were made on 20m (1356) and 17 (957) metres SSB.

ZCZC AP34
QST de W1AW
Propagation Forecast Bulletin 34 ARLP034
>From Tad Cook, K7RA
Seattle, WA August 23, 2013
To all radio amateurs

SB PROP ARL ARLP034
ARLP034 Propagation de K7RA

Solar activity picked up this week, with average daily sunspot numbers for August 15-21 up nearly 42 points (forty-nine percent) to 126.9, when compared to the previous seven days. Likewise, average daily solar flux increased from 111.7 to 126.3.

The latest prediction from USAF/NOAA has solar flux at 130, 125, 120, and 115 on August 23-26, 110 on August 27-29, 105 on August 30, 95 on August 31 through September 1, 100 on September 2, 105 on September 3-4, 110 on September 5-8, 115 on September 9-11, 120 on September 12-13, and 125 on September 14-16. It then drops below 100 to 95 again on September 27-28.

Predicted planetary A index is 15, 25, 20, 12, and 8 on August 23-27, 5 on August 28-30, then 12, 15 and 10 on August 31 through September 2, 5 on September 3-9, then 10, 15 and 18 on September 10-12, 8 on September 13-14, then 5, 15, 22, 12 and 8 on September 15-19 and 5 on September 20-26.

OK1HH predicts in his geomagnetic activity forecast that August 23-24 will be active to disturbed, quiet to active conditions on August 25, quiet to unsettled August 26, mostly quiet August 27-29, quiet August 30, active to disturbed August 31 and September 1, quiet to unsettled September 2, quiet September 3-5, mostly quiet September 6-7, quiet September 8-9, quiet to active September 10-11, active to disturbed September 12-13, quiet September 14, mostly quiet September 15, quiet September 16, quiet to active September 17 and active to disturbed September 18.

On Saturday, August 17, 2013 the Penticton observatory recorded solar flux values of 123.2, 149.7 and 129 at 1700, 2000 and 2300 UTC. The local noon value at 2000 UTC is always reported as the official flux value for the day, but NOAA reported it as 125 instead of 149.7. They do this when the noon number appears to be an outlier caused by overload of the 2.8 GHz receiver used to produce

these numbers. I suspect the overload was caused by a significant and long duration M3 class solar flare, erupting from sunspot 1818 at 1824 UTC.

The NOAA estimate is produced by selecting a number somewhere between the morning and afternoon readings.

A look at the weekly Preliminary Report and Forecast for August 5, 2013 (see http://www.swpc.noaa.gov/weekly/pdf/prf1979.pdf) shows the most recent prediction for smoothed sunspot numbers peaking in January and February 2014.

The Arizona Daily Star ran an interview with Matt Penn, the astronomer who predicted the possible disappearance of future sunspots based on weakening solar magnetic fields. Read it at http://azstarnet.com/news/science/don-t-flip-out-about-the-sun/article_ce93e4cf-0178-51bf-882e-fee8e5e8de91.html.

David Dary, W5ZAX of Norman, Oklahoma sent in an interesting article about a different method for tracking the complexity of the solar magnetic field. It posits that the sun may be more active than it appears. Read it at http://www.universetoday.com/104023/is-the-sun-more-active-than-it-looks-an-innovative-method-to-characterize-the-solar-cycle/.

Note they give a link to the original journal article. You may be able to access the article in the Astrophysical Journal online for free via an account at your local public library.

Roland Anders, K3RA of Elkridge, Maryland reports on August 19: "15 meters continues to be fantastic into Indonesia from 8 am until past 1 pm EDST. Besides the many strong YB stations, in the past several days during the 1300 to 1745Z time period on 15 I've worked JA, BY, BV, 9M2, 9M4, V8, 9V, HS, 4S, VU, and UN. And the EU signals are crushingly loud! But when 15 is that good to EU, it is a clue to try 12 meters. I've found 12 open in the morning hours several times in the last week. Today, I called CQ on 12 (dead band) and worked 2 IT9 stations at 12:45Z. After some more CQs with no answers, I returned to 15. I'm sure 12 was open to EU from time to time during the morning -- maybe all morning, but I didn't get back to 12 until 1612Z."

"For the next hour I worked DX over a wide area: Starting with a walloping signal from CU8AS, I then worked stations as far North as TF and east to SV and HZ. But the biggest surprise was at 1644 when I worked YB0NFL S9 over the North Pole. Arif worked a lot of EU and NA DX over the half hour or so--that's 12 meters at midnight Jakarta time! And, there were a couple of EU stations heard on 10 meters when 12 was open. So, it seems like we're getting into fall conditions on 12 and 10 meters. This much maligned sunspot cycle has a lot to offer!"

Later he wrote: "Went back to 12 meters at 2100Z, and the band was wide open to EU. Some stations VERY loud. Then, at 2130Z I heard JAs answering an LU CQ, so I call CQ with beam to JA and worked seven JAs, several very strong. Viva 12!"

Laurence, GJ3RAX from the Isle of Jersey sent this in: "I have been following the discussions on this solar cycle and the question of whether there will be a second peak. Looking at the graphs of the previous ones I interpret them as all having a second peak even if it is not as well defined as in the more recent 2 cycles. Obviously the graphs do show that the second peak is normally weaker than the first one. The shape of the present one looks as if that trend is going to be followed although it is often dangerous to make such assumptions."

"You have probably seen the same predictions that I have suggesting that Cycle 25 will be even weaker and some think it could be virtually flat. Looking at the historical information it does seem to do that about every 100 years."

"The conditions on the HF bands have been so poor with my rather minimal antenna system that I have not been able to resume skeds with my friends in the USA and Canada. Those used to be mainly on 17 meters. Instead we have been catching up in person when some of my friends have come over here to visit me! That is partly why I have now gone back on the VHF and UHF bands instead."

"From what I can recollect of the recent cycles I think that the best conditions each time on the 6 meter band have been during the second peak rather than during the first one. This year I have been using a rather low gain log periodic antenna covering 50 MHz to 1,300 MHz. Photos are on my QRZ.com entry. I have had QSOs with 39 countries on 6 meters so far this year and all were on SSB. I keep thinking I should learn Morse or try some of the digital modes. Most of those have been within Europe and North Africa (EA8, EA9 and CT3). On the second of this month I was on during the only transatlantic opening I have caught this year. I worked VE1YX and five in the USA. My radio on 6 meters is the IC-756 Pro 2."

"A few weeks ago I got back on the 4 meter band after an absence of about 30 years. There are now many more countries on the band than when I was first on. My score this year is now 11 countries although I could have got a lot more if I had been on earlier in the Sporadic E season. I am using a Spectrum transverter, with 20 watts out, driven by an FT-817."

"On 2 meters I have had 9 countries, 70 cms 7 countries and 23 cms 5 countries this year all using an IC-910X. Last year I was able to work into Germany on all three of those bands during November when I had just got back on those bands. I have worked Germany this year on 2 meters. I am hoping to be able to get more on the list when the Tropo season starts which is usually in October."

"Earlier this year I joined the Yahoo group for the microwave bands, http://groups.yahoo.com/group/ukmicrowaves/ . That one is very interesting but I later realized that I could not find a suitable one for the lower VHF and UHF bands so I recently started one - http://groups.yahoo.com/group/VHFandUHF/ . That group now has 69 members and seems to be growing nicely. We already have 3 members in the USA so maybe we will get more from your part of the world soon."

Thanks, Laurence! Many readers may be unfamiliar with the 4 meter amateur band at 70 MHz, which is used in Europe but not North America. Some links to information on 4 meters: http://en.wikipedia.org/wiki/4-meter_band, http://www.70mhz.org/, and http://g1efu.webs.com/4meters.htm.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for August 15 through 21 were 129, 104, 96, 134, 161, 115, and 149, with a mean of 126.9. 10.7 cm flux was 122.7, 119.9, 125, 126.1, 128.3, 131.5, and 130.4, with a mean of 126.3. Estimated planetary A indices were 15, 23, 7, 6, 5, 5, and 18, with a mean of 11.3. Estimated mid-latitude A indices were 15, 27, 9, 8, 6, 5, and 13, with a mean of 11.9.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30824
SIDC SOLAR BULLETIN 24 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 24 Aug 2013 until 26 Aug 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 24 Aug 2013 10CM FLUX: 118 / AP: 024
PREDICTIONS FOR 25 Aug 2013 10CM FLUX: 120 / AP: 028
PREDICTIONS FOR 26 Aug 2013 10CM FLUX: 122 / AP: 006
COMMENT: Solar activity was very low, featuring only 2 C-class flares (C1.0 and
C1.4), with a source region near NOAA AR 1830. All active regions were
quite stable. Solar activity is expected to be low, with a slight chance
for C-class flares. No Earth directed CMEs were observed. ACE observed a
small shock in the solar wind data at 00h00 UT this night, indicating the
arrival of a CME, possibly that of 20 or 21 August. Solar wind speed
currently is around 500 km/s. The magnitude of the interplanetary magnetic
field had a maximum of 9 nT, with a Bz component fluctuating between +5 and
-5 nT. Current geomagnetic conditions are unsettled. We expect unsettled
to minor storm levels for the next 48 hours, related to the CME arrival,
possibly combined with some minor influence of a coronal hole fast speed
stream.

21521. PJ2/GI0RTN

Yahoo group: DX-IS (2013)
Date: 2013-08-25 00:15:09 UTC
From: Alek Petkovic
Topic: 21521 Message: 21521

Ok experts, I'm lookin' for clues here.

I worked PJ2/GI0RTN on CW in November, 2007, for what is now a deleted country. Although it is deleted, I would still like to get it confirmed.

I looked up all the usual sites, including qrz.com for his qsl info. It all seems to agree but the trouble is, he is no longer at the listed address. My letter with enclosed card, envelope and greenstamps came back to me, unopened. Also, there is no reply from any of the email addresses I could find for the man.

Anybody got any clues?

73, Alek

Looks like he's active on Twitter and FaceBook:

https://twitter.com/gerrylynch
https://www.facebook.com/gi0rtn

Ask him there, if you can? Another possibility is his parents' address - see:

http://www.qrz.com/db/?callsign=g0rtn

since it appears he's currently living in Salisbury, England.

73,

~iain / N6ML

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4VA, KH6BZF, N7QT, WX7E, K8GI, K8YSE, W8GEX & 60m News, K9EL, W9ILY, W0GXA, 9M2PJU, 9M6DXX, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, E73Y, F5NQL, F6AJA & Les Nouvelles DX, F6FQK, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RN1CW, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 18th-August, through Sunday, 25th-August there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5H, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PY0F, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP6, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. A few sources report that Darren, G0TSM, will be active as 3B8/G0TSM from between September 18-28th. Darren will be there on holiday, so activity will be limited to 2-3 hours per day on 40-6 meters using CW, SSB and RTTY. His equipment is an IC-7000 with wire antennas

for 40-10m and a 2 element Quad on 6m. Participation in the CQWW DX RTTY Contest (September 28-29th) will be very limited due to his return flight time. Darren states [edited], "Please do not send me any paper QSL cards, either direct or via the Bureau. Please use the OQRS feature on ClubLog to request Bureau or direct cards. Also, requests for Bureau QSL cards can be made via E-mail. The log will be uploaded to LoTW and ClubLog during the holiday."

5C0, MOROCCO (Special Event Cancelled). The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) was expected to team up with the "Association Royale des Radio Amateur du Maroc" (ARRAM) to activate the special callsign 5C0CE between August 20-21st, but the operation was cancelled by the ARRAM's President 16 hours before the CERAC team was to leave for Morocco. Francis, F6FQK, one of CERAC's Administrative Personal, informs OPDX that they received the Moroccan licence many months ago and the Radio Amateurs from Morocco have been preparing for this operation since last year with a lot of enthusiasm. There has been no direct details and/or motive received on behalf of the ARRAM's President about any problem. Francis believes that this incident is very damaging to the ham radio community. Also, the members of the CERAC team, who were expected to participate in the event, personally funded this expedition (train, fly etc), and now it's too late to recover their paid expenses.

9M6DXX & 9M8Z GOING QRT. Steve, 9M6DXX, informs OPDX: "After more than eight years in Malaysia, my wife Eva, 9M6EVA, and I have decided to move on to another part of the world. We leave Malaysia on November 1st; therefore, 9M6DXX will go QRT some time in October. 9M8Z has already closed down; the last QSO from that station was made in the RSGB IOTA Contest in July. We will be moving to Bonaire, and we hope to be active with PJ4 callsigns before the end of the year. Thanks for all the QSOs from 9M6DXX and 9M8Z (also 9M6DXX/P, 9M8Z/P, XU7DXX, V8FEO, V85/9M8Z, FK/G4JVG, T32MI / CI / VI / SI, 4W6A, GD4JVG and 9M4SLL) since 2005. It's been fun! 73, Steve, 9M6DXX"

AFRICAN TOUR. Nick, G3RWF, has announced that he will once again be active as 5X1NH from the University of the Mountains of the Moon (MMU) in Fort Portal, Western Uganda and (occasionally) the capital, Kampala, between September 24th and November 16th. He is expected to join/meet with Alan, G3XAQ/5X1XA, later and both operators will travel to Rwanda to be active as 9X0NH between November 19-29th. The duo plan to participate in the CQ WW DX CW Contest (November 23-24th) from Rwanda. QSL 5X1NH and 9X0NH via G3RWF. QSL 5X1XA via G3SWH.

BY, CHINA. The "425 DX NEWS" reports that CAMSAT (AMSAT China) will hold "a big DX party" from the outskirts of the city of Dunhuang in northwestern China (Zone 23, WW Loc. NM79aw) between October 19-28th. Alan, BA1DU, and a very large group of operators coming from all over the country will be active with four well equipped stations: one for 2 and 6 meters, one for 70 centimeters and two for 160-10 meters.
